A special meeting of the stockholders of this corporation was held in Boston on the 30th ult., to take into consideration the propriety of authorizing the purchase of the Mill Pond wharf estate, on Lowell and Minot streets, adjoining the freight station in Boston, in conjunction with the Nashua and Lowell Railroad Co., and to issue bonds in payment therefor. Wm. Minot, Jr., the clerk, stated in regard to the business before the meeting that, inasmuch as the depot arrangements of the company, were now, and certainly would be in the future, quite inadequate to the local and prospective through business of the road, and the property referred to being in the market, it was thought best to purchase the same in conjunction with the Nashua and Lowell Railroad corporation, the price to be $300,000. He therefore offered a vote for the consideration of the stockholders, authorizing the Directors to purchase said property for a sum not exceeding $300,000 69 per cent. of the purchase money to be paid by the Boston and Lowell, and 31 per cent. by the Nashua and Lowell corporations, that being the proportion in which the property of the two roads is jointly owned; the vote also empowering the Treasurer to issue bonds to the amount of $200,000, payable in fifteen years, to bear the rate of six per cent. interest. Mr. Minot also stated that there was a vote of the corporation on record authorizing the issue of bonds to the amount of $60,000 as yet unexecuted, and which would not be necessary, and moved a vote that all prior authority to issue bonds be rescinded. Both votes passed unanimously and the meeting dissolved.

Economy of Fuel and Incrustation.

As this is a subject of import to all, we give peculiar stress and attention to it at this particular time when fuel and iron are so high. It is well known that the least quantity of incrustation, or scale adhering to the metal retards the transmission of heat, or in other words, it takes from 10 to 50 per cent. more fuel to penetrate the scale, (according to its thickness,) which is not only a dead loss but a serious injury to the iron, because it overheats or burns it up and involves immense amounts in repairs, in the way of new flue sheets and tubes, besides the loss of the services of the engine. We therefore, again urge upon our superintendents of railroads to study this matter carefully, and see if there is not some means of avoiding this heavy repair account. We are credibly informed that boilers on some of the roads running into Boston and using good water are not cleaned, or flues removed, or repaired in any manner in 7 to 10 years. While in other localities using bad water, which is anywhere West, our railway managers and master mechanics would be glad to avoid cleaning once a week or month, or resetting their flues once a year. It therefore stands to reason if boilers could be kept free from scale they would last years longer without repairs and save vast amounts in fuel, and add to the mileage of their engines.

We now propose to note a means of effecting these desired results. Mr. H. N. Winans of this city, has invented and had in successful operation for 8 years past, a chemical preparation for preventing the deposit of lime or incrustation, it keeps the iron entirely free from the scale, hence saves fuel, repairs, and the time lost in cleaning or repairing; we have the authority of our best mechanics, of its efficiency and non-injurious effects on the boilers. We cannot well say more, and insist, if economy is really intended that this is one of the first and most certain directions to try it on. We urge this matter, knowing with certainty of its effect, also as being a duty to the railroad community as well as a tribute due the inventor who has spent so much patient time in bringing the needed remedy before the public and railroad managers. We know no better evidence of its utility, than that some railroads have used it constantly for 8 years, and would not willingly be without it—the cost is less than 100, about one dollar a week, and the saving about $500 a year.

☞ An excursion train left Philadelphia on the 4th inst., for Erie City *via* the Pennsylvania, the Northern Central, and the Philadelphia and Erie Railroads. Regular trains will commence running on the 17th inst. The distance by way of Harrisburg and Sunbury is 448 miles. The completion of the Erie road will open a wide track of country to trade; and the oil trade particularly will find increased facilities over this route to the seaboard.

Mode of Estimating Damages where Land is taken for use of a Railway.

The late case of Harvey against the Lackawanna and Bloomsburg Railroad Company was on error to the Common Pleas of Luzerne County, Pennsylvania. The facts appear in the opinion of the Supreme Court of that State, which opinion was delivered by READ, J., and is as follows:

The plaintiff is the owner of a very valuable tract of land of about three hundred and fifty acres, of which two hundred and fifty-five acres one hundred and fifty perches are coal land, having three veins, described respectively as the three feet, the twenty feet and the twenty-two and a half feet vein, and it was estimated to contain ten millions of tons of anthracite coal. It is situated at the lower end of the Wyoming Valley, just above the Nanticoke dam, which was completed about 1838, and the towing path was extended up the pool to a point near this property. Subsequently the canal was extended to the New York State line, opening up the coal region of the Wyoming Valley. The Lackawanna and Bloomsburg Railroad Company, incorporated in 1852, was completed in 1857, extending from Northumberland to Scranton, traversing the limestone and ore regions of Montour and Columbia Counties, and running through the Wyoming coal field for its entire distance. It passed, from necessity, through Mr. Harvey's land, between the river and the mountain, which is very precipitous.

The present controversy arises out of the alleged damage occasioned to his land by the construction of this railroad. The canal was extended to the upper coal region, without any complaint on the part of Mr. Harvey, although to a certain extent it might be supposed to interfere with the monopoly of the canal navigation practically possessed by him before the extension was effected. But it seems now to be claimed as a ground of damages against the railroad company that it has brought other owners of coal property into competition. The continuation and extension of railroad facilities is a positive benefit, for it creates a large and steady market for the article in which he deals, and he still possesses both by land and water the actual advantages of a shorter transportation, and of course of a diminished expenditure upon the product of his land. Besides, the continuation of a railroad beyond your door can never be claimed as an item of damage in passing through your property.

The rule for estimating damages was distinctly laid down by Judge Gibson, forty-three years ago, in the Schuylkill Navigation Company *vs.* Thobrun (7 S. & R., 442,) in this emphatic language: "The jury are to consider the matter just as if they were called on to value the injury at the moment when compensation could first be demanded, they are to value the injury to the property without reference to the person of the owner, or the actual state of his business, and in doing that the only safe rule is, to inquire what would the property, unaffected by the obstruction, have sold for at the time the injury was committed? What would it have sold for as affected by the injury? The difference is the true measure of compensation." The rule was laid down again in the same words by Judge Rodgers, in the Schuylkill Navigation Company *vs.* Farr (4 W. & Sergeant, 375,) twenty years afterwards, accompanied with strong cautions against allowing it to be infringed upon by introducing irrelevant matters, not to ascertain but to enhance the price of the property beyond its actual value. In the matter of Furman street (17 Wendell, 649,) Mr. Justice Bronson has made some very striking observations which bear on the case under consideration. An individual, by the opening of the street in the rear of his lot, had it cut down about forty-five feet, and he estimated his damages by the cost of a wall necessary to support the soil of his ground at the same height as before, he using it as an ornamental garden attached to his dwelling.

"In a case like this," says the learned judge, "the proper mode of adjusting the question of damages is, to inquire what is the present value of the land, and what will it be worth when the contemplated work is completed. In deciding these questions, neither the purpose to which the property is now applied, nor the intention of the owner in relation to its future enjoyment, can be matters of much importance. In both cases the proper inquiry is, what is the value of the property for the most advantageous uses to which it may be applied? If a man suffer his land to lie open and unimproved, that will not authorize the commissioners to say it is worthless. They must award what the land would be worth in the hands of another who would cultivate or improve it; that is its value to the owner, because he can procure that sum of money for it; and in estimating the probable influence of any public improvement upon the value of land, the commissioner should not regard so much the intention of the owner in relation to the future use, as they should the purpose to which the property may be applied in the hands of one who is disposed to make it yield the greatest income. What price will it bring in the market? That is the proper inquiry in a proceeding of this kind. As between individuals, the owner may demand any price however exorbitant for his property, but when it is taken for public purposes he can only demand its real value. That value cannot depend in any degree on his own will." "The appellant is no doubt averse to a change in the use of his grounds on Furman street, from horticultultural to commercial purposes, and he prefers to retain instead of parting with his property; but these considerations can have no just influence, as between him and the public. There can be no other practical guide for the Commissioners than the intrinsic value of the land, and that value depends on the uses to which it may be applied, or the price which it will bring in the market. The appellant may build a wall and continue the enjoyment of his garden, but upon no legal principle can he charge the expense to the public, if, by adopting another course, he might avoid the necessity of incurring it. If, in truth, this lot will be more valuable after the street is opened than it is at present, what might be the effect of adopting the rule insisted on by the appellant? After receiving four or five thousand dollars to pay the expense of erecting a wall he may change his purpose, and either apply his land to commercial uses or sell it to some one else who will do so."

This mode of estimating the damages of Mr. Harvey has been distinctly stated by the Court, and all other instructions are in fact simply subsidiary to this view.

The first eight assignments of error are to the rejection of evidence which if admitted could not in any manner have affected the question of the value of the land either before or after its taking by the company. There is no error in the instruction objected to in the 9th assignment of error, nor in the subsequent nine assignments, which principally proceed upon a wrong apprehension of the law of the case. A State road was laid out through Mr. Harvey's land and for his own convenience he carried from his mine five iron tramways diagonally across this road to the canal bank or pool, down which his cars loaded with coal descended by their own gravity. The railroad company occupied this public highway with their railway, took up the five tramways, and gave Mr. Harvey two crossings in place of them. For this alleged injury is his real claim for damages. His being the owner of the soil does not give him any more right over the highway, or the passage along or over it than any other individual.

The answer to this is, that these tramways were nuisances, illegally placed there by the plaintiff, and were therefore properly removed. An act by which a public highway is in a perceptible manner obstructed is a nuisance. In The King *vs.* Morris (Barn. & Adol. 441), it was held that a railroad from a colliery to a seaport town laid upon a turnpike road was a nuisance; and the same doctrine was held in Reg. *vs.* Train and others (8 Jurist, 1151), where a tramway was laid on a public highway and used for the transportation of passengers in cars. In the last case, Crompton, Justice, said, "He contends that it is a question for the jury, whether what was done was not a reasonable and convenient arrangement of the highway for the convenience of the public generally, using that highway, and for the accommodation of the traffic passing over it. He is thus, it seems to me, driven, in order to avoid any conflict with the class of cases to which I have referred, to confine his proposition to cases where the arrangement is for the benefit of the public using the highway and for the accommodation of the traffic passing over it. Now, it appears to me that, admitting the proposition to be true, his case is not brought within its terms, inasmuch as this is clearly not a dealing with or any alteration of the highway in an ordinary manner, such as the construction of a footpath, a paved crossing, or the like. Cases might be put, where even such a dealing with a highway, however necessary and advantageous to a portion of the public, would be so complete an obstruction to the remainder of the highway as to amount to a nuisance; but admitting, as I have already said, the position to be true, it appears to me that the present case is not brought within it, inasmuch as being so far from an ordinary use of the highway, what is here complained of amounts to an actual withdrawal of a portion of it from its proper legitimate purposes. I think, therefore, that the principle laid down in Reg. *vs.* The Longton Gas Company (6 Jur. N. S. 601) applies, and that the legal carrying over of such a scheme as the present can only be effected by act of Parliament." And this undoubtedly is the law of Pennsylvania. In the next case of Reg. *vs.* The United Kingdom Electric Telegraph Company, (id. 1153,) the same Court held that the post of a telegraph erected on a highway and placed there without lawful authority, is an unlawful act, and amounts to a nuisance at common law.

It is clear, therefore, that the placing of these five diagonal tramways across the State road was an unlawful act, and amounted to a nuisance, which the defendants were entirely justified in abating, and that therefore no damages can be claimed by the plaintiff, and this virtually disposes of these assignments of error.

There is nothing in the 19th assignment of error for the finding of the jury of the different portions of the damages, closing with a gross result, was strictly legal, and enabled the Court to judge definitely of its correctness.

Judgment affirmed.

Brightening Prospects of the Republic.

Unless the signs of the times are wonderfully delusive, the end of the rebellion is not far distant. Turn which way we will, everything looks bright and promising for the Federal cause—the cause of Union and peace—to be followed by a return of general prosperity throughout the whole length and breadth of the land. The long night of darkness which brooded over the destinies of the Republic, until some of the most hopeful became despondent, appears to be breaking away at last, and that day is apparently dawning which will light the Nation onward in the path of greatness and prosperity, such as the most sanguine hardly dared to anticipate amidst the doubts and fears which have hung over the future, during the past four years.

The best evidences that the rebellion is tottering to its fall, are probably afforded by the downward course of gold, since the late important successes of the Union arms, and the gratifying response to the new loan lately offered for general competition, thus indicating an abiding confidence among the people in the stability of the Government. Despite the desperate efforts of speculators to sustain the price of gold, there is a growing conviction that the capricious commodity is nominally at a higher quotation at present than it will ever again be, except perhaps by temporary fluctuation, and it is this conviction that is bringing to light from hidden recesses increasing amounts, by hoarders, day by day. As a matter of course the fall of gold has carried with it some relaxation of commercial values, though the reduction of the latter has not, thus far, been commensurate with that of the former. The probability is that the fall of general commercial values will not keep pace with the decline of gold, from the fact that, in the event of an early peace, a ready market is confidently expected for many descriptions of merchandise and produce now on hand, especially the necessaries of life, and at prices considerably above the normal standard, as many sections of the country are known to be bare of supplies.

With the decline in gold, too, comes increasing confidence in the financial situation. Whatever opinion may be entertained, of the particular measures of the Treasury Department, we are of those who believe that a specie basis could not have been maintained during this war, further than it now is, viz., to pay the interest on the public debt in gold, with the intention, as we certainly have the ability, to retire the principal, in due time, in coin. Judging from the rapid progress and determination of the American people in the past, and in view of the vast resources and wonderful fertility of our soil, it is by no means improbable that, with the Union preserved, our financial burdens will have disappeared in a single generation. Certainly no nation in the world has the recuperative power of our own, nor as many indisputable inducements to preserve its nationality. The national debt is not only, in our opinion, within controlable limits, but, if necessity required, it might be doubled without danger of repudiation or insolvency. To-day not a single bond of the United States is below par, and nearly all command a premium. The income of our Treasury for the last year, in the very midst of the rebellion, was nearly three hundred millions of dollars. The increase in the value of our real and personal property from 1840 to 1850 was sixty-four per cent.; from 1850 to 1860 it was one hundred and twenty-seven per cent. We have hardly commenced to work our gold mines, as well as all of our other unequalled mineral wealth. The increase in the value of coal from 1850 to 1860 was one hundred and seventy per cent. The income of our productive labor for 1860 was nearly two thousand millions of dollars. Our rich public lands are alone worth almost enough to pay our whole debt at the end of the war, at one dollar per acre. The war has not retarded but rather quickened the spirit of immigration. This, added to our natural increase, will soon settle these lands and pour countless millions into the National Treasury.

We have more than thirty thousand miles of railroad finished, at a cost of one thousand two hundred millions of dollars. Our exports of grain in a single year have reached five hundred millions of dollars. Agriculture gave the nation in 1860 sixteen hundred millions of dollars, and the fertile lands of our nation, when well cultivated, can multiply this an hundred fold. Our territory is nearly as large as all Europe, with its forty different empires. Our increase since 1790 has been six times greater than England, nine times greater than Austria, and ten times greater than France.

The burden of our debt will sit but lightly upon a nation whose home is a continent, whose climate embraces the products of almost every land, and whose people, by their industry, thrift and skill, multiply an hundred fold, and whose population grows with a rapidity which has no parallel in history. Peace, when it comes, will be all the more properly appreciated, after the trying ordeal we have passed through, during the eventful four years of bitter war. Men will thence glance upward and onward, with no misgivings to cloud their hopes—no fears of what might some day happen—but, on the contrary, a feeling that they are worthy of a noble destiny connected with the fortunes of the Great Republic. More than ever will they come to reverence the old flag—more than ever will they be ready to defend every right, assured to them under it, at home or abroad.—*Shipping List.*

The Crops—Past and Present.

Late and careful estimates of the crops indicate that there will be very nearly an average yield of wheat this season, notwithstanding the reports so industriously circulated all through the season for sinister purposes, to the effect that the amount could not reach more than half the average. While the drought continued, the people generally were disposed to give credence to these dismal reports, but now that the crop is secured, and in good part garnered, we are enabled to arrive at an approximate idea with regard to the actual yield. From the Bi-Monthly Report of the Department of Agriculture, just issued, we learn that though there is some falling off in the yield of winter wheat in all the great producing States, except Michigan, there is an *actual gain* in Spring wheat, except in Wisconsin and Iowa, and as the culture of Spring wheat largely predominates, the entire yield will be little, if any below an average. The tables in the report before us, are expressed in tenths; thus, 10 is the standard, one-tenth above it is stated at 11—and one-tenth below it, 9. Of the most important wheat-growing States, Ohio gives the lowest return. It is four-tenths, or forty per cent. below the crop of 1863 in Winter wheat, but its Spring wheat is ⅕ tenth, or five per cent. above the same crop of last year. Illinois is one-tenth below in Winter wheat, two and a half tenths above in Spring wheat. Michigan is one-tenth above both in Winter and Spring wheat. Wisconsin is one-tenth below in Winter wheat, and four-and-a-half-tenths below in Spring wheat, the latter occasioned chiefly from the destruction caused by the chintz bug. Iowa is one-tenth below in Winter wheat, and one-and-a-half-tenths below in Spring wheat. Indiana is an average. Maryland is two-tenths below. Pennsylvania is two-and-one-third-tenths below, and New York one-tenth below in winter wheat, and three-tenths below in Spring wheat. As the grain is large and the heads well-filled, it is believed the threshing will reduce these losses.

With regard to the other cereal crops, there is a slight falling off in barley, and about an average yield in oats. In relation to corn, the returns are for June and July, consequently they do not embrace any report of the benefits received by this crop from the August rains. We may state, however, that information received by us, from parties in the West and from our cotemporaries, points to a full average yield. The root crops promise about an average, while of sorghum and flax there is likely to be a substantial gain.

In order to afford some idea with regard to the magnitude of the crops, and the progress of agricultural development in the loyal States, we submit the following figures from an authentic source:

	1859.	1862.	1863.
Wheat, bush.	138,000,000	189,000,000	191,000,000
Oats "	152,168,000	172,520,000	174,858,000
Rye "	18,792,000	21,254,000	20,798,000
Barley "	15,433,000	17,781,000	16,760,000
Corn "	547,029,000	586,704,000	452,445,000
Potatoes "	107,337,000	114,583,000	101,457,000
Tobacco, lb.	230,343,000	208,807,000	267,302,000
Hay, tons	19,073,000	21,500,000	20,000,000
Wool, lb.	50,183,000	60,744,000	79,405,000

It will thus be seen, that there was a very large increase in the product of all the crops enumerated in the year 1862 over 1859, notwithstanding the existence of the war; and that there was also a very marked increase in the articles of wheat, oats, tobacco and wool, produced in 1863, (the third year of the war) over 1862; which increase would doubtless have also extended to all the other crops but for the occurrence of unusual drought and frosts. The State of Iowa, which, out of a population in 1860, of 675,000, furnished to the Federal army from May, 1861, to the end of 1863, 52,240 men, nevertheless increased her number of acres of improved land from 3,445,000 in 1859, to 4,700,000 in 1862, and 4,500,000 in 1863; and her product of wheat from 8,795,000 bushels in 1862, to 14,592,000 in 1863. In 1859, the amount of wheat raised in the State of Indiana was 15,219,000 bushels; while in 1863, notwithstanding the State out of its population in 1860 of 1,350,000 had furnished to the army more than 124,000 fighting men, the annual product of wheat exceeded 20,000,000 of bushels. Nor are these facts concerning Iowa and Indiana, remarkable as they most certainly are, exceptionable; for although exact statistics on this subject are not ready available, yet enough is known to render it certain that the products of industry have greatly increased in all the loyal States during the war, notwithstanding the constant draughts that have from time to time been made upon the numbers of their producing classes.—*Commercial List.*

Improved Construction of Ships.

Mr. Fairbairn suggests the following improvements and additions to the midship section of iron vessels, viz., the introduction of two cellular rectangular stringers, one on each side of the hatchways, and two triangular stringers, one on each side of the vessel, which run the whole length of the ship, and rest on the watertight bulkheads which divide the ship into eight separate compartments; these cells to be chain riveted, and by the same means to be attached to the angle iron of the bulkheads on which they are supported. These will diminish, says Mr. Fairbairn, the span of the cells and tighten the deck beams, which will not exceed fifteen feet in length from the cells to the side of the ship. Mr. Fairbairn asserts that in the formation of the deck, it is essential that a new principle of construction should be adopted, and that the cross beams forming the upper deck should be covered with iron stringer plates, thickest towards the middle of the vessel, and tapering from three-fourths to five-sixteenths of an inch thick as they approach the stem and stern. The section area thus obtained, however, is short of what would be required for a vessel of great magnitude.

American Railroad Journal.

Saturday, October 8, 1864.

Stock Exchange and Money Market.

The feature of the week was the introduction of a gold bearing 5-20 loan of 40 millions, under the act of June 30, last, and of course not strictly a new loan, but a further offer under an existing law, which was contemplated and to be expected from the first. Bids will be received until the 14th inst., and the awards will be made the next day, or as soon thereafter as possible. Two per cent. of the amount bid must accompany each bid as a guarantee of payment.

Successful bidders can pay for the bonds awarded to them at any time after the award is made, and must make payment as follows: Fifty per cent. on the 20th, and the balance 50 per cent. on the 31st inst. One-half of the first instalment, or 25 per cent. of the accepted offers may be paid in certificates of indebtedness with accrued interest to the 14th inst.

The two per cent. guaranty and the instalments can be deposited in the Treasury, Assistant Treasurers, Government Depositories, or National Deposit Banks, for which deposits, duplicate certificates will be issued to the depositors, the original of which must be sent to the Secretary.

The bonds will be of the usual varied denominations, and will be coupon or registered, as may be preferred by the successful holders. They will bear date the 1st of November, 1864, and interest on payments made before the 31st day of October to the date of the bonds, will be paid in coin by the Government.

There is not the smallest doubt that the bids will be liberal, and the whole amount secured. As usual, however, there is an outcry by the friends of the rebellion at the fresh increase of the National debt. The disloyal papers take every possible opportunity to decry this measure, and to place before their readers not only the most discouraging statements with regard to the National finances, but to accompany them with the most exaggerated reports of the movements and intentions of the confederates; their columns are filled with the falsest accounts of the war, palliations of the small successes of the enemy, and very desponding opinions as to the final result. It is really astonishing that such presses and such editors exist among us. Their place is within the Southern lines, not here where the Union and the success of our army are the first thoughts of all patriotic people. And while these sympathisers are continually howling over debt and taxation, it is to be remarked that they are quite willing to assume the rebel debt of seven or eight hundred millions of dollars, and to add it to our own. Everything for rebellion, nothing for putting it down!

So too, the same fault-finders after having demanded that the Government should raise money by borrowing only, and not by issuing its own currency, which is safer than local bank paper, preferred everywhere, current everywhere, and hoarded next to gold everywhere, when their own scheme is adopted, attack it just as much and in the same bitter terms as if the opposite course had been taken.

It must not be forgotten that we are driven into debt and taxation by no fault of the loyal States. If we have to submit to these misfortunes it is entirely owing, first to the rebels, who committed no less than fifteen open and violent acts of war against the Union, before the Government had even thought of resistance, and when it was wholly unprepared for it, because the previous administration had dispersed our naval and military forces far and wide, and the best artillery and most of our firearms had been sent to Southern forts and arsenals. And worse than this, the enemy has been secretly and openly encouraged to resist to the last. If the people of this country wish to know who are really responsible for this increase of the public debt and of taxation, they must look to the rebel leaders and their allies in the North. If they wish to know the authors of the evils complained of, it is easy as it is just to distinguish and to punish them.

These persons who are continually doing a they can to stop the supplies, are no less traitorous than silly. They ignore entirely the fact that the large expenditures necessarily made to carry on the war and save the country from ruin have

gone directly into the pockets of the people, and have furnished them the means to invest in the public securities and pay any amount of taxes, with this advantage to them, that by the overflow of this money they have had means to enlarge their business, make the temporary profits arising from a large demand, and have only to pay back a percentage to the Government of what it has received, in the shape of taxes. There never was so admirable a system of finance as the very one of which there is so much complaint in the quarters we have mentioned. It has enabled us to carry on a gigantic war without foreign aid, and without impoverishing ourselves. It has specially favored the working and debtor classes who under any other system, especially a metallic one, would been crushed to the earth and ground to powder. And the present condition of things as now existing is one more easily restored to the old standards of commerce, than the reverse could possibly have permitted. We have no reason to be discontented with it, but on the contrary have reason to be gratified that in some departments of the Government there were men who grasped the real power as well as the patriotic spirit of the country, in this great moment of danger.

It will be the simplest thing in the world to readjust the monetary affairs of the country the moment the rebellion is crushed, and we believe that moment is not far off. As soon as the expenditures for the army and navy cease, that moment the Treasury will begin to overflow. The interest it has to pay is not more than half of the amount of gold it is receiving at the custom houses. Who can honestly entertain any apprehension of the future when he appreciates this single fact.

Besides, as soon as the Union is restored, a large portion of the National currency, especially the legal tender part, will rush off into circulation in the restored States, as the basis of their commercial and agricultural operations, and their principal if not only medium of exchange. We doubt if this currency will be a dollar too much for the public wants, the moment peace is restored. So that the excessive issues as they have been declared to be, will at once disappear at the North, and become the main reliance of the restored business in the South.

One year's revenue after the war is over would absorb the whole amount of legal tenders now afloat. So that we are likely to see these notes in as much demand as gold, and far more useful commercially speaking.

This article of gold, for it can hardly be called money of account at its present rates, has fallen during the last week, but not so rapidly as previously. The most gigantic efforts have been made to keep up the price but in vain. We have frequently pointed out the interests which are at work to this end. But they are unable to accomplish their purpose, and the numerous failures which are now taking place, point out distinctly who are the guilty parties. When foreign and domestic houses engaged for long years in a particular and honorable trade, step out of it to deal in gold and exchange, are also continually putting out options to keep up the prices, and are diverted from the pursuit of regular profits to those of gamblers, staking their capital on the belief hat the great country they live in is sure to go to ruin, when such houses are engaged in such an ungrateful business, their utter destruction is no cause for regret. And the more of this class who succumb the better for honest trade, and the better for the country.

Nor would we much regret the losses sustained by those local Banks, which taking offence at the introduction of a system of national currency have vigorously set themselves in opposition to the Government, and afforded numerous facilities to all these operators in gold, exchange and produce, whose aim has been to depreciate the credit of the Treasury, keep up the price of specie, keep down the value of legal tenders, and encourage the extortions of the venders of all articles of necessity. We should not in the least be surprised to hear of the failure of some of these institutions, and their fate would be well merited.

The balance of gold and silver held in the old associated Banks on the 24 of September, was but $19,671,131, in August it was $281,818 more.

Connected with the fall of gold which since last July has been nearly 80 per cent, there has been a general alarm amounting almost to a panic in the produce, dry goods and share markets. Quite a number of leading houses even among dealers whose credit has never before been strained, or suspected, in consequence of their unwise and unpatriotic operations, have gone by the board, for as a rule it may be laid down that those men who overlook sound morals in their transactions, but will venture into them at the expense of their convictions, and consciences are pretty sure to be ruined in the end. There is something in the eternal fitness of things which commercial avarice does not comprehend, and cannot avoid, and another lesson to this effect is near at hand. Thus with the alarm, a general decline has taken place and as the innocent suffer with the guilty, it is not to be wondered at, that the very best railway shares have been sold at a large discount from former rates. This will be but a temporary depression for reasons of a general nature outside of speculative ones, as will appear from the leading article in the present number, and which makes any extended remarks on the subject in this place unnecessary. The arrivals from Europe at this port in the beginning of the week fully sustain our predictions for some time past as to the disturbances in the British Money Market. Consols had fallen to 88 in a weak and drooping condition. Heavy and numerous failures of large houses interested in cotton speculations and blockade running followed. The Leeds Banking Company has gone down, and carried many firms with it, some of them having connections at New York. This is but the beginning of trouble in England. It is noticeable in connection with this subject, that the demand for foreign exchange in this city is weak, and it is actually disposed of at a loss in most instances.

The following is the official statement of the National debt in Sept., as compared with the month of August.

	The Public Debt.		
	Sept. 30.	Aug. 30.	Inc.
Int. in coin..	$923,085,941	$889,899,491	$33,188,450
Int. in curr'cy	564,585,874	469,197,004	95,389,870
Int. stopped..	356,970	356,470	*500
No interest ..	497,944,929	519,111,267	48,833,662
	$1,955,973,714	$1,878,565,132	$77,408,482

*Decrease.

The debt has been increased in the following items

10-40 Bonds	$2,578,000
Bonds under act of March 8, 1863	30,664,550
1 year Certificates	26,889,000
7-30 Currency Notes	30,664,550
Increase of 6 per cent Compound Notes $56,440,000	
Decrease of 5 per ct. Notes. 13,111,173	
	$43,326,827
Less decrease in requisition	$44,153,636
Increase of balance in the Treasury	7,169,878
Decrease in temporary loan	4,850,006

The progressive increase of the Public Debt, of all descriptions, since the 5th July, when Mr. Fessenden took charge of the Treasury, is as follows:

	Principal.	Interest.
July 5	$1,792,867,040	$73,425,240
July 12	1,795,033,569	73,752,554
July 19	1,796,288,368	74,758,047
July 26	1,805,523,564	73,650,529
Aug. 2	1,837,492,170	76,418,305
Aug. 9	1,832,649,885	74,871,660
Aug. 16	1,849,714,555	76,088,165
Aug. 23	1,859,274,374	76,500,069
Aug. 20	1,878,565,234	77,447,122
Sept. 30	1,955,973,716	81,778,643*
Increase in 87 days.	$163,106,676	$8,353,403
Average daily increase of Principal		$1,746,788
Average rate of interest per annum		4.59 per cent.

* In Gold $54,608,446; in Currency, $27,170,197.

The balance in the Sub-Treasury on Tuesday was $21,552,249 83.

This statement puts to rest the idle stories that the Government was increasing its debt 2½ millions per day, and it also shows that at this moment the increase is actually within the daily receipts from taxes and customs by many hundred thousand dollars.

The aggregate amount of exports (exclusive of specie) from the port of New York to foreign ports for the week ending Oct. 1, 1864, was $3,622,356.

The price of cotton has fallen off in England 12 cents a lb., while the stock in hand at Liverpool is 391,000 bales, 140,000 more than in Sept. 1861.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending October 4, was $2,658,102, against $1,767,511 in 1863, and $2,585,059 in 1862.

The exports from New York for the same week was $3,622,356 against $2,413,660 in 1863, and $2,807,827 in 1862. The shipments of specie since January 1, have been $35,278,801. The exports since January 1, have been $166,958,756 against $133,156,650, in 1863, an increase of $33,802,106 on the same period in 1863. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to October 1, was $56,601,469.

The value of foreign goods imported into the port of Boston for the week ending September 30, was $352,215, against $235,874 for the corresponding week in 1863. The exports were $307,041 against $505,804 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $190,100.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—North Carolina 6s, 59; Illinois coupon bonds, 1870, 99¾; Illinois War Loan, 100; McGregor Western 1st mort., 75¾; Detroit, Monroe and Toledo bonds, 100; Milwaukee and St.

☞ The Secretary of the Treasury announces that he will receive Proposals, until October 14th, for forty millions of 5-20 bonds. The 5-20s have always been so popular that a liberal premium is expected, and a considerable amount will probably be taken on foreign account. The 7-30 loan will not be interfered with, and remains the most convenient investment at par that is now in the market, while the "Proposals" may be desirable for banks and capitalists. The subscriptions to the 7-30s have already amounted to over forty-five millions. Full particulars in relation to both these loans will be found in our advertising columns.

☞ The Ninth National Bank, 363 Broadway, will receive bids for the new loan of $10,000,000 5-20 6 per cent. bonds, advertised in another column, to be awarded on the 14th inst. This bank will be represented at Washington by its President, and will receive and include in its proposals all offers, charging ⅛ per cent., *if successful*. We have frequently observed the course of the officers of this bank in relation to their action as agents for the Government loans; and have reason to believe that their efforts have assisted, in a pre-eminent degree, in the dissemination of the loans among the people.

Philadelphia and Erie Railroad.

On the 17th inst., trains will commence running from Philadelphia to Erie City, a distance of 448 miles. The mileage is divided between three roads, as follows: Pennsylvania Railroad, West Philadelphia to Harrisburg, 106 miles; Northern Central Railroad, Harrisburg to Sunbury, 54 miles; Philadelphia and Erie Railroad, Sunbury to Erie City, 288 miles. As the Northern Central Railroad is owned in large part by the Pennsylvania Railroad Company, which is also the lessee of the Erie, it is presumed that the time table will be adjusted by that company; and as more trains are needed between Philadelphia and Harrisburg, than beyond that point, the Erie trains will be run intermediate between the Pittsburg trains, thus opening between Philadelphia and Erie City the same facilities that exist between Philadelphia and Pittsburg.

Couplers and Bunters.

The invention of "couplers and bunters" as applied to railway trains, of which on former occasions we spoke favorably, has at last been tried on the Chicago and Northwestern Railroad, under the direction of Mr. G. S. Dunlap, the Superintendent. The inventor, Col. E. Miller, has long been engaged in perfecting his plans, and we are pleased to see that on a full and fair trial they were approved of. The attention of our railroad companies should be directed to this new method of coupling; by which it is believed entire safety to railway passengers is secured. Further information can be obtained by addressing the inventor at Monroe, Wisconsin.

Jamestown and Franklin Railroad.

We understand that work upon this road is being pressed forward with energy. The iron is already at the canal; and the grading from Jamestown to Brownsville completed ready for the rails. Five miles of the track is already laid. Grading upon the eastern division of the road is also progressing. The company expect to have the road open for traffic early next season.

Atlantic and Great Western Railway.

The following is the traffic of the Atlantic and Great Western Railway since Jan. 1, 822 miles being opened:

	Passengers, &c.	Freight.	Total.
January	$38,615	$168,683	$207,298
February ...	50,189	178,852	229,041
March	60,518	166,215	226,733
April	63,992	133,275	197,267
May.....	57,193	157,486	214,679
June.....	73,654	240,867	314,521
July	82,665	249,433	332,098
August.....	95,077	310,999	406,076
Total	$521,903	$1,605,810	$2,127,713

☞ At the last meeting of the directors of the Sandusky, Mansfield and Newark Railroad Company, a resolution was passed to fund all the coupons maturing prior to Jan. 1, 1865—it being the expectation to pay that falling due on that day. Seven per cent. interest will be allowed on the coupons up to Jan. 1, 1865, and bonds of that date bearing the same rate of interest included in coupons annexed thereto will be issued and exchanged therefor—the coupons remaining in the hands of the trustee, as collateral, the lien continuing good. The conversion is now going on at the office of Mr. E. T. H. Gibson, No. 54 William street, N. Y.

Railroad Earnings--Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Sept. 21, 1864, were:

	1864.	1863.
Passengers	$3,309 21	$2,586 91
Freight	10,381 17	11,442 70
Express	104 16	75 00
Mails	296 58	296 58
Total	$14,091 12	$14,401 19

Receipts from January 1st to Sept. 21:

1864	$409,555 15
1863	261,802 89
Increase	$147,752 26

The earnings of the Marietta and Cincinnati Railroad for the 3d week in September:

	1864.	1863.
Passengers	$9,546 86	$5,415 15
Freight	9,792 29	9,633 42
Mail, express & telegraph	1,119 58	1,040 00
Total	$20,458 73	$16,088 57
Total this month to date	64,461 79	47,879 93
Total since Jan. 1	$705,773 49	$452,307 54

The traffic of the Great Western Railroad for the week ending Sept. 23d, 1864, was as follows:

Passengers	$36,418 95
Freight and live stock	25,783 76
Mails and sundries	1,229 75
Total	$63,432 46
Corresponding week of 1863	60,728 76
Increase	$2,703 70

The earnings of the Grand Trunk Railway for the week ending Sept. 17, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were: $124,007 00
Corresponding week, 1863 ..... 111,129 00
Increase $12,878 00

Railroad Earnings--Monthly.

The earnings of the Michigan Central Railroad for the month of Sept., 1864, were ... $408,444 58
Corresponding month of previous year 308,167 99
Increase $100,276 59

The Flint and Pere Marquette Railway earned in August;

1862	$1,941 43
1863	4,261 04
1864	7,330 32

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of August, 1864 were:

1864	$84,483 00
1863	51,281 00
Increase 1864	$33,202 00

The earnings of the Chicago and Northwestern Railroad earned in August, 1864 ..... $519,305 93
Same period last year 299,607 29
Increase $219,698 64

The earnings of the Housatonic Railroad for Jan. 1 to Sept. 1, 1864, were $371,261 00
Corresponding period of previous year 186,613 00
Increase $83,648 00

The earnings of the Chicago and Rock Island Railroad Company for the month of Sept., 1864, were. $331,494 00
Corresponding month of previous year 209,103 00
Increase $122,391 00

The gross earnings of the Ohio and Mississippi Railroad for the month of August, 1864, were:

	1864.	1863.
Eastern Division	$177,926 82	$138,656 73
Western Division	124,669 46	96,682 84
Total	$302,595 78	$235,335 97
Increase	$67,256 21	

The following were the comparative earnings from January 1, to August 31:

	1864.	1863.
Eastern division	$1,224,859 48	$1,030,215 47
Western division	853,612 07	687,163 70
Total	$2,078,471 55	$1,717,379 17
Increase	$361,092 38	

The following shows the gross receipts of the Chicago and Alton Railroad during the month of Sept., compared with the earnings for the same time last year:

1864	$320,857 03
1863	186,475 61
Increase	$134,381 42
From January to September, inclusive the earnings were	$1,831,942 61
Corresponding period of previous yr.	1,321,072 85
Increase	$510,869 76

The earnings of the Connecticut and Passumpic Rivers Railroad for August were:

	1864.	1863.
From passengers	$26,880 20	$13,132 41
" freights	17,169 78	8,925 59
" mails	883 33	758 33
" express	250 00	166 67
Total	$45,183 31	$22,983 00
Increase	$22,200 31	

St. Paul and Pacific Railroad.

The St. Cloud brought up a large load of railroad iron yesterday, for the Pacific road. A large amount of iron for the same road is lying at points below, and will rapidly be brought forward. The contractors are laying track about twelve miles beyond Amoka, on the main road, and hope soon to open the road for the winter to Elk River. Probably if low water had not delayed the bringing of the iron up river, notwithstanding the high price and scarcity of labor, our Pacific road would by this time have been nearly ready to open to St. Cloud. This road is the commencement of a road to the British Northwestern Possessions, running alongside of the Mississippi River to Crow Whig, from thence to Pembina, and promises to be one of the most successful roads in Minnesota. It has a liberal grant of lands from Congress, which are now selling and settling very rapidly, at prices which will fully cover the cost of the road. The passenger and freight business is fully up to the expectations of its managers.—*St. Paul Pioneer, Sept. 28.*

The Resources of the Country--their Annual Growth in Relation to the National Debt.

The growth of the United States is the wonder of the world. Nothing like it is recorded in authentic history. To foreign nations this growth is known almost exclusively by the increase of population, or the appearance of American ships in their ports. But when we come to investigate the ability of the nation to incur extraordinary expense, or to pay an accumulating debt, the question is not so much one of population as of industry and productions. It is a question of the rate at which the nation increases in wealth and resources. This problem has scarcely been investigated at all, and is understood by few. To meet the question of the ability of this nation to pay its present and future war debt with promptness, and without the least distress or doubt, we propose to solve these problems: 1. What is the Wealth of the Nation? 2. At what rate does it increase? 3. What is its proportion to the Debt?

1. What is the Wealth of the Nation? Wealth is all the available property of the country—lands, houses, precious metals and domestic animals, and instruments for the employment of labor and to make lands productive. In some countries, as in Holland and Belgium, there is a considerable drawback on many of these, from the fact that there is little or no market for them, except for the use of those who hold them. Thus, a man who builds a home in Amsterdam does not expect to sell it for what it cost; he builds it for his own use. In this country it is exactly the reverse. Every man expects to get more for his property than what it costs, and in nine cases out of ten is justified by the event. In a country where foreign immigration is immense, and the natural growth rapid, the market is always a rising one, and all species of property is marketable. Hence, in valuing the property of the country, there is no drawback from the want of sale, or the possible fall of values. The property of the nation in one year is worth more than it was appraised at the preceding year. Hence, if we can find a fair valuation of the property of the country, that valuation is a perfectly safe standard to ascertain the wealth of the nation. It is only recently that any attempt has been made to value the property or wealth of nations. In this country, the only valuations we have are in the Censuses of 1850 and 1860; but these are enough to establish both the actual value of property and the rate of increase. The valuations are very well proved, by corresponding nearly with several State valuations, which are made for the purposes of taxation. For example, the increase of wealth in the State of Ohio, given in the United States Censuses of 1850 and 1860, compared very nearly with that given by the Auditor of State and Commissioner of Statistics, and are known to be very near the actual saleable value of property. We therefore assume the valuation of property of this country given in the Censuses of 1850 and 1860 to be substantially correct. Taking, then, only the States and Territories now in possession of the United States Government, (although, for the ultimate payment of the debt, we have a right to assume that we shall recover the whole property of the nation,) the following brief table will show our wealth in 1860:

	Wealth in 1850.	Wealth in 1860.	Inc.	Inc. p.c.
California	$22,161,872	$207,874,613	$185,712,741	837.98
Conn.	155,707,980	444,274,114	288,566,124	185.32
Delaware	21,002,556	46,242,181	25,179,625	119.54
Illinois	156,265,000	871,860,282	715,595,276	457.93
Indiana	202,650,264	528,835,371	326,185,107	160.95
Iowa	23,714,638	247,338,266	223,623,627	942.97
Kansas	.....	31,327,825	31,327,825	.....
Kentucky	301,628,486	666,043,112	364,414,666	120.81
Maine	122,777,571	190,211,600	67,434,029	54.92
Maryland	219,217,364	376,919,944	157,702,580	71.93
Mass.	573,342,286	815,237,433	241,895,197	42.19
Michigan	59,787,2[illegible]6	257,163,983	197,376,728	330.13
Minnesota	.....	52,292,413	52,292,413	.....
Missouri	187,247,707	501,214,393	363,966,691	205.18
N. Hamp.	103,652,835	156,310,860	52,658,025	50.80
N. Jersey	200,000,000	467,918,324	267,918,324	133.96
New York	1,080,309,216	1,843,338,517	763,029,301	70.63
Ohio	504,726,120	1,193,898,442	689,172,302	136.54
Oregon	5,063,474	28,930,637	23,867,163	471.35
Penn.	722,180,120	1,416,501,818	694,015,698	96.05

Tennesse	201,248,686	493,903,892	292,657,206	145.44
Vermont	92,205,049	122,477,170	30,272,121	32.83
Wisconsin	42,056,595	273,671,668	231,615,073	550.72
Territories	30,179,428	41,142,408	20,962,980	108.00
	$5,047,097,712	$11,410,266,848	$6,373,269,136	127

The problem of wealth, estimated by the cash

standard of value is solved. The actual wealth of the country on the 1st July, 1860, was eleven thousand four hundred and ten millions, including in this only the States and Territories now in actual possession of the government. On the same day the wealth of the entire country was sixteen thousand one hundred and fifty-nine millions ($16,159,000,000). Hence, the entire wealth of the States now in rebellion, including portions of Louisiana, Arkansas, Virginia, North Carolina, &c., now in our control, was but four thousand seven hundred millions, and of this sum not less than one and a half thousand millions was in slaves. The national wealth, by the rates of 1860, was in fact three-fold that of the Rebel Confederacy. If we take from the list half of Virginia and Louisiana, fully in our control, the value of the Confederacy is but three and a half thousand millions; so that the wealth of the loyal country is really four times that of the rebels. Looking to the increase, we find that the decennial increase was 127 per cent., and the annual increase 12.7; so that the four years, from 1860 to 1864, gives an increase of 50 per cent. On this basis, the actual wealth of the Loyal States and Territories, on the 1st July, 1864, would be sixteen thousand six hundred millions of dollars ($16,600,000,000), equal to that of the entire nation in 1860. But some one may say that the condition of war has diminished the increase of wealth. Some consideration will make it evident that this if this is true at all, is only in a very moderate degree. War prices are always high prices, and high prices —such high prices as we now have—stimulate production to a vast extent. The farmer manages somehow to sow as many acres and reap as large harvests as ever, and we not only feed our armies and home population, but continue to feed a good part of Europe besides. But let us look at some other considerations: 1. With the exception of Tennessee and Missouri, the loyal country has felt none of the destruction of war. 2. A large part of the increase of wealth was due to immigration, and that continues as large as ever, and goes exclusively to the Loyal States. 3. The production of the gold and silver mines is far greater than it was in 1860. 4. A large proportion of the increase is in the new States and Territories, which are still increasing very rapidly. 5. All the payments of the war are made to our own people, and, with the exception of wastage, the war has drained no wealth from the country.

But suppose our national wealth does not increase as rapidly as in time of peace, the gain is undoubtedly sufficiently great to demonstate the correctness of our position.

What is the Proportion of Debt to the Wealth of the Country? The debt created by three years and a quarter of war, from April 1861, to July, 1864, (exclusive of the legal tender notes, which, being the best currency of the country, will continue out,) was thirteen hundred millions. This is not near the increased wealth of the country! If we were to suppose the war to go on from two to six years longer, the additional debt will be less than the natural increase of its values. From these facts the following deductions are inevitable:

1. That, even with a considerably diminished increase of wealth, the country can carry on war for an indefinite period, and continually increase its wealth.

2. That the resources and progress of the nation are so great and inexhaustible that any public debt created by this or any ordinary war, can be paid, principal and interest, without any serious burden on the people.

3. That, therefore, the public loans of the United States are, and will remain, unimpeachably secure, through any period of war, and bring good interest—are the best investments which lenders can have in any public securities.

Our Burden and our Strength.

A very valuable work has recently been published by David A. Wells, Esq., entitled "Our Burden and our Strength," illustrating the ability of the loyal States to bear, without serious injury, the pressure of any debt which the present war may impose upon us. This has been our conviction from the first, and we have on all occasions, as our readers well know, furnished in our columns abundant evidence of the same fact. Mr. Wells' figures but corroborate our own. We make the following extracts:

TABLE.

Showing the present and prospective debt, interest and population of the United States with the present debt, interest and population of Great Britain, France, Austria, Italy and Holland:

	Public Debt.	Population.	Annual interest.	Debt to each person.	Av.int. to each person.
United States (loyal.) July 1864	$1,750,000,000	24,909,000	$75,000,000	$72.92	$3.01
At close of war, (assumed) 1865.....	3,000,000,000	84,000,000	180,000,000	82.35	5.35
In 1870, assuming 30 per cent. as average decennial increase of population	3,000,000,000	40,950,000	180,000,000	78.26	4.38
In 1880, do.....	3,000,000,000	58,235,000	180,000,000	56.35	3.38
In 1890, do.....	3,000,000,000	69,205,500	180,000,000	48.35	2.60
In 1900, do.....	3,000,000,000	89,964,150	180,000,000	38.34	2.00
Great Britain, March, 1863	8,915,000,000	30,000,000	127,564,000	130.46	4.25
France, 1862.....	2,206,000,000	37,000,000	110,000,000	59.65	3.00
Austria, 1863	1,868,000,000	35,090,000	.....	36.10	.....
Italy, 1868.....	704,000,000	22,000,000	.....	34.73	.....
Holland, 1868.....	424,500,000	3,600,000	12,244,000	117.00	3.40

It would thus appear from the above table (the figures and estimates of which are, it is believed, entirely reliable) that assuming the actual national debt at the close of the federal fiscal year, June, 1864, to be $1,750,000,000, the apportionment of debt to each individual of the loyal States would be $72.92, and of the annual interest, $3.01. If we assume further, that the war terminates at or before the close of 1865, and that the national debt has reached at that period the sum of $3,000,000,000, then the debt for the population of the restored Union will average $82.35 for each individual, and the annual interest $5.35. Supposing the debt to remain the same, (*i. e.*, $3,000,000,000,) and the population to increase in the ratio of only 30 per cent. for each decennial period, the table shows the rapid decrease of individual liability for debt and interest during the remaining years of the present century.

TABLE.

Showing the population and wealth of the United States by decades from 1790 to 1860; population of the loyal States in 1864; decennial per centage increase of population; decennial per centage increase of national wealth; average property to each person; average annual value of the national product:

Year.	Population.	Value of real and personal property.	Dec. p.c. inc. of popul'n.	Dec. p.c. inc. of wealth.	Av. prop. erty of each person.	Av. annual value of nat'l prodt.
1790 ..	3,929,827	(estimated.) 750,000,000	.....	....	$187.00	$187,500,000
1800 ..	5,305,937	1,072,000,000	35.02	43	202.13	300,000,000
1810 ..	7,239,814	1,500,000,000	36.43	39	207.20	420,000,000
1820 ..	9,638,131	1,882,000,000	33.13	25.4	195.00	526,960,000
1830 ..	12,866,020	2,653,000,000	33.49	41	206.00	742,840,000
1840 ..	17,069,453	(official.) 3,764,000,000	32.67	41.7	220.00	1,063,185,000
1850 ..	23,191,876	7,135,780,000	35.87	89.6	307.67	2,004,000,000
1860 ..	31,500,000	16,159,000,000	35.59	126.42	510.00	3,804,000,000
Loyal States, 1864 ..	24,900,000	(estimated.) 15,500,000,000	4 y'rs 12 p.c.	4 y'rs 40 p.c.	614.95	4,018,000,000
Rest'd Union assumed. 1865 ..	34,000,000	21,574,000,000	.....	....	634.52	5,718,500,000

No estimate of further resources of the country; furthermore can be considered complete, which fails to take into account the great augmentation of values which is sure to accrue in time to the South from the substitution of free for slave labor. This matter is set in a clear light by the following statement, which any one who doubts can verify for himself by referring to the official statistics of the census of 1860:

If the product per head of the population in the Slave States had been the same in 1859 *that it was in the Free States, there would have been added to the aggregate national wealth returned at that time the additional value of* $1,531,631,000—a sum nearly equal to the entire national debt, June, 1864.

Shawmut and Ridgway Railroad.

The Shawmut and Ridgway Railroad connects with the Philadelphia and Erie road at a point two miles above Ridgway and eight miles below St. Mary, in Elk County. Stock subscriptions constitute the basis of the work, and the company have no debt, except their own bonds issued for the purchase of iron.

The road, from its starting place on the Philadelphia and Erie, gains its altitude, some 600 feet, by a series of switches, embracing about five miles. Railroad men describe it by the term "back-switch;" *we* would call it a "zig-zag" track. It is extended from the summit to the coal fields of Elk County, terminating at Mead's Run, upon little Toby Creek, upon the lands of the Pennsylvania Cannel Coal Company, and of the Shawmut Cannel Coal Company, owning together 7,000 acres of land, in which coal of a good quality is found in abundance. Its entire length will be fifteen miles. The whole work will be completed in the early part of October, when the company propose delivering coal at Erie.—*Erie Gazette.*

Large Artesian Wells.

Mr. W. Mather of the Salford Iron Works, Manchester, England, recently read a paper before the South Wales Institute of Engineers upon machines for boring artesian wells. In the course of his remarks he said that his machine averaged three feet per day, including stoppages, and that he had already sunk wells of 18 inches diameter and 1,184 feet depth. Machines were already in use capable of boring 2 feet diameter, and he had some in progress capable of making 3 feet bores. He would make a machine capable of boring 6 feet in diameter to any depth, if necessary. Steam power is used to operate the borer. It would work through rock readily, and the Weardale Iron Company were using it to test the character of the strata through which the well was sunk for coal.

Interest and Dividends.

The Housatonic Railroad Company have declared a dividend of $4 per share, free from Government tax, on the preferred capital stock, out of the net earnings for the last six months, payable on the 15th instant.

The Lehigh Valley Railroad Company have declared a quarterly dividend of two and a half per cent., payable on the 10th instant.

The quarterly dividend of 1¾ per cent., free from Government tax, due Oct. 3, 1864, on the Joliet and Chicago Railroad stock, and on the Alton and St. Louis Railroad stock, will be paid on and after that date, by the United States Trust Company.

The coupons of the bonds of the Atlantic and Great Western Railway, due on the 1st October, are payable at the office of McAndrew & Wann, No. 12 Pine street.

☞ The New Castle and Youngstown Railroad, connecting the Mahoning Branch of the Atlantic and Great Western Railway at Youngstown with the Erie and Pittsburg Railroad at New Castle, has been located on the south side of the Mahoning River. Mr. J. W. Blanchard has contracted to do the work, and the grading is commenced. The company intend to push on the work vigorously to completion. This is an important road, opening as it will direct communication by those roads between Cleveland and Pittsburg.

WANTED

A gentleman with a capital of $25,000 to take an interest in a Car Manufacturing Establishment at New Haven, Ct. The business is already established, with a large capital invested, and in successful operation. Address this office, or box 2287 P. O., New Haven, Ct.

FOR SALE.

450 Ton, Street Rail, Philadelphia pattern.
1000 Ton, 57 lb. English Rail.
1300 Ton, 50 lb. Rail.
3 Locomotives 14x22 Cylinders, 5 feet Drivers, now ready for delivery.
20 Platform Cars.
The Cars and Locomotives 4 feet 8½ gauge.

Apply to

4138 GEO. T. M. DAVIS,
New York, Sept. 14, 1864. 47 Exchange Place.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, Sept. 20, 1864.

THE FIRST SERIES of $2,000,000 Redemption Bonds bearing 6 per cent. interest, and payable in 1890, have been exchanged for Construction Bonds. The Directors, by resolution this day, have decided to issue another series of $3,000,000, under the same mortgage, upon the road and appurtenances, which are offered at 110 per cent., in exchange for Construction Bonds at 120 per cent., making a difference of 10 per cent. in favor of the Construction Bonds.

This arrangement is proposed in order to relieve the holders of the Construction Bonds from the inconvenience of a peremptory call for the Bonds as provided by the terms of their issue, but in case the Bonds are not surrendered and the exchange effected in amounts sufficient to meet the requirements of the land sales, the Company will be compelled to pay off a further portion of the Bonds.

THOMAS E. WALKER, Treasurer.

Immigration.

The remarkable letter which the Mayor of this city recently published on the subject of immigration has naturally been the occasion of much remark. If there was ever an official personage who should have encouraged it both on public and private grounds, it was the author of that letter. And we also venture to suggest that the party whom he consulted as to the substance of that communication, if not the words of it themselves was also if we are not greatly mistaken, in the same category. The Mayor and his adviser are both indebted to the principle of immigration for all the honors and the wealth they have acquired, and this discouragement of it on his part seems to be both unfair and unjust to those who would leave the old world to better their condition in the new as the immediate ancestors of those gentleman had done.

At a recent meeting of the Chamber of Commerce, the subject came up for consideration and was ably discussed by S. B. Ruggles Esq., one of the far seeing men of the day, who with the figures always at command, and leading principles always in his mind, demonstrated the absurdity and injustice of the communication alluded to. The following resolutions offered by him in relation to the subject were unanimously adopted by the Chambers and further action will be taken to counteract the false impressions which this act of the Mayor might give to persons abroad.

Resolved, That the Chamber of Commerce of New York regard the increase of the population of the United States, with judicious and profitable employment, as the surest and most efficient mode of preserving and increasing the national strength, and that they hold it to be the imperative duty of the government and of all our public authorities, in view of the withdrawal by the pending war of the labor from civil employment, and also of the necessity of increased activity in agricultural, manufacturing and mining industry, to develop our dormant resources, and thus provide the means of lightening our public burdens.

Resolved, That the Chamber regards with particular satisfaction, the recent act of Congress, "to encourage emigration," passed on the 4th of July last, and view with approbation any proper efforts of their fellow citizens to carry the objects of the act into speedy and full effect.

It appeared from Mr. Ruggles' statements that during the present war no less than 640,000 emigrants had reached the Northern States, and we may add they immediately found lucrative employment. Our losses in the field have not only been repaired very nearly by the ingress of this large number, but we have gained an accession to our industrial power worth millions of dollars, when reduced to money. What is quite an novel idea, too, as suggested by Mr. Ruggles is this, that while our own population is gaining by the regular increase of births, yet it gains children only, who have to be nursed, fed and taken care of for many years before they come of age and fall into the class of producers, while on the contrary the immigrants in almost all cases come to us of mature age, and are able at once to labor and earn their own living, and contribute to swell the aggregate products of the nation.

The population of the nineteen free states and seven territories increased from 1850 to 1860, at the rate of 41 per cent, and this is equal to about 4 per cent per year, while the increase by immigration during the same period as appears by the last census, was for the ten years previous to 1860, not including that by way of Canada, 3,255,591, or in other words about one sixth of that increase. That is to say, of the total population of the free states and territories, of which 18,936,579 were white, 237,218 free colored, and 27,749, Indians, 3,255,591 and upwards was the increase by immigration. Their immediate average earnings during the decade between 1850, and '60 may be safely set down at $50 per annum, which is unquestionably below the truth, as every person who could work, earned from $5 to $12 per month, and skillful artizans or experienced farm laborers much more. Even domestic servants received a larger amount. Thus by this estimate we arrive at the annual amount of earnings of these emigrants for each year, to wit., $162,779,550. If instead of looking at the proportion between the whole population, and the whole immigration as recorded in the census, we take the increase of the population by itself to wit., 5,598,608 the immigration having been as before mentioned 3,255,591 then the latter contributed more than 50 nearly 60 per cent of the increase.

Mr. Ruggles following up this idea of the value of emigrant labor, asserted and was within a safe limit as will be perceived by our figures, that this emigration had been worth to this country two hundred millions of dollars. The value of their labor was in fact vastly greater.

Now then the man it is clear who seeks to prevent emigration to these United States can neither be a statician, nor a statesman, nor even a good citizen. And he is not only ignorant of one of the great elements of American prosperity but is false to humanity, and an enemy of the class of the poor, the humble and the industrious of other countries.

This Country has been justly styled the home of the emigrant, and the asylum of the exile. It has always offered to such, abundant labor, and cheap land. In later years it has offered homesteads to all such, small estates in fact, without money and without price. It still offers them, More than this it has encouraged associations for the introduction of emigrants, and given them the sanction of legislative enactments. One of these has recently entered upon its humane and patriotic work in this city under the title of the American Emigrant Company, with a large capital, and managers of the highest respectability. It en-

gages to furnish immediate employment for laborers from all countries, and to protect them from want or imposition on their arrival here. It has established agencies all through the principal cities of Europe, where it will contract to take charge of them and bring them safely to this country. It also undertakes to receive applications from employers, and to stand between them and the emigrants as their friends and protectors. No other Country ever witnessed such an association, and no other country could undertake it, for we know of none in the old world that has fertile lands to give away, or employment to offer which cannot cease.

Even in England where it has been asserted as the Mayor has re-asserted it, that we were merely entrapping men to get them into our armies, or to injure the industrial classes already among us, the Government has by an official circular published its full and entire commendation of this humane, careful and generous conduct of this Emigrant association, and this admission is posted in all the ports of Great Britain, from whence the emigrants take their departure. This circular assures them that they are looked after, the very moment they land here, and are safe under the proffered protection, and contains in fact the highest eulogies on the Immigration system as now organized in this city. It is indeed a complete refutation of the slanders which the enemies of the republic have circulated abroad, and which have been repeated by an American official, himself a remarkable illustration of what emigration to the United States has done to elevate the fortunes of a German family which had no chance whatever to rise in its own country.

We may therefore truly and conscientiously affirm that Emigrants from the old world always have been and always will be making a fortunate change in their condition when they come to the new. Here labor is rewarded, land cheap, competence if not wealth readily obtained, education gratuitous, in short, life, liberty, and the pursuit of happiness are effectually guaranteed to all who seek the protection of our flag. In no other spot on the face of the globe can similar advantages be offered to the family of man.

Welding Iron by Hydraulic Pressure.

A series of experiments have lately been made in Paris by M. Duportail, engineer in the workshops of the Western Railway, to ascertain whether iron might be welded by hydraulic pressure instead of by the sledge hammer. The latter indeed, has not a sufficient impetus to reach the very core of the metal, while continuous pressure acts indefinitely to any depth. In the experiments alluded to M. Duportail caused two iron bars, an inch and a half in diameter, and heated to the welding point, to be placed between the piston and the top of an hydraulic press. The bars were welded together by this means with extraordinary ease, the iron being, as it were, kneaded together, and bulged out at the sides under the pressure. The action of the press was suspended when the part welded was brought down to the thickness of the bars. After cooling the welded part was cut through to examine the inside, which was found perfectly compact. To try it, one of the halves was placed under a fore hammer weighing 1,800 kilogrammes, and it was not until the third stroke that the welding was discovered.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1862 and 1863, were as follows:

	1862.	1863.
From passengers	$1,645,024 83	$1,834,133 75

Leaving		$352,189 10
Appropriations to sinking fund		53,333 33
Leaving an actual surplus of		$298,855 77

The aggregate gain in receipts over 1862, was $323,395 58.

The details of the new work above alluded to are as follows:

16½ miles of double track and additional track with grading, masonry and bridging for the same	$239,978 39
New fences	2,812 21
New locomotives	46,664 52
New mail and baggage cars	12,349 53
New freight cars	73,265 75
New stations and buildings	42,732 28
Susquehanna Bridge	47,802 38
Real estate	10,451 00
	$471,046 01

The sinking fund for the year, amounting to $46,000, has been invested in the loan of the company.

The company have 40 locomotives (8 of which are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, and Junction and Breakwater Railroads;) 66 first class and 4 second class passenger cars; 3 refreshment, 2 hospital, 2 sleeping, 19 baggage, 7 platform cars for crates, 6 express and 1 paymaster's—making the total in passenger department, 110; in freight department, 828; in road department, 63—total, 1,001.

The number of miles run by locomotives during the year burning coal was 545,765; do., burning wood, 130,100—total, 675,865, against 582,615 in 1862—an increase of 93,250.

Number of passengers carried, 1,071,961; of which 290,457 were through, and 781,504, way. Number carried one mile, 54,301,469; of which 28,464,786 were through, and 25,836,683 way. Tons of freight carried, 217,034; of which 107,486 were through, and 109,548, way. Of the through freight, 84,931 tons were moved northwardly, and 22,554, southwardly. Of the way freight, 42,863 tons were moved northwardly, and 67,183 southwardly. The total tonnage northwardly was 64,919; do., southwardly 152,115. Number of tons carried one mile northwardly, 4,074,024; do., southwardly, 11,538,518.

The cost of new work and improvements per mile run by locomotives has been 69.7 cents. The ratio of expenditures to earnings has been 59½ per cent. The ratio of operating expenses to earnings only 38 per cent. The cost per mile run with locomotives including all expenditures, was $2 11.2; do., including only operating expenses, $1 41.5.

The apparent loss in operating the Delaware Railroad, it will be seen, has been reduced to $5,637 33. The revenue on the main line has been increased by business brought to it by the Delaware road, as follows: from passengers, $63,570 79; from freight, etc., $59,865 11—total, $125,535 90. Allowing the same ratio of expenses to earnings here as on the whole of the main line, the profits from the business brought to the main line by the Delaware road have been $80,397 34. The report says:

It was resolved in the early part of the year to push all our various improvements with the utmost vigor, losing no time in making the road all that a resonable public could desire. Arrangements were made accordingly to continue the double track to the Susquehanna River, at the earliest practicable moment. Fourteen miles of new double track have been laid and put in use since the last Annual Report, and the grading, masonry and bridging of twenty-three miles more are now nearly ready for the track, and only awaiting the iron which was contracted for in due season, but which owing to the unusual demand has not yet been delivered. When all is delivered which is now contracted for and over due we shall have enough to complete the double track to the Susquehanna.

The double track now in use is, between Philadelphia and Darby Bridge about ten miles, and between Chester Bridge and Newport about four miles below Wilmington, making in all about twenty-seven miles. Between Darby Bridge and Chester Bridge nearly every thing is now in readiness to commence laying the rails. Darby Bridge has been widened with a double track draw. Crum Creek Bridge is nearly ready. The masonry at Ridley Creek Bridge when rebuilt several years since was prepared for a double track. Between Newport and Northeast all the grading,

masonry and bridging are prepared for the double track, and the ballasting to Elkton has been completed ready for the superstructure whenever the iron arrives. Contracts have been made for the whole work to the river, and we hope before Spring if the weather is propitious, and the iron long since contracted for is delivered, to have most of the iron down and in use. Much more progress would have been made, but for the difficulty in procuring the labor and the materials; we have, however, done all that we could do, regardless of the very high cost, believing that the emergency justified the outlay. On the west side of the Susquehanna River we have as yet made no preparations for a double track, but shall go on at once with the same, as soon as we have finished the work on this side, should the business of the road continue as now.

The contract system, which was abandoned on the main line in 1862, was again resorted to on the 1st of November, 1863, for the labor on repairs, and renewals of the track on the main line, and for the grading and ballasting of, and for the laying of the double track. The contract for repairs of road was made for one year, and for the new work referred to between Newport and the Susquehanna River. The directors hope that the time may soon come when prices for labor and materials will assume certain and fixed value, as to enable them again to resort to the contract system, which they still believe to be, under ordinary circumstances, the best system both for building and operating railroads.

Secretary and Treasurer.—ALFRED HORNER.

Central Pacific Railroad.

SUPREME COURT DECISION.—*July Term.*

The People of the State of California, on the relation of the Central Pacific Railroad Company of California *vs.* Henry P. Coon, Mayor, Henry H. Hale, Auditor, and Joseph S. Paxson, Treasurer of the City and County of San Francisco [No. 391].—Applications for mandamus. The Legislature of this State, by an Act passed in 1863, authorized the Board of Supervisors of the city and county of San Francisco to take and subscribe one million dollars in the aggregate to the capital stock of "The Western Pacific Railroad Company," and "The Central Pacific Railroad Company of California," and to provide for the payment of the same. (Laws of 1863, p. 380.) By this Act it was made the duty of the Board of Supervisors to order a special election for the purpose of submitting to the electors of the city and county the proposition for the Board to take and subscribe four hundred thousand dollars to the capital stock of "The Western Pacific Railroad Company," and also the proposition for the same Board to take and subscribe six hundred thousand dollars to the capital stock of "The Central Pacific Railroad Company of Califarnia." It was provided by this Act that if a majority of the electors voting was in favor of the proposition to subscribe for the stock of said companies, then it should become the duty of the Board to take and subscribe, in the name of the city and county of San Francisco, for its use, benefit and advantage, to the capital stock of each of said companies in the amounts specified, and therefor to pledge the faith of the city and county for the payment of the same, in the manner provided in the Act. The Act also provided that the subscription should be made conditioned to be paid in the bonds of the city and county, which should be issued in the sum of one thousand dollars each, from time to time, as the work should progress on the railroad, by a Board, consisting of the President of the Board of Supervisors, otherwise called the Mayor of the city and county of San Francisco, and the Auditor and Treasurer of said city and county, and styled the "Pacific Railroad Loan Commissioners." The special election was held and the result of it was that a majority of the electors was in favor of the proposition submitted.

In April, 1864, an Act was passed by the Legislature by which the same Board of Supervisors was authorized and empowered "To compromise and settle all claims upon the part of the Western Pacific Railroad and the Central Pacific Railroad for cash or other security, in place of bonds claimed by said companies of said city and county, under an Act to authorize the Board of Supervisors of the city and county of San Francisco to take and subscribe one million dollars to the capital stock of the Western Pacific Railroad Company and the Central Pacific Railroad Company of California, and to provide for the payment of the same, and other matters relating thereto, approved April 22, 1863; provided that the power to make such compromise shall rest in said Board of Supervisors only after and in case said Board of Supervisors shall be compelled by final judgment of the Supreme Court to execute and deliver the bonds specified in said Act." (Laws 1863-4, p. 388.)

The Board of Supervisors having declined, after request to take and subscribe to the capital stock of the Central Pacific Railroad Company, an application was made to this Court for a peremptory writ of mandamus to compel said Board to proceed to make the subscription and issue the bonds therefor as provided in the Act of 1863. The respective parties to that proceeding appeared by counsel and argued the questions involved therein, after which this Court rendered a judgment granting the writ, which was issued in June, 1864, commanding said Board of Supervisors to take and subscribe in the name of the city and county of San Francisco, for its use, benefit and advantage, to the capital stock of the Central Pacific Railroad Company of California to the amount of six hundred thousand dollars, and for the payment of the same to pledge the faith of said city and county in the manner provided in the Act of 1863; and also commanding the Board of Supervisors to make an order directing the Board of Commissioners styled "The Pacific Railroad Loan Commissioners," to issue the bonds of the said city and county to the Central Pacific Railroad Company, upon the conditions as required and specified in and by the provisions of the Act. This writ was served on the Board of Supervisors.

Pending the application for a writ of mandamus, the Board of Supervisors, on behalf of the city and county, and the Central Pacific Railroad Company, by its President, were engaged in an effort to effect a compromise of the matter in difference between them, which resulted, after the writ had been issued and served, in an agreement upon the terms thereof; and to carry the compromise agreed upon into effect the Board of Supervisors, on the 20th of June, 1864, duly passed an ordinance entitled, "Providing for issuing Bonds to Central Pacific Railroad Company." By this ordinance, after reciting the Act of 1863 and the election under that Act, and the judgment of this Court granting the peremptory writ of mandamus, and the Act of 1864, authorizing and empowering the Board of Supervisors to compromise and settle all claims upon the part of the Central Pacific Railroad Company of California, the people of the city and county of San Francisco ordained as follows:

SEC. 1. Four hundred bonds of said city and county, each for one thousand dollars, with interest coupons attached, dated July 1st, A. D. 1864, in all other respects, in form, substance and execution, such as are required by said Act first above mentioned shall be forthwith made, executed, and delivered to said Central Pacific Railroad Company of California.

"SEC. 2. The payment of said bonds and coupons shall be provided for, and made in all respects as is provided in said Act of April 22, 1863, and for such payment the full faith and credit of said city and county are hereby pledged.

"SEC. 3. Said bonds and coupons shall be delivered to said Central Pacific Railroad Company of California upon the condition that the Board of Trustees or Directors of said company, at a regularly called meeting of the same, shall, by a vote duly recorded, accept said bonds and coupons in full discharge of all obligations on the part of said city and county to make any subscription to the capital stock of said company, and for all claims, debts, dues, bonds, and coupons whatsoever. Upon the issuing and acceptance of said bonds and coupons, the same shall be deemed to have been so received and accepted, in place of the bonds and coupons mentioned and provided to be given in the Act of April 22, 1863, before mentioned."

This Ordinance was duly approved by the Mayor on the 21st of June, and became a law on that day. Immediately thereafter the Central Pacific Railroad Company accepted the proposition contained in said ordinance, in accordance with the terms and conditions thereof, and signified the same to the Board of Supervisors. But the Mayor, Auditor and Treasurer, constituting the Pacific Railroad Loan Commissioners," refused to issue the bonds, as provided in said ordinance, after demand duly made therefor on behalf of the Central Pacific Railroad Company.

The relator has applied by petition to this Court for a peremptory writ of mandamus commanding and requiring the respondents to issue to the Central Pacific Railroad Company of California the four hundred bonds specified in said ordinance. To the relator's petition setting forth the facts, in substance, as hereinbefore stated, the respondents have demurred. The grounds of the demurrer are in substance as follows:

First.—It does not appear in or by said affidavit and petition that the respondents have any legal authority or power to execute or deliver to said Central Pacific Railroad Company the bonds referred to in said petition or any part thereof.

Second.—It does not appear in said affidavit and petition that the Board of Supervisors of said city and county of San Francisco, or any officers of

said corporation had any lawful authority to issue or cause to be issued to said Central Pacific Railroad Company bonds to said amount of $400,000, or any other amount, in the manner or for the causes or considerations alleged in said affidavit and petition.

Third.—That said ordinance was passed without any lawful authority, and is wholly illegal and void.

Fourth.—That the Act of the Legislature of this State approved April 4, 1864, so far as the same authorizes or attempts to authorize, the issuing of bonds by the said city and county to the Central Pacific Railroad Company, or the payment by said Board of Supervisors to said company of cash or other securities, is in conflict with the Constitution of this State, and is null and void.

The respondents, for answer to the petition, deny that the Board of Supervisors at any time become, or were lawfully bound or obliged, to subscibe six hundred thousand dollars, or any other sum, to the capital stock of the Central Pacific Railroad Company of California, or to make, execute or deliver to said company bonds to any amount whatever; and they also deny that the judgment of this Court was a final judgment, compelling them to execute or deliver the bonds specified in the Act of 1863; and they further deny that they ever were or have been bound by law to execute or deliver to the Central Pacific Railroad Company said four hundred bonds; and they insist that said ordinance is wholly illegal and void, on the ground that neither the Board of Supervisors nor the Legislature had any right or power to make the Central Pacific Railroad Company a donation of four hundred thousand dollars, or any other sum of money belonging to the city and county San of Francisco.

The Act of 1863 conferred on the corporate authorities of the city and county of San Francisco certain powers which were not comprehended by the general grant of powers contained in the Act consolidating the Government of said city and county, passed by the Legislature in 1856. By the last section of the Act of 1863 it is declared that this Act shall be in force and take effect from and after its passage. It provided the mode by which the electors, the corporators of the city and county, might express their will in respect to the privilege granted by the Act to take and subscribe to the capital stock of the railroad companies. The duty to submit the proposition to the electors of the city and county as to whether or not stock of the railroad companies should be taken and subscribed for the use, benefit and advantage of San Francisco was imposed on the Board of Supervisors, and the electors were provided with the opportunity of expressing their choice on the subject. The creation of this law did not depend on the vote of the electors, and therefore the objection that was interposed to the Act considered in Barto *vs.* Himrod (4 Selden, 483) is without force as authority touching the Act under examination. (Blanding *vs.* Bun, 13 Cal., 356; The Bank of Rome *vs.* The Village of Rome, 18 N. Y., 41; Staren *vs.* The Town of Genoa, 23 id., 446; Corning *vs.* Greene, 23 Barb., 50; Grant *vs.* Courter, 24 Barb., 242; Clarke *vs.* Rochester, 24 id., 472; Moers *vs.* City of Reading, 21 Penn., 202.

By the choice of the electors of San Francisco, an obligation onerous in its character was assumed, for the purpose of prospective benefits, which it was supposed would accrue to the city and county from the construction of the railroads mentioned in the act, and it has been determined by the judgment of this Court that the Board of Supervisors were in duty bound to take and subscribe, in the name of the city and county of San Francisco, for its use, benefit and advantage, to the capital stock of the Central Pacific Railroad Company, as required by the provisions of the Act of 1863, and also to proceed to direct the Pacific Railroad Loan Commissioners to issue the bonds of the city and county to the Central Pacific Railroad Company, upon the conditions required and specified in and by the provisions of the same Act. The execution of this judgment has been suspended, if not entirely superseded by the joint action of the Board of Supervisors of San Francisco on one part, and the Central Pacific Railroad Company on the other, under and in pursuance of the provisions of the Act of April, 1864. But objections are interposed on the part of the respondents, to the effect, first, that the corporate authorities of San Francisco were not clothed with power to make the compromise agreed upon, and second, that the contingency specified in the proviso of the Act of 1864, and which stands as a condition precedent to the existence of authority in the Board of Supervisors to effect a compromise with the railroad company, has not transpired.

It is denied on behalf of the respondents that the Act of 1864 conferred upon the Board of Supervisors the authority to compromise and settle the claims which accrued to the Central Pacific Railroad Company, in the mode and upon the terms specified in the ordinance set forth. It is said the claim to be compromised and settled was not a claim on the part of the railroad company for money or bonds without a consideration in return, but was a claim to exchange certificates of stock for bonds, and that to settle such a claim is to fix the amount of subscription by reducing it if possible. The Act authorizing a compromise provides for the settlement of the claim of the railroad company for cash or other security in place of bonds claimed by the company, of said city and county, under the previous act. It can hardly be maintained that a settlement of the claim of the railroad by taking a reduced amount of bonds of the city and county without some corresponding benefit to the company would amount to an adjustment of the difference between the parties by compromise. But be this as it may, the statute is simply a grant of power to the Board of Supervisors to compromise and settle the claim of the company for cash or other security in the place of the bonds to be issued under the first Act, upon the happening of the contingency mentioned in the proviso. No other limitation is placed upon the power whenever it might arise than the words of the Act itself import; that is, that the claim to be compromised and settled should be satisfied by cash or other security, in place of the bonds to which the company might be entitled under the Act authorizing the subscription.

It is insisted that the Act of 1864 does not authorize San Francisco to withdraw her subscription from either of the railroad companies. There is nothing obscure or ambiguous in the language of this Act. It seems to us apparent that the authority granted by the Act was to the Board of Supervisors to compromise and settle the claims of the respective companies on such terms as in the wisdom of the board would best conduce to the interests of the city and county of San Francisco, provided such settlement could be made for cash or other security in the place of the bonds specified in the Act of 1863. It is a fact judicially known to us that at the time the Act of 1864 was passed, the case of French *vs.* Teschemacher was pending in this Court, by which it was sought to overthrow, as unconstitutional, the Act of 1863, and in that case we were advised that the plaintiff was in fact the representative of a considerable portion of the electors of the city and county of San Francisco, who were opposed to subscribing for stock of the railroad companies as authorized by the Act of 1863, and by the election held in pursuance of its provisions; and we may well suppose that the Act of 1864 was passed in deference to the opinions of those opposed, and who we are not prepared to say, were not reasonably opposed to the corporation of the city and county of San Francisco becoming a member of the railroad companies mentioned in the Act of 1863. So that if the object of the Act authorizing a compromise is to be sought for in the light of concurring circumstances, we might justly conclude it was designed to give the city and county of San Francisco the opportunity to sever its reluctant connection with these railroad companies by a compromise and settlement affecting such object.

It is claimed, however, that the individual corporators of the city and county acquired rights to the capital stock of the railroad companies as beneficiaries, separate and distinct from the municipal corporation as an entity, of which they cannot be deprived, otherwise than by a majority vote therefor by the electors of the city and county; and, as a consequence, it is maintained that the Legislature had no power to pass an Act conferring on the Board of Supervisors the authority to so compromise and settle the claims of the railroad companies as to divest the individual corporators of these vested rights held in trust for them by the corporate authorities. The answer to all this is, that the corporation of the city and county is the creature of legislative enactment, and in legal contemplation is an entity possessing for many purposes the attributes of individuality; and in the exercise of its legitimate powers can only act by and through its agents, appointed in the mode prescribed by the law of its creation. The Act of incorporation may be altered from time to time or repealed as the Legislature may will it. (Const., Art. 4, Section 31.) The powers of the corporation may be enlarged or restricted, and the Legislature may determine by law who, as the representatives of the corporation, shall exercise the powers granted. Hence it is that the rights of the individual corporators can only be enjoyed in subordination to the power of the Legislature over the subject. A contrary doctrine carried to its ultimate consequences would require the affirmative consent of each individual corporator to every act done by the corporate authorities affecting his interests before he could become bound by such act; the result of which would be to render entirely useless and nugatory the corporate government of the city and county.

The Legislature conferred the authority on the Board of Supervisors to compromise and settle the claims of each of the railroad companies mentioned, for cash or other securities in place of bonds specified in the previous Act, provided it should first be determined by the final judgment of this Court that the board were bound to execute and deliver such bonds. By this Act the board were permitted, in case the conditional contingency transpired, to enter into any compromise and settlement with the Central Pacific Railroad Company coming within the purview of the Act, which in their judgment would best subserve the interests of the city and county. The terms of the compromise and settlement have been agreed to upon the hypothesis that the contingency on which the board were authorized to act has happened; and the railroad company, as a party to that compromise, has the right to its execution, unless the condition on which the authority of the Board of Supervisors depends remains to arise; and this conducts us to the inquiry as to whether the judgment rendered by this Court in the case of the Central Pacific Railroad Company of California against the Board of Supervisors of the city and county of San Francisco, decided in June last, is a final judgment, compelling the board to execute and deliver the bonds specified in the Act of 1863.

It is maintained on the part of the relator that the construction given on behalf of the city and county of San Francisco to the judgment rendered by this Court as a final judgment, compelling the Board of Supervisors to execute and deliver the bonds, is conclusive upon the city and county. We think it would be going beyond any just rule of law to so hold, for the reason that the Board of Supervisors have the power by a construction of the effect of this judgment to assume an authority which depends for its existence upon this precedent condition.

The judgment referred to determined the obligation resting upon the corporation of San Francisco to take and subscribe to the capital stock of the Central Pacific Railroad Company, to be valid and binding, and the Board of Supervisors was required by this judgment to perform the obligation named, and to make an order directing the Pacific Railroad Loan Commissioners to issue the bonds to the Central Pacific Railroad Company upon certain conditions, and in all respects to perform and comply with the provisions and requirements of the Act. The judgment requiring the

bonds to be issued was final, though the conditions upon which the duty to issue the same could only arise as the exigencies of the enterprise in contemplation might transpire, rendering the performance of this duty imperative. The judgment of the Supreme Court was a final judgment as to the obligations of the Board of Supervisors as the corporate authorities of the city and county, and as the conditions on which the bonds required to be issued by the Act of 1863 might become consummate, this judgment could be enforced in case of refusal to issue and deliver the bonds, and therefore to all intents and purposes it was, from the time it was pronounced, a final judgment compelling the Board of Supervisors to execute and deliver the bonds specified in the Act.

It is further objected by the respondents that the Act of 1864 does not confer on the Board of Supervisors the power to compromise with one of the railroad companies without a compromise with the other also, and that therefore the ordinance referred to was passed without authority and is void.

The first section of the Act of 1863 provided for an election for the purpose of submitting to the electors "the proposition for the Board of Supervisors to take and subscribe four hundred thousand dollars to the capital stock of the Western Pacific Railroad Company;" and "a proposition to take and subscribe six hundred thousand dollars to the capital stock of the Central Pacific Railroad Company of California." The elector could not vote for or against taking and subscribing to the stock of one of the companies only. He could only vote for or against the two-fold proposition as a unit. The third section of the same Act authorized the Board of Supervisors, in case the election authorized the subscription, to take and subscribe, in the name of the city and county, to the capital stock of the companies respectively, in the proportions prescribed in the first section, and therefore to pledge the faith of the city and county for the payment of the same in the manner provided in the Act. There is nothing in the Act requiring the Supervisors to deal with the two companies jointly; nor is it provided that the action of one of the companies should at all be dependent upon or be controlled by that of the other. The two companies in their relations to each other sustained an individual independence from the passing of the election, and the rights and obligations of each could not be affected by the action or conduct of the other. There is no reason why the Act should be construed to require a compromise and settlement with one of these companies to be made in connection with a like compromise and settlement with the other. Such a construction of the Act might be attended with embarrassments that would entirely defeat its execution, however much it might be to the benefit and advantage of the city and county of San Francisco to adjust and settle the claim of one of such companies. A construction that would most probably, if not necessarily, be attended with such consequences cannot be adopted in consistency with the settled rules of construction of statutes.

We might extend this opinion to the consideration of other questions suggested by counsel, but we deem it unnecessary, as the conclusion to which we have come would not be changed thereby. After a careful examination of the whole case we are of the opinion that the application should be granted.

It is therefore ordered and adjudged that a peremptory writ of mandamus be issued to the respondents, commanding and requiring them to execute and deliver without delay to the Central Pacific Railroad Company of California the four hundred bonds of said city and county of San Francisco, described in the ordinance hereinbefore referred to, with the interest coupons attached as in said ordinance provided.

We concur: CURREY, J.

SHAFTER, J.

Atlantic and Great Western Railway.

At a meeting of the Directors of the New York, Pennsylvania and Ohio Divisions of the Atlantic and Great Western Railway, held at Meadsville on the 30th ult., the resignations of William Reynolds and Marvin Kent, as Presidents of the Pennsylvania and Ohio Divisions respectively, were tendered to the Boards. James Robb, Esq., was then elected President of the entire line, and Marvin Kent Vice President of the Ohio Division. The Urbana *Citizen* says:

Things present quite a lively appearance at the depot of the Atlantic and Great Western road in this place. The cars depart every morning for Marion, and return in the evening on time. The change in the track here is a decided improvement, as it has straightened the road. The Freight Exchange House is about completed, and the Telegraph House at the south end is now occupied for that purpose. The company is now erecting a commodious carpenter shop, and have an immense amount of lumber piled along the track. The erection of the new depot building will soon be commenced.

At Dayton, the company intend erecting a round house, a depot, and mammoth machine shops, having already purchased a site, comprising some 30 acres, on the east side of Mad River, for the purpose.

James McHenry, Esq., the great financier of the road, has returned to England. During his stay in this country, he made the tour of the road from New York to St. Louis, and was highly pleased with the enterprise, and the country through which the road passes. The impression that he is an Englishman is erroneous. He is a Pennsylvanian by birth, but has for some years resided in London, employing his capital at that point as a centre for his operations. He is every whit an American, his munificence is unbounded, and we think we are safe in saying, that no capitalist in this or any other country, makes more judicious investments of his means.

Interest and Dividends.

The Cleveland and Toledo Railroad Company have declared a semi-annual dividened of 5 per cent (free of Government Tax), payable at the Continental Bank New York, on the 25th inst., until the 20th day of November next, and after that date at the Company's Office in Cleveland.

The Central Railroad Company of New Jersey will pay, on the 15th instant, a quarterly dividend of 2½ per cent., free of tax.

Pittsburg and Connellsville Railroad.

The people of Pittsburg and its vicinity are complaining very bitterly of the failure of the "Slack Water Company" to keep open the navigation of the Monongahela River. The recent discovery of coal oil in Greene County, on the Monongahela, has greatly increased the necessity of free communication between that region and Pittsburg, and the Pittsburg papers say that the "contempt with which the Slack Water Company treats the complaints made against the state of the locks and dams" has revived the project to procure a charter allowing the Pittsburg and Connellsville Railroad Company to build a railway up the valley of the Monongahela River to New Geneva. The Monongahela *Republican*, alluding to the subject, says: "Mr. Latrobe, the President of the Connellsville Railroad Company, and Mr. Stewart, of Monongahela, in a recent conversation with capitalists and coal merchants in Pittsburg, representing several millions of dollars, found a unanimous verdict in favor of the contemplated project." An application will be made to the next Legislature to authorize the Pittsburg and Connellsville Railroad Company to build the proposed road.

Morris and Essex Railroad.

The Morris and Essex Railroad Company are engaged in preparations for building the new coal branch of their line, from near Rockaway *via* Boonton, to Montclair, and thence over the Newark and Bloomfield Railroad to Newark. The route has already been surveyed, the iron purchased, and the line is now being located, but it is not decided whether ground will be broken this fall, or delayed until spring. Mr. J. B. Bassinger, the late efficient Superintendent, is devoting his whole attention to his duties as Chief Engineer of the road, and is superintending the construction of the extension from Hackettstown to Phillipsburg.

The company has recently erected a commodious repair shop in this city, extending from the line of their road to Orange street, which will materially accommodate the increasing business of the road. A new engine house has also been constructed, with a new transfer table, which will be a necessity so soon as the new engines, now in the course of construction, are received. We understand that several new passenger cars are also being built for the company. The double track is now used as far as Roseville, and will be continued to South Orange as speedily as possible. —*Newark Advertiser, Sept.* 23.

Pittsburg and Steubenville Railroad.

The work on this road is being pushed forward with great energy. The bridge over the Ohio River at Steubenville, is assuming proportions, and construction trains are running from Steubenville to Noblestown, a distance of twenty-eight miles. The work at the other end of the road is also rapidly approaching completion, and a large number of masons and laborers are engaged upon the heavy masonry at South Pittsburg. The bridge over the Monongahela, river is progressing satisfactorily. It is supposed that the road will be finished about the first of January next.—*Wheeling Intelligencer.*

Lehigh Valley Railroad.

The Beaver Meadow Road, 24½ miles long, double track, extending from Mauch Chunk up the Lehigh River bank, to Penn Haven, thence up the Quakake and Beaver Creeks to Audenried, and the Penn Haven and White Haven road, 16 miles long, single track, extending from Penn Haven up the Lehigh River bank to White Haven, having been merged and consolidated in the Lehigh Valley Railway, the last named road is now an intact continuous line from Easton to White Haven, 70 miles, with a branch from Penn Haven to Audenried, 16 miles, and an auxiliary line, the Lehigh and Mahanoy, 40 miles long, reaching to the Shamokin Valley and Pottsville Railway.—*Fernon.*

Huntingdon and Broad Top Mt. Railroad.

The Bedford Railroad, 13 miles long, from Hopewell to Mt. Dallas, having been merged and consolidated in the Huntingdon and Broad Top Mountain Railroad, the latter being now 44 miles long, and reaching from Huntingdon to Mt. Dallas, is a road of considerable length and growing consequence; for beside 44 miles of main road, with 6 miles of sidings, there is the Shoup's Run branch, 9¼ miles long, with 8 miles of sidings, the Six Mile Run branch, 4½ miles long, with 2 miles of sidings, and the Sandy Run branch, 1 mile long, with ¼ mile of sidings—making, altogether, 58½ miles of main and branch road, and 11¼ miles of sidings, or a total trackway of 69¾ miles. Six and a half miles of road from Mt. Dallas will carry the road to Bedford, there to terminate.—*Fernon.*

☞ At a recent meeting of the directors of the Fitchburg and Worcester Railroad Company, Ivers Philips was chosen President, H. A. Blood, Superintendent, and H. F. Coggshall, Treasurer.

☞ The Commissioner of Internal Revenue has decided that interest upon coupons due and payable prior to Sept. 1, 1862, cannot be taxed if paid after that date.

American Railroad Journal.

Saturday, October 15, 1864.

Stock Exchange and Money Market.

The last arrivals from England bring us news that many large failures have occurred in its commercial circles, and that the Bank of England is buying gold, which is very significant. A crisis long expected seems to be at hand, produced by over speculation in cotton, and the violation of the Queen's proclamation by blockade running and a dry goods conspiracy to destroy the United States by furnishing supplies to the Southern Confederates. There seems to be not only poetical but substantial justice in the revulsion with which English finance and speculation are now visited. Had England honorably refused to encourage the rebellion, if its leading presses had not sustained it, if privateers had not been permitted to go out of English ports to prey upon American commerce, the rebellion would have been suppressed twelve months ago, cotton would have been as plenty and as cheap as ever, and there would have been no drain of gold to India and Egypt. While a few English houses have succeeded in making fortunes out of this illegitimate and unfriendly traffic, a large number of operators in Contraband have gone by the board, as may be seen by the failures continually announced in the newspapers, by the lists of captured blockade runners, and the numberless reclamations filed with the British Government for damages against this country for the captures made by our Navy. We imagine that the difficulties thus announced by the last two or three arrivals are by no means at an end. The English cotton market is over crowded by speculation, and the fall of 12 cents a pound to be succeeded by a still further decline, is likely to knock over every house that has merely trusted to credit and good luck. While this Country unaided, without foreign friends, with little foreign sympathy, on the contrary against an active and bitter enmity abroad, has sustained itself under the grave and distressing pressure of a civil war of the vastest proportions, the country of all others which should have been with us in our struggle for the maintenance of our liberty and unity, is the one to suffer most for its insincerity and want of good faith. While we have demonstrated the immensity of our resources, and the courage of our people, equal to any and every emergency, we have seen and are now seeing that mere commercial cleverness is not enough to secure National prosperity, that the largest trade is not always the most secure, and that the influx of gold does not gild the pavements over which it is carried. There is at this moment less commercial embarrassment in the loyal states in the midst of war and taxation than there is in diplomatic and peace-at-any-price England.

Nor have we much to fear from these foreign failures or panics. There has been studiously and pertinaciously cherished among certain foreign merchants and bankers a distrust of American solvency, so that what we have purchased we have paid for in cash. Those American houses can only suffer therefore by any crash in England which are working here on its capital, and by the medium of agencies, or as dealers in exchange on a credit, or speculators in gold. We may therefore safely conclude that any financial storm that vexes the coast of Albion, will hardly reach our shores, or if it does that it will not do much damage.

The gold market has been tranquil the last week, the fluctuations having been moderate. The rates have not as rapidly declined as many have supposed, nor advanced as many predicted. The price of the article does not seem to have settled yet to the mark at which it would fairly represent its real relation to paper. Much depends on the United States Treasury, and much at this moment perhaps on the National Banks. If the Secretary keeps to the policy of curtailing everything he can in the shape of currency, and the latter do not discount too largely to speculators in produce of all kinds, we may count on a further decline in gold. For outside of this cause for its advance, there is none other. Our imports are not so large as our exports, even if the latter are estimated in currency, and there is no domestic demand for it except for customs. The late mails

from England brought back protests of several hundred thousand dollars of bills drawn by at least one concern, engaged in keeping up the price of gold and stimulating the unjustifiable speculation. And as we now learn by the Europa, the failures are continuing and money is growing scarcer, we may expect to find the fancy bills of exchange which have been so numerous in the street will cease to find purchasers. A bill drawn against gold, which has tumbled 80 or 90 per cent in a few weeks, and is to fall still further, is not likely to be paid, if the remitter has to find the funds. The future of this whole question depends much on the action of the next Congress, much more than we might at first suppose. Taking for granted that the war is near its close, which now seems to be the general opinion, the legislation of the next Congress will necessarily be conformed to the new state of things, and it will require great skill, caution and firmness to shape the future action of the Treasury, reduce all unnecessary expenditure and place the revenues on a permanent footing, so that there shall be no doubt, or irregularity in its operations. The people should bear this in mind when voting for their representatives, and should vote only for the wisest and honestest candidates. For the burthen of taxation will be less and less every year after the war is ended, because the population and resources of the country are being annually developed on an enormous scale, and legislation must have regard to this important fact. We quote, as we have often before quoted, from the writings of Dr. Elder, who has given the subject more consideration perhaps than any other political economist and statician in this Country.

The increase of population from 1800 to 1860 was 125 per cent.; from 1840 to 1850 64 per cent. In England from 1850 to 1860 it was 32 per cent.; from 1840 to 1850, 16 per cent—a like ratio of increase.

On the 30th of September our known debt was 1956 millions—bearing interest, 87 millions; not bearing interest, 457 millions. Value of loyal States, 10,000 millions. Increase 125 per cent., equal to 8⅛ per cent per annum at compound interest. Everything is at compound interest. Taking that as the rate of increase for the future, in 1870 it will be 2400 millions; in 1880 the value of the loyal States will be 53,676 millions with 3000 millions of debt. The interest on 3000 millions, at 5 per cent., the average now, in 1866 will be 3 1-10 per cent. of the productions of that year; in 1880, 1 3-10 per cent., assuming that the growth will not exceed the ratio of the past.

He thinks the debt, enormous as it is, a mere bagatelle in the giant hands of this great country. The full debt to-day does not exceed two thousand millions."

And all the money which has been received by the Government from the people, has gone as we should remember, back into their hands, and is in the Country. That is a remarkable circumstance, quite different from the ordinary disposition of Government loans, with perhaps the single exception of those of Great Britain, the people of which like our own are the chief creditors of their Country. This makes an essential difference, and one greatly in our favor.

To return to the gold market, it is believed that our Cotton mills are in the combination as it stands at present, just as much as the large importers of foreign goods for the auction houses. These mills are loaded with goods manufactured from cotton at high prices, and they are nearly unsaleable. But having made enormous sums by the war, they cannot only stop work, but hold their stocks for a scarcity, and even spend a few thousand in keeping up the price for a time until they can run off what they have on hand. We may therefore find the price of gold sustained at near its present quotations some time longer than was expected. But a fall of a few pence more in cotton in Liverpool will have its effect upon them, and no combination can keep out cheap cotton goods from the market, if the English want money, and here they can always get it if they fail everywhere else.

Since the return of the protested bills alluded to, purchasers are rather shy of exchange, while the strongest houses ask a little more than previous quotations as a concession to their responsibility. The auction sales of imported goods are without life and spirit, and being almost entirely for foreign account, do not unsettle the money market for remittances either in gold or exchange.

The Stock Market is quiet, Governments remaining firm, and a favorable reaction going on in Railway shares, as will be seen by reference to our report of sales for the week.

The week's Exports of Domestic Produce and Miscellaneous Goods have been quite heavy, having amounted $5,452,800, against $2,229,534 the same week last year.

The balance in the Sub-Treasury on Tuesday was $27,736,098 39.

Among the financial news announced in the late foreign journals, are two items of singular interest to American readers. Two of the strongest men in the London money circles have retired from it; Joshua Bates of the house of Baring, Brothers & Co., by the act of death, and George Peabody by his own. Both these clever and successful men, by birth Americans and New Englanders, have held a high place among the merchants and Bankers of England, and have been able representative men throughout their career. Mr. Peabody it is understood will spend the remainder of his days in his native Country.

It is believed that the new loan has been fully bid for, though the offers will not be at so high a rate as previously. It is well enough here to state, that by late advices we learn, our American 5-20's were in demand in London. The subscriptions to the 7-30 currency Treasury notes are large, the amount received the last week being about $4,021,000. The money market remains easy, quite in contrast with that of London, where 9 per cent. or 18 cents of our money is still the rate with the Bank of England, on the best securities, the demand being heavy, and the money brokers failing in numbers. The Petroleum Exchange is being rapidly organized in this city. The production of the oil, the increasing markets for it, and the fact that it is rapidly growing into a vast article of export, makes it quite necessary that it should be handled as skillfully as any other of our national products.

"Corn wine and oil" were in old times the greatest wealth of Eastern nations. The Empire of the West has a greater supply than any of those in their best days.

The exports from New York for the same week were $5,452,800 against $2,229,534 in 1863, and $4,444,881 in 1862. The shipments of specie since January 1, have been $35,566,559. The exports since January 1, have been $172,411,556 against $135,386,184, in 1863, an increase of $47,025,372. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to October 8, was $57,453,469.

The value of foreign goods imported into the port of Boston for the week ending October 7, was $303,108, against $884,877 for the corresponding week in 1863. The exports were $451,667 against $334,458 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $54,560.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Counting-Rooms and Offices.

In nothing has there been so marked an improvement of late years, as in the fitting up and furnishing of offices. It was once the custom for men of business to occupy the most unseemly and comfortless places in the pursuit of their professions. But all this is changed. Sensible people have found out that when they are obliged to spend the greater part of the day over their books and desks, they should do so under agreeable surroundings, and cold floors with the wind rushing up from every crack are destructive to the health.

Conforming to this new and received opinion, Doremus & Nixon, No. 45 Warren street, offer for sale, carpets of various qualities and prices, made expressly for offices, which are fitted up at short notice and in the best manner.

Accident on the Harlem Railway.

Although the recent railway accident which occurred to the down passengers on Tuesday last on the New Haven train, may be legally laid to the account of the New Haven Company, yet in fact the blame may justly be charged to the Harlem. For the former company pays a large sum annually to the latter for the use of its track for a certain number of miles out of the city. And by the spirit if not the words of the contract, this should be kept in perfect repair. So that if the New Haven is mulcted in damages for the injuries received by the unfortunate passengers, it may turn upon the Harlem and recoup for what it has to pay.

It is indeed a most scandalous neglect in the company to permit a rotten superstructure to go without repair, and thus subject valuable lives to such frightful dangers.

The truth is, the Harlem from being well and scientifically managed as it was under a former President, is now in hands more conversant with stock jobbing than practical engineering. If they can make a corner in the street, they are quite indifferent to a crash on the road. If they can get large profits out the manipulation of the shares, they are utterly indifferent as to declaring a dividend.

Railway travelling can never be safe unless the utmost vigilance is daily and hourly exercised in keeping the permanent way in perfect order, and this cannot be done by ignorant men, no matter how wealthy they may be.

New York and Boston Air Line Railroad.

At the annual meeting of this company held at Middletown, Conn., on the 5th inst., the following gentlemen were elected Directors for the ensuing year: N. C. Munson, Geo. O. Shattuck, Edwin F. Waters, S. F. Plimpton, Thos. Upham of Massachusetts; Gov. John A. Gilmore of New Hampshire; Edward Learned of New York; L. A. Cook, Daniel S. Whipple of Rhode Island; Benjamin Douglas, Sabin L. Sales, Nathaniel Hayward and John Woodruff of Connecticut.

The stockholders voted to carry out the new contract for the construction of the road. The contractors are now pushing the work on the line between Woonsocket and Dayville, up the Pascoag Valley, with energy. Some hundreds of laborers are already employed, and the number is daily increasing.

American Cast Steel.

It is now an established fact that American Cast Steel is fast superseding the similar article of British manufacture, of which such large quantities have hitherto been imported into this Country. And there is no good reason why it should not supersede it. We have all the varieties of iron that have been hitherto worked in Europe or Asia, and how many more, depends on the exploration of our geologists, for the field of inquiry is as yet vast and wide spread, and also on the skill of our metallurgists in refining the ores and converting them into steel. The progress making is in keeping with our advance in all the useful arts.

At Pittsburg where coal and iron are abundant, there have been applied successfully the skill and labor necessary to its production, and the manufacturers who have specially distinguished themselves in this branch of the iron trade are the well known firm of Hussey, Wells & Co., whose extensive operations are justly attracting the attention of our workers in the metal. Their works which in 1859, were but 12 small furnaces employing 25 men, are now 90 in number and are shortly to be increased to 120. Their expenses daily in coal and crucibles are even now little short of $1,000. The admirable machinery used by them is of great size and strength, of which the principal steam hammer is a specimen. This can strike a blow of the weight of 6,000 lbs! From this factory is produced the finest qualities of cast steel, supplying the mechanics of New England, the miners of Lake Superior and of Colorado, with their most efficient tools; and our principal sword makers, plough makers, and spring makers with their best material. The product per day of these works of Hussey, Wells & Co., are about 20 tons.

We especially commend the use of their cast steel to those Railway Companies, who wish to have their locomotive engines and cars well supported, and strongly put together, as a matter of economy for themselves, and a duty they owe to their patrons the public.

Toledo and Wabash Railroad.

At the annual meeting of the stockholders of this company held at Toledo on the 5th inst., the following gentlemen were chosen directors for the ensuing year: James Spears, Isaac H. Knox, William Baker, George Cecil, William Kidd, Robert Brackenridge, James R. Jesup, Edward Wells, Henry Keep, William Kent, John Ross, Warren Colburn, William Williams, and John N. Drummond.

At a subsequent meeting of the board, the following officers were elected: A. Boody, President; Warren Colburn, Vice President, and J. N. Drummond, Secretary and Treasurer.

The earnings of the road from January 1 to October 1, 1864, were $1,343,288
Corresponding period of previous year. 1,043,043

Increase $300,245

The increase for the remaining three months of the year is expected to be in much larger proportion to last season.

☞ It is said the new railroad to connect the Grand Trunk at St. Johns with the Vermont Central at Swanton is to be opened on the first of next month for traffic. This will be a great convenience to a large portion of Missisquoi.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of September, compared with the same period last year, were as follows, viz:

	1864.	1863.
Freight	$390,449 58	$283,997 77
Passengers	293,756 32	160,609 18
Express matter	5,200 20	2,700 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 34	7,083 34
Miscellaneous	1,660 00	1,293 74
Total	$705,974 44	$463,508 98
Increase		$242,465 46
En'gs fr. Jan. 1 to Sept. 30	$4,833,518 41	$3,673,178 03

The business of the Illinois Central Railroad for the month of September, 1864:

LAND DEPARTMENT.

Acres construction lands sold	21,660.50 for	$239,381 61
Acres Interest Fund Land sold	600.00 "	8,587 40
Acres Free Lands sold	2,506.91 "	34,717 16
Total sales during month of Sept. 1864	24,767.41 for	$282,686 17
To which add town lot sales		2,835 00
Total of all		$285,521 17
Acres sold since Jan. 1, 1864	214,647.26 for	$2,300,085.44
Cash collected in September		$305,599 77

TRAFFIC DEPARTMENT.

Receipts from passengers	$376,731 97
" freight	474,272 20
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in month of Sept., 1864	$767,363 50
Total receipts in month of Sept., 1863	478,576 49
Increase	$288,787 01

The traffic of the Cincinnati and Chicago Air-Line Railroad for the month of September was:

	1864.	1863.
Freight	$35,349 69	$22,136 30
Passengers	45,244 70	26,020 13
Mail, express & sundries	4,712 95	3,328 74
	$85,307 34	$51,485 17

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Sept., 1864, were $398,820 00
Corresponding month of previous year 300,822 00
Increase $97,498 00

The earnings of the Chicago and Rock Island Railroad Company for the month of Sept., 1864, were $307,000 00
Corresponding month of previous year 209,103 00
Increase $97,897 00

The earnings of the Toledo and Wabash Railroad for the month of Sept., 1864 $243,940 00
Corresponding month of 1863 120,595 00
Increase $122,345 00

The earnings of the Chicago and Northwestern Railway for the month of Sept., 1863 and 1864, were:

	1863.	1864.
Passenger	$120,097 56	$194,803 82
Freight	340,695 57	449,344 75
Express	4,013 92	5,593 62
Mail	5,144 48	5,622 51
Total	$478,186 12	$655,364 20
Increase 38 47-100 per cent	185,412 67	

Atlantic and Great Western Railway.

The following is the traffic of the Atlantic and Great Western Railway since Jan. 1, 322 miles being opened:

	Passengers, &c.	Freight.	Total.
January	$38,615	$168,683	$207,298
February	50,189	178,852	229,041
March	60,518	166,215	226,733
April	63,992	133,275	197,267
May	57,193	157,486	214,679
June	73,654	240,867	314,521
July	82,665	249,433	332,098
August	95,077	310,999	406,076
September	135,502	310,542	446,044
Total	$657,405	$1,916,352	$2,573,757

Railroad Earnings--Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Sept. 31, 1864, were:

	1864.	1863.
Passengers	$4,579 07	$3,365 72
Freight	14,535 09	16,160 80
Express	104 16	75 00
Mails	296 58	296 58
Total	$19,514 90	$19,898 10

Receipts from January 1st to Sept. 31:

1864	$429,070 05
1863	281,700 99
Increase	$147,369 06

The earnings of the Marietta and Cincinnati Railroad for the 4th week in September:

	1864.	1863.
Passengers	$17,887 51	$13,706 15
Freight	12,294 04	14,475 65
Mail, express & telegraph	1,419 02	1,050 41
Total	$31,600 57	$29,232 21
Total this month to date	96,062 36	77,112 14
Total since Jan. 1	$737,374 06	$481,539 75

The earnings of the Grand Trunk Railway for the week ending Oct. 1st, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were: $119,447 00
Corresponding week, 1863 113,647 00
Increase $5,800 00

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the 4th week in September:

	1863.	1864.
Passengers	$41,523 83	$67,180 18
Freight	109,719 06	147,385 38
Express	1,003 48	1,373 96
Mail	1,286 13	1,405 64
Total	153,532 50	217,345 16

Increase 41 56-100 per cent $63,812 66

From June 1, to Sept. 20, 1864, (4 months) the earnings were $2,220,525 44, against $1,417,509 46 in 1863—an increase of $803,015 98.

The earnings of the Chicago and Alton Railroad Company for the week ending Oct. 7, were:

	1864.	1863.
Passengers	$30,749 80	$15,116 45
Freight	32,880 61	22,995 31
Sundries	1,276 50	1,606 46
Total	$64,906 91	$39,718 22
Increase 1864		$25,188 69

The earnings of the Michigan Central Railroad for the 1st week in Oct., 1864, were $85,425 81
Corresponding week of previous year 71,222 33
Increase $14,208 48

The traffic of the Great Western Railroad for the week ending Sept. 30th, 1864, was as follows:

Passengers	$50,634 60
Freight and live stock	29,392 20
Mails and sundries	1,360 44
Total	$81,387 24
Corresponding week of 1863	62,354 63
Increase	$19,032 61

The Oil-Wells of America.

The American petroleum trade has so suddenly sprung up into vast importance that one might easily suppose the article itself to be a novelty. So far from this, however, it has been known and employed in the arts from the most ancient times. Egyptian mummies are in existence of which the cerements bear traces of the petroleum in which they had been steeped to preserve them from the ravages of time. Herodotus mentions that petroleum was largely used in the construction of the walls and towers of Babylon, and traces of it may still be found among the ruins of Nineveh. The oil-springs of Is, situated about 120 miles above Babylon, on a tributary of the Euphrates, attracted the attention of Alexander, and are still in existence. On one of the Ionian Islands there is a spring which has been flowing for 2000 years. The springs of Rangoon, in the Burman Empire 520 in number, have been worked for ages, and they now yield annually 400,000 hogsheads of oil. Petroleum has been found in later times in many other parts of the globe, including Clermont and Gobian, in France. The celebrated "Pitch Lake" of Trinidad is filled with a bituminous substance formed by the evaporation of this oil.

Even in America petroleum is not a novelty. In Pennsylvania and Western Canada, at the spots where the recent discoveries were made, some ancient oil-wells are still to be found, and large trees are now growing in the earth thrown out of these wells, affording incontestible proof of their great antiquity. The early English and French settlers seem to have known nothing of petroleum, and when, in 1836 and 1844, mention was publicly made of certain oil-springs at Little Kanawha, Virginia, and of liquid bitumen in Western Canada, the discoveries attracted little or no attention. It was not till 1857 that operations were commenced for the distillation of the bitumen at Enniskillen, in Canada; and the operators then speedily discovered that by sinking wells a similar material might be obtained in a fluid state. Large quantities of oil were thus produced. Two years later a well was sunk to the depth of 70 feet, near to the ancient wells already referred to, in Venango, in the State of Pennsylvania. The oil flowed with such force that for many weeks 1,000 gallons per day were obtained from this well. Other wells were speedily sunk, many of which yielded large quantities of oil.

In some districts the earth is saturated with the oil, and, occasionally, a porous sandstone or limestone will yield considerable quantities. More commonly, however, the oil is collected in fissures in the rocks, at various depths below the surface. In some cases an ample supply of oil is obtained at 40 feet, deep, while other wells are sunk as low as 120 feet to 160 feet. In Titusville, Pennsylvania, there are wells of the depth of 500 feet. Usually, when the oil is reached, the pressure of gas in the fissure forces it up, and it flows for some time to the surface. As soon as the oil has ceased flowing a pump is employed. Sometimes the oil continues to flow spontaneously, and with such force as to defy every effort to control it.

Different opinions prevail in regard to the origin of petroleum. There can be no doubt that it has been derived in some way or other from organic remains; but whether by a slow process of distillation at a low temperature, or by simple decomposition, there is at present no sufficient evidence to decide.

The quantity of oil yielded by the wells varies considerably, some wells producing only ten barrels per day, and others as much as 300 barrels.

It is probable that the total yield of oil in America is, at the least, 150,000 gallons per day. The method of working is very rude and imperfect, and, with better machinery, much larger quantities of oil may be obtained. The following figures show the rapid progress of the trade in this article. In 1861, 37,082 barrels of petroleum were exported from America; in the following year the number of barrels reached 362,593; and in the first six months of 1863 it was no less than 568,535.

I may be well to remark, that a large quantity of the oil which comes from America has not been freed from inflammable spirit, the presence of which constitutes the only source of danger. But if consumers would be careful to obtain only some well-known brand, they might use petroleum with perfect safety. The brilliant and colorless oil, so popularly known as the "patent cazeline oil," affords a most powerful light at a very moderate cost, and is quite free from every objectionable quality.

The discovery of the oil-wells, and of the valuable properties of petroleum, would have been only of limited advantage to the world without adequate means of transport. When the first wells were sunk in Oil Creek the oil was collected in casks, and conveyed by long trains of carts, slowly and wearily, over roads of the roughest description; or the casks were lashed together to form rafts, which were then floated along the shallow rivers, often with considerable loss of the oil. The value of the oil was thus greatly enhanced by the cost and risk of carriage, and the price to the consumer was necessarily much higher than it should have been. But after a little while a railway was seen pushing its way through the woods and swamps at the rate of a mile per day, and the requisite facilities of carriage were provided.

The Atlantic and Great Western is a very remarkable railway—remarkable in respect to its origin, the circumstances of its construction, and its future prospects. From New York a railway runs in a north-westerly direction to Lake Erie. Another railway, whose direction is nearly due west, connects the important western city of St. Louis with the cities of Cincinnati and Dayton. About thirteen years ago, when these two railways were yet unfinished, a manufacturer living in Ohio conceived the idea of constructing a line of 400 miles in length, to connect the two, and thus to form one grand direct line from New York to St. Louis. With much difficulty he obtained the requisite powers for constructing the railway, but the scheme was not regarded with favor by the American public, and it appeared likely to fail for lack of support. The project, however, had attracted the attention of Mr. James M'Henry, of London, who was in correspondence with M. De Salamanca, an eminent Spanish capitalist, and other men of resources equal to his own, and of sagacity equal to their resources. Mr. M'Henry discerned in this unfortunate railway, which no one would support, the elements of a great success. The report of Mr. Kennard, a skilful engineer who visited the route, confirmed him in this opinion; and, although America was now on the verge of civil war, he determined to construct the line at once. The question of money did not trouble Mr. M'Henry and his friends. To obviate all difficulty on this score, they began the work at their own risk, and they did not ask the public to subscribe a farthing until a section of the line had been completed, which they could offer as a material guarantee. In the spring of 1862 the work was commenced, 5,000 laborers having been carried from England for the purpose, and, notwithstanding all the difficulties arising from the civil war, the progress was so rapid that, at the end of the year, 200 miles were completed in as many days. The main line is now open from Salamanca, on the New York and Erie Railway, to Dayton, thus establishing direct communication between New York and St. Louis, a distance of 1,200 miles without change of carriage. Two important branches have already been constructed; one, of sixty-seven miles in length, to Cleveland, the great port of Lake Erie; and one of fifty-four miles, to Franklin and Titusville, passing through the oil region.

It is now evident that this railway, constructed under every kind of discouragement by a few enterprising individuals, is destined to become one of the greatest and most prosperous undertakings in the world. It passes through the most fertile portions of the States of New York, Pennsylvania, and Ohio, the internal traffic of which is very great; and even in the uncultivated districts which it traverses towns and villages, are springing up on every hand. The oil traffic is of itself greater than the line can at present carry, and will provide employment for largely increased means of transport. But the line has other and still more important sources of income. Other western lines are unfavorably noted for their frequent breaks of gauge, involving changes of carriages, circuitous routes, and steep gradients; but this railway, being free from these defects, will undoubtedly become the great highway from the Far West, to the Atlantic. The farmers of the grain-producing prairies, who have frequently burnt their corn as fuel because the cost of transport was so great, will now be provided with ready means of conveyance to the markets of the New and the Old World. When peace is restored, the new line will also gather up the cotton of the neighboring Southern States and convey it to New York. A bridge over the Niagara will form the connecting link between the Atlantic and Great Western and the leading railways of Canada West, conferring great benefits on the inhabitants of the British possessions, and greatly extending the traffic. There is no coal in Western Canada, but this railway will convey thither an unlimited supply from the Pennsylvania coal-fields, and receive back the grain of the Canadian farmers for direct conveyance to the Atlantic ports.

The returns from the Atlantic and Great Western Railway already amount to between £50 and £60 per mile per week; when they reach the larger amount it is expected that the line will pay the handsome dividend of 25 per cent to its shareholders. Our Engraving taken from a photograph, represents the Franklin station, at Oil Creek Pennsylvania; some of the sheds and other rude apparatus of the oil-wells are visible in the distance.—*London Illustrated Times.*

Western Maryland Railroad.

A number of capitalists mostly of Baltimore, having in view the speedy completion of this road, purpose extending it from Hagarstown, to the Coal regions in Allegheny County. We learn that a corps of engineers is now engaged in making a preliminary survey for this route, and that so far they have progressed very favorably—the course taken proving practicable. Baltimore being in direct railroad communication with the district of country above mentioned, it is contended that coal could be transported to that city at greatly reduced rates. The Hagerstown *Mail*, in urging the project says:

The road once built, the value of the fertile lands lying near it would be very greatly enhanced. The mountain lands in the western parts of our county and in Alleghany county, now worth comparatively little, would have their value incalculably increased by the developement of the mineral riches which now lie buried in their bosoms. Intercourse, too, would be greatly augmented between the extreme parts of our State. We would be brought into communication with Cumberland, the second city in the State in point of size and commercial prosperity, but now almost completely isolated by intervening mountain chains.

A charter was obtained for this route from the last legislature, and from the spirit with which the matter has been taken hold of, it is not unlikely the road will be built. It is said that a number of New York capitalists are interested in the project.

Boston and Maine Railroad.

The annual meeting of the stockholders of this company was held at Lawrence on the 14th ult. The following gentlemen were elected directors for the ensuing year: Israel M. Spelman, President; James H. Duncan, Geo. W. Kittredge, Daniel M. Christie, Peter T. Homer, Henry Saltonstall, and Nathaniel G. White.

From the report which was presented we learn that the receipts of the road during the year ending May 31, 1864, were:

From passengers		$687,347 45
From freight		359,266 29
From rents (including Methuen Br.)		18,967 53
From mails		9,983 96
From interest and dividends		8,865 50
From surplus earnings of Portland, Saco and Portsmouth Railroad		32,500 00
Total gross receipts		$1,116,930 82
The expenses, including renewals, depreciation and all taxes except tax on dividends have been		635,031 72
Net earnings		$481,899 10
From which deduct two dividends of four per cent. each	$328,456 00	
U. S. tax on same	10,158 42	
And amount paid on Charles River draw accident since June 1, 1863	26,968 77	
		$365,583 19
The surplus of the year is		$116,315 91
To which, add the amount received for locomotive sold above its valuation on the books		7,500 00
Amount carried to undivided earnings for the past year		$123,815 91

The gross receipts exceed those of the year ending May 31, 1863, by the amount of $170,950 78; the net earnings are $31,597 14 larger.

During the three months ending August 31, 1864, the receipts of the road have been $347,832 and the expenses $207,486—showing an excess of receipts over expenditures of $140,346, or about three and a half per cent. on the capital stock.

Brockville and Ottawa Railway.

This company inform the people of the Upper Ottawa that they will be in a position to convey passengers and freight on or about the 1st of November. Opposition will then commence between three rival lines—the cars with the Union Forwarding Company to Arnprior, and the Gould line from Arnprior up. From that wharf it is said a steamer will be built to connect with their own line *via* Pembrook.—*Montreal Gazette.*

☞ The following gentlemen have been re-elected Directors of the Erie Railway Company: Samuel Marsh, Daniel Drew, John Arnot, William B. Skidmore, Cornelius Vanderbilt, Robert H. Berdell, Dudley S. Gregory, Ralph Meade, Ambrose S. Murray, William Evans, J. C. Bancroft Davis, H. L. Pierson, D. A. Cushman, Alexander S. Diven, Thomas W. Gale, Isaac N. Phelps, Horatio N. Otis.

☞ Holders of unendorsed bonds and other creditors and stockholders of the Northwestern Virginia Railroad Company are notified that the time for signing the agreement for the capitalization of the company, expires on the 1st of November.

☞ Pittsburg, (Pa.) has forty-six foundries consuming forty-six thousand tons of metal annually, and paying a million of dollars in wages.

☞ At a special meeting of the Ottawa City Council, held on the 7th inst., a letter was received "from the Solicitor of the Grand Trunk Railway Company, stating that unless some arrangement was effected between the Ebbwvale Company and the City of Ottawa, the Grand Trunk Company would remove the rolling stock; also a letter from R. Bell, Esq., President of the Ottawa and Prescott Railway Company, stating that the sheriff had notified him of his intention to seize upon the rolling stock, and asking the Mayor to become security for its being forthcoming on the day of the sale." A resolution was thereupon adopted by the City Council appointing a special committee to report upon the matter, and take such steps as may be deemed advisable to protect the interests of the corporation.

☞ The condition of the Susquehanna and Wyoming Valley Railroad and Coal Company on the 1st of June last, was as follows:

1,400 acres land, cost	$800,000
200 acres town lots, in Scranton	488,000
Improvements, depot at Elizabethport, cars, boats, rolling stock, coal on hand and cash assets, exclusive of earned profits	200,000
Total	$1,488,000
Seven per cent. mortgage bonds	350,000
22,760 shares stock, at $50 each	$1,138,000

☞ The City Treasurer of Philadelphia will pay on presentation on all City Loans maturing January 1, 1865, with interest to date of payment.

☞ The Baltimore and Ohio Railroad has been re-opened throughout its entire length. The trains now run through from Baltimore to Wheeling. The track has not only been relaid but sidings put down, and every preparation made to keep the road open permanently for trade, travel and military uses.

American Railroad Journal.

New York, Saturday, October 22, 1864.

Wealth and Resources of the State of New York.

We propose as opportunity permits, to give a succinct account of the wealth and resources of the great loyal States of the Union, in order to show the extent of the one and the magnitude of the other. Our abstract is made up from the Census of 1860, and an able statistical work of Dr. Fisher. From this our readers will be able at a glance to see how splendid has been our progress under our matchless Union and the Constitution, which created us a nation out of a heterogeneous mass of dependent colonies, afterwards a weak and precarious confederation, and invested us for the first time with the insignia of a real National sovereignty. There never was any before, though it was often attempted to be shown by the enemies of our present system, particularly by the insurgent confederates that the Union is no Union, and that each State from the beginning was a sovereignty. The area of the State of New York is 47,000 square miles or 30,080,000 acres. The population by the last census was 3,880,785 being about 83½ persons to the square mile. The rate of increase from 1850 to 1860 was over 25 per cent, or 2½ per cent per annum. This would from 1860 to 1864, taken in the aggregate be 10 per cent, so that at that rate our present population may be set down at 4,261,570. The population of the city of New York was in 1860, 805,651, of Brooklyn 266,660, of Buffalo 81,129, Albany 62,367, Rochester 48,204, Troy 39,282, Syracuse 28,119, Utica 22,529, while there are 28 other cities and villages with a population varying from the smallest figure 5,077, to Oswego with 16,817.

There are 14,379,397 acres of improved farm land, and 6,616,558 unimproved. The value of the former as obtained from the assessors books is $803,343,593, and the implements of husbandry used upon them are worth $29,166,565.

The live stock consists of 583,725 horses, 1,553 mules and asses, 1,123,634 milch cows, 121,702 working oxen, 727,837 other cattle, 2,617,855 sheep, and 910,178 swine. The products of animals are as follows: Butter 103,097,279 lbs., Cheese 48,548,288 lbs., wool 9,454,473 lbs., wax and honey 2,490,770 lbs. The value of slaughtered animals is $15,841,403.

The products of cereals are of wheat, 8,861,000 bushels, of rye 4,786,905, indian corn 20,061,048, oats 35,175,133, barley 4,186,667, and buck wheat 5,126,305 bushels.

The Commercial crops are as follows: Tobacco 5,764,582 lbs., Hops 9,665,542 lbs., and Hemp 35,821 tons, Flax 1,514,476 lbs.

The miscellaneous crops as given as follows:

Peas and beans	1,699,334 bush.
Irish potatoes	26,447,389 "
Sweet "	7,523 "
Wine	61,404 gall.
Hay	3,564,786 tons.
Clover seed	106,963 bush.
Grass seed	81,622 "
Flax seed	56,986 "
Maple sugar	10,816,458 lbs.
" molasses	181,841 gall.
Sorghum	265 "
Silk cocoons	259 lbs.
In value the orchard yield was	$3,726,380
Market gardens	3,881,596
Home made manufactures	717,865

The capital invested in manufactures of all kinds is $175,449,206, and the number of establishments it keeps at work is 23,236. The value of the raw material annually consumed is $209,899,880, the number of operatives employed in the factories is 174,059 males and 47,422 females, while the annual value of the products of the factories is $379,623,560.

The principal articles produced are as follows:

Flour and meal	$35,064,906
Clothing	24,969,852
Printing, book, job, and newspapers	22,916,885
Leather	20,758,017
Lumber	12,485,418
Boots and shoes	10,878,797
Steam engines and machinery	10,848,868
Woollen and mixed goods	9,090,816
Iron castings	8,216,124
Spirituous liquors	7,698,464
Cotton goods	7,471,961
Furniture	7,175,000
Jewelry, silver ware, plated	5,466,468
Malt liquors	4,986,151
Gas	4,881,805
Soap and candles	3,886,503
Agricultural implements	3,429,087
Musical instruments	3,292,577
Rolled iron (38,275 tons)	2,215,050
Pig " (63,145 ")	1,385,208
Sewing machines (estimated now at)	2,086,805
Salt (7,521,335 bushels)	1,289,811
India rubber goods	977,700
Fish	151,040

The total value of imports and exports was in 1860 $394,045,326. The total tonnage was 9,410,733 tons. The shipping built in the State was 31,906 of which 7,889 tons were at fresh water ports.

There are 4 collection districts on the Ocean, New York, Cold Spring, Sag Harbor and Greenport, and nine fresh water districts, viz.: Champlain, Cape Vincent, Sacketts Harbor, Oswego, Genesee, Oswegatchie, Niagara, Buffalo and Dunkirk. There are upwards of 340 Banks, with about $350,000,000 capital, and a large number of Fire, Life and Marine Insurance Companies, and 71 Savings Banks, with 300,000 depositors having in these institutions $67,440,307 in deposites. The risks assumed by the Life, Fire and Marine Companies are over one thousand million of dollars.

The length of railroads in operation is 2,701 miles, and their cost was $131,820,542.

There are 16 principal canals in the State, in all of the length of 1,020 miles; of these are:

The Erie	350 miles.
Champlain	64 "
Black river	35 "
Chenango	42 "
Cayuga and Seneca	20 "
Genesee Valley	107 "
Delaware and Hudson	108 "

The total movement of tonnage in 1860, was 4,650,214 tons, the value of the tonnage was $170,849,198.

The tolls collected in 1860 were		$3,009,507
" "	1861	3,402,638
" "	1862	4.854,988
" "	1863	5,118,501

The estimated value of the real estate in 1860, was $1,119,938,484, and of personal $320,617,352. This however, is known to be far below the real value at least one-half.

In 1860 the State debt was		$7,085,054
1861 " "		6,505,654
1862 " "		6,505,654
1863 " "		6,506,654
And the Canal debt 1860		27,107,321
" "	1861	32,926,264
" "	1862	23,081,619
" "	1863	23,278,470

It will thus be seen that New York is far in advance of any Country or State of its size on the globe, in all the elements of progress and prosperity.

Boston.--Value of Imports.

The value of imports received from foreign ports, in American and foreign vessels from 1850 to 1863, have been as follows:

	American vessels.	Foreign vessels.	Total.
1850	$20,817,410	$9,091,966	$29,909,376
1851	20,627,308	11,323,250	31,850,558
1852	22,071,572	11,915,572	33,987,144
1853	26,177,320	17,140,009	43,317,389
1854	20,012,604	18 828,051	46,840,655
1855	26,298,858	15,685,155	41,984,013
1856	31,301,350	11,713,550	42,014,900
1857	34,613,242	13,894,682	48,607,924
1858	21,930,641	10,810,075	32,740,716
1859	29,501,582	14,452,443	43,954,025
1860	25,587,052	11,709,182	40,296,234
1861	14,150,552	11,894,418	26,044,970
1862	17,223,910	9,394,434	26,618,344
1863	12,227,591	13,803,853	26,031,444
Total	$331,540,992	$183,556,680	$514,097,672

Hartford and New Haven Railroad.

The earnings of this road for the year ending August 31, 1864, were:

From passengers		$787,626 65
From freight		457,110 09
From rents, mails, and expresses		47,570 21
Total		$1,292,306 95
And the expenses were:		
Repairs of road and bridges	$166,361 27	
Material and labor on engines and cars, and new cars and engines	194,845 38	
Station repairs and improvements, including new buildings	41,001 83	
Transportation and general expenses	204,284 95	
Wood, coal and oil	103,901 89	
Lost and damaged goods, damage and loss by fire, gratuities, etc	9,313 59	
	$719,708 36	
Balance of interest	50,337 69	
Taxes—State & Nat'nal.	64,935 12	
		834,981 17
Net receipts		$457,325 78

The number of miles run by passenger trains during the year was 290,102; by freight trains, 123,737; by other trains, 34,406—total, 458,245 an increase over the previous year of 58,948 miles. Number of passengers carried, 856,365; tons of freight transported, 280,607—showing an increase in the former of 193,075, and in the latter of 47,-968.

The gross income of the road exceeds that of the preceding year in the sum of $333,847 54. Of this increase $229,720 46 is derived from passengers, and $102,600 22 from freight. The report says:

The continued inflation of prices of all articles consumed in the operations of the road, and the constant increase of compensation to those employed in the service of the company, have, as will be observed, absorbed a large portion of this increased amount of earnings.

The increase of the business has devolved upon the company the necessity of large additions to the equipment of the road, and of the buildings and other accommodations at several of the stations. These additions have been made and their cost charged as a part of the current expenses of the year, which will account for some portion of the largely increased expenditures.

The item of taxes, State and National, is regularly increasing from year to year, and the coming year, with the large addition to the State as well as National tax, will show an increase far beyond any previous experience. The tax to the State alone for the coming year under the law of last session will exceed $60,000.

No satisfactory opportunity having offered for contracting in this country, for the construction of the new iron bridge for crossing Connecticut River, the Board of Directors determined in February last to commission an agent to proceed to England and endeavor to effect a contract there, for the accomplishment of this object. We are advised that a contract has been concluded with responsible parties there, and that the work of constructing the component parts of the bridge and fitting them ready for erection is in a forward state of progress. We trust, therefore, that during the current year this important structure will be completed and placed in position. A portion of the cash advanced on this account has been charged in the account for repairs of road and bridges.

In pursuance of the authority conferred on the Board of Directors, by the stockholders, at their last annual meeting, the board, on the 15th day of June last, determined to divide among the stockholders a portion of the unissued stock of the company, equivalent to twenty per cent. on the present stock, in consideration of the amount of earnings of the company during a series of years past, which have been invested in the construction and equipment of the road. This dividend is declared upon the stock as it shall stand on the books of the company on the 24th day of September, 1864, and will be payable and deliverable on and after the 3d day of October, 1864.

Circulars giving information of this dividend, and of the details connected with it were sent to the several stockholders immediately after the date on which it was declared.

We are again obliged to report that the suit against the New York and New Haven Railroad Company has not yet reached a conclusion, though we are now confidently assured that a decision may very soon be expected.

Our accounts are of course kept in conformity to our own claims as to the questions in controversy, and the amount of these unadjusted claims by the accumulations of a long course of years has become large, which accounts for an important portion of the item of debts due the company. The final adjustment of this account will depend upon the decision of the case.

A quarterly dividend of three dollars per share, free of government tax, has been declared, payable on the 3d day of October next.

The income account of the company for the past year is as follows:

Cash on hand September 1, 1863		$187,440 38
Income of the road		1,292,306 95
Sales of real estate		5,958 33
		$1,485,705 66
Dividends paid	$400,057 50	
Interest	50,337 69	
Operating and repairing road	722,951 07	
State and National taxes	64,935 12	
Real estate	6,852 39	
Increase of debts due the company and in the hands of agents	171,368 23	
Cash and cash funds on hand	69,203 66	
	$1,485,705 66	

The following from the ledger presents a general statement of the affairs of the company, September 1, 1864:

Capital stock	$2,850,000 00
Bonds	927,000 00
Contingent fund	562,802 01
Reserved fund	150,000 00
Profit and loss	249,999 44
Dividends unpaid	8,658 50
Debts due by the company	31,748 69
	$4,280,208 64
Construction	$3,158,644 52
Middletown Extension Railroad	27,682 66
Real estate, land, dwellings, etc	74,681 46
Bonds purchased	87,000 00
Tomlinson bridge stock	102,888 67
Advances to Tomlinson Bridge Co	34,147 27
Equipment, engines and cars	254,000 00
Wood, stock and tools	158,718 74
Debts due the company including account due from N. Y. & N. H. R. R. Co., unadjusted, and funds in the hands of agents	363,241 66
Cash and cash funds on hand	69,203 66
	$4,280,208 64

The office of the company is at Hartford, Ct. The directors chosen September 21, 1864, are as follows:

President.—C. F. Pond.

Directors.—Charles F. Pond, Julius Catlin, Cornelius Vanderbilt, Henry Coit, John A. Robinson, Ezra C. Read, Chester W. Chapin, A. G. Hazard, Samuel H. Parsons.

Superintendent.—E. M. Reed.

Secretary.—S. P. Conner.

Great Western (Canada) Railway.

From the report of the Great Western Railway Company we learn that the receipts on capital account during the half-year ending July 31, 1864, amounted to £1,198 10s 10d, and the total receipts to the 31st July, 1864, were £5,218,356 15s 2d. The aggregate expenditure to the same date amounted to £5,074,004 5s 7d, leaving a balance to the credit of capital account of £144,-352 9s 7d. The outlay on capital account during the past half year consists of additional sidings laid down at sundry stations, fish-jointing fourteen miles of rails—the proportion of expenditure chargeable to capital in rebuilding in stone and iron the wooden bridges over the cove of the River Thames, west of London—outlay on account of rolling mill at Hamilton, &c., amounting altogether to £16,156 15s 7d. The revenue account for the past half-year is as follows: Gross receipts, £314,930 19s 2d; working expenses including maintenance of way, taxes, insurance and rent of suspension bridge, £140,188 10s 3d—balance £174,751 8s 11d. From this there has to be deducted—Interest on government loan, £17,498 5s;

interest on company's bonds, &c., £33,228 1s 7d; loss on the conversion of American currency, £44,025 3s 9d; renewals of rails, sleepers, bridges, £31,263 11s 6d—total, £126,015 1s 10d; leaving a balance from the half-year's working of £48,736 7s 1d.

Fences and Cattle Guards on Line of Railroads.—Injury to Cattle.—Negligence.

The recent case of Hance *et al.* against The Cayuga and Susquehanna Railroad Company, was an action brought before a justice of the peace of this State, to recover the value of a cow. It was admitted by the defendants that on the night of the 11th of December, 1854, the defendants' locomotive ran over and killed the plaintiffs' cow, while on the railroad belonging to the defendants; and that the plaintiffs purchased the cow of Harvey Stevens. The cow was very breachy and would jump and break fences, which was the reason Stevens sold her to the plaintiffs, who were drovers. She was driven from the premises on the 11th of December to the tavern of one Taylor, and there put into a yard with five other cattle. The yard was about fifteen rods from a cattle guard, where a highway crossed the railroad. The cow got over the bars to the yard, by breaking the two upper ones, into the highway, and then went on to the cattle guard, and walked over or through it upon the railroad, and was killed by the locomotive on the railroad, about three-fourths of a mile from the cattle guard. There had been so severe a snow storm that the regular trains could not run on the railroad for a day or two. When the cow walked through or over the cattle guard it was filled up with snow under the slats. The snow plow ahead of the locomotive had taken off the snow even with the top of the slats, and from the upper side of the rails on the road. The cow sank into the snow two or three feet in walking through the cattle guard. Taylor testified that he never knew of cattle passing the cattle guard, before the cow went through or over it, and that the slats of the cattle guard were five or six inches apart and seven feet long.

One Baldwin (who worked on the railroad repairing the timber) testified that he lived three or four rods from the cattle guard; that he saw it some days after the cow was killed; that the slats to it were open; that he did not know but the snow there came up to the under side of them; that he saw the cow the night she was killed; that she was in his lot or yard; that there was a gate from his yard to the railroad, which was open that night, that the cow went out of his yard on to the railroad; that the railroad was fenced, and that the gate belonged to the railroad fence; also, that the cow might have come into his yard from the railroad or the highway; that there had been a great and severe snow storm, that he was sick and got his father to go and see if it was his (witness') cow that had gone on to the railroad track.

The engineer who ran the locomotive testified that the cow was killed at about 8 o'clock in the evening, that when he first saw her she was on the south side of a bridge; that he whistled down the brakes, that the head-light on the locomotive was lighted; that it was impossible to prevent killing the cow, that she so near the train when discovered it could not be prevented.

Two witnesses testified they were acquainted with the cattle guard; that it was in good repair or in good order, though it was partly filled up with snow at the time the cow was killed. One of them said the railroad was fenced from the cattle guard to the place where the cow was killed, and he had never known of cattle passing over the cattle guard.

There was a good fence around Taylor's yard, from which the cow escaped into the highway, and none of the other cattle in the yard got out that night.

At the close of the plaintiffs' evidence the defendants moved for a non-suit, on the ground that the plaintiffs had not made out a cause of action; and second, that there had been no negligence shown on the part of the defendants; and further, that the plaintiffs themselves had been guilty of negligence; which motion the justice refused to grant.

The justice rendered a judgment in favor of the plaintiffs for $25 damages, besides costs which was reversed by the Tompkins County Court in this State. The Supreme Court reversed the judgment of the County Court, and affirmed that of the justice, on the sole ground that the justice did not certify that he returned all the evidence given in the trial before him. The return set forth the evidence in detail, first, that given by the plaintiffs, and then that given by the defendants, and at the end end thereof was a statement that "the evidence here closed."

And after stating the judgment, the justice said; "I hereby certify that the foregoing are all the proceedings had before me in this cause." The case was appealed to the Court of Appeals of the State of New York, and was submitted to that Court upon printed briefs.

Balcom, J.—The defendants had fenced their railroad where the plaintiffs' cow was killed, and had constructed and maintained a cattle guard at the highway crossing where she went upon the railroad; and the evidence fails to show that the fence was not "of the height and strength of a division fence;" or that the cattle guard as made and maintained, was not "suitable and sufficient to prevent cattle and animals from getting on to the railroad."

Two or three witnesses who lived near it, testified that had never known cattle passing over it, and no witness pretended any cattle had ever gone over or through it before the plaintiffs' cow walked through it; and the evidence is uncontradicted, that she passed through it in consequence of its being filled up with snow. There had been so great and severe a snow storm as to prevent the regular trains of cars running on the railroad for a day or two. The snow had been removed from the rails and the top of the cattle guard, but it remained in and under the same and up to the under side of the slats of the guard.

The justice was probably satisfied that the defendants were guilty of negligence in not removing the snow from underneath the slats of the cattle guard. But that conclusion, however, well sustained by the evidence, did not justify him in giving judgment in favor of the plaintiffs, if their cow escaped from Taylor's yard, and went to the railroad by reason of their own or Taylor's negligence.

It is only before the requisite fences and cattle guards are duly made, that a railroad company and its agents are made liable by statute for all damages done by their agents or engines, to cattle, horses or other animals thereon notwithstanding the negligence of the owner co-operates in producing the damages.

After such fences and yards are duly made and maintained, the corporation is not liable for any such damages unless negligently or willfully done. (Conwin *vs.* The New York and Erie Railroad Co. 3 Kern., 42); and then the person sustaining such damages by reason of the negligence of the corporation, cannot recover if his own negligence in any way concurs in producing the damages.

This Court decided in Munger *vs.* The Tonawanda Railroad Company, (4 Const., 349,) that where the statute does not apply, an action against a railroad company for negligently running their engines or cars against or over cattle, and killing or injuring them on their railroad, cannot be sustained if the wrongful act or negligence of the owner co-operated with the misconduct of the company to produce the injury to the cattle. Also, that when cattle escape from the enclosure of the owner and stray upon the track of a railroad, they are to be regarded as trespassing upon the lands of the railroad company, and that the law charges the owner of the cattle with a wrongful or negligent act, if they stray from his enclosure and go upon lands appropriated by a railroad corporation, although his enclosure is kept well fenced, and he is guilty of no actual carelessness in suffering them to escape.

According to that decision the plaintiffs were clearly guilty of negligence, in suffering their breachy cow to escape from Taylor's yard and go to the railroad, which co-operated with the defendants' negligence to produce her death, and as the defendants' negligence was their omission to remove the snow from underneath to cattle guard, through which the cow walked from the highway on to their railroad, and not their failure to construct and maintain one there, sufficient, when not filled up with snow, to prevent cattle and animals from getting on to the railroad, the plaintiffs were not entitled to recover.

If the plaintiffs had been properly driving their cow along the highway, and she had walked over or through the cattle guard, or to the railroad by reason of the omission of the defendants to remove the snow that was in and under the slats of the guard, the case would have been different, and they would have been entitled to recover. But as the case is, the cow went upon the railroad track in consequence of their own as well as the defendants' negligence, and they should not have recovered.

The justice should have non-suited the plaintiffs or given judgment in favor of the defendants; and the County Court did right in reversing his judgment.

It follows that the judgment of the Supreme Court should be reversed, and that of the County Court affirmed, with costs.

All the judges concurring. Ordered accordingly.

☞ A telegraphic dispatch from San Francisco, dated 18th inst., quotes mining stocks as follows: Ophir, $400 per foot; Gould & Curry, $1,700 per foot; Savage, $1,900 per foot; Potosi, $825 per foot; Sierra Nevada, $50 per foot; Yellow Jacket, $712 per foot; Crown Point $600 per foot; State Telegraph, $38 per share.

Eight Hundred Thousand Dollars Involved in one Lawsuit.

One of the most important cases ever tried in this State was up for argument yesterday before Judge Heron of the Circuit Court. It is a case in which the State of Missouri sues the Platte County Railroad Company, and the Atchison Railroad Companies for possession of the road from Savannah to Weston, a distance of about forty-four miles. The question discussed yesterday was on an application for a change of venue. Col. Woodson and Jones and Vories did not deny the sufficiency of the petition for a change of venue, but contended the Court should at the time of granting the change of venue appoint a Receiver to take possession of the road, and preserve the profits until the case was finally determined. Colonel Bassett, General Stringfellow, Barnes and Denihan contended that the motion being acknowledged sufficient to change the venue, the jurisdiction of the Court was ousted and it could not legally decide any issue arising on the face of the petition. The point remains undecided, and is continued for argument. Able arguments have been made on both sides.—*St. Joseph Herald.*

Celebration of the Opening of the Philadelphia and Erie Railroad to Erie City.

On Tuesday, October 4, an excursion party left this city, in a special train, for Erie City, to celebrate the completion of a rail route of uniform gauge from tidewater on the Delaware in the port of Philadelphia, to the lakes in the harbor of Erie City. The train arrived at Lock Haven on Tuesday evening, departed thence Wednesday morning, reaching Erie City at 5:20 P. M. Returning, the train left Erie on Friday morning and arrived at West Philadelphia at 6 A. M. Saturday, on time.

It was our first trip over that portion of the new route which is west of Lock Haven and east of Warren, a distance of 157 miles, through the wilderness portion of Pennsylvania, where the solitude of the forest was only broken here and there by the echo of the woodman's axe till the locomotive made its advent, and with its shrill whistle announced that henceforth trains will run to the ocean and the lake, opening to the hardy pioneers and indwellers in a range of counties hitherto shut in from the commercial world, all the facilities to travel and transportation which distinguish other portions of the State.

The forest country traversed by the Philadelphia and Erie Railroad, already shows the quickening influences of the locomotive, which is a symbol of progress and an augury of improvement, understood by all, felt everywhere. And year by year as clearings are made and mines are opened, towns will grow around the stations and farms will cover the hill sides and valleys.

There are no desert wastes on the line of the road; on the contrary, where there is soil, overgrown with stalwart hemlocks and pines, amongst sturdy maples gums and oaks. There are no normal Savannas, but a sea of woods. And these latter in the frost-dyed shawls which autumn wrapped around the shoulders of her tenderest trees, were radiant with tints of scarlet and orange and russet and ochre, made brighter by the contrast with interspersed evergreens.

The streams are all cradled in the mountains; and from their sources, many of them from recesses never penetrated by man, but known to the deer and the elk, come out from the glens and side valleys over pebbly bottoms and down rocky beds to the larger and deeper channels which flow on, increasing as they go, till they swell into a river, and pass down into the open country, seeking the sea.

Ah! how refreshing is the sight of one hundred and fifty miles of nature? Of nature in the majesty of the mountains ribbed with rocks; in the forest mailed with leaves; in the waters which mirror overhanging clouds, between banks overgrown with vines and wild flowers and tangled briar tresses.

And then, too, how full of interest, and of sentiment, and of romance is the solitary cot of the axeman or hunter which here and there greets the eye from a ravine or hill-top, for there, says the heart, dwells a pioneer—a picket of civilization.

With like thoughts also the excursionist contemplated the little villages which dotted the settlements met with at irregular distances, in the primitive area.

At its commencement at Sunbury the elevation of the Philadelphia and Erie Railroad above tide is 423 feet; at its terminus in Erie City its elevation above tide is 573 feet; from Sunbury west the grade of the road rises gently for 150 miles; from Erie City east the grade rises rapidly for twelve miles; the maximum grade per mile going west is 105 feet, for a distance however of only two miles, and at this point the grade can be modified hereafter down to 52 feet; the maximum grade coming east, ascending from the lake, is 79 feet for several miles; Clarion Summit (Kane) 95 miles from Erie and 193 miles from Sunbury, is the highest summit on the road, being 2,006 feet above tide. From Wilcox to Sheffield, 25 miles, across the main Summit, the road is on a new location made by Phaon Jarrett, C. E. Robert Faries, Esq., the present Chief Engineer of the road has held that office throughout the whole period that the road has been in progress of construction from Sunbury, since 1852, a period of 14 years, embracing six executive administrations.

From Sunbury to the West Creek Summit a distance of one hundred and fifty-seven miles, the road skirts the Susquehanna waters, and is without sharp or objectionable curvature at any point. For all this distance—fifty-five per cent of the whole road—the alignment and curvature are marvellously favorable. In fact, the freight route from Philadelphia to Erie will margin the Susquehanna waters, from Columbia to West Creek Summit, within two miles of St. Mary's two hundred and forty miles, or fifty-four per cent of the whole distance from Philadelphia to Erie. Ponder this fact, reader, and think that for more than half the distance from Philadelphia to Erie city the rail route follows the course of the Susquehanna waters! The bearing of this distinguishing characteristic, on economy in transportation, is obvious.

After the road crosses the water-shed which divides the tributaries of the Susquehanna from the tributaries of the Clarion, it courses along the streams down one and up another till the water-shed which separates the Clarion from the Allegheny is reached, when the creeks are again followed down to their mouths and up to their sources. In this process the road skirts the Clarion river 8 miles, and the Allegheny river 9 miles. The 12 miles from Erie city to Jackson constitute the cross-country portion of the Philadelphia and Erie Railroad, all the rest of the route being along the meanderings of streams of water, big and little. This policy, west of the basin of the Susquehanna, added twenty miles to the length of the road, but lessened its money cost several millions of dollars.

At Erie city, on Thusday, October 6—a day passed in the enjoyment of courtesies and hospitalities long to be remembered—we realized and appreciated that, now, indeed, the three ports of Pennsylvania are bound together in ties of iron, never to be severed, never to be divorced. And when, on cars standing on the shore of the harbor, at State Street, in the centre of Erie City, we read the letters "P. R. R. (Erie)," we thought how fortunate is it that the operating contracts of Pennsylvania's great carrier include a leased line to Erie in unity with its own line to Pittsburg, the two coming together at the Susquehanna bridge, five miles north of Harrisburg, and 112 miles from Philadelphia, thus throwing an immense travel and prodigious traffic on the butt end of the main road, thence to tide water. Truly the necessities for a co-operating line of steamships from Philadelphia to Europe become more palpable from month to month. And with rebellion crushed out and pirates driven from the ocean, then will come the time for a line of steamships from Philadelphia to the Old World.

The valuable and spacious water frontage in Erie harbor donated by Erie City to the Philadelphia and Erie Railroad Company, whilst it shows the measure of importance attached by Pennsylvania's lake port to an iron union with Philadelphia, it at the same time gives the railroad a potential hand-hold on the lake.

The Philadelphia and Erie Railroad begins business at the lake with ample space on which to lay down a plan comprehensive enough for future operations on a grand scale, to be carried out according to the pressing wants of an expanding trade.

The plan of Erie City, too, indicates the aspirations and the foresight of those who founded the lake port of the Keystone Commonwealth, and squares with the bold, broad and sound views of the wise men who acquired for Pennsylvania, from the United States, the triangle of territory which contains the harbor of Erie. But Erie City is isolated no more; for all the way across the State, through its centre and its capital, to its cradle which is its portal at tidewater, an unbroken iron line is out-stretched; and passengers, (after Monday next) will pass from the tides to the lakes, in through trains running from Philadelphia to Erie City.

The Philadelphia and Erie Railroad Company, was incorporated by an act entitled "An Act to incorporate the Sunbury and Erie and Pittsburg and Susquehanna Railroad Companies" passed April 3, 1837.

The company was organized by the election of Nicholas Biddle, President, and Edward Miller, Chief Engineer. As the railroad from Philadelphia to Columbia was opened in 1834, whereas the railroad from Philadelphia to Pottsville was not opened till 1842, itseems strange that Sunbury was made the terminus of the route to Erie; but so it was. Edward Miller, Esq., First Chief Engineer, who made surveys for the company in 1838–'9, through the country previously surveyed for a canal by B. Acrigg, C. E. in the service of the State, was contractor for the completion of the road, and under his contract the last rail was laid down on the 2d July, 1864.

The company having yielded up the ghost, subsequent to Mr. Miller's report dated March 1, 1840, was resuscitated after an interval of eleven years, by the election of Daniel L. Miller, Jr., President, on the 24th May, 1851. On the 22d October, 1852, Mr. D. L. Miller, Jr., resigned; and on the same day Christopher Fallon, Esq., was chosen his successor. On the 28th October, 1853, Mr. Fallon resigned, whereupon John Tucker, Esq., acted as President *pro tem*, until 21st January, 1854, when James Cooper, Esq., was elected President. On the 12th February, 1855, James Cooper, Esq., resigned, when William Bigler, Esq., was elected. Mr. Bigler was President one year; on the 11th February, 1856, Samuel V. Merrick, Esq., was elected President. On the 8th December, 1857, Wm. G. Moorhead, Esq., succeeded Mr. Merrick, and is President at this time.

The history of the road is checkered with events which are recorded with the past; the public, however, are most interested in the road's present and future. That the line is capable of results of great moment and lasting importance, time will show, and rapidly, too, after it shall have been furnished with equipments and provided with appurtenances. To fortify it with shops, stations, sidings, etc., will require perhaps one and a half million dollars, to be secured. it may be, by another mortgage; but this additional lien will soon be offset by additional income from increased business.

Meanwhile, however, it will be well to bear in mind that time speeds swiftly on, and that traffic does not rush to a railroad through a new country, as waters discharged from the clouds rush into a stream in the bottom of a valley. Nevertheless, as the wide belt of territory traversed by the Philadelphia and Erie Railroad possesses resources in value exceeding estimate, and almost beyond limit, forests will give place to cultivated acres; towns will thrive; mines will be opened; manufactures will be introduced; and the wilderness middle portion, like the improved ends of the route, will be dotted with towns lively with industrial pursuits, and covered with farms mapped with cultivated fields smiling with growing crops.

Sunbury, Milton, Williamsport, Jersey Shore, and Lock Haven, with the populous surrounding country, put travel and traffic on the 66 miles of the eastern end of the road; whilst Warren, Corry, Union Mills, Waterford, Erie, and other towns, as well as the cultivated country which bounds them on all sides, contribute a large business to the 66 miles of the western end of the road. These 132 miles constitute 45 per cent of the entire mileage of the line.

The intermediate 55 per cent or 156 miles of wilderness will attract settler's in large numbers to traffic in its lumber and its minerals; and these newcomers will open mines, build towns and clear farms; so that in a few years Emporium and Ridgway, and Wilcox and Kane, will become centres of a profitable trade.

The capital and debt of the Philadelphia and Erie Railroad Company are in these amounts, to wit:

Capital stock	$5,000,000
Seven per cent mort. on 40 miles of road between Sunbury and Williamsport	1,000,000
Six per cent first mortgage on 248 miles of road from Williamsport to Erie—interest guaranteed by Pennsylvania Railroad Company	5,000,000
Six per cent second mortgage held by the State, to bear interest from Jan. 1, 1872—seven years hence	4,000,000
Total	$15,000,000
Interest on ten millions funded debt	$610,000

The profit on the hundreds of thousands of barrels of well oil which will undoubtedly be carried over the road—for the gauge of the Oil Creek Railroad will be changed so soon as sufficient cars can be provided to accomodate the transporters from the wells to tide water—will go very far towards paying the interest on all the mortgages, and may indeed, if the oil continue to command a high price, exceed the interest on all the liens on the road!

Philadelphia and Erie bondholders are as well secured as the most fastidious invester can desire; and after the proceeds of one more loan shall have been expended on the road, to put it in efficient condition to accommodate the travel and traffic which it will develope on its route, which it will attract from the lakes and elsewhere, and which it will command by reason of its geographical position and direction with reference to the interior and the seaboard, then will its stockholders be gladdened with its fast increasing income.—*U. S. R. R. and Mining Register.*

British North American Pacific Railroad.

The plan of connecting Canada with the Pacific is still agitated with considerable zeal. The following is an extract from the report of a lecture on Vancouver's Island and British Columbia, recently delivered by the Rev. Lachlin Taylor, D. D., in Belleville:—

The reverend lecturer proceeded to say, this road would open a new highway for British commerce, and shorten the voyage from Southampton by at least ten days. Before his locks were as gray as those of some of his Highland forefathers, he hoped to enjoy the exciting realization of a trip from Halifax, N. S., to New Westminster, B. C., by the iron horse, the thought of whose snortings among the lofty majestic, but otherwise silent mountains of Lake Superior and Huron was, in his eyes, so sublime, or if not thus by some other conveyance. The distance from the head of Lake Superior to Cariboo was about 1800 miles, and from the head of navigation to the Pacific very much less, so that it would require 5,000,000 cross-ties and sleepers, 200,000 tons of iron rails, 60,000 poles, and 1,000 tons of telegraph wire, which he was happy to say was already under way. It would require a motive power of 50,000 horses, and $100,000,000 to construct it; to work and maintain the road it would require $8,000,000, and the interest on the whole would be $6,000,000, so that altogether it would require $14,000,000 before there would be any returns. All these statistics he had from the highest authorities; their correctness therefore was undoubted. The lecturer would now come to the reason why he would have direct communication. The Hudson's Bay Company's territory was more than 3,000,000 square miles in extent, a little more than the whole of Europe. That this land instead of being peopled with the surplus population of more crowded and probably less favored lands, should have remained so long the mere hunting ground of a private company, was a lasting stigma to Britain. Immigration, instead of pouring into the States, would if this country was opened up, as it ought to be, in this way, the only available method, go to form the bone and sinew of a hardy, loyal, prosperous and contented portion of Her Majesty's subjects. A lasting disgrace this also was to the Canadian Government.

The Junction Railroad in Ohio and Indiana.

We have before us the statement of the president, J. M. Ridenour, Esq., relative to the securities of this company, from which we make the following extract:

The Junction Road was organized in 1849, by virtue of a special charter, granted by the Legislature of Ohio and Indiana. The road traverses a very rich and fertile region of country. Commencing at Hamilton, where it connects with the Cincinnati, Hamilton and Dayton Road; and also with the Atlantic and Great Western, passing through Butler county, Ohio, and Union. Fayette, Rush, Shelby, Hancock, and Marion, Indiana; and passing through the towns and villages of Hamilton, Oxford, College Corner, Liberty, Connersville, Rushville, Morristown and Indianapolis. The part from Hamilton to Connersville is completed, and doing a very good business.

The portion between Connersville and Indianapolis—fifty-six miles—has had more or less work done, at an original cost of some $300,000. It is now proposed to complete this portion, and thus open up a line of trade and travel that will without doubt prove highly profitable on the investment, and meet the demands of the country through which it is located.

It is needless to recite in detail all the advantages to result on the completion of the road as is proposed; we will simply refer to the map herewith to demonstrate its central position, and without doubt holding the key to a larger extent of territory than any other road of equal length in the State; connecting, as before stated, at Hamilton, with roads that open up the whole system in Ohio, and with the extension of the Marietta and Cincinnati Railroad, from Loveland, now in process of construction, gives us the shortest and only direct line from Indianapolis *via* Marietta to all points on the Delaware and Chesapeake, and *via* the C. H. & D. and A. & G. W. R. roads, to all points north and north east.

The Connersville and Newcastle Junction Railroad is now about complete—ready for the rails. This road is twenty-five miles in length, connecting the main line at Connersville with the Indiana Central at Cambridge City, and the Chicago and Great Eastern Railroad, at Newcastle—passing through a valley of surpassing beauty and richness, and thus opening the shortest line, by many miles, between those two great cities of the West, Cincinnati and Chicago.

As before remarked, that portion of the road from Hamilton to Connersville has been constructed at an original cost of about $35,000 per mile, to which has since been added in depot buildings and other facilities to the extent of some $10,000 per mile, making a total of about $45,000 per mile, or | $1,890,000
On the portion West of Connersville | 300,000
| $2,190,000

Upon the whole line there was originally placed a mortgage for $2,000,000, represented by 2,000 bonds, twelve hundred of which were sold, and by arrangement with the holders thereof, they have been surrendered, and are now in your hands for cancellation; and in consideration of the same, the Company has issued to the parties preferred stock, thus releasing the entire line of road from all mortgage liabilities and have made a new first mortgage, represented by twelve hundred bonds of one thousand dollars each; the mortgage has been duly executed and recorded, is now in possession of Morris K. Jesup and Charles Lanier, of New York, Trustees, and constitues the first and only mortgage on all the property and effects of the company. It is proposed to use the funds arising from the sale of these bonds for the completion of the road as contemplated, and its equipment, which is deemed sufficient for that purpose, even at present prices of materials and labor, which, when done, will present the company representing

Original capital stock	$1,800,000
First prefered stock, say	1,200,000
First mortgage bonds	1,200,000
	$4,200,000

The entire road is subject to the last, and only mortgage bonds; and therefore as we believe, offers as good security as any road in the country can do. We see no reason to doubt, that the Junction Road will, when completed, be one of the most productive railroads. The line is an important one: the country very rich, and the local traffic will be great.

Shipbuilding on the Clyde.

The almost incredible strides that have been taken by the iron shipbuilding trade of the Clyde during the past three years, have been a matter of much interest and surprise. There are now 31 shipbuilding yards on the Clyde, 13 of which may be said to be of the last two or three years' growth; and these latter are all well employed, and are keeping pace with the older and more matured establishment, and all enjoying a fair share of trade. The large number of 90 vessels are on the stocks. These vary in tonnage, from the 500 tons blockade running to the 5,000 tons war-rams, and would represent a total of 70,000 tons. Besides these, there are already launched, and at present fitting out at the yards or quays, about 40 vessels of 30,000 tons, making a grand total building and finishing of 130 vessels, of 100,000 tons. During the past nine months, 150 vessels, of 117,000 tons, have been launched on the Clyde. For the whole of the previous year, which was the busiest in shipbuilding ever before experienced on the Clyde, the total number of vessels launched was 170, of 124,000 tons.

Improved Mining Machinery.

It is proposed in England to dispense with ropes and chains in mining machinery and to use the pneumatic elevator. A cylinder or tube is placed in the shaft, which rises a few feet above the top, and reaches a few feet below the bottom of the mine. In this cylinder or tube a double-headed piston works, and between the two heads of the piston a fixed or movable receiver or barrel, or wagon is placed, which holds the mineral or water to be raised. An air-pump, worked by steam engine or water wheel, or other power, is used for forcing air down the shaft in a tube, which air passes into the cylinder below the under piston head. When the load is put in at the bottom, a valve is opened, so that the air is introduced under the piston, which, with its load, then rises to the top. On arriving at the top the load is removed, and on an escape valve at the bottom being opened, the piston descends, and the air which escapes ventilates the mine.

American Railroad Journal.

Saturday, October 22, 1864.

Stock Exchange and Money Market.

Another week of turmoil in the gold market. On Tuesday the price went up and down in a few hours at least 10 per cent. By persistent combination among the operators for a rise as well as knowledge of the contracts of the shorts, the price is upheld. The holders of large stocks of goods bought at high prices, and under the belief, possibly the hope, that the war is to last some years longer, and the cotton mill managers with them, have united to keep up the rates, and in order that they may slide their goods upon the market, are willing to run the risk of a few thousands in the street whenever it becomes necessary. Just as soon as these stocks of goods are disposed of they will cease to bull the market, for gold is a dangerous commodity to handle at the present moment, and not so "handy" to have much of "in the house." It is supposed by some, that the increasing difficulties in the British Money Market will produce corresponding difficulties here. But we do not think so. All recent American purchases abroad have been mainly for cash, thanks to the suspicions of foreign merchants. So too, the fear that our stocks will be sent home to be sold in large quantities appears to be groundless, for all those foreign holders who felt any alarm as to their permanent value and were uncertain even as to the punctual payment of the interest, sold out at the beginning of the war, while those who have held on, have received their interest in gold, some of it long in advance of its becoming due, and are getting more for their money than they could by any English or continental investments.

The German capitalists have understood our affairs better than the French or English, and are making fortunes and will make more, out of their confidence in our courage, persistence and resources. The Scotia brought over a remarkable document which is strongly corroborative of our views in relation to this matter. On the 1st of October, at a session of the International Association for the advancement of social science, in the City of Amsterdam, the greatest city in the fatherland, the Netherlands, an address was adopted and signed by 160 members. We republish it from no partizan feeling, and consider it not so complimentary to the person to whom it is addressed, (it could not well be addressed to any other,) as it is to the cause of the Union and the loyal people who are maintaining it. It is in the following words:

To the President of the United States:

"We have followed with profound interest, from its origin, the struggle between the energetic citizens of the North and the slaveholders of the South. While regretting the bloodshed and the evils resulting from war, we congratulate you upon the constant firmness with which you and the great nation which elected you have defended justice and humanity. Convinced that the United States nation will issue from this trial stronger than ever, and with a future definitively separated from every servile institution, we await the speedy triumph of the holy cause of liberty. We are sure that the destinies of the great republic will never be compromised by you."

It must be borne in mind that the association is composed of the most learned and intelligent body of men in Europe, men whose brilliant scientific researches and matured minds place them far in advance of the rest, in their day and generation. The wishes and convictions expressed in this admirable document must have a large effect upon their own countrymen, and while such opinions prevail among them, there is no fear but that American credit will stand firm and high on the continent.

By the same vessel which brought this address to our shores, comes the farther intelligence that the money market in England continues to be greatly disturbed, and the number of heavy failures is increasing. The previous advices of late date, that the tone of the market was improving, prove to be incorrect. The East England Bank had followed in the footsteps of the Leeds and gone down with it. It appears that forgeries and defalcations are coming to light every day, and houses of established credit and large means have succumbed. Not only cotton but banking shares have proved the ruin of a large number of

speculators. The shareholders of the Leeds Bank will lose two and a half millions of dollars, and there are outstanding endorsements by the bank to the extent of five millions more! A single dealer in cotton has sunk in his speculations in that article, about four hundred thousand dollars on a single contract, besides having sunk twelve hundred and fifty thousand of his capital. Another operator in bank shares has gone down with liabilities of three millions of dollars, while the blockade runners are tumbling like a row of bricks. Fourteen houses in good standing have failed for nine millions of dollars and joint stock Bank shares have in some cases fallen from 42 premium to 9! The bank returns for the week ending October 1, show a decrease of gold of £50,000, and consols were at that date at 87⅝, about 10 per cent. below the usual quotations. When these fall everybody quakes. There is no knowing where this state of things will terminate. With all our troubles occasioned by the war, we have had no such panic as now prevails in England.

As we predicted last week, the new loan was largely subscribed for; about 50 per cent. beyond the amount required by Mr. Fessenden. The bids being mostly combination bids, and proceeding from banks and capitalists, the offers were gauged at a low figure, though all above par. The readiness with which the people assist the Government is one of the most remarkable and interesting features of the National character. Never did capital come forward so abundantly and promptly. It amounts practically to this, that the Government can get all it wants to pay for enlistments, munitions of war and all other supplies, and upon its promises to pay on time fixed, and at a rate of interest to suit itself. The determination of all parties to preserve the Union at every hazard, settles the question as to the value of the National securities. However they may differ about men or measures, on one point, the people of the loyal States are determined that "the Union must and shall be preserved;" and the Union preserved is a guarantee that it will easily and promptly pay its debts as it always has done before.

It is observable in connection with this, that there appears a general disposition in dealers of most articles to recede from their former prices, the result of the popular opinion, that gold must take a heavy decline, and that the war is near its close. If Richmond falls, it will involve with it such heavy losses in the only one large army now left in the confederate cause, that further resistance will be unavailing. The operations of the guerillas will cease almost immediately on the destruction of Lee's force, and it is a maxim in war, that guerillas are of no account when the main body is defeated. The leading articles of tea, and made up clothing have within the last week fallen from 50 to 100 per cent. This is significant of what is to follow.

Money is sufficiently abundant at 7 per cent. on good security. Railway shares have been drooping under a pressure to sell on the part of weak holders, trammelled by speculations in other quarters, but intrinsically they are as valuable as ever. No better property can be held, as it is remunerative and sure in its earnings.

The only drawback just now to its advance, is in defective management. A series of lamentable accidents have recently occurred on various lines, from defective rails and want of attention to the condition of the permanent way. Those companies that make themselves liable to heavy damages by the loss of lives, and irreparable injuries to the limbs of passengers, will find from their pecuniary losses thereby, that it is more economical to keep their roads in good order than pay enormous sums in the shape of damages for loss of life, and broken limbs. And again and again we recommend to some of our leading companies, to look sharper after management and competent agents, than to the corners and options, and combinations of the street.

The Petroleum Exchange has established itself in Broad street, with the prospect of a large sphere of operations. We venture to suggest to them, that they look carefully after the character of the article which they are to manipulate. The Scotia brings the intelligence, that in a continental theatre lighted with petroleum, the lamps exploded which hung from the dome, and the contents which fell upon the audience beneath sat fire to their garments, injuring many and nearly causing a large loss of life. Unless the oil is properly refined, this danger is constant, and will have a material influence in diminishing the demand abroad where it has latterly been largely increasing. It is an interesting fact that those residuums of petroleum which have hitherto been considered of no value, have recently been found to contain the bases of the most beautiful and brilliant dyes.

The increase of the National debt in consequence of the expenses brought on the loyal States by the confederates is of a less threatening character, in consequence of a circumstance which is now coming into notice. It is this, that the South will be most justly called to pay its share of it, the moment the Union is restored, and this is far less than strict justice might require at their hands. We might compel them to bear the whole burden as a penalty for their transgressions, but from their share of taxation and ultimate responsibility they cannot escape.

The gold Government bearing stocks are very steady, with a slight advance. As these stocks are *gold* to all intents and purposes, both interest and principal, we see no reason why they should not in fact bear the same prices as gold. The coupons do bring the advance, and why should not the bonds. This is one of the vagaries of the market, and shows that it is not regulated by any sound maxims whatever.

The balance in the Sub-Treasury on Tuesday was $27,183,986.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending October 17, was $2,212,605, against $1,400,976 in 1863, and $1,501,909 in 1862.

The exports from New York for the same week were $4,615,612 against $2,880,417 in 1863, and $5,077,436 in 1862. The shipments of specie since January 1, have been $35,806,051. The exports since January 1, have been $177,027,168 against $138,266,601, in 1863, an increase of $38,760,567. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to October 14, was $58,103,400.

The value of foreign goods imported into the port of Boston for the week ending October 14, was $314,256, against $316,698 for the corresponding week in 1863. The exports were $298,368 against $368,821 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $206,720.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Railroad Car Findings.

Messrs. Doremus & Nixon, No. 45 Warren street, have on hand and for sale Plushes and Moquetts, Head Linings, Ducks, all widths, Curled Hair, Plush Buttons, Nails, etc., etc. Also Cocoa Matting, Oil Cloths, Velvet and Cocoa Rugs, and all kinds of Railroad Furnishing. The attention of Railroad Companies and Car Builders is invited to their advertisement in another column. Velvet, Brussels and 3-ply carpets made expressly for offices. The assortment is large and of superior quality, offices fitted up at short notice. Address Messrs. Doremus & Nixon, 45 Warren street, New York.

The Late Accident on the Harlem Railroad.

Our remarks in last week's JOURNAL have not been well received by the managers of this Road. We are assured by E. A. Chapin, Esq., the Superintendent, that the statement generally believed at the time that the accident alluded to was owing to defective sills or ties is entirely incorrect. We have also received a communication to the same effect from a writer over the signature of "Justice." It is now asserted that the accident was owing to a flaw in a rail, not visible to the eye nor discoverable in any manner. It is also said that the New Haven train consisted of eleven cars drawn by two engines "at a dangerously high speed," and that "the Engineers of the New Haven road are a reckless set of fellows and have been notoriously so from the Norwalk murder to the present fearful smash up." This is stated Editorially in the *Tribune*, and calls for some reply from those attacked not only on their own account but for the information and security of the travelling public. We accept the explanation as to the flaw in the rail. We imagine however, the part of our article which caused the most anxiety, was our reference to the opinion that there is more anxiety about the condition of the Company in the street than any where else; and certainly when we have seen its shares, which pay no dividend run up to 285, from the former and long established quotations of 10-19, the inference is natural enough that a corner is more important to the present proprietors than a crash. We have always been warm friends of the Harlem road under its many difficulties, and are therefore glad to be assured by its particular friends that it is now in better condition than ever. We sincerely hope this is so.

☞ The attention of Manufacturers of Railroad Cars, Car Wheels and Locomotives is invited to the Advertisement of "F. R." in another column.

☞ The subscriptions to the seven-thirty currency loan during the last week were $2,900,000. end to the ten-forty $7,200. The entire subscription to the seven-thirty loan is now upwards of $54,000,000.

☞ The Northern Central Railroad Company are running an Express train from Baltimore to Lake Erie over the roads lately opened through the State.

☞ The Directors of the Pennsylvania Railroad propose to make a new survey of a route from Tyrone to near Blairsville, by which the great tunnel on the mountain will be avoided, and several miles saved in the distance between the points named. The reason for this movement is said to be an apprehension that the tunnel may cave in.

Finances of Vermont.

The receipts of the State treasury of Vermont for the last year (including $122,500 balance on hand) were $2,449,100, and the expenditures were two million, leaving nearly half a million cash in the treasury. Of the receipts, about one million was from taxes, and the balance from loans. The funded debt of the State is a million and a half, and the floating debt and liabilities are about one million; but a tax of 100 mills on a dollar, being the same as last year, will nearly, if not quite, meet this last sum, and will undoubtedly be voted by the legislature now in session.

Bridge over the Monongahela.

Plans and proposals will be received by the Pittsburg Bridge Co., Pittsburg, Pa., until the 1st of December next for both Wooden and Iron Bridge superstructure, and proposals for the masonry of the piers and abutments of the Roadway Bridge, to be erected over the Monongahela River, from Pittsburg Point to West Pittsburg. The bridge will consist of eight spans, 210 feet each from centre to centre of piers, or 201 feet clear of masonry, and one span 317 feet from centre to centre of piers. The clear width of carriage way must be 19 feet, with foot ways at each side 8 feet in clear. The structure must be proportioned to sustain, in addition to its weight, a uniformly distributed load of 2,000 pounds per lineal foot. The effect on any portion of the structure under this maximum load must not exceed one-sixth of its breaking weight. Proposals should be endorsed "Proposals for Pittsburg Bridge (wood) or (iron)," and "Pittsburg Bridge masonry." The company reserve the right to adopt either wood or iron superstructure, and to reject any or all bids, if it is for their interest to do so.

Interest and Dividends.

The Board of Directors of the Baltimore and Ohio Railroad Company have declared the following dividends, viz: four per cent. on the stock of the Main Stem, payable at the Merchants Bank, Baltimore, on and after November 1, and five per cent. on the stock of the Washington Branch for the half year ending 30th September ult., payable at the same place, on and after October 17. United States taxes paid by the company.

The Cincinnati, Hamilton and Dayton Railroad will pay, 1st November, at the Bank of America, a dividend of 5 per cent. and the Government tax.

The Cleveland and Pittsburg Railroad Company have declared a semi-annual dividend of four per cent., free of Government tax, payable at the office of the Farmers' Loan and Trust Co., on the 25th inst.

The semi-annual dividend of three and one half per cent., due Nov. 1, 1864, on the preferred stock of the Toledo and Wabash Railroad Company, will be paid on and after that day at the office of the company.

The interest due November 1st, 1864, on the second mortgage bonds, the interest bonds and the equipment bonds of the Toledo and Wabash Railroad Company, will be paid on and after that day, at the Bank of the Republic.

John Horner, Telegraph Office, No. 145 Broadway, will pay holders of Western Union Telegraph Stock, residing in this city, their regular quarterly dividend of two per cent. on and after Oct. 20.

Railroad Earnings—Monthly.

The earnings of the Erie Railway for the month of Sept., 1864, were.....$1,291,005 75
Corresponding month last year..... 816,801 21

Increase..... $474.204 54

The traffic receipts of the European and North American Railroad for the month of Sept., 1864, compared with the corresponding month last year, is as follows:

	1864.	1863.
Passengers	$5,959 87	$6,591 28
Freight	5,676 69	4,483 73
Mails and Sundries	1,051 10	1,151 90
Total	$12,687 66	$12,226 91
Increase		$460 75

Railroad Earnings—Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 7, 1864, were:

	1864.	1863.
Passengers	$3,552 90	$2,313 01
Freight	7,022 34	10,602 57
Express	104 16	75 00
Mails	296 58	296 58
Total	$10,975 98	$13,287 16

Receipts from January 1st to Oct. 7:

1864.....$440,046 03
1863..... 294,988 15

Increase.....$145,057 88

The earnings of the Marietta and Cincinnati Railroad for the 1st week in October:

	1864.	1863.
Passengers	$10,526 31	$6,885 99
Freight	8,220 76	8,921 28
Mail, express & telegraph	1,169 58	1,132 00
Total	$19,916 65	$15,939 27
Total since Jan. 1	$757,290 71	$497,479 02

The earnings of the Chicago and Alton Railroad Company for the week ending Sept. 30, were:

	1864.	1863.
Passengers	$33,826 12	$16,238 12
Freight	37,570 97	23,275 62
Sundries	1,346 70	1,283 80
Total	$72,743 79	$40,797 54
Increase 1864		$31,946 25

The traffic of the Great Western Railroad for the week ending Oct. 7th, 1864, was as follows:

Passengers.....$36,181 32
Freight and live stock..... 25,679 51
Mails and sundries..... 1,259 65

Total.....$63,120 48
Corresponding week of 1863..... 62,943 18

Increase..... $177 30

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of October, 1864, were.....$85,120 00
Corresponding week of previous year.. 76,448 00

Increase..... $8,672 00

The earnings of the Chicago and Northwestern Railway for the second week in October, 1864, were.....$160,078 57
Corresponding week of previous year. 124,496 09

Increase.....$35,582 48

The following is a statement of earnings of the Toledo and Wabash Railway for the 2d week of Oct., 1864.....$44,150 00
Corresponding week of previous year. 31,049 00

Increase.....$13,101 00

The earnings of the Michigan Central Railroad for the 2d week in Oct., 1864, were....$92,546 00
Corresponding week of previous year.. 85,176 00

Increase..... $7,370 00

The earnings of the Rock Island Railroad for the 2d week in October, 1864, were...$69,165 00
Corresponding week of previous year. 47,628 00

Increase.....$21,537 00

County Subscriptions to Railroad Co.—The Armstrong County Bond Case.

A decision was recently delivered in the Supreme Court of Pennsylvania, in the Armstrong county Bond Case, in which the principle is evolved that where bonds have been issued by a county in payment of its subscription to the stock of a railroad company, and sold below par, in violation of the statute authorizing them, the county may compel the holder, by proceeding in equity for the purpose, to receive in satisfaction for the bonds the amount actually paid for them by the first purchaser, with lawful interest thereon. The plaintiff in this case purchased twenty-seven bonds of the county at thirty-seven cents on the dollar, or sixty-three cents below par. The county offered him the amount which he paid for the bonds, with interest, which he refused to take. Judge Woodward, in his opinion, holds that, no matter how unfairly the county may have been dealt with, it was their official act, and they were responsible for it. "But to make them responsible beyond this, is to fabricate a fictitious liability out of principles of the commercial law that are sound and valuable in their proper application, but pernicious and unjust when applied as the argument strives to apply them." Courts of Equity he holds are the only remedy; that the intent and purpose of issuing bonds are always to put money into the treasury. Let them be enforced to the extent of the money they brought, and the popular mind will at once recognize the reason and justice of such a decree.

But the law of the United States and the law of Pennsylvania in regard to municipal bonds sold in violation of the statute authorizing them, do not agree. The Supreme Court of the United States at its very last session, decided in two or three cases, the exact opposite of this doctrine; one a suit against a county of Pennsylvania, Mercer County *vs.* Hacket (1 Wallace, 83,) that if counties issue their bonds, payable to bearer, and those bonds go for value into the hands of holders in good faith, the counties must and shall pay the face of the bonds, and not only what actually passed into the county treasury. Bonds payable to bearer, though they are in truments under seal, were declared in one case by Grier, J., speaking for the whole Court, to be "negotiable by the commercial usages of the whole civilized world;" and in another, Gelpcke *vs.* City of Dubuque, by Swayne J., (1 Wallace, 206,) "to have all the qualities of commercial paper." Nothing, indeed, could be more resolute than the stand taken by the Supreme Court of the United States in the whole matter, which, apparently, it considered one that touched the honor of the country as much as the rights of creditors. Admitting that an illegal issue might probably be prevented by injunction, they declared positively that after the bonds were issued and sold, for value, to innocent holders, the Court would presume almost anything as to the regularity of preceding acts, and decide almost anything as to legal power in the city or county issuing or selling the bonds, (Meyer *as.* City of Muscatine, 1 Wallace, 384). The view taken by the Supreme Court of Pennsylvania in previous cases was declared not to be law. As the decisions now stand, therefore, any Pennsylvanian suing a Pennsylvania county, and who must accordingly sue in a State Court, cannot recover more than the amount which the county actually received; but a citizen of any other State or any foreigner, to both of whom the Courts of the United States are open, will recover the whole amount. Of course, as the bonds are payable to bearer, no Pennsylvania, if he can help it, will sue on them. By selling them—if sold in good faith—to a citizen of New York or New Jersey, we suppose, since the bonds are declared to have "all the qualities of commercial paper," that suit could be brought by the new purchaser in the Federal Courts, and the whole amount be recovered.

Important Lawsuit in Reference to Stock Operations.

In the Maryland Supreme Court, before Judge Martin, the case of Wm. J. Dalrymple *vs.* The Maryland Fire Insurance Company, was concluded by a verdict for the plaintiff. The action was instituted to recover for an alleged illegal parting with 325 shares of Baltimore and Ohio Railroad stock. The facts proved were that on the 12th day of June, 1860, the plaintiff's agent, Mr. Conkley, applied to the President of defendant for a loan of $19,500, and obtained the money, depositing the shares as collateral security, the contract providing that a margin of ten per cent. was to be kept up, and that the money was to be paid on one day's notice from the defendant, and that on failure on plaintiff's part, defendant could sell without further notice. The stock commenced declining a few months after the loan was made, and continued to decline until it had reached $55 per share. On the 20th of November, 1860, and in May, 1861, it had declined to about $40 50 per share.

The defendant, on the 30th of October, 1860, commenced notifying the plaintiff to put up more margins and pay up part of the loan, several notices having been given between that date and November 13th. On the latter day the defendant notified the plaintiff to return the whole loan the next day. The loan not having been returned, the defendant directed the sale of the stock at the Board of Brokers by its broker, and one of its directors purchased it at $55 per share, (the highest price of the day,) for the defendant, and an account was afterwards sent to the plaintiff's agent and a claim made for the balance; being $1,700. The defendant retained the stock until the spring of 1862, when it sold it at the board to various parties for an amount which realized $600 more than the debt. On December 16th, 1862, the stock having risen to $78 per share, the plaintiff called on the defendant, tendered the return of the loan, and demanded his stock. The Court had already decided in another case, against the Marine Insurance Company, that a sale at which the party with whom the pledge was made becomes a purchaser, is void, (although it is, as the Court said of the sale in this case, entirely free from fraud,) and the only question was as to the rate of damages. The defendant's counsel

(Messrs. Wallis & Fisher,) contended that the plaintiff could claim only the value of the stock on November 20th, 1860, with interest, less the debt with interest. The plaintiff's counsel Messrs. Schley and Alexander,) contended that he was entitled to the price of December 16, 1862, when he made his demand, and the Court, while saying there was no fraud on the part of the defendant, but that its officers supposed they could properly buy in the stock at the stock board, held that the latter was the proper rule, and so instructed the jury. The jury assessed the plaintiff's damages at $5,037 18, and the defendant appealed to the Court of Appeals.

Railways Including Cartage on Freights.

The case of Baxendale *vs.* the Great Western Railway has just been decided in the Court of Error in England, and is thought to be a controlling one under similar circumstances hereafter. It appears that the plaintiffs better known as Pickford & Co., "brought this action to recover back sums of money which they had paid for tolls and for carrying their goods on the railway but which they contended included, in fact, charges for the collection and conveyance of goods to or from the different receiving houses of the company but of which facilities they did not avail themselves as they carted their goods which they as carriers collected to the Paddington station. When the case was argued in the Court of Common Pleas, Lord Chief Justice Erle delivered a judgment in favor of the defendants, but the rest of the Court differed from him, and the decision was, therefore, in favor of the plaintiffs. To this was a writ of error. The Court of Appeal which assembled in the exchequer Chamber consisted of Lord Chief Justice Cockburn, and Justice Crompton, Blackburn, and Mellor, and Barons Martin, Channel, and Pigot. At the close of the arguments the Chief Justice said that they were all agreed that the judgment of the court below must be affirmed. The matter appeared to turn not on the Traffic Act, but upon the company's own Act, which contained a clause for equality of charges which was afterwards renewed. It is said that the charges should be made equally and that construction had been put upon it in a case in the Court of Common Pleas, which applied to a case like the present, and it was not *competent for a railway company to superadd to the tolls they were entitled to charge another charge for collection of conveyance to or from the railway*, inasmuch as in doing that they were imposing upon those who did not require their services for such collection or conveyance, and a charge which might be a reasonable charge, as regarded those who require the service, but unreasonable as regarded those who did not, therefore it was an unequal charge. That construction having been put upon the Act by the court of Common Pleas, this court were all of opinion that that was the right view, and that the judgment was correct, and they hoped that in future a charge for those services might not be made under the guise or disguise of tolls on a railway.

Judment affirmed."

The lines in Italics appear to state the pith of the decision, which was against the Great Western Company.

☞ The national bank currency issued during the last week amounted to $1,661,200, making the total to date $55,376,730.

English and Swedish Iron.

The difference between plate iron made respectively in England, France and Sweden, has been thoroughly tested at the fortress of Calberg, Sweden. There were two French plates, each 7 feet 6 inches by 2 feet 3 inches. Two Swedish, one 12 feet by 1 foot 6 inches, and one 6 feet by 3 feet 8 inches. All the plates were 4½ inches thick, and then bolted to a teak target backed with iron plating, and supported by a massive stone pier. The two upper plates in the target were French, each secured by 11 bolts; the next plate below was the longest, Swedish, secured by 29 bolts. Below this was a tier of two short plates, one Swedish and one English, each secured by 24 bolts, and the lowest plate was a long English, secured by 29 bolts. Each plate received six shots from the ordinary 68 pounder naval gun. The French and Swedish plates broke to pieces; and the English plates remained uninjured and free from cracks. The shots used were of Swedish iron.

Railway from Windsor to Annapolis.

We learn that two offers have been made for the construction of a line of railway from Windsor to Annapolis. The parties to the proposal are the International Contract Company of London, and some other company equally responsible. The proposals are made in accordance with the views of the subvention resolution passed at the last session of the Nova Scotia House, which requires the Government to pay 4 per cent. on £6,000 a mile for twenty years. Under this arrangement, Nova Scotia will secure the construction of eighty-five miles of road, at a cost to the Province of £20,000 cy. for twenty years. It is thought that a very large proportion of the annual subvention will be immediately returned to the Province through the increased receipts that will be obtained over the line between Windsor and Halifax, as soon as the connection is formed. We are told, too, that in a few weeks, the line from Pictou to Halifax will be under contract.—*Halifax, N. S., Colonist.*

☞ The earnings of the Huntingdon and Broad Top Mountain Railroad, from Jan. 1 to Oct. 1, nine months, are $265,564
Same period in 1863..... 183,555

Increase for nine months..... $82,000

Large as the increased receipts of this Company have been for the nine months of the current year, they would have been much greater had the carrying companies on which it relies been able to furnish the required transportation. The company to protect itself against any similar drawback next season, has increased its own power and rolling stock, so that for the future we may class the Huntingdon and Broad Top Company among the regular interest and dividend paying companies.

☞ The Montreal and Vermont Junction Railway between St. John's and Swanton is rapidly approaching completion, and will probably be opened for traffic by the end of the month. A mile or so of the track has yet to be laid.

☞ Five hundred shares of the American Telegraph Company's stock were recently sold at auction, to eight different takers at prices ranging from $140 to $143 per share.

☞ The annual election for thirteen Directors of the Camden and Atlantic Railroad Company, will be held at the office of the Company, Cooper's Point, Camden, on the 27th instant.

OFFICE OF THE PITTSBURGH BRIDGE COMPANY,
No. 83 Water street, Pittsburgh, Pa.,
October 12th, 1864.

PLANS AND PROPOSALS are invited for both Wooden and Iron Bridge Superstructure, and proposals for the masonry of the piers and abutments of the Roadway Bridge to be erected over the Monongahela river, from Pittsburgh Point to West Pittsburgh. The bridge will consist of eight spans 210 feet each from centre to centre of piers, or 201 feet clear of masonry, and one span 317 feet from centre to centre of piers. The clear width of carriage way must be 19 feet, with foot-ways at each side 8 feet in clear. The structure must be proportioned to sustain, in addition to its weight, a uniformly distributed load of 2,000 pounds per lineal foot. The effect on any portion of the structure under this maximum load must not exceed one-sixth of its breaking weight.

Plans and specifications of the masonry and superstructure may be seen at the office of the Company. Bids will be opened December 1st, 1864. The right to adopt either wood or iron superstructure, or to reject any or all of the bids or plans is reserved.

Endorse envelope "Proposals for Pittsburgh Bridge, ('wood') or ('iron')" and "Pittsburgh Bridge Masonry."

Fiscal agent for the United States, and Government Depository in the City of New York.

Has on hand the Popular 7 3-10 Notes, and allows ¼ per cent. to all subscribers.

Also 10 40 Bonds which are payable, principal and interest in Gold. Also converts the old 7-30s into 6s of 1881. Collects Certificates of Indebtedness. Buys and sells Quarter-Master's checks and gives every possible facility to parties wishing to transact financial business with Government. 3m-51

CENTRAL

Petroleum Exchange Office

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have entered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

FOR SALE.

450 Ton, Street Rail, Philadelphia pattern.
1000 Ton, 57 lb. English Rail.
1300 Ton, 60 lb. " Rail.
8 Locomotives 14x22 Cylinders, 5 feet Drivers, now ready for delivery.
30 Platform Cars.

The Cars and Locomotives 4 feet 8½ gauge.

Apply to

4t38 GEO. T. M. DAVIS,
New York, Sept. 14, 1864. 47 Exchange Place.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD CO., NEW YORK, Sept. 20, 1864.

THE FIRST SERIES of $2,000,000 Redemption Bonds bearing 6 per cent. interest, and payable in 1890, have been exchanged for Construction Bonds. The Directors, by resolution this day, have decided to issue another series of $3,000,000, under the same mortgage, upon the road and appurtenances, which are offered at 110 per cent., in exchange for Construction Bonds at 120 per cent., making a difference of 10 per cent. in favor of the Construction Bonds.

This arrangement is proposed in order to relieve the holders of the Construction Bonds from the inconvenience of a peremptory call for the Bonds as provided by the terms of their issue, but in case the Bonds are not surrendered and the exchange effected in amounts sufficient to meet the requirements of the land sales, the Company will be compelled to pay off a further portion of the Bonds.

THOMAS E. WALKER,
Treasurer.

Finances of San Francisco.

We have before us a considerable volume entitled "San Francisco Municipal Reports for the fiscal year 1862-'63," and propose herewith to lay before our readers a synopsis of its contents. Another year has passed over since the period to which it refers, but some length of time must elapse before its doings can be fashioned into book-shape and given to the public. This is the last published report, and has only just been received from the city auditor, for whose courtesy in transmitting us a copy we here return our thanks.

San Francisco—the Queen City of the Pacific Coast—is by no means an ancient emporium. Its history before the American conquest has no bearing on its present condition. Near its site was the village of Yerba Buena, famed for its ecclesiastical colony and nothing more. At a favoring hour, however, the gold discovery was made in the interior, and *presto*, San Francisco rose on the margin of its beautiful bay and commenced its career as the metropolis of the gold region of the Pacific slope.

Fifteen years have since this important era been numbered with the past, and as each succeeded its predecessor the city has been developing and consolidating its advantages, and now presents us with a community numbering 100,000 souls, engaged chiefly in commerce and the gold trade, exporting in the latter capacity alone to the value of $1,000,000 a week, and as a commercial port rivalling the old city of Boston in the variety and amount of its imports and exports. Truly this is a wonderful spectacle even in this age and country of wonders.

It is not, however, of its external connections we would descant, but of that which concerns its inner financial condition. To convert its wilderness site into a thriving mart has required, beyond private expenditures, vast public outlays. To lay out and grade streets, squares and parks, to construct wharves, erect public buildings, open outlets to the adjacent country, and do and complete all that a great city demands is not a costless undertaking. In most instances these operations spread over a long number of years and are only undertaken one by one as circumstances demand. But San Francisco demanded the immediate and complete construction of these city appurtenances. It is not wonderful then that we find its government saddled with a considerable debt, or its annual expenditures large. To its honor, however, be it said, the city authorities have always been prompt in paying all they have contracted for, and that in *coin*, spurning to take advantage of the law to repudiate even in part their responsibilities, as our old States and cities have done, by paying in another currency than that which circulated when they were borrowers.

Nothing exhibits more clearly the progress of a community than the annual valuations of taxable property within its limits. And probably no other city has progressed more rapidly than the one under consideration. In 1851 the total valuation was $21,621,224, and in 1864 $77,129,066, showing an increase in 13 years of $55,507,852, or 210.5 per centum. The following shows the valuation yearly since the city government was first established:

Fiscal Years.	Real Estate.	Improvements.	Personal Property.	Total Amount.
1850-'51	$16,849,054	Included in Personal	$4,772,160	$21,621,214
1851-'52	11,141,463		2,875,440	14,016,903
1852-'53	15,676,356		2,805,381	18,481,737
1853-'54	17,889,850	$6,158,300	4,852,000	28,900,150
1854-'55	19,765,285	9,159,935	5,837,607	34,762,827
1855-'56	18,607,800	8,394,925	5,073,847	32,076,572
1856-'57	17,827,617	8,345,667	4,194,970	30,368,254
1857-'58	16,676,545	7,394,296	12,426,335	35,897,176
1858-'59	13,554,565	5,946,585	11,224,800	30,725,950
1859-'60	14,172,235	6,522,985	9,323,002	30,019,222
1860-'61	25,148,885	Included in Real Estate	10,818,614	35,967,499
1861-'62	31,871,887		9,973,222	41,845,119
1862-'63	36,975,250		15,655,760	66,581,208*
1863-'64	43,116,538		19,378,147	77,129,066*
Additional special assessments 31st Oct., 1863				1,560,655
Total valuation for 1863-'64				$78,189,732

* Including mortgage property in 1862-'63, $13,900,208; in 1863-'64, $14,634,381.

The cause of the fluctuations noticeable in the above table may be attributed—those of 1851-'52, to the disastrous fires destroying almost the entire business portion of the city; of 1854-'55 to the reaction from the speculative advance in real estates of the previous years, and in 1857-'58 in the financial revulsion of that year. In 1862 a law was passed authorizing the collection of taxes upon mortgages, which added largely to the valuations of the two last years.

The rates of taxation for the years embraced in the valuation table were as follows:

Fiscal Years.	State Tax.	City Tax.	County Tax.	War Tax.	Total Taxes.
1850-'51	$0.50	$1.00	$0.50	.....	$2.00
1851-'52	50	2.45	1.15	.....	4.10
1852-'53	80	2.45	1.66½	.....	4.41½
1853-'54	60	2.00	1.28½	.....	3.88½
1854-'55	60	2.15	1.10½	.....	3.85½
1855-'56	70	2.33¼	0.82½	.....	3.86
1856-'57	70	$1.60		.....	2.30
1857-'58	70	1.60		.....	2.30
1858-'59	60	1.85		.....	2.45
1859-'60	60	2.56.9		.....	3.19.9
1860-'61	60	2.25		.....	2.85
1861-'62	62	2.25		.....	2.87
1862-'63	62	1.97½		$0.15	2.74½
1863-'64	90	1.20		.....	2.10

The expenditures of the local and municipal

governments since August 1849, are exhibited in the following table:

From Aug. '49, to May 8, '50	$649,859 82
From May 8, '50, to June 30, '51	1,818,447 00
For fiscal year 1851–'52	456,332 00
" 1852–'53	1,009,029 00
" 1853–'54	1,831,825 00
" 1854–'55	2,646,190 00
" 1855–'56	856,120 00
Total for 6 years and 8 months	$9,262,802 82

Since the passage of the Consolidation Act the expenditures have been:

For fiscal year 1856–'57	$353,292
" 1857–'58	366,127
" 1858–'59	480,895
" 1859–'60	745,014
" 1860–'61	579,131
" 1861–'62	591,656
" 1862–'63	700,364
Total for seven years	3,816,779 00
Add interest and principal of funded debt paid	2,832,046 00
—and paid to the State of California	3,210,060 00
Total expenditures	$19,121,687 82

The revenue of the city and county for the fiscal year 1862–'63, (exclusive of payments by the State for school apportionment and assessment expenses,) amounted to $1,334,681 34, being an increase of $170,930 75 over that of the preceding years, as shown by the following comparative statement:

	1861–'62.	1862–'63.
From taxes	$857,482 40	$982,304 79
" licenses	132,278 11	160,686 79
" fees	95,071 85	101,6 8 53
" fines of courts.	28,252 05	34,428 20
" harbor dues	16,913 05	18,127 05
" wharf & ground rents	11,187 41	9,789 00
" sale of school bonds	11,960 00	
" poll taxes	3,033 00	18,852 48
" int'st on loans.	6,976 62	3,680 08
" sundries	596 10	5,184 47
	$1,163,750 59	$1,334,681 34
Add amount collected for State	520,960 47	
Total collected	$1,855,641 81	

The payments to the State of California by the city and county for thirteen years have been as follows:

Fiscal Years.	Property Taxes.	Poll Taxes.	Stamp Taxes.	Licences, etc., etc.	Total Taxes.
1850–'51	$95,879	$2,220	$.....	$38,905	$137,003
1851–'52	78,675	2,180	.....	21,665	102,520
1852–'53	61,218	11,833	.....	20,532	93,583
1853–'54	188,659	3,828	.....	17,852	210,339
1854–'55	179,617	3,800	.....	108,479	291,896
1855–'56	168,588	.....	.....	11,431	180,019
1856–'57	119,572	4,907	.....	22,480	146,959
1857–'58	224,359	8,640	39,751	54,323	322,073
1858–'59	181,471	2,825	94,216	28,456	306,468
1859–'60	192,198	1,826	90,409	33,000	317,433
1860–'61	200,574	4,325	39,964	32,418	277,281
1861–'62	299,561	8,075	28,287	27,653	363,526
1862–'63	390,655	48,229	57,457	24,619	520,960
Total	$2,221,026	$97,158	$350,094	$441,812	$3,210,060

In the property taxes of 1862–'63, there is included $69,811 73 for the Federal War Tax and in the poll taxes $29,284 20, for the National Poll Taxes which being deducted from the total payments makes the sum paid for State purposes $421,864 07, showing an increased payment of $118,838 over the preceding year.

In this connection it may be proper to state that the taxable property of San Francisco yields about 40 per cent. of the real estate revenue of the State of California.

Funded Debt.

Statement of the funded debt of the city and county, June 30, 1863:

Description.	Amount Outstanding	Interest — Rate.	Interest — Periods.	Principal Payable.
City bonds of 1851	$1,352,600	10	May & Nov.	1871
City fire bonds of 1854	178,500	10	Jan. & July	1860
City bonds of 1855	329,000	6	" "	1875
City & Co. bonds of '58	1,133,500	6	" "	1858
School bonds of 1854	42,000	7	May & Nov.	1866
" of 1860	59,500	10	Jan. & July	1870
" of 1861	20,000	10	" "	1870
City and Co. bonds of 1862–'63	240,000	7	" "	1872–'73
Total	$3,355,100			

—the interest on which amounts annually to $268,550, and the sinking fund to $79,166, (not including that for the bonds of 1862–'63 which does not commence until 1866:) total, $347,716 66.

The last item of the above debt was made for the payment of the City's subscription to the capital stock of the San Francisco and San Jose Railroad. Bonds to the amount of $60,000 have been issued since the close of the fiscal year, making the full subscription $300,000.

In addition to the funded debt above related there was existing a judgment debt against the city and county, amounting to $1,450,000. Since the close of the fiscal year in pursuance of an order of the Board of Supervisors, under authority of an act of the Legislature, a settlement was effected with a large number of creditors in the so-called City Slip suits, and also of the Seale judgment.

In accordance with the terms of the supervisor's order, three appraisers were appointed, who valued the various lots at $162,000, under which valuation the holders all elected to retain their lots, which was agreed to by the committee appointed on behalf of the city. To complete the settlement, bonds bearing interest at 7 per cent., redeemable in 20 years from Oct. 1, 1863, were to be issued to the amount of $960,000, which extinguish $1,120,000 of the judgment claims.

The history of the city legislation, terminated by the settlement as above, is remarkable. The property was sold at public auction Dec. 26, 1853, in pursuance of an ordinance of the Common Council. This ordinance was passed the Board of Aldermen by the requisite majority; a vacancy existed in the Board of Assistants in which body it was passed by four votes out of seven. The property was bid off at high figures, and was then looked upon as having been advantageously sold by the city. Following the depreciation in value which occurred in the succeeding years, dissatisfaction was expressed by the purchasers, and the legality of the ordinance authorizing the sale questioned. This resulted in the institution of suits for the recovery of the purchase money, which have been prosecuted with untiring industry through the various Courts until they were recently decided in favor of the purchasers. The suits on the other hand were vigorously but unsuccessfully contested on the part of the city, until the final decision of the Supreme Court was pronounced against her.

Referring to the foregoing exhibit of the indebtedness of the city and county of San Francisco, it should be borne in mind that authority exists by act of the Legislature of April 22, 1863, for the issuance of $1,000,000 in 7 per cent. bonds to the Pacific Railroad Companies, to wit: $400,000 to the capital stock of the Western Pacific Railroad Company, and $600,000 to that of the Central Pacific Railroad Company. The question authorizing the supervisors to make the subscription was submitted to the public vote at the election May 19, 1863, and decided in the affirmative by 6,239 votes *for* to 3,118 *against* the measure. Informalities in the election were subsequently alleged, and an injunction restraining the issue of the bonds was obtained. The case was carried to the Courts, and a decision has been awarded in favor of the issue, the full report of the adjudication of which appeared in the Journal of the 15th inst. (Which see)

Thus in addition to the amount of funded debt represented in the table showing its sum at $3,355,100

—there should now be added:

7s bonds issued to S. F. & S. J. R. R. Co	$60,000
7s bonds to be issued for judgment debt	960,000
7s bonds to be issued to Central Pacific Railroad	600,000
7s bonds to be issued to Western Pacific Railroad	400,000
	202,000

—making a total of $5,875,100

Add to this the balance of judgment debts, less amount provided for by city slip settlement, say $300,000, and the total indebtedness of the city, authorized and in abeyance, will exceed $5,500,000. This presents a large showing; but it is to be remembered that the city holds the stock of the San Francisco and San Jose Railroad Company for the $300,000 subscribed, and that the subscription to the Pacific Railroad Companies was authorized to be made upon similar terms and as the work progresses.

It should also be borne in mind that less than fifteen years have elapsed since this city was a place of comparative obscurity, and that at the present time San Francisco occupies a pre-eminent and commanding position among her sister cities. She presents the front of the Union arms upon the Pacific coast, and nine-tenths of her citizens carry in their hearts and prove by their actions their sympathy with the National cause.

The rivers, which from the mountain slopes have profusely poured their garnered gold into her lap, and the hills whose silver treasures have contributed and still continue to contribute so largely to her prosperity, have had witness borne that her citizens are not unmindful of the good gifts bestowed upon them.

Her wharves resound with the busy hum of a thriving commerce; her streets are alive with the active tread of an enterprising and industrious population; good order and peace prevail; the public liberties are preserved; and unrivalled and unapproachable upon the western shore of the continent, San Francisco has won and proudly

wears her crown as the Queen City of the Pacific. No surer guarantees for continued honor in her public duties towards her creditors can be offered by her compeers.

Grand Trunk Railway of Canada.

The earnings of this road for the half-year ending June 30, 1864, were:

From passengers, mails and expresses	£174,354
" merchandize and live stock	349,539
" rents receivable	2,110
" sundries	2,297
	£528,301

Ordinary working expenses, viz:

Maintenance of way, stations and buildings	£52,624	
Locomotive power and repairs to engines	107,910	
Repairs and renewals of cars	37,353	
Traffic expenses	95,223	
General charges	12,030	
Miscellaneous expenses	4,839	
Rent of rolling stock	3,810	
Tolls paid to other companies	1,232	
		315,021
Net earnings		£313,280
Deduct renewals of way, including £1,489 for Montreal and Champlain line		31,489
Balance to net revenue account		£181,791
Add balance from last half-year		532
		£182,323
Nominal amount of postal and military revenue carried to separate act.	£10,431	
Amount charged on account of accident at Beloeil	8,219	
		18,650
Leaving a balance of		£163,672

The gross receipts* from traffic and all other sources for the half-year have been £528,301, as against £456,222 for the corresponding half of 1863, or an increase of £72,079, or equal to 15.80 per cent.

The coaching traffic again shows a considerable improvement—the number of passengers carried, of all classes, having been 523,284, as against 457,120 in the first half of 1863, or an increase of 66,164, or 14.47 per cent. The receipts have been £174,354, as against £148,866, or an increase of £25,488, or 17.12 per cent.

The average receipt per passenger in 1863 was 5s 7d, and in 1864, 6s.

The total tonnage of freight carried during the half-year has been 430,034 tons as compared with 369,484, and the receipts have been £349,539 as against £302,088, or an increase of £47,451, or equal to 15.70 per cent. The average yield per ton in 1864 was 16s 3d, and in 1863, 16s 4d.

The sum carried into the accounts for Postal Service is again a merely nominal amount, no settlement of this long pending question having up to this time been effected with the Government of Canada. The last advices from the Company's Executive in Canada state that renewed promises of a most positive character have been made of an early settlement of the accounts between the Government and Company, and the Board hope to be in a position to announce at an early date that these pledges have been fulfilled.

The ordinary working expenses show a total outlay of £315,022, as against £289,970, or an increase of £25,052, or equal to 8.60 per cent, expended in earning an increase of revenue of £72,079, or 15.80 per cent.

The per centage of ordinary working expenses to June, 1864, is 59.62 as against 63.59 in the first half year of 1863.

The following statement shows the per centage rate of ordinary working expenses exclusive of renewals since 1861 inclusive:

June Half Year.		Dec. Half Year.
1864	*59.62 per cent.	
1863	*63.59 "	57.11 per cent.
1862	77.23 "	59.68 "
1861	87.32 "	68.64 "

The following statement shows the progress of the Net Revenue of the Company since 1859:

Year	Miles open. No.	Earnings. £	Expenses including Renewals. £	Revenue Bal. £	Yearly Total.
1859—June	880	223,930	203,062	20,867	73,357
" Dec	880	282,939	230,448	52,490	
1860—June	978	314,811	268,810	46,000	102,684
" Dec	978	367,847	311,163	56,684	
1861—June	1,090	347,110	300,324	46,785	142,492
" Dec	1,090	419,409	323,701	95,707	
1862—June	1,090	382,902	319,556	63,436	170,233
" Dec	1,090	439,361	332,563	106,797	
1863—June	*1,174	456,222	322,933	133,289	315,033
" Dec	*1,174	510,580	328,833	181,747	
1864—June	*1,174	528,301	346,510	181,791	------

From the net profit of the half-year, viz., £181,791, there has to be deducted the (nominal) amount of £10,431 for Postal and Military Service Receipts, and the sum of £8,219 paid as compensation in connection with the unfortunate accident at Beloeil in June last, leaving (including the balance of £532 carried from last half-year) £163,672, which has been applied or is now applicable as follows:

Interest, &c., paid on land				£2,665	13 0
" on mortgage to Bank of Upper Canada				4,423	16 2
" Loans, Bankers' Balances, Promissory Notes, European Exchange, &c.				7,356	5 0
" British American Land Co.'s Debentures				616	8 9
" Montreal Seminary debentures				616	8 9
" Island Pond debentures				2,700	0 0
Half yearly instalment Portland Sinking Fund				2,311	12 10
				£20,690	4 6
Atlantic and St. Lawrence Lease in full.	£32,545	0	4		
Detroit Line Lease in full.	11,250	0	0		
Montreal and Champlain Company	10,273	19	5		
				54,068	19 9
First preference bond interest for half-yr.	£49,920	15	0		
Second pref., bond interest for half-year.	22,585	10	0		
Third pref., bond interest for half-year.	9,936	0	6		
				82,442	5 6
Balance carried forward to next account				6,470	14 10
				£163,672	4 7

The half-year's interest accrued on the First and Second Preference Bonds to the 30th June last will be paid on and after the 17th October next, on presentation of the coupons at the Company's offices; and warrants for the interest on the Third Preference Stock will be forwarded to those proprietors who stand on the register at the closing of the books on the 28th inst.

The improvement of the Permanent Way by strengthening and renewal has progressed rapidly during the half-year; 34¼ miles of lines with heavier Rails, fished at the joints, having been relaid, and 12 miles of the 34½ have been renewed with steel-headed rails.

The outlay on Capital Account for additions to the plant and property of the Company has been during the past half-year £65,229, which includes the cost of upwards of 100 Cars and 13 Engines, and payments on account of further Rolling Stock.

The Directors have issued Equipment Mortgage Bonds to the amount of £244,100. The issue of these Bonds have enabled the Directors to meet liabilities on Capital Account and to pay off temporary loans. As a part of these operations, £153,100 Second Preference, and £18,372 Deferred Second Preference Bonds, have been added to the available assets of the Company. It has also enabled the completion of the purchase, for a sum of £20,140, of the engines hired from Messrs. Fairbairn and Son, and Messrs. Peto and Co., by which a saving to Revenue of an Annual Rental of £3,792 is effected.

The Directors have to report that the £100,000 Portland Bonds due by the Grand Trunk Company as lessees of the Atlantic and St. Lawrence Railway, and maturing in 1866, have been purchased with funds accruing in America, and in lieu thereof Sterling Bonds for the same amount will be hereafter issued.

The Securities (Equipment Bonds and others) belonging to the Company (including these Sterling Bonds), and available for Capital purposes, after deducting the £250,000 of Fourth Preference Stock cancelled with the issue of the Equipment Mortgage Bonds, are now as follows:

Atlantic & St. Law. New Bonds.	£100,000	
Second Preference	195,500	
" " Deferred	18,372	
Atlantic & St. Law. Shares	7,100	
" " Capitalized	4,875	
" " Bonds	7,500	
Fourth Preference Stock	130,119	
		£463,466
Equipment Bonds		255,900
		£719,366

The increasing traffic of the road will necessitate at an early date further additions to the means of conveyance, and some increased station accommodation at various points. In fact, the increase of the traffic and net profit in the future now becomes almost entirely a question of adequate equipment.

The agreement between the Grand Trunk and Buffalo and Lake Huron Companies, reported to the proprietors at the last Meeting, has been carried into practical operation. The Board have much pleasure in announcing that the new arrangement has been received with satisfaction by the public in the district served by the Buffalo and Lake Huron Company. The arrangements preparatory to laying down the narrow gauge between Fort Erie and Sarnia are in hand.

The Board have to report that a Bill legalising the agreement for co-partnership with the Montreal and Champlain Railway (the particulars of which were reported at the last Meeting) was passed by the Canadian Legislature in the Session now closed. It is satisfactory to the Board to announce that, notwithstand the heavy expenses incurred in renewals of the Permanent Way, &c., upon this line during the past half-year, the loss upon the Champlain arrangement will not exceed £200.

The Directors believe that the Board and Shareholders will agree with them in regarding the steady and continuous increase of gross traffic and net earnings exhibited by this Report as justifying favorable views of the intrinsic value of the line and the ample resources of the extensive area of which it serves. In all the calculations of profit and loss, however, the temporary difficulties brought by the fluctuations of American currency must be borne in mind. The Board have felt much anxiety in relation thereto but hitherto they have been able to make arrangements by which the loss has been mitigated, and during the past half-year the debit has been obviated.

The Hon. Mr. Thibaudeau having resigned his seat as a Director of the Company in Canada, the vacancy has been filled by the appointment of Mr. Alexander McEwen, a Director of the Buffalo and Lake Huron Company.

It appears from the statement of rolling stock on the 30th of June last that the number of passenger engines was 83; goods engines, 166; shunting engines, 5—total 254. There were 101 first class carriages, 12 sleeping carriages, 3 composite and paymasters' carriages, 3 smoking cars,

* Throughout this report the Statements of the receipts and expenses include for both half-years the Montreal and Champlain Railway.

49 second class cars, 38 Post-office and baggage cars, 28 baggage cars, 70 break vans, 2,050 box cars, 50 box and cattle cars, 55 cattle cars, 1,107 platform cars, 92 ballast trucks, and 34 snow ploughing machines—total 3,692. The total increase in the stock was 12 locomotive engines, 3 sleeping, 3 smoking, 103 box, 59 box and cattle, 6 cattle and 2 snow-ploughing cars.

CAPITAL ACCOUNT, JUNE 30, 1864.

Expended on capital actcount to Dec. 31, 1863	£16,061,702

Directors.—EDWARD W. WATKIN, President; Thomas Baring, Henry W. Blake, C. J. Brydges, Robert Cassels, James Ferrier, Geo. C. Glyn, K. D. Hodgson, Alex. McEwen, Wm. Molson, Richard Potter, A. W. Young.

Auditors.—T. Moreland, Edward T. Taylor, Montreal; Wm. Newmarch, London.

Chief Accountant.—Joseph Hickson, Montreal.

Railroad Earnings—Weekly.

The earnings of the Cleveland and Toledo Railroad for the 3d week in Oct. were $42,457 00
Corresponding week of previous year.. 32,752 00

Increase $9,705 00

For the three weeks the earnings were $126,-111, against $96,680 in 1863—an increase of $32,-431.

The earnings of the Rock Island Railroad for the 3d week in October, 1864, were...$79,846 00
Corresponding week of previous year. 48,887 00

Increase $30,979 00

The earnings of the Grand Trunk Railway for the week ending Oct. 13, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:..$120,089 00
Corresponding week, 1863 ..... 113,801 00

Increase $6,288 00

The traffic of the Great Western Railroad for the week ending Oct. 14th, 1864, was as follows:

Passengers	$33,173 79
Freight and live stock	24,578 88
Mails and sundries	1,545 67
Total	$59.298 34
Corresponding week of 1863	67,027 14
Increase	$7,728 80

The earnings of the Chicago and Alton Railroad Company for the week ending Oct. 15, were:

	1864.	1863.
Passengers	$30,853 50	$17,187 42
Freight	42,624 50	30,068 06
Sundries	1,325 25	1,661 68
Total	$74,803 25	$48,917 16
Increase 1864		$25,886 09

The earnings of the Marietta and Cincinnati Railroad for the 2d week in October:

	1864.	1863.
Passengers	$10,350 67	$5,682 41
Freight	9,169 56	11,669 23
Mail, express & telegraph	1,169 58	1,132 00
Total	$20,689 81	$18,483 64
Total this month to date	$40,606 46	$34,422 91
Total since Jan. 1	$777,980 52	$515,962 66

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the 3d week in October:

	1863.	1864.
Passengers	$27,191 27	$57,126 89
Freight	99,141 17	116,015 95
Express	1,109 32	1,433 66
Mail	1,286 12	1,405 68
Total	$128,727 88	175,982 18
Increase 36 70-100 per cent		$47,254 25

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 14, 1864, were:

	1864.	1863.
Passengers	$3,767 49	$2,027 85
Freight	8,865 18	11,435 15
Express	104 16	75 00
Mails	296 58	296 58
Total	$12,533 36	$13,834 58

Receipts from January 1st to Oct. 14:

1864	$452,579 39
1863	308,822 73
Increase	$143,756 66

☞ Mr. Sanford Fleming, who has arrived in Quebec, reports most favorably of the survey of the Intercolonial road now going on.

Common Carriers.—Extent of their Liability irrespective of Negligence.—Injuries to Passengers.

The late case of Alden against The New York Central Railroad Company was an action for damages to a passenger on the defendant's railroad, from the running off the track of the car in which he was riding.

Upon the trial, it appeared that the accident was caused by the breaking of the axle of the car. It was extremely cold, and there had been an unusual severity and continuance of cold weather before the accident, which, it was proved, chrystalizes iron and renders it brittle. There was a small old crack in the axle, so covered by the wheel that it would have been impossible to discover it without taking the wheel off; and to replace it would require a power equivalent to twenty-five or thirty tons.

Some of the witnesses who were experts, testified that they knew of no way of discovering such a crack without destroying the axle.

The defendant moved for a non-suit, on the ground that no negligence on its part had been shown, which was denied and an exception taken. The defendant asked the Court to charge that the care and diligence required of it by law did not require the taking off of the wheel to examine the axle before starting the car. The judge denied so to charge, and the defendant took an exception.

The plaintiff had a verdict and judgment, which were affirmed at general term in the eighth district of this State, and the defendant appealed to the Court of Appeals.

The following is the opinion of that Court, delivered by

GOULD, JR.—In regard to what has been called the negligence of railroad companies, in not providing safe axles for their cars, the only case in our own Courts which professes to fix any rule, is that of Hegeman *vs.* The Western Railroad corporation, (8 Kern., 9.)

The result of that case held in substance, that the company was responsible, both for the manufacturer's possessing the requisite skill, and for his actual exercise of that skill in each particular axle—the judgment in that case being against the company for negligence in not having discovered a flaw in the axle, which could not have been discovered by any known trial after the axle came into the company's possession, but which might have been discovered by a process of bending before it left the hands of the manufacturer.

But in that case the charge to the jury, at the Circuit, held that, "in making the careful examination required by law, before the train started, the company was *not* guilty of negligence, if it made all the examination which human skill and foresight could make *without taking the machinery to pieces.*" And in this Court, the prevailing opinion says the company "is bound to use all precautions, as far as human care and foresight will go, for the safety of the passengers."

In the case before us, so far as the defect in the axle (the hidden crack) is concerned it is clearly, and without any contradiction proved that it was absolutely out of the reach of discovery by any practicable examination of the axle, unless by taking off the wheel, with great difficulty and labor; that is "taking the machinery to pieces."

Tried by the Hegeman case, it would seem that this defendant could not be responsible for an in-

jury caused, as the one sued for seems to have been by that defect; as it is positively testified "that it would not be safe to run at all an axle cracked as this was," found to have been on examination after the accident.

There has, however, always been something unsatisfactory in the decision of the Hegeman case arising from the difficulty in finding anything to call negligence in the acts of the company as there proved; and we can probably place the result of that case on a surer and more satisfactory ground, as well as fix a test of much easier application, by referring to another case.

In Sharp *vs.* Grey (9 Bing., 457; S. C., Q. M. and Scott, 621), the proprietor of a stage coach was sued for injuring a passenger by the overturning of his coach from the breaking of an axle. The axle was of iron, secured and strengthened by parallel wooden strips secured on and around it; and before starting it was carefully examined, and showed no flaw.

After the accident, it was examined and it then appeared that it had been cracked for sometime, but the crack was in such a place that it was not possible for any strictness of examination to find it without taking off the wooden strips, the frequent taking off of which would have injured the axle and rendered it less safe than it would be if those pieces of wood were left undisturbed.

Yet in that case a verdict of £500 was rendered against the defendant and the court in banc refused to set it aside, holding unanimously, (not that the defendant was guilty of any negligence, but) that he must be held accountable, in every event, to furnish a road-worthy coach; and that, if the event proved it not to have been so, he must suffer the consequences.

And though this may seem a hard rule it is probably the best that can be laid down, since it is plain and of easy application, and when once established is distinct notice to all parties of their duties and liabilities. And, practically, it will be likely to work no more burdensome results to carriers of passengers than to leave them with an uncertain criterion of responsibility, to the trouble and expense of strongly litigated contests before jurists.

The judgment of the Supreme Court should be affirmed, notwithstanding there may, in strictness, have been an error in the refusal to charge (as requested) that the defendant was not bound to take off the wheel and examine the axle, since by the rule now laid down, so charging would be entirely immaterial to the result.

All the judges concurring.

Judgment affirmed.

Wealth and Resources of Pennsylvania.

This State is known by the soubriquet of the "Keystone," being geographically and politically in the centre of the arch of the Union. A large portion of its population is of German descent, not perhaps so enterprising as conservative. Slow of opinion but steady in maintaining it, Pennsylvania is eminently entitled to the appellation generally given to it.

Its area is 46,000 square miles, or 29,440,000 acres. Its population in 1860 was 2,906,116, or about 63 persons to the square mile, and its ratio of increase between 1850 and '60, being at the rate of nearly 26 per cent., we may safely estimate its numbers at the present time as being at least 3,150,000. Its principal city, Philadelphia, situated on the Delaware and Schuylkill, a site selected by William Penn, contained in 1860, 562,529 persons, and at the present time contains at least 600,000. It has 17 principal cities and towns. Six of them having a population of from 11,000 to 49,000 people, and ten more with above 5,000. The improved lands four years ago were in acres 10,463,306, and the unimproved 6,548,847. The value of the farms was $662,050,707, and of the implements of husbandry $22,442,842. The live stock consisted of horses, 437,654, asses and mules, 8,832, milch cows, 673,547, working oxen, 60,371, other cattle, 685,575, sheep, 1,631,540, and of swine, 1,031,266.

The animal products per annum were of butter, 58,658,511 lbs., cheese, 2,508,556, wool, 4,752,523, wax and honey, 1,454,698, and the value of slaughtered animals was $18,399,378.

The cereal crops in bushels in 1860 were as follows: wheat, 13,045,231 bushels, rye, 5,474,792, Indian corn, 28,196,821, oats, 27,387,149, barley, 530,716, and of buckwheat, 5,572,026.

The commercial crops for 1860 were as follows: tobacco, 3,181,586 lbs., hops, 41,576, hemp, 4,003 tons, flax, 310,030 lbs.

Among the miscellaneous crops are:

Peas and beans, bushels	123,094
Irish potatoes "	11,687,468
Sweet " "	103,190
Wine, gallons	88,623
Hay, tons	2,255,420
Clover seed, bushels	274,368
Grass seed "	57,204
Flax seed "	24,209
Maple sugar, lbs	2,768,965
Maple molasses, gallons	127,455
Sorghum do. "	9,605
Silk cocoons, lbs	163

The value of the orchard products was $1,479,938, of market gardens, $1,384,970, and of home made manufactures, $544,732.

The number of manufactories was 21,100, with a capital of $189,00,000. The value of the raw material consumed by them was annually $145,300,000. The value of their products was $285,500 000, and the number of operatives employed in them was 223,141.

The principal articles manufactured, and their value were as follows:

Flour and meal	$26,572,261
Woollen goods	12,744,373
Iron bar and rolled	12,643,500
Leather	12,491,631
Clothing	12,192,603
Coal anthracite	11,869 574
" bituminous	2,833,859
Cotton goods	11,759,000
Iron pig (553,660 tons)	11,427,379
Lumber	11,311,149
Boots and shoes	8,178,935
Steam engines and machinery	7,243,453
Printing	6,281,587
Iron castings	4,977,793
Jewelry, silver ware, etc	4,132,130
Malt liquors	3,246,681
Furniture	2,938,503
Soap and candles	2.937,798
Spirituous liquors	2,183,421
Illuminating Gas	2,147,802
Agricultural implements	1,455,760
Musical instruments	475,950
Sewing machines (5,149)	249,355
Salt	154,264
Zinc, ore (11,800 tons)	72,600
Nickel (2,348 tons)	28,176
Copper, ore (70 tons)	2,450
India rubber goods	13,500

The total movement in foreign and domestic imports were in value, $20,262,606. The tonnage was 155,161 tons American, and 39,344 foreign, total, 194,505. The total of shipping owned in the State, sails and steamers, was 308,766 tons. In 1860, 152 vessels was built in the State.

In 1860 there were 89 banks in the State with a capital of $25,808,553, and 10 insurance companies, with capital and assets of $6,510,601, and amount of risks, $139,229,374.

The length of railways in operation was 2,542, costing the sum of $143,471,710, and they were 66 in number. The city railways in Philadelphia extend 148 miles in all, and cost $3,811,700.

The canals, 13 besides branches, are collectively 1,047 miles in length, the principal being—

Schuylkill Navigation	108 miles.
North Branch	105 "
West Branch and Susquehanna	117 "
Pennsylvania Eastern Division	156 "
Erie	136 "

The real and personal estate was valued in 1860 at $1,416,501,888.

The public debt Nov. 30, 1863, was $39,486,596 78, being $851,617 04 less than the preceding year, and the productive property owned by the State the same year was $12,827,546.

Pennsylvania like New York has but one great seaport on the Atlantic, but she has several important lake ports; her railways and canals reach to the latter, crossing her territory and affording numerous outlets and inlets for her trade.

As a coal producing State she excels all others, her iron and coal mines are to her sources of inexhaustible wealth.

New London Northern Railroad.

We learn from the New Haven *Palladium* that a very important suit is soon to be brought before the U. S. Circuit Court at that place. This suit involves the entire property of the New London Northern Railroad Corporation, embracing the line of road, 86 miles in length, from New London to Amherst, with all the buildings, rolling stock, wharves, and other appurtenances thereto. The total cost of the whole has been not much below two millions of dollars. It appears that five or six years ago the New London, Willimantic and Palmer Railroad Corporation failed to meet the interest on its bonds, and passed into the hands of the trustees of the mortgage bondholders. The trustees operated the road for two or three years without fully meeting the interest on the first bonds, and by the action of the Legislatures of Connecticut and Massachusetts, the property passed from the hands of the trustees directly to the holders of the first mortgage bonds, who were organized into a new corporation, receiving its stock in lieu of their bonds. The new corporation was the New London Northern Railroad Company, which has for two or three years past held the line. The second mortgage bondholders and the holders of income and convertible bonds issued by the old corporation, and the holders of the capital shares now deny the equity of the legislation under which the new corporation was created, and of the course pursued by its managers carrying out the provisions of the acts.

Hermetical Barrel.

A barrel has been invented and patented for carrying coal oil. By a certain chemical process it is made impermeable, so that no drop of oil can escape, while the stench and dirt incident to the ordinary petroleum casks are also avoided.

MINING STOCKS---GOLD, SILVER, COPPER, IRON, LEAD, ETC.

American Railroad Journal.

Saturday, October 29, 1864.

Stock Exchange and Money Market.

The last arrivals from abroad bring us the news of further embarrassments in the English Money Market. Failures continue on a large scale, many of them said to be the result of speculations in this country, and most probably connected with blockade running. As yet we have seen no weakness in our own commercial circles, at least where business is conducted on a legitimate basis. But we do see trouble ahead for those who have been speculating in our great staple articles of production, or in gold; and no one can commiserate their fate, when the blow comes. All the combinations in the world can not keep up prices, when there is a surplus of production, as there is now, and is likely to be in this Country. And as the Banks which have upheld these speculations are reversing their policy, and are evidently unwilling to continue to loan in securities that are not beyond the reach of a reaction, we do not see how holders at large prices can stand out much longer. They must submit to the impending reduction. Months ago we advised the realization on all the articles of this description.

The gold market has been rather quiet for the last week, the fluctuations being moderate either way, the amounts actually sold in good faith being small, so small in amount as to be unworthy of notice, and the demand for foreign export is decreasing.

It is generally believed that present prices are entirely maintained by combinations, speculative and political. It is well known that but a small portion of the gold bought and sold is ever really delivered, yet the transactions in it are numerous, and attractive for those who will risk something in hopes to make a great deal. All classes of this description have their "flyers" out. Lawyers, attorney's clerks, ministers of the gospel, and even women lodge a few hundreds at a time as margins with their brokers in the expectation of making their "pile" as it is termed. The majority of these are losers just the same as if they were at work at a faro table. We hear of the winners but never of the losers, unless the losses are large, and the party is notoriously obliged to succumb. Some of the largest operators however, topple over from time to time in spite of all their gains, and they disappear from the street, trampled on and run over by fresh adventurers, who fill up the gap, and take the chances with unsubdued eagerness.

We notice that the associated Banks of this city have since Jan. 2, reduced their circulation $2,211,552 while their specie has diminished nearly twice that amount on $4,151,575. On the other hand, on the 22d of this month there was an increase from the returns of October 15, in loans $381,494 in specie, $488,328; in deposits, $583,800; and a decrease in circulation of $59,488. Railway transactions have become more lively owing to the plentifulness of money, and the heavy receipts on the principal roads. Freights have however fallen off, in consequence of an expectation of larger prices on products hereafter. Our quotations will show an increased buoyancy in the prices of shares. Continual and regular earnings continue to give confidence to holders, and were it not for the large amounts of Government securities constantly in the market, prices would go up. Gold dividends just now are what the public like above all other things, and it is said that some new railway companies are coming on the market as soon as the Elections are over, and propose to make their subscriptions and dividends in gold. The idea is a novel one but it is attractive, and will probably succeed, as gold paying Railway shares will be something out of the ordinary course of things.

Stocks generally are irregular in price, Governments steady but rather lower, the advance having fallen off a trifle. At present the profit lies in the dividends in gold, which is accumulating in the Sub-Treasury faster than it can be regularly disbursed. So that the real profit to the holder of Government securities is not in the advance in the market from day to day, but in the dividends, which return him in fact more than 12 per cent in currency, which currency is par in the liquidation and payment of all debts. Money continues plen-

tiful at former rates. Foreign exchange is quiet but firm, being held at a fraction above the par of exchange for gold.

The United States Treasurer held on Tuesday a balance of $31,981,938.

The sales at the auction houses are not satisfactory. Our readers will do well to bear in mind, that New York is the great mart for the sale of foreign dry goods, which come in from France, England and Germany, by millions to be disposed of for cash at any price. While this gives consumers a great advantage by the competition of the sellers, yet it always has an unfavorable influence on our money market and exchanges. There is no other country where a cargo of goods can be so rapidly disposed of as ours. A lot of silks, ribbons and shawls may leave Paris, for example, on the first day of any month, and the proceeds in gold may be back again in that city in 30 days. It would be an impossibility to perform any such feat in any English, French, or German capital with an American invoice.

The speculations in petroleum continue to be made on an increasing scale. The fortunes suddenly acquired by operators in the article, are beginning to be colossal, and are bringing forward to the public eye new classes of men, who have hitherto been in the back ground.

In view, however, of the speculative tendency of the public to indulge in investments in oil wells, we may as well caution our readers against hasty transactions. One of the modes of operation now much resorted to, is to offer large tracts of land with a few acres of an oil producing character. Thus lands with a single well perhaps, are brought into market, and the price asked for them is from $500 to $1000 per acre, though they may be bluff and hilly land not worth anything for oil, and not more than $50 per acre for agricultural purposes. It is like the Eastern plan of selling a cat and a camel. You may have the latter for a song, but the cat goes with it at a fabulous price. In this way the petroleum speculators are making large fortunes out of a very small capital. As yet all seem to be gainers and no losers. We may, however, congratulate the country that a marvellous source of hitherto unknown wealth has been brought to light, to add to its financial strength, and to repair the loss of other resources cut off by the war.

It is observable that a good deal of business is now suspended in consequence of the approaching election. The result is probably anticipated by the public. Meantime the events of the war appear to be of the most decided character, and and the probabilities are that with the second week of the next month, we shall see a disposition on the part of the Southern people to give up the further support of their leaders in a contest, begun without reason, and which has been their ruin.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending October 24, was $1,588,814, against $2,237,701 in 1863, and $2,644,-982 in 1862.

The exports from New York for the same week were $2,728,510 against $4,166,179 in 1863, and $5,065,026 in 1862. The shipments of specie since January 1, have been $36,422,507. The exports since January 1, have been $179,755,678 against $142,432,780, in 1863, an increase of $37,-322,898. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to October 22, was $59,088,469.

The value of foreign goods imported into the port of Boston for the week ending October 21, was $402,571, against $280,288 for the corresponding week in 1863. The exports were $405,087 against $471,788 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $325,800.

Ohio and Mississippi Certificates.

These certificates are issued under a trust created December 15, 1858, for the purpose of conserving the mutual interests of the creditors and stockholders of the Eastern division of the Ohio and Mississippi Railroad Company, both of which were then threatened with a common ruin. By an arrangement then made, known as the Capitalization Agreement, the trustees were authorized to issue, in discharge of claims and in purchase of stock of the company, certificates for amounts regulated by the agreement, according to the relative value of the assets, and entitling the holder to such interest in the aggregate trust fund as the amount of certificate therefor should bear to the total amount of all certificates issued and outstanding.

In connection with the Eastern division of the road, the property acquired at different times, and now held under this trust for the benefit of the certificate holders, is substantially as follows:

1st mortgage coupons	$127,820
Second mortgage bonds	198,000
Construction bonds	4,075,000
Income bonds	3,262,000
Stock bonds	4,690,001
Sundry claims	871,700
Sundry coupons from second mortgage, construction and income bonds	2,792,000
Rolling stock purchased from contractors	523,795
Aggregate assets held by the trust	$16,040,315

In payment for these assets certificates had been issued by the trustees up to July 22, 1864, as follows:

Pref. certificates, entitled to 7 per cent. interest	$1,133,179
Common certificates	10,861,185
Total certificates afloat	$11,994,364

The total amount of certificates authorized to be issued on account of the Eastern Division is:

Common certificates	$12,000,000
Preferred certificates	1,700,000
	$13,700,000

There now remains unissued

Of common certificates	$1,138,815
Of preferred certificates	566,821
Total unissued (E. D.)	$1,705,636

On the 17th April, 1863, the authority of the trustees was enlarged, so as to enable them to purchase the capital stock of the Western division, its rolling stock, branch roads and all its mortgage bonds, except $850,000 of the first and $750,000 of its second mortgage bonds. In payment for this property, the trustees have issued $1,279,000 in preferred certificates, and $9,250,000 in common certificates. The total amount of certificates afloat is therefore as follows:

Issued on account of Eastern Division common	$10,861,185
Issued on account of Eastern Division preferred	1,133,179
Issued on account of Western Division common	9,250,000
Issued on account of Western Division preferred	1,279,000
Total certificates issued	$22,523,364
Add remaining unissued	1,705,636
Total issue authorized	$24,229,000

The issue of these certificates has enabled the trustees to purchase the entire stock, claims and property of both divisions of the Ohio and Mississippi road, except $2,050,000 of first mortgage bonds on the Eastern Division, and $1,600,000 of first and second mortgage bonds on the Western Division. The interests of the two divisons are thus consolidated under the same trust. It is in contemplation to provide, at an early day, for the issuing of the stock in exchange for the certificates, thus placing the company's affairs upon the common footing of other railroad corporations.

The indebtedness of the company not held by trustees was on the 22d of July, 1864, as follows:

First mortgage bonds	$2,050,000
Second " "	13,000
Construction "	71,500
Income "	19,500
City of Cincinnati, for which $1,000,000 stock is held	600,000
Sundry other claims	150,000
Total of mort. and unsecured claims	$2,904,000

Steam Passenger Cars.

We publish in another column the advertisement of Messrs. GRICE & LONG, patentees of the street cars or dummies, designed to do away with the use of horses for city and suburban railways. It is clatmed for these that they are the finest and most successful contrivances yet produced of their kind, and are in operation in many places.

Sale of the Ottawa and Prescott Railway Rolling Stock.

The rolling stock of the Ottawa and Prescot Railway Co. was sold at Ottawa, on the 21st inst., by the Sheriff under an execution. It consisted of 3 engines, 26 box cars, 23 flat cars, 3 first-class 2 second-class, and 2 baggage cars. It was subject to a mortgage of from £40 to £45,000, and the purchaser was C. J. Brydges, Esq., who bid the sum of $301.

☞ ROBERT H. BERDELL, Esq., has been elected president of the Erie Railway Company, and Mr. A. L. DIVEN, Vice President. Mr. Samuel Marsh, who has performed the duties of president since the decease, in July last, of Mr. Nathaniel Marsh, having declined the office of president permanently, or that of vice president practically, has been made Honorary Vice President. The new President Mr. Berdell, is a merchant of high standing, and has been identified for five or six years with the Road, as a member of the Direction, and more especially as in active charge of the completion of the Long Dock property in 1859–60.

☞ It has been decided in the Supreme Court of this city, in the case of Stilwell vs. Meigs, that a broker cannot sell stocks lodged as security for advances and a margin, without notifying the owner of the deficiency, and a demand for further security. In this case the plaintiff recovered $5,685, the defendants not having informed him of their intention to sell, or made the demand for more margin.

☞ In Cambria, Somerset and the adjoining counties of Pennsylvania, a good quality of tar is being manufactured from the knots of the pitch pine. The manufacture of this substitute for North Carolina tar is carried on quite extensively, and has already considerably depreciated the price of the latter article. The tar thus produced answers nearly all the requisites as a substitute for the original article. Rosin might be produced also. Its present price would amply repay the cost of the experiment if successful.

Interest and Dividends.

The Northern Central Railway Company have declared a quarterly dividend of two per cent, payable clear of national and State taxes, at the office of the company in Baltimore on and after the 10th of November.

The Cincinnati, Hamilton and Dayton Railroad Company have declared a dividend of 5 per cent., and the Government Tax, payable in cash on or after Nov. 1, at the Bank of America in New York. Also, a dividend of 20 per cent., in stock, to be delivered at the same time and place, on the payment of the Government tax chargeable thereon, of 5 per cent., and provided that all fractions of said stock less than a full share, be paid in cash at the par value of same.

The Long Island Railroad Company have declared a quarterly dividend of two per cent., payable at the Bank of North America Nov. 1.

The Chicago, Burlington and Quincy Railroad Company have declared a cash dividend of $6 per share, and a scrip dividend of $10 per share, payable November 15.

The Cambria Iron Company announces a dividend of six per cent., payable at the office of the Company in Philadelphia, on and after Nov. 1st.

The Hoosac Tunnel.

The Boston *Journal* of Oct. 22d says: The Executive Council visited the Hoosac Tunnel this week. Never before was the work pushed with so much energy and expedition as now. From eight hundred to nine hundred men are in constant employment. The dam which is building across the Deerfield river on this side of the mountain, in order to furnish power, to keep the tunnel supplied with pure air, will cost $100,000.

Railway Projects for China.

The English are talking of building railroads through China, as they have in India. The difficulty in the way is the political situation of the country, and until these are settled it is not likely that much progress will be made in the work. The electric telegraph is likely to be sooner established. The characters of the Chinese language, numerous as they are, are capable of being expressed through the telegraph by about sixteen strokes.

Great Western (Ca.) Railway.

At the general annual meeting of this company held in London on the 5th inst., an entire new Canadian Board of Directors was elected, viz: Mr. Thomas C. Street, M. P., Niagara; Hon. W. McMaster, Toronto; Mr. D. McInnis, Hamilton; and Mr. Charles Hunt, London, C. W. No change was made in the English board.

☞ A call for a an instalment of five per cent. on the capital stock of the Union Pacific Railroad Company has been made, payable at the office of the company, 13 William street, N. Y., on or before the 15th prox.

☞ The United States Telegraph Company, are constructing a line on the lake shore, through Port Washington, Sheboygan, Manitowoc, Green Bay, and to Lake Superior.

☞ An election for twelve directors of the Baltimore and Ohio Railroad Company will be held at the office of the company in Baltimore o on the 21st of November.

Winona and St. Peter Railroad.

This road is now finished through to Rochester, and the cars are running regularly the entire distance. In connection with this road, Messrs. Burbank & Co. have established a direct line of stages to St. Paul, *via* Zumbrota, Cannon Falls, &c. which will carry a large share of the through travel from La Crosse, the coming winter.

Central Pacific Railroad.

Report to the Board of Supervisors of Placer County, in relation to the Central Pacific Railroad of California:

In pursuance of an order made, passed and entered upon the records and minutes of the Board of Supervisors of Placer County on the 18th day of August, A. D. 1864, we, the undersigned committee appointed and designated in said order, on the 7th day of September following the date of said order, entered upon the labors and duties thereby imposed upon us; and after a full, careful and diligent examination of the books, records and papers of the Central Pacific Railroad Company of California, at their office in the city of Sacramento, present the following report as the result of our investigations:

Charges having been made in a petition to the Board of Supervisors of Placer County, "that the persons residing in this State, named in the Act of Congress incorporating the Central Pacific Railroad Company, and granting to the company certain rights and privileges, have assumed that such grants were made to them as individuals; and have also assumed to sell the same to the company incorporated under the laws of this State as the Central Pacific Railroad Company, and have received in pay therefor a large amount of the paid up capital stock of said company—such amount extending to a number of millions of dollars—and that such a transaction would be a great fraud of the interests of Placer County as a stockholder of the corporation."

The following are the names of the persons whom we presume are referred to by the petition, and whom it is intended to charge with having sold the privileges derived from Congress, and received stock in pay therefor, to wit: S. J. Hensley, Peter Donahue, C. P. Huntington, T. D. Judah, James Bailey, James T. Ryan, Charles Hosmer, Charles Marsh, D. O. Mills, Samuel Bell, Louis McLane, George W. Mowe, Charles McLaughlain, Timothy Dame and John R. Robinson. Those are the only persons named in the Pacific Railroad act passed by Congress who reside in this State. Nearly all of those persons are men well known to the public, not only in this State but throughout the Pacific coast and many of the Atlantic States, and whose high character and respectability is a sufficient refutation, in the opinion of this committee, of these or any other charges of a similar nature that may be brought against them. The Act of Congress grants these privileges and makes these donations directly to the Central Pacific Railroad Company, as a company or corporation, and not as individuals, and every man of ordinary intelligence knows that a deed or transfer of real property, to be legal notice, must be put upon the records of the county in which the property is situated; and as the greater portion of the lands upon which this franchise, grant or privilege is fixed are lying in Placer County, it seems, in the minds of this committeee, that the records of said county would be the proper place to ascertain the truth or falsity of the charge.

We have carefully examined the books of the company relating to its stock transactions, and find that no stock was ever issued to Hensley, Donahue, Ryan, Hosmer, Bell, McLane, Mowe, McLaughlain, Dame or Robinson. It does not appear that they ever had any dealings in the stock of the company. It appears from the books of the company that Huntington, Judah, Bailey, Mills and Marsh have owned stock in the company, all of them being among those who first organized the same. But the stock held by them has been subscribed on the books in the same manner as the stock held by other stockholders, to be paid for like other stock. The amount of stock held by them is not large, and evidently not beyond their ability to pay, and the greater part of it has already been paid by them.

We found the books of the company kept in a clear, plain, legible manner, and had no difficulty in ascertaining all the facts relating to the stock transactions of the company, and we are fully satisfied that the charges made in the aforesaid petition are entirely without foundation; evidently a machination of the brain of some individual who has no regard for the true interests of Placer County as a stockholder in said company.

It is also charged in the petition that the affairs and business of the company are not conducted in a way to construct the road speedily and economically. In relation to this matter the officers of the company fully explained to us the difficulties and opposition they have had to contend with; not only in the halls of Congress, in our State Legislature, but in effecting private individual negotiations, and how they had surmounted them, the enemies of the enterprise resorting to all kind of means to hinder and delay the work and to prevent the company, or their agents, from raising the money necessary to build the road.

And, as another impediment in the way of effecting monetary negotiations at this time, it is well known that the war has to a very considerable extent deranged the financial system of our Government; besides this, the Government, to meet the immense expense of keeping our vast armies in the field and other unavoidable expenses of its machinery, has to a very considerable extent absorbed the available capital of the country, thereby rendering it the more difficult for a corporation to raise the means to carry on a great work like this. The high premium on gold has been another obstacle in the way. Under all these circumstances, in the opinion of your committee, the officers and agents of the company are entitled to much credit for the rapidity with which the work has been carried on thus far. We are satisfied that the directors of the company have used the means under their control to the best advantage they could, and they have faithfully and economically applied the same to the building of the road. They fully explained to us all matters affecting the interests of Placer County, and gave us free access to all books, papers and accounts relating to the business of the company. There can be but little doubt that the company will soon have sufficient means to press on the construction of the road, and the officers gave us every assurance that they should do all in their power to complete it as fast as possible with a due regard to the economical application of the means at their disposal. The unfortunate litigation with regard to the bonds of the city and county of San Francisco having terminated successfully, this aid, together with that from the United States Government and the State of California, will soon be available to the company. We are satisfied that the interests of Placer County, as a stockholder in this great work, are entirely safe in the hands of the company, and have suffered no injury from or by any actions of its officers.

It has been rumored that the company had disposed of the lands donated to it by Act of Congress to the directors of the same. We have made proper inquiry into the matter and have not found the slightest evidence that such is the fact, except in one or two instances where small tracts of land have been sold to parties not stockholders in the company, one of which is a forty acre lot to S. T. Leet, at the town of Newcastle, the present terminus of the road. No patent for lands has yet been issued to the company, and the Directors state it to be their intention not to sell lands, except perhaps in a few exceptional cases, until they have acquired a full and perfect title.

The company has now on hand about three thousand tons of iron and about eighteen hundred tons purchased, a part of which is now on the way from the East, with the proper amount of chairs and spikes, which will be sufficient to lay the track from Newcastle, its present terminus, to about eighteen miles above or beyond Dutch Flat. They also have sufficient redwood ties to lay twenty-two miles of track beyond Newcastle. The company has now on hand sufficient rolling stock, including locomotives, passenger, baggage and freight cars, to stock the road from Sacramento to Dutch Flat. This rolling stock and material has all been purchased and paid for. The road, so far as completed, is in excellent order, and we do not hesitate to pronounce it much the best road on the Pacific coast, and but few roads its equal in the United States. Through the care and diligence of the employees upon the road its business is conducted with regularity and dispatch.

The company has also constructed a telegraph line, as required by the Act of Congress, which is now in working order from Sacramento to Newcastle, thus completing thirty-one miles of railroad and telegraph under the law of Congress. This entitles the company to Government bonds amounting to one million two hundred and sixty-four thousand dollars. They also have the right to issue one million five hundred thousand dollars of their own bonds, on which the State of California pays the interest, and are entitled to four hundred thousand dollars of the bonds of the city and county of San Francisco; all of which, amounting to three millions one hundred and sixty-four thousand dollars, will soon be available to grade the road beyond Newcastle, and the proceeds of which will be expended in Placer County, as rapidly as it can be economilly done. These means, together with the proceeds of the lands which they will soon be able to put in market, and the receipts from the business of the railroad and from stock subscriptions, will be ample to construct expeditiously many miles more of the road. The fact that the company has pushed on the work with energy up to Newcastle gives assurance that, with the means at the control of the company, the road will soon be completed to Dutch Flat, and perhaps beyond that point. The expenditure of this large sum of money and the business of the railroad will have a most beneficial effect upon the interests of Placer County, adding many thousand dollars to the taxable property, as well as greatly increasing the business and general prosperity of the whole county. As to the debts of the company, we find that besides a few small debts to individuals dealing with the company, in the aggregate about two hundred thousand dollars, the only liability is upon the company's bonds for one million five hundred thousand dollars, secured by a mortgage upon the first fifty miles of the road. This debt is certainly very small compared with that of other railroads when we consider the large amount of railroad iron and other material purchased, paid for, and not yet laid down.

The present means of the company can be applied almost exclusively to the grading of the road bed; and economically used it will construct many miles of road, sufficient to push it so far into the mountains as to turn the whole of the immense traffic to Washoe and other mining localities in Nevada Territory through the County of Placer. It is well known that Congress granted the timber on the mineral lands on each side of the railroad to the company, and many of our citizens residing on the lands have felt some anxiety to know what course the company intend to pursue in relation to this timber. The directors assured us that they had no intention of preventing the cutting of timber necessary for mining and domestic purposes by those actually residing on those lands, but that they must see that there was no wanton destruction of the valuable timber thus granted to the company; that they desired to make this timber as far as possible available toward building the road, and to furnish business in the way of transporting lumber, shingles, wood, etc., to market; and further, that they expected to charge parties a reasonable stumpage for the timber, and that they had found no difficulty in making arrangements with the owners of saw mills who had so far readily acceded to the terms proposed by the company.

Citizens of Placer County who are familiar with the country along the old Truckee emigrant road have long known that Placer County had the best route for a road over the mountains of any in the central portion of the State. Some effort has been made in times past to construct a good road over it, but the great cost and want of capital has prevented it; in the meantime, El Dorado County, with the help of Sacramento County, procured legislative aid, improved the route through the former county, and thus obtained the start of Placer County, the result of which has been that, though having far the best route across the mountains, Placer County is decreasing in population and taxable property, while El Dorado County, by being thus permitted to almost entirely monopolize the immense trade east of the Sierra Nevadas, is adding many thousands of dollars to her tax list, and many of her citizens are accumulating large fortunes from the revenue derived from toll roads and other sources incident to this vast traffic across the mountains. The explorations made by the engineers of the Central Pacific Railroad Company to find a suitable line for a railroad over the mountains has sufficiently proven the superiority of the Placer County route.

In building the railroad it became a matter of no inconsiderable importance to the railroad company to have a good wagon road, as an outlet from the termination of the railroad, as it progressed over the mountains. To accomplish which, citizens of Sacramento, associated with some of our own citizens, have constructed one of the best mountain roads in any country, from Illinistown over the mountains, at a heavy cost. This road was opened for travel this last Summer, and soon after the California Stage Company put on a daily line of six-horse stages, running from the present terminus of the railroad to Virginia City, Nevada Territory; and, in consequence of the superiority of the roads, they have been able regularly to make the trips in from four to six hours less time than any other company by any other route. A recenttrial of speed between the two rival routes, in which the time over the Placer county beat the El Dorado route about nine hours, has settled the question of the superiority of our route. All travelers over the new roads speak of them in the highest terms of praise. Hotels, dwellings, saw mills and other improvements are being rapidly erected through the county along the line of this road, and we may well look to a rapid increase of our population and taxable property by this means. Already a large proportion of the freight over the mountains passes over this new route, some teams taking ten tons to a load. As its advantages become better known, and the railroad is extended, we may expect soon to see all the immense trade of Washoe, Reese River and Humboldt passing through our county. The officers of the railroad company exhibited to us the maps and surveys of the railroad line over the mountains; and these, taken in connection with our own knowledge of the country through which the line has been located, leave us without a doubt as to the practicability of the route, though the construction of the road must necessarily incur a heavy expense, but perhaps no greater than many of the mountainous portions of railroads in the Atlantic States, making a proportional allowance for the difference in cost of labor and material here and there. The line, as surveyed, follows the ridge above the town of Newcastle to the Bloomer ranch, where it passes through the divide into the ravines at the head of Baltimore and Auburn ravines, passing near the town of Auburn, following the ridge near Millsburg, and not far from Illinoistown it crosses Long ravine to the ridge between Bear river and the north fork of the American river; thence it keeps up the ridge, passing near Secrettown, Gold Run, to Dutch Flat; thence along the side of the ridge by Zerr's ranch to the valley of the South Yuba; thence it follows the valley of the Yuba through Summit valley to a low pass through the summit, known as the Donner Pass, above Donner lake; from there winds down the mountain on the opposite side, around the head of Fremont's canon, around into Cold creek; thence down to the Truckee river and following the valley of the Truckee into the great valley or basin beyond.

Fears are entertained by many that there will be great difficulty in keeping the road by this route from blocking up during the heavy Winter snows; as the snows on this line are lighter than many of the various routes and no deeper than any other in the central part of the State, there will be no more difficulty in travelling this route in the Winter than any other and no more expense in keeping it open.

The officers of the Wagon Road Company assure us that it is their intention to keep it open for stages and teams all Winter.

It is charged that the Directors of the railroad company have awarded contracts for work on the road to favored contractors, to the injury and at the expense of other stockholders in the company. Upon examination of the "book of corporate debts" of the company and of the contracts and specifications on file in the office of the company, we find that the greater portion of the work has been let to one individual; but that he has received a greater price for labor done and material furnished than other contractors, or that there has been any favoritism shown in awarding contracts, there is nothing upon the books or papers to show; we are therefore satisfied that the Board of Directors, in letting contracts, as well as in other matters pertaining to the building of the road, have exercised a just and proper regard for the true interest of each and every stockholder in the company.

That counter interests would arise and opposition spring up, not only at the commencement and at each step in the progress of a great enterprise like this, was doubtless anticipated by those who originated and gave it vitality. The enmity and ill will of rival railroad companies, parties directly and indirectly interested in toll roads upon pretended rival routes, and citizens of counties through which these routes run, was all to be expected. But that there should be an opposition grow up in a county that is a large stockholder in the road and is to derive perhaps a greater benefit and advantage that any other county from the building of the road, a county whose future welfare and prosperity almost wholly depends upon the successful completion of the work, is to this Committee most strange and unaccountable; we would most willingly believe that citizens of Placer county who have been instrumental in giving circulation to reports and rumors having a direct tendency and probable object to destroy the credit and character of the parties to whom we must look for the success and construction of the work, were prompted by a desire to promote the real interests of Placer county as a stockholder in the Central Pacific Railroad Company.

But after making a full, careful and thorough examination of the books, records and papers of the company—the investigation having been conducted in direct reference to the truth or falsity of these charges of fraud and bad faith to Placer county as a stockholder in the company, and failing to find anything in the transactions of the company upon which to predicate even a suspicion that we were being dealt with unfairly by the Directors or others composing this company—common justice to our fellow men, as well as a full sense of the duties devolving upon us as members of this Committee, and as sworn officers of Placer county, force us to the conclusion that the originators and those who have understandingly given circulation to these charges, were not actuated by a proper desire to do justice and are not friendly to the true interests and real welfare and future prosperity of Placer county.

For further information as to the progress of the road and the general condition of the compaay, we would refer to the annexed sworn statement of the Secretary of the Central Pacific Railroad Company. [Signed.]

A. B. Scott, D. W. Madden, } Committee.

Auburn, September 15, 1864.

STATEMENT OF THE CONDITION OF THE CENTRAL PACIFIC RAILROAD COMPANY OF CALIFORNIA.

The authorized capital stock of the company is	$8,500,000 00
The amount of cash subscriptions of the stock by individuals, and the amount issued and due to contractors for work done and material furnished is	723,800 00
The amount subscribed by Placer county is	250,000 00
The amount subscribed by Sacramento county is	300,000 00
The amount issued for purchase of iron, cars, etc., in the Eastern States is	188,700 00
Total	$1,462,500 00

The following items comprise all the indebtedness of the company:

First mortgage bonds issued	$1,250,000 00
Individual accounts, including advances made by the Treasurer	205,700 00
Pay rolls for the month of August and unadjusted accounts not to exceed	25,000 00
Total	$1,480,700 00

The assets of the company are:

Amount due from stockholders	$203,886 68
One hundred and fifty Placer county bonds	75,000 00
Three hundred and twenty-seven Sacramento county bonds	163,500 00
Amount due from San Francisco county in bonds of the county	400,000 00
Amount due from the United States (on the thirty-one miles of railroad and telegraph line already built and accepted by the Government) in United States thirty-year six per cent bonds	1,264,000 00

Every alternate section of Government lands, except mineral lands, for twenty miles on each side of the road, has been granted to the company by the United States, and the company is now entitled to a patent for the same along the thirty-one miles of road already built.

By Act of the Legislature the State of California is to pay seven per cent. semi-annual interest, in gold coin, on one and one-half million of dollars for twenty years, amounting to $105,000 yearly, or in the aggregate to $2,100,000.

Surveyed line of the road to the eastern boundary line of the State cost	$66,740 66
Thirty-one miles of first-class railroad and telegraph line completed, with all the necessary side tracks, depot buildings, engine houses, tanks, turntables, railroad scales, derricks, etc.	
Work on the line between Newcastle and Auburn amounting to over	50,000 00

On that portion of the line from Newcastle to Bloomer Divide all necessary culverts have been built of granite preparatory for the work of grading. The work on the heavy cut at Bloomer Divide—63 feet in depth—and upon the cuts and fills immediately above and below that point, has been steadily pressed forward by the company for the last four months with all the force that could be advantageously employed, and is now nearly complete.

The work between Bloomer Divide and Auburn will be comparatively light.

Six passenger cars, two mail and express cars, fifteen box freight cars, twenty-five platform freight cars, five hand cars and three construction cars, are in daily use on the road. Four passenger cars, two mail and express cars, eighty-four freght cars, extra axles, cars wheels, tires, etc., are shipped and on the way here.

Eight locomotives, five of which are in use on the road and one of the others is now due, having been shipped nearly five months.

Shops, material and tools in shops, wood, coal, oil, etc..... 25,000 00

There is here, and afloat, now due, iron sufficient to build thirty-two miles of road beyond Newcastle, and enough more has been purchased for twenty miles additional.

Chairs and spikes enough to build fifty-three miles of road beyond Newcastle are now here.

Ties enough for twenty-two miles of road beyond Newcastle are already delivered.

A sixty horse power stationary engine and machinery for a first class machine shop has been bought.

Levee front in Sacramento city, from K street north, and Sutter Lake property, about thirty acres north of I street, granted to the company by the city of Sacramento.

BUSINESS OF THE ROAD.

Trains for the transportation of freight and passengers commenced running to Newcastle on the 6th day of June last. Since that time the business of the road has been steadily increasing.

The earnings for the first three months were $47,917 74.

The expenses for operating the road, for employes on the trains and at the depot, and for wood, water, oil, etc., for the engines, has been less than $3,000 per month.

With an additional twelve miles of road, which will be completed by the first day of January next the earnings of the road will be largely increased, while the expenses will be but little more than they are now.

E. H. MILLER, JR.,
Secretary Central Pacific Railroad Co.

☞ The shareholders of the Great Western (Ca.) Railway have authorized the Directors to provide funds for laying down a third rail on the track, to enable freight carried by the New York Central and Michigan Central to be brought through Canada without transhipment. This is expected to increase materially the through business of the line.

WANTED

A gentleman with a capital of $25,000 to take an interest in a Car Manufacturing Establishment at New Haven, Ct. The business is already established, with a large capital invested, and in successful operation. Address this office, or box 2287 P. O., New Haven, Ct.

TRUSTEES.

JOHN E. BODY, President.
STEPHEN HILLS, JR., WM. BARCLAY PARSONS,
GEO. V. N. BALDWIN, EDGAR DE PEYSTER,
ERNEST SACCHI, Secretary.

The Trustees offer for sale 15,000 shares of the capital stock of this Company.

The property consists of 325 acres valuable mineral land, twelve miles from Richmond Station, on the Grand Trunk Railroad, Canada East. The mine has been worked down to the rich copper bearing veins, and is a property of great value.

It is entirely free from debt

For full particulars apply as above, or at the office of
HENRY G. STEBBINS & SONS,
46 Exchange Place.

Where subscription books will be opened.

RICHARD DUDGEON,
MACHINIST,

24 COLUMBIA ST., NEW YORK,

WOULD respectfully inform his friends and the public that he has removed to his new Building No. 24 **Columbia Street**, where he is prepared to furnish

Hydraulic Jacks, of from 4 to 150 tons lifting power. PULLING JACKS of different sizes.

Hydraulic Presses WITH PLATENS.

Hydraulic Punches for punching iron from three-eighths to 1 inch thick. **Force Pumps** or Hydraulic Presses. Force Pumps for testing tubes, cylinders, etc.

STEAM CARRIAGES for good hard roads.—Squirting Oil Cans, also Dunver's Patent Steam Hammer

A. WHITNEY & SONS
CAR WHEEL WORKS,

Callowhill & Sixteenth Sts.,

PHILADELPHIA, PENN.,

FURNISH CHILLED WHEELS for Cars, Trucks, and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES WHEELS and AXLES FITTED COMPLETE.

CENTRAL

Petroleum Exchange Office

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

Wealth and Resources of Ohio.

This is one of the great States of the West which settled by persons from New England, first at Marietta in 1788, and subsequently becoming a territory, come into the Union in 1802. Having no claims to inherent sovereignty, no reserved rights to quarrel about, no metaphysical and hair spliting statesmen to embroil it with the other states about abstractions and obsolete theories, it has gone on steadily in its career, with a rapidity unknown to any single one of the original thirteen colonies.

In 1790 its population was	3,000
" 1800 "	45,365
" 1810 "	250,760
" 1820 "	581,434
" 1830 "	937,903
" 1840 "	1,519,468
" 1850 "	1,980,329
" 1860 "	2,337,511
" 1864 estimated	2,800,000

Its area is 39,964 square miles or 25,576,960 acres. It is divided into 88 counties, the local administration of which is in perfect order and harmony. It contains 12 principal cities and towns, of which the beautiful one of Cincinnati contained in 1860, 161,044 inhabitants and probably 200,000 now. Cleveland another fine city with a most commanding picturesque and commercial site on Lake Erie, contains about 50,000 inhabitants, while the others vary from 6,000 to 25,000.

Its improved farm land amounts to 12,665,587 acres, and the unimproved to 8,075,551. The value of these farms in 1860 was $666,564,171, and of the implements of husbandry used in their cultivation $16,790,296.

The live stock returns were as follows: Horses 622,829, asses and mules 6,917, milch cows 696,399, working oxen 61,760, other cattle 901,781, sheep 3,063,887, swine 2,175,623.

The products of animals were as follows: Butter 50,495,745 lbs, cheese 23,758,738 lbs., wool 10,648,161 lbs.; of slaughtered animals the value was $14,298,972 and of wax and honey 1,441,707 lbs.

The cereal crops were, of wheat 14,582,570, bushels, rye 656,146, Indian corn 70,637,140, oats 15,479,133, barley 1,601,082, buckwheat 2,327,005.

The commercial crops were as follows: Tobacco 25,528,972 lbs., hops 22,344 lbs., flax about 440,000 lbs.

The miscellaneous crops were:

Peas and beans, bushels	105,219
Irish potatoes "	8,752,873
Sweet " "	297,908
Wine, gallons	562,640
Hay, tons	1,602,513
Clover seed, bushels	216,545
Grass seed "	53,475
Flax seed "	250,768
Maple sugar, lbs	3,323,942
Maple molasses, gallons	892,932
Sorghum do. "	707,416
Silk cocoons, lbs	2,166

The value of the orchard products was $695,921 in 1850, and $1,858,673 in 1860, of market gardens same year $864,313, and of home made manufactures $600,081.

The number of the manufacturing establishments in Ohio was returned at 10,700 with a capital of $58,000,000, using raw material of the value of $70,000,000, employing 71,000 operating and producing fabrics of the value of $125,000,000 annually.

The specific values of the principal articles of production were as follows:

Flour and meal	$27,129,405
Clothing	8,615,329
Lumber	5,600,045
Steam engines and machinery	4,855,005
Spirits (15,160,975 gallons)	4,197,429
Furniture	3,703,605
Boots and shoes	3,623,827
Leather	2,799,239
Agricultural implements	2,690,943
Soap and candles	2,418,972
Coal (1,133,596 tons.)	1,539,713
Salt (1,744,240 bushels)	276,879
Iron pig (94,647 tons)	2,327,261
Iron rolled (10,493 tons)	692,000
Iron castings	1,650,823
Printing book	673,800
" job	632,606
" newspaper	844,377
Malt liquors (402,085 bbls)	1,912,419
Cotton goods	629,500
Woollen goods	692,333
Gas	491,748
Sewing machines	178,785

The number of cotton spindles is 15,000, and of looms 400, and the cotton used was 1,815,000 lbs.

The number of woollen spindles was 5,897 and 96 looms, and the wool used was 1,054,540 lbs.

The value of foreign and domestic imports was $544,394. The foreign tonnage entering her lake ports was 25,246 tons, and American 26,671. The total tonnage owned in the State, sails and steam was 131,155 tons.

Five schooners, three sloops and 32 steamers were built there in 1860.

The number of banks in 1860 was 55, since increased under the National Bank law. The total capital was $21,053,456.

The railways in 1850 were only 575 miles in extent, and in 1860 they were 3,000 miles. These cost $111,896,351 being 34 in number exclusive of the branches.

The State Canals are 6 in number exclusive of branches and feeders, and are 821 miles in length constructed at a cost of $15,859,999.

The two largest are the Ohio between Cleveland Lake Erie and Portsmouth on the Ohio 309 miles, and the Miami and Erie 182. The whole number of locks is but 324, and the whole tonnage both ways in 1860 was 1,527,997 tons. The receipts for tolls were $359,782.

The total value of the real and personal property by the Census, was in that year:

Real Estate	$687,518,121
Personal Estate	272,348,980

It may be well to notice for the benefit of our foreign readers, that the values of property in these states, is usually set at from ⅓ to ½ of the money they would bring on a sale.

This is a peculiarity of our system of taxation.

The foreign debt of the State in 1864 was $12,931,986, upwards of $11,704,037 having been cancelled and redeemed previously, and the domestic debt at the same date was but $406,393. The total property belonging to the State in 1860 was valued at $770,422.

Ohio has a fertile soil, a good climate, fine rivers and large deposits of coal and gypsum. It contains numerous literary and humane institutions, and is one of the most distinguished members of the Union in all respects. Its progress has been rapid and uniform up to this moment, and the only check it has ever received has been in those early moments of the rebellion when it was threatened with assaults by the confederate armies, ready to imbrue their hands in the blood of their brothers who had never done them the least harm.

Ohio bids fair to move on to the very first rank of the States, having advanced more in the last sixty years than any of the old 13 states with hundreds of years advantage in age and settlement.

Steam Passenger Cars.

The Boston *Journal* of 28th ult., says: The Metropolitan Railroad Company a few weeks since received from Messrs. Grich & Long, Philadelphia, two of their superior dummy engines, which are now in Cambridge, where the cars for them have been built. They will soon take their place on the road. We understand that these engines can run ten to fifteen miles an hour, have seats for twenty-eight passengers and can accomplish a mile with eight pounds of anthracite coal. Each is competent to draw an additional car up a gradient of three hundred feet to the mile. They have gone up such acclivities with one hundred passengers. If the experiment of using these engines should be successful a great saving will be effected on the long routes of the company.

Connellsville and Southern Pennsylvania Railroad.

The Commissioners named in the act of incorporation give notice to the stockholders that an election will be held for a President and Directors of the Connellsville and Southern Pennsylvania Railway Company, in Philadelphia, on the 10th of November.

At Bedford, on the 14th ult., when and where the Commissioners attended with open book, to receive subscriptions to the capital stock of this new company, the large sum of $5,120,000 was subscribed at a single sitting, on which ten per cent.—$512,000—was paid to the Treasurer.

This prompt action assures the building of a railroad across the Allegheny Mountains, south of the Pennsylvania Railroad (though not in antagonism thereto) to open the Youghiogheny coal field to the seaboard markets.

The new road will connect with the Huntingdon and Broad Top Railroad, at its terminus at Mount Dallas, 6½ miles east of Bedford; and a part of its plan is, we believe, to form a connection with the Western Maryland Railroad, whereby, at the same time, a connection will be made with the Cumberland Valley Railroad. The new road, consequently, will have outlet to Huntingdon, Harrisburg and Baltimore.—*R. R. and Mining Register.*

Louisville and Nashville Railroad.

The annual meeting of the stockholders of this company was held in Louisville on the 3d of October last. The Annual Reports of the President and Directors, Secretary, Superintendent of Transportation, and Superintendent of Machinery and Road Department, were read, adopted and ordered to be printed. We have been favored with a copy of this report, from which we learn that the receipts from transportation, etc., during the fiscal year ending June 30, 1864, were:

	Memphis Branch.	Lebanon Branch.	Main Stem.
From pass.	$34,402 09	$39,614 24	$1,906,557 91
" freight	23,138 54	36,343 05	1,050,624 51
" expr's.	6,638 05	5,066 63	90,238 85
" mails			27,750 00
" use of engines by U. S. Gov			30,511 88
" bridge tolls, rents, etc.			10,804 15
Total Main Stem			$3,116,487 30
" Lebanon Branch			81,023 92
" Memphis "			64,178 68

Total Main Line and Branches, viz:

From passengers	$1,980,574 24

		1,457,736 74
Net earnings (55.3 per cent.)		$1,803,953 16

The net earnings have been and will be applied as follows:

Interest on debt	$231,651 74
Mortgage bonds redeemed	90,000 00
Construction	270,831 13
Depot lands, etc	16,677 88
Increase of fuel and stock	165,910 17
Dividend No. 3, payable Aug. 1, 1864	338,498 72
Advanced and to be advanced to the Lebanon Branch Extension on 300 bonds taken to account	300,000 00
Bills and pay rolls for June	227,650 80

The company have continued the operation of the Louisville and Bardstown Railroad, 18 miles, as a branch of this road under the agreement that existed at the close of the last fiscal year. The earnings during the year have been $11,130 63, and the expenditures for operating, repairs, etc., $10,029 03.

The company have also continued the operation of the Memphis, Clarksville and Louisville Railroad, between the State Line and Clarksville, 14 miles, under the arrangements existing at the end of the last year. The earnings of this road to the 30th of June, 1864, have been $7,040 20, and the expenditures, $9,595 54.

The amount of damage done to the road and branches by the rebels during the year is stated in the report of the Superintendent of Machinery and Road Repairs, at $36,794 61, and the whole damage sustained at $620,450 57. The amount expended on repairs of damages during the year was $60,735 26; and previously $440,570 31—in all $501,305 57, leaving $119,145 yet to be expended to compete the repair of damages. The report of 1863, referring to the estimate of 1860 to complete the road and branches and the expenditures up to date, exhibited a balance of $634,575 88 yet to be expended. The present report shows $270,831 13 expended and charged to construction, besides $120,988 84 expended under the head of improvements, and charged to operating expenses—leaving $363,744 75 of the estimate of 1860 unexpended. The report states that this sum is not sufficient, because of the increase in cost of labor and materials, and because of the increase of business requiring more motive power and rolling stock than the estimate of 1860 made provision for. The expenditure for motive power and cars up to June 30, 1864, exceeds the estimates of 1860 $72,143 61, and with an estimate to complete what is required amounts to $328,143 61—giving $691,888 36 yet to be expended to complete and equip the road. This he recommends should be charged to construction. An estimate is also given by him of $566,415 35 to be made under the head of improvements, and the $119,145 yet to be applied to the repair of damages, should be charged to operating expenses.

The board adopted these recommendations to close the construction account after the expenditure of the $691,888 36, except for the extension of the Lebanon Branch.

The consolidated statement gives the cost of the Main Stem and Branches at $9,730,101 55. This will be increased by the expenditure of the $691,888 36, and the cost of the Lebanon Branch extension, and somewhat diminished, when in accordance with a resolution of the stockholders, the whole discount on bonds sold and proceeds applied to construction, shall be made up out of the earnings and credited as directed at stockholders' meeting. This it is hoped can be done by the close of the next fiscal year.

The stock dividend of ten per cent., payable on and after the 20th of April last was out of the earnings of the 22 months preceding the 30th of June, 1863. The earnings having been applied to the redemption of the debt and liabilities of the company.

At the last session of the legislature a law was passed authorizing the consolidation of the Main Stem and branches, and dispensing with keeping but one set of books, also the withdrawing of the certificates of stock in the branches, and issuing the stock of the company for the same. This act was accepted by the stockholders at general meeting.

The following table shows the cost of road repairs per mile of road, and per revenue train mile, during the past five years:

	Ordinary repairs.	Renewal of iron and ties.	Total per mile. of road.	Per Revenue. train mile.
1859–'60	$470 73	$135 00	$605 73	26.03 cts.
1860–'61	339 54	48 93	388 47	14.84 "
1861–'62	321 28	219 78	541 06	38.18 "
1862–'63	382 29	389 56	771 85	38.30 "
1863–'64	616 94	3,547 12	2,164 06	102.30 "
Average.	$426 14	$668 08	$1,094 22	43.93 "

It will be seen that the cost of ordinary road repairs, per mile of road, has been nearly 100 per cent. more, and of renewal of iron and ties nearly 600 per cent. more than in former years. But the cost per train mile for ordinary repairs which is computed from the amount of business done over the road, does not materially differ from former years, being 19.95 cents, against 18.97 in 1862–'3, and 19.84 in 1861–'2. The cost for renewal of iron and ties per revenue train mile has been 82.35 cents, against 19.33 in 1862–'3, and 18.34 in 1861–'2.

The following table shows the number of cross-ties, and the quantity of new, re-rolled and repaired iron used since the completion of the road:

	Number of cross ties.	Tons of new iron.	Tons of re-rolled iron.	Tons of repaired iron.
1858–'59.	1,500	....	....	....
1859–'60.	16,672	109	....	113
1860–'61.	10,082	....	....	516
1861–'62.	27,752	463	32.50	143½
1862–'63.	16,871	433	95.25	558
1863–'64.	96,709	2,936½	471.10	1,104
Total....	169,586	3,941½	598.85	2,434½

The number of cross ties required to relay the whole road is 518,000; deduct from this the number already laid, leaves 348,414 to be laid. Supposing the average life of the ties to be about eight years, it follows that for the next three years 116,000 ties per year will be required to renew the whole road.

The quantity of iron required to relay the whole road is 16,650 tons. The above table shows that 4,540 tons of new and re-rolled iron have been used during the last six years. Supposing the average life of the rails to be ten years, it will require for the next four years 3,000 tons per year to make good the wear of the iron.

Seventeen miles of road have been relaid with new iron and ties. The company had on hand at the close of the year 1,000 tons of iron and 10,000 ties.

The cost of repairs and renewals of the Lebanon Branch during the year was $1,183 33 per mile, or 162.14 cents per revenue train mile. Twenty-three miles have been relaid with new ties; 31,224 ties have been bought; 63½ tons of new and 6 tons of repaired iron have been put in the track.

The cost of repairs on the Memphis Branch per mile of road has been $336 25; and per train mile, 51.40 cents.

The engines have run in the service of the Transportation Department 744,829 miles; in the service of the Road Department, and on the Bairdstown Branch and the M., C. & L. R.R., 96,709 miles—total mileage, 841,558. Total cost for repairs per mile run 7.58 cents. Total cost per mile run by engines 31.52 cents, against 24.03 cents in 1862–'63. Average cost per mile of all trains, 37.26 cents.

The equipment of the road July 1, 1863, consisted of 43 locomotives; 27 passenger, 8 baggage, 8 express, 232 box, 18 rack, 18 gondola, 73 flat, 23 gravel, and 7 boarding cars. There have been added during the year 13 locomotives; 12 passenger, 2 baggage, 60 box, 77 rack, 4 gondola, 22 flat, and 34 gravel cars. There have been sold to government 4 locomotives and 30 box cars; destroyed by raids or accident 8 passenger, 2 baggage, 11 box, and 4 rack cars—leaving on the road July 1, 1864, 52 locomotives; 31 passenger, 8 baggage, 8 express, 257 box, 91 rack, 22 gondola, 95 flat, 57 gravel, and 7 boarding cars.

The office of the company is at Louisville, Ky. The officers and directors are:

President.—James Guthrie.

Directors.—James Guthrie, James B. Wilder, U. E. Ewing, J. C. Guild, H. D. Newcomb, A. D. Hunt, James Speed, Russell Houston.

Secretary.—Willis Ranney.

Sup't of Transportation.—B. Marshel.

Superintendent of Machinery and Road Department.—Albert Fink.

Paterson and Newark Railroad.

At a meeting of subscribers to the stock of this road held at Paterson on the 25th ult., it was announced that $250,000 had been subscribed—the amount required by the charter previous to organizing. The following persons were then elected as a Board of Directors: Messrs. Robert S. Gould, H. Holmes, John W. Stitt, Edward Ellsworth and Erastus W. Smith. The Board subsequently organized by the choice of Robert S. Gould, of Newark, as President, L. W. Duncan of Franklin as Secretary, Erastus W. Smith of New York as Chief Engineer, John Hopper of Paterson as Attorney, and Horace W. Tolles as General Superintendent. The line, as surveyed, will be 11½ miles in length, connecting the cities of Newark and Paterson, the aggregate population of which is considerably above 100,000. The route selected has exceedingly few natural obstacles, the only one worth mention being the Passaic river, which will be bridged near Belleville. No heavy cuttings or embankments, no sharp curves or steep gradients will be needed. It is designed to put the road under contract forthwith, and have the line in operation by the Summer of 1865.

☞ The American shipbuilding company has been organized in this city, with a capital of $1,000,000, for the purpose of building ships and steamers of all sizes, including merchant vessels, monitors, iron-clads, yachts, &c., upon the newly invented models of Captain Augustus Walker of Buffalo. Several prominent shipbuilders and machinists have taken a lively interest in this enterprise, which promises to be one of much importance to the advancement of the science of naval architecture. The following is a list of the officers of the company:—

President, David Ogden; Vice President, Horace H. Day; Secretary, Charles B. Norton; Naval Constructor, Augustus Walker.

The company are about to construct an ocean steamer of about 900 tons for the coasting trade.

☞ An issue has been advertised in London of four millions of dollars second mortgage bonds of the Ohio division of the Atlantic and Great Western Railway, the terms being such as to pay in specie nine and a half per cent. interest per annum.

Catawissa Railroad.

The Catawissa is successor to the Catawissa, Williamsport and Erie Railroad Company, which was chartered under the title of the Little Schuylkill and Susquehanna Railroad Company on the 21st March, 1831.

The original purpose of this road was simply to connect Philadelphia with the North Branch of the Susquehanna River, and with this view a survey had been made in 1827. Upon the organization of the Company in 1831, the design was enlarged and a route projected towards the Lakes *viâ* Williamsport, Elmira, etc. Little further however was accomplished until 1836, when the United States Bank subscribed $250,000 which with $300,000 or $400,000 obtained from individual subscriptions, enabled the Company to commence construction.

During the years immediately following to 1841, the building of the road progressed steadily and about $1,500,000 been expended in grading for a double track from the eastern terminus to Catawissa about 48 miles. In the latter year the Bank failed and operations were suspended, the credit of the company being completely prostrated.

By an act of the Legislature passed on the 29th March, 1849, the name of the company was changed to that of the Catawissa, Williamsport and Erie Railroad Company, and several concessions made in its charter, and in 1851 and 1852 successful efforts were made to revive the enterprise. Some $200,000 in stock and $1,500,000 in bonds were disposed of, principally in New York; and with these funds the road was completed as originally intended and opened for traffic—to Catawissa on the 17th July, and to Milton on the 7th September 1854. The Sunbury and Erie Railroad which completed the line to Williamsport was opened on the 18th December following.

The road of the company has a total length of 55 miles commencing "at a point in the woods," eight miles north of the town of Tamaqua in Schuylkill County with two-thirds of its whole length located upon unproductive mountain sides, crossing deep ravines upon high bridges and ending at the town of Milton on the West Branch of the Susquehanna River. This peculiar position of the road placed it almost wholly at the mercy of its terminal connecting roads, both of which have an alternative route to all business points. These causes have forced the road in self-protection and in an imperfect manner to become a link, measurably beyond the control of the company, in the chain of roads leading from Philadelphia to Western New York and Buffalo on the trade of which it has heretofore mainly relied. To each of these several conditions thus briefly shadowed out, must be attributed in a greater or less degree the troubles which have involved the company and which can never be wholly overcome.

The engines and cars of the company are run over the following roads under agreements and contracts by which a certain portion of the receipts thereon and therefrom are paid for the privilege:

Philadelphia and Erie Railroad	27 miles.
Little Schuylkill	28 "
Quakake Railroad	14 "
Beaver Meadow Railroad	13 "

—making a total of leased road equal to 82 miles, and including the main line a road of 147 miles extending from Port Clinton to Williamsport where its connections with the Elmira Railroad, and the railroad system of Western New York. Philadelphia is reached by the Philadelphia and Reading Railroad a distance from Port Clinton of 78 miles.

In 1859 the Company having failed to pay the coupons on its funded debt, a Receiver was appointed, and the company under a general agreemont re-organized themselves into the Catawissa Railroad Company as it exists at the presont day.

The financial condition of the company on the 31 August, 1859, was materially as follows:

Share capital	$1,700,000
Funded debt	2,271,536
Floating debt	340,631
Coupons and interest overdue	95,597
	$4,407,764

The funded debt consisted of the following contituents:

1st mortgage 7 per cent. bonds due 1st February, 1867	$1,500,000
Chattel mortgage 10 per cent. bonds due 1st May, 1886	380,000
2d mortgage 7 per cent. bonds due 1st February, 1888	339,036
Unsecured 7 per cent. bonds due 1st February, 1865	38,500
Unsecured 10 per cent. bonds due 1st May, 1871	14,000
Total funded debt	$2,271,536

In addition to the above there was a large floating debt of the company as follows:

Owing for labor and materials	$69,893
Bills payable, guaranteed by officers and managers of the company	132,845
Loans and judgments guaranteed by officers and managers of the company	18,311
Dues for running connecting roads	15,986
Unsecured indebtedness or secured by insufficient collateral	103,597
	$340,632

—and the outstanding overdue coupons and interest amounted to $95,597

The earnings and operating expenses of the road from its first opening to the 31st August, 1859, were yearly as follows:

Year.	Gross Earnings.	Operating Expenses.	Earnings less Exps.
1854 (part)	$48,062	$32.791	$15,271
1854–'55	279,055	166,803	112,252
1855–'56	300,746	178,233	122,513
1856–'57	379,309	189,662	189,647
1857–'58	271,665	141,725	129,940
1858–'59	337,257	187,007	150,250
Total	$1,616,094	$896,221	$719,873
Deduct amounts paid to connecting roads for same years		$330,400	
Deduct interest—			
1st mortgage bonds 6 years		680,000	
2d " " 18 months		35,600	
Chattel bonds, say two years		76,000	
7 per cent bonds 4½ years		12,200	
10 " " 3 years		4,200	
			1,088,400
Deficit of earnings in 5½ years			$368,527

And to this should be added large amounts expended in improvements, extraordinary repairs, etc.

From these statements it is obvious that the earnings were insufficient to meet the expenditures and accruing liabilities. The road was also in a neglected condition, and the equipment originally deficient had been sold under the hammer. The only remedy was re-organization within the bounds of the ability of the road to earn, and this was determined on by the parties interested, for which purpose a committee of first bondholders was appointed, which committee reported to a meeting held in Philadelphia on the 11th of November, 1859, as follows:

"In view of an amicable and equatable arrangment by which the affairs of the company may be adjusted without the interposition of law, it is the opinion of the committee, that the company should be re-constructed by a foreclosure and sale under agreement; and that in the said re-construction there should be issued two classes of stock—one preferred and the other common, and that the company should re-enter on business entirely free from debt.

"That the preferred stock should be issued to the First Mortgage bondholders for their bonds and unpaid coupons, and to the claimants of the confidental debt, being the money loaned and obligations issued by the friends of the company, without profit beyond the interest, and which has been expended for the payment of coupons or for the immediate benefit of the property of the company, such claims to be admitted after investigation by the committee of bondholders.

"That the preferred stock shall be entitled to all the net profits of the road, until the said profit reaches seven per cent. per annum—after which the net profit beyond seven per cent. shall be divided among holders of the common stock until the said holders receive a like amount; after which any further profit which may arise, shall be divided *pro rata* to all stockholders.

"That all classes or claimants shall receive their several claims in stock at par.

"That the common stock shall be issued to the second mortgage bondholders and to the claimants of the unsecured indebtedness at par, and to the present stockholders in the ratio of one share for every four shares now held of equal amount."

After the reading of the report, resolutions were read and adopted, approving the plan proposed and authorizing the committee in conjunction with the Trustee to take all necessary measures, to reconstruct the company on the above basis—the title of the new company to be the "Catawissa Railroad Company" and constituted by the creation of a sufficient number of shares of $50 each for that purpose. The Trustee of the mortgage was also requested to effect by sale or otherwise a legal transfer of the property and franchises of the old to the new company when formed, and to obtain a surrender thereof by the discharge of the receivership, the new company being pledged by him to carry out in good faith the present existing order of the court in equity appointing such receiver.

The programme thus set forth was fully carried out and the re-organization completed. The road was sold on the 2d July, 1860, and purchased as directed. The legal requirements necessary to enable the new company to take possession of the property were, however, from various causes not consummated until near the 1st of October, when occupation was had on the assumption of the company of the September obligations of the receiver of the former company, and also of the various expenses incurred for the organization of the existing company, as per agreements made by the

committee of the Catawissa, Williamsport and Erie bondholders.

The capital of the new company is thus represented:

By 44,000 shares Pref. Stock @ $50 each	$2,200,000
" 23,000 shares Com. Stock @ $50 each	1,150,000
" Chattel mortgage on Engine No. 22 and 50 coal cars	34,000
Total	$3,384,000

—to which should be added the Catawissa, Williamsport and Erie Railroad Company chattel mortgage for Engine No. 21, and 26 flat cars, $19,500 for which was paid interest at the rate of 5 per centum.

The 31st December having been determined upon as the proper time to end the fiscal year of the corporation, the Directors in conformity with the requirements of the charter submitted to the shareholders, a statement of affairs in their first report presented at the annual May meeting, and covering the operations of the road during the months of September, October, November and December 1860.

From this report we learn that the receipts after deducting the rents of connecting roads for the four last months of 1860, had been.... $95,790 96
And the exp. of repairs and operating. 80,820 54

Leaving a net increase of.... .... $14,970 42

which was disposed of in settlement of legal obligations, leaving yet to be paid out of the same by legal obligation the sum of $80,914 37; and the expenditures during 1861, over and above ordinary repairs to road, machinery and cars were estimated at $117,000.

It is scarcely necessary to follow the subsequent annual reports. They chiefly relate to the orerations of the road and its financial condition. From these however we make up the following statistics:

CONDENSED BALANCE SHEET, January 1.

	1861.	1862.	1863.	1864.
Common shares	$1,150,000	$1,150,000	$1,150,000	$1,150,000

The officers of the Company for 1863–'64 are as follows:

President.—T. HASKINS DU PUY.
Secretary.—M. P. HUTCHINSON. } Phila. Pa.
Treasurer.—W. L. GILROY.

Sup't.—GEORGE WEBB, Williamsport Pa.

Directors.—Samuel V. Merrick, James S. Cox, M. P. Hutchinson, M. D. William, P. Chandler, all of Philadelphia; Robert Bayard, of New York; and George R. Payton, of Bloomsburg, Pa.

Company's Office, No. 424 Walnut st., Phila.

Railway from the Black Sea to the Caspian.

Since 1861 the project of this line has been under consideration, but, owing to the pressure of the present financial situation, the part of the line connecting Tiflis with the Black Sea is to be executed first, and the rest to the Caspian Sea at a later period. According to the estimates of the local administration, says the *Invalide Russe*, the numbers passing from Trebizond to Central Asia being taken as basis, the revenue of this line will yield at least ten per cent. on the capital. The transport of military stores and of ammunition of war would save the Government about three hundred and eighty-five thousand roubles, which could be granted to the shareholders as a guarantee. The project presented by Count Levacheff, Aid-de-Camp to the Grand Duke Michael, has been approved of; but the Minister of Public Works wishes to submit it to the Caucasian committee at St. Petersburg to have it more strictly considered and to reduce the cost. The Emperor awaits the result of those studies before he definitely sanctions the project.

☞ The Morris and Essex Railroad Company, in addition to their extension beyond Hackettstown, are progressing favorably with their second track; have lately added some fine new locomotives, in addition to new cars lately put upon the road, and have several other locomotives now building for their use. The directors also contemplate rebuilding some of the depots on the line of the road.

Railroad Earnings--Weekly.

The earnings of the Chicago and Alton Railroad Company for the week ending Oct. 23, were:

	1864.	1863.
Passengers	$31,340 44	$14,227 62
Freight	33,338 40	31,061 50
Sundries	1,325 25	1,406 46
Total	$66,004 09	$46,695 58
Increase 1864		$19,308 51

The traffic of the Great Western Railroad for the week ending Oct. 21st, 1864, was as follows:

Passengers	$32,260 09
Freight and live stock	26,940 33
Mails and sundries	1,232 83
Total	$60,433 25
Corresponding week of 1863	64,906 76
Decrease	$4,473 51

Interest and Dividends.

A dividend of two and a-half per cent. on the common stock of the Elmira and Williamsport Railroad Company, will be paid on and after November 1st, at the Pennsylvania Railroad Company building, room No. 1.

The Manchester and Lawrence Railroad Company have declared a dividend of four per cent., payable Nov. 1.

The Nashua and Lowell Railroad Company declared a dividend of 4 per cent., payable Nov. 1.

The Long Island Railroad Company have declared a quarterly dividend of two per cent., payable November 1st, at the Bank of North America.

The Morris Canal Company have declared a semi-annual dividend of five per cent., on the consolidated as well as the preferred shares of the company, payable on and after November 1.

The coupons due November 1, of the City of San Francisco School-Bonds of 1854, will be paid in gold coin by Wm T. Coleman & Co.

Messrs. Winslow, Lanier & Co., of No. 52 Wall street, will pay the Coupons on the Indiana 6 per cent. bonds, due November 1.

The interest on the bonds of the Mississippi and Missouri Railroad Company, due Nov. 8th, will be paid on that day at the Corn Exchange Bank.

The coupons due November 1, from the second mortgage bonds of the Galena and Chicago Union Railroad Company, and from the funded coupon bonds of the Chicago and Northwestern Railroad Co., will be paid on presentation at No. 8 Wall street.

Coupons of the first mortgage Sinking Fund Bonds of the Chicago and Alton Railroad Company, due Nov. 1, 1864, will be paid at the office of Messrs. M. K. Jesup & Co., No. 59 Exchange Place, New York, less Government tax.

The Second Preferred Series D, and the second income mortgage bond coupons of the St Louis, Alton and Terre Haute Railroad Co., due Nov. 1, will be paid at the Bank of North America.

The coupons due 1st November, on the Mortgage Bonds of the Indianapolis and Madison R. R. Co., will be paid by J. & S. Ferguson, No. 35 Pine street, N. Y.

The coupons from Scioto and Hocking Valley 1st mortgage bonds, due 1st November, will be paid at the office of Winslow, Lanier & Co., No. 52 Wall street.

American Railroad Journal.

Saturday, November 5, 1864.

Stock Exchange and Money Market.

The last arrivals from Europe bring us continual reports of disturbances in the commercial marts of England. Numerous failures have taken place in addition to those already announced, and the aggregate losses are large. Several cases of suicide have taken place, the results of pecuniary embarrassments.

The sum total of the deficiencies may be safely estimated at fifty millions of pounds sterling. Nor are all apprehensions for the future at rest. Commercial discredit was spreading on the day of the departure of the steamer, and the usual rate of interest outside of the Bank of England was full 10 per cent. Consols were unsteady, with a slight recovery from former quotations. The cotton question was thought to be at the bottom of the principal difficulties. It was feared that the stimulated supply from India would glut the market, and that the price would fall finally to 6d. or 6½d. sterling per lb. The weekly circular of the Liverpool brokers on the 8th of October, two weeks before the date of the last departure from that port, gives the following summary: increase of imports compared with last year 584,910 bales; increase of quantity taken for consumption 185,370 bales; increase of stock compared with last year, 211,270 bales. After deducting the weekly sales for home consumption, and the actual re-exports of the article, there will be still left on hand for the ensuing year a stock of 1,250,804 bales. There is no wonder that there is cause for alarm, especially as we are told that the cotton "mills are rapidly closing." It seems to us that the financial and commercial crisis is by no means passed, that there will be large exports to this country at reduced rates, and that the prices of cotton goods with us are certain to fall. It seems to us that it is the part of prudence in our dealers in those articles to realise at present prices without delay. We notice that gold is 2-10ths per cent dearer in London than in Paris, and 7-10ths dearer than in Hamburgh.

The money disturbances in England are drawing the attention of its leading financiers to some plan of a remedy. Some of these maintain the opinion, that the constant increase of commerce in the world, requires some new medium of exchange other than gold and silver, since while there is a profit in the extension of business every where, it is at any time likely to be lost by sudden demands for specie from causes which are not legitimately connected with that commerce. Thus the act of a bad ministry or a declaration of war may make gold and silver so scarce, that absorption of a few millions at an unexpected time and place, may destroy other properties of equal intrinsic and more than intrinsic value, and cause wide spread bankruptcy. Government or paper money on some principle of eventual security has been therefore suggested as a substitute. Others again propose a repeal of the Bank charter act so as to make money less dear. In 1849-'50, Bank interest was but 2½ per cent. it is now 9 and 10. It is feared that the present rate is likely to be permanent. Another cause of anxiety is the drain of specie to the East since 1801, and up to 1863, it appears that a final balance of £234,000,000 of coin sent to India had never returned, and was now lost to the commerce of other parts of the world. In 1861-'2, £25,000,000 had gone there from England alone. On the contrary when any considerable amounts had been sent to the U. S. the course of trade soon brought it back again.

American securities have improved. The 5-20s and our best railway bonds have advanced from 5 to 10 per cent., showing a decidedly favorable reaction in the London market.

Our own has also shown renewed activity. It is said with how much truth we know not, that the crowd of speculators is largely increasing. Certain it is that there has been an increase of buyers of railway shares, which are of a more expansible character, than the bonds. The feeling in favor of a rise has been quite general, and there is no lack of money in any quarter. Thirty millions of legal tenders, and ten millions of certificates of indebtedness have within a short time been paid

into the Treasury, and there is no stringency in the money market.

The movements in gold seem no longer to cause much apprehension, nor are they looked upon as conclusive on any financial question. The prices of articles are not now in fact measured by a gold standard uniformly. As an example we may state that butter is much dearer than gold, the one being held at 131 in paper, and the other as compared with its former and usual value in gold about 300 per cent. Other articles of necessity as potatoes, are selling throughout the country at about 15 to 20 cents per bushel in gold. So that we see all calculations based on the price of gold in the street, lead to no just conclusions whatever. This is a curious state of things, but it is an indication in our opinion that we should very easily adapt ourselves to an early resumption of specie payments when it should arrive.

The Bank statement for the first Saturday of the present month Oct. 29, shows that the variations from the balances on the 22d of October were as follows:

Increase in loans	$782,587
" specie	67,947
" deposit	1,066,206
Decrease in circulation	77,489

It is understood that the Banks generally begin to see the necessity of coming into the National system of Mr. Chase. The Philadelphia institutions have taken the initiatory steps for this object. The advantages are so obvious that we wonder there has been so much opposition to it in certain quarters. To secure an unquestioned circulation throughout the United States, and the receipt of their paper every where for taxes, by the Government is an immense advantage.

When our internal commerce is restored to its old basis, no one will care about any other money than that of the National Banks, and that the system is a tempting one already, may be seen by the large profits realised by some of these institutions already. The first National of this city has declared a semi-annual dividend of 10 per cent.

Recurring again to the subject of the gold market, we believe we are fully justified in saying, that the present advance is greatly attributable to political combination. The actual amounts sold from day to day, are not large for there is no great demand. A few thousand pass from hand hand, often at fictitious quotations, and these control public opinion more than they justly should do.

On Tuesday a sudden rise of 10 per cent took place without any real cause for it. It is true that rumors of disasters to our armies were loudly proclaimed in the teeth of the facts, either founded on reported private telegrams, or the carefully collected items of news equally false from day to day put forth by the disloyal presses, that are in this way doing all they can to aid the confederate cause. When there are journals, the Boston *Courier* for example, which unblushingly assert that the rebels possess all the territory they did when the rebellion broke out, when for example they were on the banks of the Ohio, held the Mississippi from Cairo down to the gulf, when Missouri, Tennessee, Kentucky, Louisiana, Arkansas and Maryland were under their sway, and although on the other hand there is not a single State over which they have now an entire control, not an open port on the ocean, we need not wonder that there are people who will believe any thing, or that they can be made and really are the dupes of bad and designing men, and are victims to the deceptions in the gold market, planned and carried on solely to affect the coming elections. The rise of ten per cent on Tuesday was without the least basis of propriety, and time will prove our assertion. We speak in no partizan spirit, our articles all have shown that we are entirely beyond all party influences, but we cannot conceal our astonishment at the constant efforts made to decry the resources, the credit, the stability and the cause of this great Republic.

Money continues abundant. The inquiries for Government securities are good, and prices show a tendency to advance. Exchange is not in large demand, and buyers are very cautious. It is proposed that the interest due on Government securities the 1st of January next, shall be advanced to its creditors as was done in the case of the November dividends. The dry goods auction sales show a continued tendency to a decline, notwithstanding the sudden rise in gold. The prices paid for many leading articles on Tuesday, were 50 per cent. less than the week previous. There is a firm conviction in the minds of the people, especially of buyers, that the quotations in the gold market cannot be sustained. The amount sold at 240 on Tuesday at the 2d board was but $5,000, and no one knows whether it was an actual sale or not.

The balance in the Sub-Treasury in this city on Tuesday was $2,686,689.

It is reported that the Government restrictions on the sale of cotton are to be taken off, as will appear by an official announcement in a few days. This will have a large effect on exchange, and *may* produce a heavy reaction in the gold market.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending October 31, was $721,817, against $1,397,081 in 1863, and $1,183,002 in 1862.

The exports from New York for the same week were $3,391,378 against $3,240,567 in 1863, and $4,287,732 in 1862. The shipments of specie since January 1, have been $37,855,155. The exports since January 1, have been $183,147,056 against $145,673,347, in 1863, an increase of $37,473,709. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to October 29, was $60,235,469.

The value of foreign goods imported into the port of Boston for the week ending October 28, was $646,226, against $600,627 for the corresponding week in 1863. The exports were $567,389 against $293,215 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $208,639.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Ohio 6s, 1881, 106¾; Illinois War Loan, 100½; Central R. R. of New Jersey, 170; Brooklyn City Water Loan, 113; Detroit, Monroe and Toledo bonds, 100; Ohio and Miss. pref. cer., 80; Mariposa 1st mort., 94; Nicaragua Transit, 4; Atlantic M. S. S. Co., 180; Central Coal Co., 57; Con. Coal Co. of Md., 64; Ashburton Coal, 21; Smith Parmalee Gold, 6; Corn Ex. Bank, 105; St. Nicholas Bank, 100; Park Bank, 140 Bank of Commerce, 105; Ocean Bank, 90.

☞ The Pottsville *Miners' Journal* publishes a call for a meeting of citizens in favor of the construction of a new railroad direct from the Schuylkill coal region to New York, under the charter of the New York and Middle Coal Field Railroad and Coal Company. The proposed road is to commence at Schuylkill Haven and occupy the route by Lizard Creek. The *Journal* says that capitalists are ready to furnish the money for its construction and equipment.

Atlantic and Great Western Railway Bonds.

We notice in the London papers by the last arrival, that the Atlantic and Great Western Railway Company have advertised a second issue of mortgage bonds to the extent of $4,000,000 to complete the Ohio division of the line. They are issued at 66 and carry 6 per cent. on the par value or 9½ on the rate of issue. They are secured by a mortgage on all the property of every kind belonging to the Ohio division of the railway, and the interest is payable in London at the fixed rate of 4s. sterling to the dollar. The Directors calculate the surplus of their receipts after paying interest and working expenses at $2,107,148, all of which is applicable to meet any loss in exchange. It is needless for us to say a word of commendation of the Atlantic and Great Western. It is a splendid work, one of the best in this country, and must every year be more and more profitable.

The Late Accident on the Harlem Railroad.

The examination into the causes of the late accident to the New Haven trains on the Harlem track, which has been going on before Coroner Ranney has been for the present postponed. The accident has now pretty clearly been traced to a defective rail, and the injury inflicted upon it by a train of eleven cars drawn by two heavy locomotives at high speed.

One fact has come to light which is worth noticing. The rail which caused the disaster was said to have been of the manufacture of the Phœnix Iron Works. But it now appears from the testimony of Mr. S. G. Reeves, of Philadelphia, the Vice President of the Phœnix Iron Company, that the broken rail *was not furnished by his company*, but was made from "English iron which is not as good as the more fibrous iron of Pennsylvania." So that it appears from this the Harlem Company do not use the best iron for their rails, nor know where their rails actually come from.

Three Rivers Railroad.

The Three Rivers Branch Railroad is being placed in repair by Hon. Ransom Gardner. The Jonesville *Independent* says the strap rail is to be continued for the present, ultimately to be replaced by rail now in general use. This will reconnect the thriving and spirited town of Three Rivers with the Michigan Southern road, and give the farmers the benefit of a market at that point, which has been about a year past closed to them.

The Pictou Railway.

The Pictou *Standard* says that the route of the Pictou Railway has been determined on. Mr. Fleming, the Chief Engineer, has recommended a line from Truro to the deep waters of Pictou by the East River, which passes through the Albion Mines and New Glasgow. The *Standard* learns that the Government has decided to adopt his recommendation.

☞ The Perth Amboy and Woodbridge Railroad was put into operation about the middle of October. It is a branch of the New Jersey Railroad, joining the latter at Rahway, and running through the village of Woodbridge into the city of Perth Amboy, a distance of about eight miles. The propelling power now in use on the road is furnished by "dummy" engines, the trains generally consisting of one car besides that which contains the engine. The trip occupies about thirty minutes, and five trips are made daily.

Specific Performance of a Contract to Operate a Railroad.—Lease of Railroad or Franchises.—Consolidation of Railroads.

The case of the Port Clinton Railroad Company against The Cleveland and Toledo Railroad Company, was an action reserved in the district Court of Ottawa County, Ohio.

The following are the facts:

The Cleveland and Toledo Railroad Company was the product of a consolidation of the Toledo, Norwalk and Cleveland Railroad Company, and the Junction Railroad Company. This consolidation was effected on the 15th of July, 1853, by an agreement that day made, to take effect on the 1st day of September, 1853.

By the terms of the consolidation, the Toledo, Norwalk and Cleveland Company was to issue to its stockholders an amount of stock or bonds equal to one-half of the then amount of its capital stock, and with this addition the aggregate stock of the two companies was to become the stock of the Cleveland and Toledo Railroad Company. It appears to have been the object of each of the original companies, or of their promoters, to construct a through line of railroad between the cities of Cleveland and Toledo, one of which would pass through Norwalk, and the other through Sandusky. It may be inferred that to avoid the effect of rival routes, under different management, was an inducement to the consolidation. But the construction and running of the two lines were contemplated; and to insure this being done on the northern route through Sandusky, the following article was inserted in the agreement as consolidation: "The Cleveland and Toledo Railroad Company shall occupy and construct a line of railroad, extending from Sandusky, across Sandusky Bay, by Port Clinton, Perrysburg and Maumee City, to or near Swanton, assuming the railroad of the Port Clinton Railroad Company, and connecting with the railroad of the Northern Indiana Railroad Company at some convenient point near Swanton. It shall open and maintain a railroad connection between Sandusky and Toledo, upon the same gauge with the railroad between Sandusky and Cleveland, to be finished simultaneously with the opening of the road to Perrysburg." It was also agreed, that "the Cleveland and Toledo Railroad Company will establish and maintain workshops, both at Norwalk and Sandusky, sufficient for the ordinary repairs of machinery on the respective lines."

The Cleveland and Toledo Company thereupon proceeded to finish the projected road of the Port Clinton Company, and did for several years run a through line from Cleveland to Toledo, by way of Sandusky, as contemplated by the agreement of consolidation. Subsequently, in the year 1858, the directors of the Cleveland and Toledo Company ceased running a through line from Cleveland to Toledo, by way of Sandusky, and after for a short time running a train from Sandusky to Port Clinton, discontinued the use of the road constructed under the lease from the Port Clinton Company. From that time to the present, no trains have been run on that road; the rolling stock and other personal property connected with the use of the road have been removed, and no repairs of the road have been made.

The object of the petition filed by the Port Clinton Railroad Company is to obtain a specific

performance of the covenant, on the part of the Cleveland and Toledo Railroad Company, as to the road finished under the lease, to "operate and manage the same in such a manner as will not forfeit or endanger the franchises and corporate rights" of the Port Clinton Company.

GHOLSON, J.—The rights of the plaintiffs depend upon some general considerations, and to these our attention will be first directed.

The specific performance of a contract rests on the ground that the ordinary remedy for its breach will not afford adequate relief. In some cases this is so apparent that a specific performance is decreed as a matter of course. Such is the case of a contract for the conveyance of real estate. In such a case, if the party has not, by some act or omission, precluded himself from relief, he may be said to be entitled to it as a right. For although the Court is said to have a discretion in granting or refusing a specific performance, it is not an arbitrary discretion, but a discretion to be regulated by precedent and established practice. It would, however, be going too far to say that, in all cases where the ordinary legal remedy would not afford adequate relief, there is necessarily a right to specific performance. In the case of a contract for personal service, it may be that, on a refusal to perform the contract, an action for damages would not afford adequate relief, and yet it is clear that a Court of equity will not attempt to enforce specifically such a contract. Hamblin *vs.* Dinneford, 2 Edwards, 529; De Rinafinoli *vs.* Rossetts, 4 Paige, 264; *ex parte* Clark, 1 Blackf., 122; Stocker *vs.* Brocklbank, 5 Eng., L. and E., 67; 3 Mac. and C., 250.

We have now to consider the peculiar features of the case under consideration. We do not think the plaintiff can be regarded as representing any interest, except its own corporate rights. It was no party to the contract of consolidation, and must stand on the covenant in its lease. The covenant required the defendant to operate and manage the road described in the lease, "in such a manner as will not forfeit or endanger the franchises and corporate rights" of the plaintiff. The only proper object which the plaintiff can have, in asking our interposition is the probation of its franchises and corporate rights. These franchises and corporate rights it leased perpetually, reserving to itself no pecuniary consideration in the shape of rent, or otherwise, except in the payment of debts it might owe, (of the non-payment of which there is no complaint,) and no advantage to its stockholders, except the privilege or the payment of 95 cents on the dollar of the amount of their subscription, to receive the same dividends as the holders of a like amount of stock in the defendants' company. We do not see that the plaintiffs at the time of the lease regarded itself or its stockholders as holding anything of pecuniary value, in rights or franchises, or in work constructed on the road for really no consideration, moving to itself or its stockholders, was exacted. We cannot shut our eyes to the fact, transparent in the testimony, that the plaintiff itself, and the operations in its name were a device and means used by the Junction Company, to accomplish that object, which, under its own charter it had no power to attain—a direct route to Toledo. Looking behind the forms of the transactions, and this as a Court of equity, asked for extraordinary relief, we have a right to do, the rights and franchises and any property ostensibly in the name of the plaintiff, except the small amount of percentage paid by the stockholders, really belonged to the Junction Company, and were so treated in making the consolidation. Under the arrangement then made, the plaintiffs may still exist as a legal entity, but we do not think it has any such standing in Court, or any such interests to be protected, as will support its claim for relief.

The trustees of Portland township rely upon a contract for subscription of stock between them and the Junction Railroad Company to the rights and obligations under which contract the Cleveland and Toledo Railroad Company succeeded. This contract was made under the authority of an act of the legislature, passed January 22, 1851, providing, "That the counties, townships, cities and incorporated towns through which said railways may be located, are hereby authorized to subscribe to the stock of said railroad, in the manner and on the conditions hereinafter prescribed." The subsequent provisions have no reference to the terms of any contract of subscription which might be made but to the amount to be subscribed—the preliminary steps to invest the proper authorities with the power to subscribe, and the payment of the subscription. The contract of subscription and the force and effect of any terms it might contain, are to be determined upon the extent and meaning of the language, "authorized to subscribe to the stock of said railroad."

Now this contract was to be made between two bodies, acting under limited powers. The subject matter of the contract was a subscription of stock.

The consideration to be paid by a township would be the price of certain shares of stock, that to be furnished by the railroad company, the certificates of stock, including the right to vote as a stockholder and receive dividends. We are not prepared to say that in such a dealing between a township and a railroad company, acting through their proper officers, there may not be terms and conditions—that the transaction must necessarily be confined to the simple payment of money, or giving securities for its payment, on the one hand, and the delivery of certificates of stocks on the other. But we think that such terms and conditions cannot properly extend beyond the subject matter and the consideration.

It might be competent for the parties to provide, as is done in this case, that on the breach of any condition looking to the benefit of the township in the construction or operation of the road, the contract should be cancelled. So an obligation might, perhaps, be imposed as to the expenditure of money in a particular locality to be enforced as a trust by an injunction against its expenditure elsewhere, or as a condition involving its return if not used as stipulated. Conditions of this description only affect the subject matter of the contract and its consideration—the money paid and the stock received. But the question becomes entirely different when the making a subscription and paying money for stock is relied on as a consideration to sustain a contract, giving the township a claim to control the general conduct and discretion of the directors of the railroad company, in matters involving the pecuniary interests of the company and its stockholders to an amount far exceeding the subscription of the township. We do not think it was the intention of the legislature to authorize the township to obtain by its contract such a claim, or the directors of the company for the time being so to limit the power and discretion of future boards of directors.

The trustees of Portland township also occupy the position of stockholders. They were such in the Junction Company, and by the consolidation became such in the defendants' company. The inquiry, therefore, as to their right as stockholders to enforce the agreement of consolidation, may be supposed to arise. If the agreement of consolidation imposed a duty on the directors of the defendant to carry into effect its provisions, this duty, like that to pursue the provisions of the charter, might be owing to all the stockholders. If so, then a suit by one or more of the stockholders in behalf of themselves and the others, might be sustained to restrain acts on the part of the directors *extra vires*, on involving a fraudulent breach of trust. But we know of no case of such a suit to enforce an active duty within the power of the directors. "If a Court of equity were to assume jurisdiction in such a case, could it do so without opening its doors to all parties interested in corporations, or joint stock companies, or private partnerships, who, although a small minority of the body to which they belong, may wish to interfere with the conduct of the majority? This cannot be done; and the attempt to introduce such a remedy ought to be checked, for the benefit of the community." Lord *vs.* The Copper Mines' Co., 1 Hall & Twells, 85, 99.

In the case of stockholders in one of our railroad companies, the remedy must be sought in the election of a new board of directors.

There may be cases, however, where there were classes of stockholders, and a duty may be owing to one class. This might occur where there is preferred stock, and it might possibly happen, that in the consolidation of two companies, the stockholders of one might as a class, acquire rights distinct from the stockholders of the other. Whether this occurred in the present case—whether the stockholders of the Junction Company, as a class, acquired distinct rights, and can upon these rights found a claim for performance of any stipulation intended for their benefit, or failing in that for a rescission and a restitution to their original status we need not decide. The action of the trustees of Portland township does not proceed on such claim, and we have not the parties before us directly interested in its adjudication. Not only the class claiming distinct rights and the directors of the company, but the other class should be represented, and the difficulty of making them defendants on account of their number, which was suggested in an English case, appears to be obviated by our code, § 37, Mozley *vs.* Alston, 1 Phill., 790, 799.

Our attention was directed during the argument to a provision in the statute, authorizing the consolidation of these companies, passed January 20, 1850, conferring jurisdiction on the Supreme Court, to enforce by decree "any agreement of consolidation, or for leasing, or for other accommodations" made between the companies. A like provision is found in the general act of March 3, 1851, 1 S. & C., 275, note.

Waiving the inquiry whether there is now any Court succeeding the Supreme Court intended by those acts, capable of receiving such a grant of original jurisdiction, we do not suppose it was the intention of the legislature to authorize or require an exercise of jurisdiction not before recognized according to the principles of equity and the practice of courts, or which those principles and that practice would not properly permit. Indeed we do not understand that this is claimed by counsel.

We feel that we do not err in supposing that the two cases before us are really the presentation of the claim of those interested in the city of Sandusky and its vicinity, to compel a compliance with provisions in the agreement of consolidation intended for their benefit, and which they had a right to expect would be carried out in good faith by the directors of the consolidated company. Their claim commends itself to our sense of justice; and if they have been disappointed in their expectation, from a mere desire for greater profits or dividends, they have just ground for complaint. We have given the claim in the mode in which it is presented, a careful consideration, but acting as a Court in a defined course and according to established principles, we feel bound to come to the conclusion that we can afford no relief.

There will be a judgment for the defendant. All the judges concurred.

Sandusky, Dayton and Cincinnati (Late Mad River) Railroad Company.

The financial difficulties of this company arising from the conflicting claims of the holders of several classes of bonds and guaranteed securities have at length been settled in a manner satisfactory to all concerned. Articles of agreement to carry out the arrangement, were entered into on the 13th of November, 1868. The creditors consisted of five classes, viz:

First. The holders of the bonds of said Railroad Company, becoming due and payable on the first day of February, 1866, and secured by mortgage on the property of said company.

Second. The holders of the bonds of said Company, becoming due and payable on the first day of February 1875, and secured by mortgage on the property of said Company.

Third. The holders of the stock issued by the Sandusky City and Indiana Railroad Company, and guaranteed by the Mad River and Lake Erie Railroad Company.

Fourth. The holders of the bonds of the Springfield and Columbus Railroad Company secured by mortgage on the property of said Company, and guaranteed by the Mad River and Lake Erie Railroad Company.

Fifth. The common six per cent. bonds of the Sandusky, Dayton and Cincinnati Railroad Company, and also the holders of the bonds of the Mad River and Lake Erie Railroad Company, issued in payment of dividends.

The Sandusky, Dayton and Cincinnati Railroad Company, on its part agrees:

First. To pay promptly the coupons attached to the bonds of the Sandusky City and Indiana Railroad Company, secured by mortgage on the property of said Company, as said coupons shall become due, and also to discharge or provide for the principal of said bonds, when the same shall become due and payable by the terms thereof.

Second. To pay three per cent. semi-annually upon the bonds of the Mad River and Lake Erie Railroad Company, falling due on the first day of February, 1866, and secured by mortgage on the property of said Company, commencing said payment of interest on the first day of February, 1864, and concluding the same on the first day of February, 1900, which several sums of interest are to be represented by new coupons, to be issued by said Sandusky, Dayton and Cincinnati Railroad Company, maturing semi-annually from the first day of February, 1864, to the first day of February, 1900, inclusive. And when the principal of said bonds shall become due and payable, as by an extension of their term of payment until the first day of February, 1900, hereinafter provided, said Company hereby agrees to promptly pay and discharge the same.

Third. To pay ten thousand dollars per annum to a Sinking Fund, which fund is to be used each year for the redemption of the bonds of said Company, issued under the former title of the Mad River and Lake Erie Railroad Company, becoming due and payable originally on the first day of February, 1866, payment whereof has been extended to the first day of February, 1900, provided said bonds can be purchased at or below their par value. But if the price of said bonds shall be above their par value, then the bonds to be purchased or redeemed shall be designated by lot, and upon notice being given of such designation, said bonds shall be surrendered in numbers and amounts corresponding to said designation, and interest upon the same shall cease from the date of said notice; the payment of said bonds also creating a discharge of the coupons past due, and held in escrow under the terms of this agreement. It is also understood that the Sinking Fund herein mentioned shall be in charge of three Trustees, the President of said Sandusky, Dayton and Cincinnati Railroad Company *ex officio* constituting one of the number, and the remaining two designated by the holders of the bonds, viz: Israel M. Spelman, of Boston, and Theo. A. Neal, of Boston; and in case of the death, resignation, or inability to serve, of either of said Trustees, the two remaining ones shall have authority to appoint his successor.

Fourth. The said Sandusky, Dayton and Cincinnati Railroad Company, further agrees to pay three per cent. semi-annually upon four hundred and seventy-five thousand dollars in amount of the preferred stock of said Railroad Company, which is to be called and known as the six per cent. preferred stock, and into which are to be funded as hereinafter agreed, the following obligations and claims against said Company, at the rates specified and following, to wit:

First. The bonds of the Mad River and Lake Erie Railroad Company becoming due and payable on the first day of February, 1875, and secured by mortgage upon the property of said Company, at the rate of forty per cent. upon their par value.

Second. The stock issued by the Sandusky City and Indiana Railroad Company, guaranteed by the Mad River and Lake Erie Railroad Company, at the rate of ten per cent. upon its par value; the holders of said stock of said Sandusky City and Indiana Railroad Company also having the option until the first day of May, 1864, of exchanging their stock at its par value, for an equal number of shares of the stock of the Sandusky, Dayton and Cincinnati Railroad Company, at the par value thereof, in lieu of funding said stock in the preferred stock of said Company, as hereinbefore stated.

Third. The bonds of the Springfield and Columbus Railroad Company, secured by mortgage upon the property of said Company, and guaranteed by the Mad River and Lake Erie Company, at ten per cent. of their par value.

Fourth. The common six per cent. bonds of the Sandusky, Dayton and Cincinnati Railroad Company, and also the dividend bonds of the Mad River and Lake Erie Railroad Company, at the rate of ten per cent. upon their par value.

Fifth. All claims of S. Henshaw & Sons against the Mad River and Lake Erie Railroad Company, provided the same be allowed, to be fully satisfied by the issue of ten thousand dollars in amount of said preferred stock, and its delivery to the holders of said claims of said S. Henshaw & Sons.

It is hereby understood and agreed by the parties to this agreement, that all payments hereinbefore stipulated to be made by the said Sandusky, Dayton and Cincinnati Railroad Company, shall have precedence in the order therein mentioned; except that the payment of the principal, becoming due upon the bonds of the Sandusky City and Indiana Railroad, shall neither have precedence over nor in anywise affect the prompt and regular payments of interest represented by the coupons attached to the bonds of the Mad River and Lake Erie Railroad Company, originally falling due on the first day of February, 1866, and the payment of which is extended until the first day of February, 1900; nor shall such payment in any way interfere with the appropriation of ten thousand dollars per annum to the Sinking Fund, as hereinbefore provided.

Fifth. The said Sandusky, Dayton and Cincinnati Railroad Company further agrees, that upon default being made in any of the payments hereinbefore stipulated, and continuing for a period of ninety days, it will surrender its entire road, and property of every description, to the Trustees under the mortgage to secure the bonds of the Mad River and Lake Erie Railroad Company, payable in 1866, who shall have the right to take immediate possession of the same, and hold and manage the same, and to foreclose their said mortgage, to all which the said Sandusky, Dayton and Cincinnati Railroad Company shall make no opposition whatsoever; the holders of the said last named bonds to take precedence, both in their payment and in the control of the road and property, to be surdered to the Trustees representing said bonds. *Provided, nevertheless*, that if said default, in any of said payments, shall occur at any time within three years, from the first day of February, 1864, then an additional period of ninety days to that herein specified, shall be allowed for the surrender of said road and property to said Trustees; but said grace of ninety days additional shall not be extended to any default occurring after the expiration of said three years, from the first day of February, 1864.

The holders of the bonds of the Mad River and Lake Erie Railroad Company, secured by mortgage upon the property of the Mad River and Lake Erie Railroad Company, and becoming due and payable on the first day of February, 1866, agree as follows:

First. To extend the time of payment of the principal of said bonds from the first day of February, 1866, to the first day of February, 1900.

Second. To place in the hands of the President of the Revere Bank, of Boston *ex officio*, all the coupons of said bonds, becoming due and payable from the first day of February, 1860, to the first day of February, 1866, inclusive, and appointing him a Trustee upon the following trusts and conditions, to wit: That if the Sandusky, Dayton and Cincinnati Railroad Company shall well and truly make all the payments, and comply with all of the stipulations herein covenanted, with the holders of said bonds, and shall also make payment of the principal of said bonds, or any portion of the same, by the appropriation of said Sinking Fund, or at their maturity, on the first day of February, 1900, then, and in that case, said Trustee shall return said coupons, belonging to said bonds, that are paid, to said Railroad Company, as fully satisfied and discharged, after having cancelled the same: Otherwise, and in case default be made in said payments and stipulations, or either of them, as hereinbefore specified, the said Trustee shall return said coupons to the holders of said bonds, to be and remain in full force and effect, and of the same legal validity as if this agreement had not been made.

Third. The said holders of bonds further stipulate and agree to receive from the said Sandusky, Dayton and Cincinnati Railroad Company new sheets of coupons, each of which coupons shall represent three per cent. interest upon the principal of said bonds, payable semi-annually, from the first day of February, 1864, to the first day of February, 1900, inclusive.

The holders of the following bonds, and guaranteed securities against the said Railroad Company to wit: The holders of the bonds of the Mad River and Lake Erie Railroad Company, secured by mortgage upon the property of said Company, and becoming due and payable on the first day of February, 1875; the holders of the stock issued by the Sandusky City and Indiana Railroad Company, guaranteed by the Mad River and Lake Erie Railroad Company; the holders of the bonds of the Springfield and Columbus Railroad Company, guaranteed by the Mad River and Lake Erie Railroad Company; the holders of the common six per cent. bonds of the Sandusky, Dayton and Cincinnati Railroad Company, due in 1878; and also the holders of the outstanding dividend bonds of the Mad River and Lake Erie Railroad Company, hereby agree and stipulate as follows:

FIRST. To receive, in lieu of their several bonds, certificates, coupons unpaid, and all claims for dividends and interest due, the six per cent. preferred stock of said Company, at the rates for each class of securities, hereinbefore specified, and in shares of fifty dollars each, as representing the amount of said preferred stock.

SECOND. To surrender said bonds, certificates, coupons unpaid, and claims for dividends and interest due, to the President of the Revere Bank of Boston, *ex officio*, as aforesaid, in trust, upon the following conditions and stipulations, to wit: That if the said Sandusky, Dayton and Cincinnati Railroad Company, shall well and promptly pay three per cent. semi-annually, upon the par value of said preferred stock, from the first day of May, 1864, to the first day of May, 1900 inclusive, then said Trustee shall surrender said bonds, certificates, coupons, claims for interest and dividends due, to said Company as fully discharged and cancelled: But if said Company shall fail to make such payments, as hereinbefore specified, then after the default, and the expiration of the time of grace from such default, the said Trustee shall return on demand to the holders of said preferred stock, all of said bonds, certificates, coupons, and claims for dividends or interest due, and the same shall have the same force and legal validity against said Company, as if this agreement had not been made.

It is further understood and agreed by the parties to this agreement, in case the said Revere Bank, of Boston, shall be discontinued, the President of the said Sandusky, Dayton and Cincinnati Railroad Company, and Israel M. Spelman and Theodore A. Neal Trustees of the Sinking Fund aforesaid, shall have power to appoint the President of some incorporated Bank, in the City of Boston, as a suitable and responsible successor to fulfill the duties of Trustee under the respective trusts hereinbefore mentioned; and the President of said Revere Bank, or his successor, shall receive the sum of one hundred dollars per annum as a compensation for the performance of the duties of said trusts, to be paid by said Sandusky, Dayton and Cincinnati Railroad Company.

It is further understood and agreed, by the parties hereto, that the said six per cent. preferred stock shall continue to be a six per cent. preferred stock, after the first day of May, 1900, and shall receive payments of interest at the same rates as before, the Trustees of the bonds, coupons, dividends, and other claims, to make surrender of the same, to be represented by said preferred stock. It is further stipulated and agreed by the parties hereto, that if the said Sandusky, Dayton and Cincinnati Railroad Company shall at any time, make a lease of its road-bed and property, the payments hereinbefore stipulated to be made shall be made by the said Lessees to the parties entitled to receive the same, under the provisions of this agreement, without the intervention of said Sandusky, Dayton and Cincinnati Railroad Company.

It is further agreed and stipulated by and between the parties to this agreement, that as long as said Sandusky, Dayton and Cincinnati Railroad Company shall well and truly make all the payments, and comply with all the conditions herein stipulated, and shall also maintain the road-bed, equipment of the road, and other property of said Company, in good and efficient order, then said Company shall be entitled to receive and enjoy, for its own use and benefit, all the surplus earnings of said road that shall remain after said payments have been made, as hereinbefore stipulated.

The agreement was duly executed by the President of the Company, O. Follett, under the authority given him by the Board of Directors 23d Sept. 1863.

☞ The exports of treasure from San Francisco from January 1 to September 30, amounted to.....$43,772,558
Corresponding period in 1863..... 33,595,052

Excess this year $10,177,506

☞ The Lynn and Boston Horse Railroad Company are having dummy engines built to run on their road from Lynn to Chelsea Ferry.

☞ The office of Comptroller has been created by the Erie Railway Board, and the Hon. Dudley S. Gregory, former Vice President of the company, elected to fill that office.

☞ The President has appointed Jesse L. Williams of Indiana, Charles T. Sherman of Ohio, George Ashmun of Massachusetts, Springer Harbaugh of Pennsylvania, and Timothy J. Carter of Illinois to be Directors on the part of the Government of the Union Pacific Railroad and Telegraph Company.

Allegheny Valley Railroad.

The part of this line under contract between Kittanning and the mouth of Mahoning, is rapidly progressing to completion. We hope at no distant day to be able to see this road completed to Brady's Bend, and thence to Franklin. If once in running order, it will be most advantageous to the oil and iron interests of the Allegheny Valley. —*Pittsburg Paper.*

WANTED

A gentleman with a capital of $25,000 to take an interest in a Car Manufacturing Establishment at New Haven, Ct. The business is already established, with a large capital invested, and in successful operation. Address this office, or box 2287 P. O., New Haven, Ct.

Fire Insurance on Favorable Terms.

100,000 Shares—Par Value $5 each.

TRUSTEES.

JOHN E. BODY, President.
STEPHEN HILLS, JR., WM. BARCLAY PARSONS,
GEO. V. N. BALDWIN, EDGAR DE PEYSTER,
ERNEST SACCHI, Secretary.

The Trustees offer for sale 15,000 shares of the capital stock of this Company.

The property consists of 325 acres valuable mineral land, twelve miles from Richmond Station, on the Grand Trunk Railroad, Canada East. The mine has been worked down to the rich copper-bearing veins, and is a property of great value.

It is entirely free from debt.

For full particulars apply as above, or at the office of
HENRY G. STEBBINS & SONS,
46 Exchange Place.

Where subscription books will be opened.

RICHARD DUDGEON,
MACHINIST,
24 COLUMBIA ST., NEW YORK,

WOULD respectfully inform his friends and the public that he has removed to his new Building **No. 24 Columbia Street**, where he is prepared to furnish

Hydraulic Jacks,
of from 4 to 150 tons lifting power. PULLING JACKS of different sizes.

Hydraulic Presses
WITH PLATENS.

Hydraulic Punches
for punching iron from three-eighths to 1 inch thick. **Force Pumps** for Hydraulic Presses. Force Pumps for testing tubes, cylinders, etc.

STEAM CARRIAGES for good hard roads.—Squirting Oil Cans, also Denver's Patent Steam Hammer

A. WHITNEY & SONS
CAR WHEEL WORKS,
Callowhill & Sixteenth Sts.,

CENTRAL
Petroleum Exchange Office
No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderoil productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

Wealth and Resources of Indiana.

This is another of the great States born of the Union, that undisturbed by absurd abstractions, and fraudulent pretensions to State sovereignty has marched on its way to wealth and greatness. Common sense, true patriotism and free labor have secured a well deserved prosperity, and its progress is still onward and upward.

Its area is 38,809 square miles, or 21,637,776 acres, its length being 270 miles from North to South, and its breadth from East to West about 150. Its northern boundary is Michigan and the lake of that name, its eastern is Ohio, its southern the Ohio River which separates it from Kentucky, and its western, Illinois. The face of the country is nowhere mountainous, the northern is quite level and is prairie land to a considerable extent. It is well timbered, the soil is fertile, and the climate mild and healthy. The State was originally territory belonging to the Indians whose title was extinguished by treaties, and purchases made from them by the United States. Its population in 1860 was 1,350,428, and its rate of increase decennially is nearly 50 per cent. It contains ten principal cities and towns, Indianapolis being the capital with about 20,000 inhabitants, the remainder having a population ranging from 5,000 to 15,000 each.

Its improved lands amount to 8,161,717 acres, and the unimproved to about the same number.

The value of the farms in 1860 was $344,902,776, and of the implements of husbandry used upon them $10,420,826.

The live stock consisted of 409,504 horses, 18,627 mules and asses, 491,038 milch cows, 95,982 working oxen, 582,990 other cattle, 2,157,375 sheep, 2,498,522 swine.

Their products and those of its busy bees were as follows: Butter 17,931,767 lbs., cheese 569,574 lbs., wool 2,466,264 lbs.; animals slaughtered produced $9,592,322, and the wax and honey amounted to 1,221,939 lbs.

The cereal products were, of wheat 15,219,120, bushels, rye 400,226 bushels, Indian corn 69,641,591 bushels, oats 5,028,755 bushels, barley 296,374 bushels, buckwheat 367,797 bushels.

The commercial crops were 1,219 lbs. of rice, 7,246,132 lbs. of tobacco 75,058 lbs. of hops, 73,112 of flax.

The miscellaneous crops were returned as follows:

Peas and beans, bushels	79,701
Irish potatoes "	3,873,130
Sweet " "	284,304
Wine, gallons	88,275
Hay, tons	635,222
Clover seed, bushels	45,321
Grass seed "	31,886
Flax seed "	155,159
Maple sugar, lbs	1,515,594
Maple molasses, gallons	203,028
Sorghum do. "	827,777
Silk cocoons, lbs	959

The value of the orchard products the same year was $1,212,142, of market gardens $288,070, and of home made manufactures $847,251.

The number of manufacturing establishments was 5,120, with a capital of $18,875,000, using annually raw material of the value of $27,860,000, employing 21,000 operatives and producing fabrics of the value of $48,250,000.

The value of the principal articles of production was as follows:

Flour and meal	$11,292,665
Lumber	3,169,843
Spirits (8,358,560 gallons)	1,951,530
Boots and shoes	1,084,341
Leather	800,387
Agricultural implements	709,645
Woollen goods	695,370
Cotton goods	349,000
Furniture	601,124
Steam engines	426,805
Malt liquors (66,338 bbls.)	328,116
Soap and candles	256,535
Iron castings	168,575
" rolled (2,000 tons)	105,000
" pig (375 tons)	9,375
Coal (15'161 tons.)	27,000
Printing	135,415
Gas	96,012
Fish (white fish)	17,500

The steam tonnage employed in the State is estimated at 5,000 tons, the latest returns being only up to 1858.

The number of banks in 1860 was 89, with a capital of about five millions. The number has been slightly increased under the National system.

The Indiana railways in 1850 were but 228 miles in length, but in 1860 they were extended to 2,200. Their cost was $72,795,000. They are about 26 in number.

The Indiana Canals are but two in number, the Wabash and Erie, between Evansville on the Ohio River to the Ohio State Line 379 miles, and the White Water between Lawrenceburg on the same river and Cambridge City, 74 miles. The mails are carried over routes to the extent of 7,960 miles.

The value of the real and personal property was in 1860 $528,835,371, having increased about 300 per cent. in 10 years.

The school fund pledged to the support of the public schools is about $5,000,000, of which one half is productive of revenue for that purpose, and the residue is becoming so.

The income of the State from other sources than taxes is about $1,500,000.

The State debt was in 1860 $10,286,855, and the canal debt $7,017,807.

In 1800 the population of the territory now the State of Indiana, was but 4,875, and it was admitted into the Union in 1816.

There is not one of the Northern States which offers greater advantages to immigrants than Indiana.

Boston, Hartford and Erie Railroad.

We are glad to see that the project of opening a new transportation route between Boston and the West, *via* the broad gauge through line of the Erie and Atlantic and Great Western Railway, is in a fair way of being speedily consummated. This is to be done by consolidating and extending the intermediate lines between this metropolis and the point of connection above indicated, and which are already located, and partially built and operated, in detached sections along the proposed route, in this State, Rhode Island, Connecticut and New York. To this end, as our readers are probably aware, a company of Boston and New York capitalists have obtained a charter from the Legislature of Connecticut for the further prosecution of the enterprise, as the remaining link required for its completion lies mostly within the limits of that State. The State of New York has also effected the legislation necessary to secure the Western terminus of the route which comes within her territorial jurisdiction.

The lines to be united under this arrangement, and which are already in a forward stage of progress, are the Boston and New York Central, embracing the old Norfolk County Railroad (now intersecting the Norwich and Worcester line at Mechanicsville, Conn.,) and the Providence, Hartford and Fishkill road—the latter as yet incomplete. The consolidated line is to be called the Boston, Hartford and Erie Railroad, and will constitute a very short and direct route between tide water at this port and the Hudson River at Fishkill, N. Y., directly opposite Newburg, N. Y., on the other side of the river, which is the upper eastern terminus of the New York and Erie Railroad. The connection is yet to be made, though in process of construction, between Mechanicsville and Willimantic, Conn., (where the Providence branch unites with the trunk line) a distance of twenty-six miles, and also between Waterbury, Conn., and the Fishkill Valley, about fifty-five miles; while the remaining distance of some twenty miles down the valley to the Hudson, is understood to be already under contract. Besides the main trunk of the Boston, Hartford and Erie road, it has already branches complete or nearly so, extending to several of the most flourishing manufacturing towns in the valley of the Connecticut; and, of the more than three hundred miles of track which the new company will have under their control when their present plan of location shall have been fully carried out, it is estimated that upwards of two hundred miles will be in operation by the first of January next.

The great advantages of this new route, as a medium of communication between Boston and the great West, are so obvious that they need not be elaborately presented. In the first place, it is the most direct, as regards the interior of the country, with fewer short curves and steep grades, having less natural obstacles to overcome in its location than most others, and hence will be able to transport 25 per cent. more freight with the same motive power. In its through business, it will connect with a line (the Erie, Atlantic and Great Western,) which requires no change of cars for passengers, or breakage of bulk for freight, on the whole route from the Hudson to the Mississippi; and which runs through the heart, and commands the traffic, of the great oil and iron region of Western Pennsylvania. In its local or way business, it reaches a larger aggregate of population, engaged in manufactures and productive industry of all branches, tributary to Boston market, than any other Western railroad; besides, it is destined to develop mineral resources, in the shape of iron ore, of unsurpassed richness upon the eastern shore of the Budson.

As it taps the Western trade, seeking the sea board, at a point on the Hudson far below Albany, it will naturally bring much of that trade to Boston which would otherwise go down the river to New York. It will bring the coal mines of Pennsylvania so near the Eastern markets of consumption, that their product can be transported hither by rail direct, cheaper than by the circuitous route *via* Philadelphia and thence around coastwise. As, between the Hudson River and Boston, this line will intersect eleven other railroads, freight or passengers over the Erie, bound for any point eastward, will be able to reach their destination more expeditiously by it, without going round by the way of Albany or New York. Lastly, but not least, as a medium by which the surplus grain and provision crops of the West may reach a foreign market, this route will afford pre-eminent advantages, since freight by it intended for export will not have to be discharged at the outskirts and carted across the city, but will enter our harbor at a point which will enable it to be brought down to deep water by steam power, and delivered directly on shipboard from the cars.

The B., H. & E. Co. have an authorized capital of $15,000,000, and its charter limits the amount of its mortgage bonds to half the cost of the road. As yet, but $8,500,000 of this capital stock has been issued, and the mortgage debt, when 203 miles of the route are in operation, will be less than $21,000 per mile. The estimated gross revenue, when the whole is completed, will be $6,000,000 per annum, which, deducting 60 per cent. for repairs and running expenses, will leave a net income of $2,400,000, equal to a dividend of 8 per cent. on the entire nominal capital.

On the whole, this railroad enterprise may be considered as *au fait accompli*, and as promising practical results of the highest importance both to its stockholders and the commercial public. We say this in no spirit of detraction or opposition to other routes, each of which has its peculiar local merits and its appointed mission to fulfil. Yet there is quite room enough for this, as well as for the Hoosac Tunnel, and even additional lines of Western travel and transport, since there are no assignable limits to the requirements of business in this direction. We build up the commerce and develop the resources of the country by increasing its facilities of intercommunication; and the greater these facilities, so far as Boston and the West are concerned, the greater and more profitable will be their trade.—*Boston Commercial Bulletin.*

Finances of Brooklyn.

The City of Brooklyn in point of population ranks the third in the lists of American cities, and in point of wealth among the most advanced. In 1850 it contained 96,838 inhabitants; but since then the adjacent City of Williamsburg with a population in that year of 30,780, and the town of Bushwick with 3,769, have been consolidated with it, which made the total population of the present city in 1850, 131,387. The census of 1860 gave the population of the consolidated city at 266,838, showing an increase of 135,451, or 103.09 per centum in the intervening decade. At the same rate of increase the population in June last would be 335,000.

Many are apt to view Brooklyn merely as a suburb of New York, or as a roost for the metropolitan merchant. This may be true to some extent, but look upon the shipping at its miles of wharves, its vast manufactories embracing every department of industry, its lines of splendid stores vieing in extent and magnificence with those of the opposite city, its busy marts—and, then estimate its true position. Neither Boston, nor Philadelphia, nor Baltimore, present such a scene of activity as is here displayed; and if we pass from its thoroughfares into the more retired streets we find them lined with magnificent residences—such as might be tenanted by princes. To call such a city a suburb is a misapplication of words. It is properly a part of the metropolis itself.

Among the notable things that Brooklyn presents in its several aspects, we may mention its splendid Atlantic docks and warehouses; its numerous steam ferries which bridge the river and connect it with New York; its unsurpassed naval establishment at the Wallabout, from which so many famous war vessels hail, and which is the chief fitting-out station of the Union; the two hundred and twenty churches which speak loudly for the general morality of its inhabitants, and its free schools to the arcana of which every child of any or no color has free access. Its charitable institutions cover every degree and kind of human distress and disability; and in proportion to its inhabitants it has sent more men to fight under the Union banner than any other city and through its great fair supplied a magnificient sum of money wherewith to lighten their burden and relieve them during sickness or when disabled. Then look to its grand system of passenger railroads which traverse nearly every principal street and avenue, and stretch into sections yet unbuilt on, but whose interests are being so rapidly augmented thereby. Most of these results and advantages have come from private enterprise. In the meanwhile the public authorities have not been wanting, and through their energy and forethought the city has been supplied with a magnificent water-system which has been completed at a cost of about $6,000,000, and a sewerage which gives it a thorough underground drainage. No other city is better lighted, and its police is efficient though it might without doubt be more extended.

The rapid growth of such a city—duplicating its population every ten years—is among modern wonders. This it doubtlessly owes mainly to its proximity to the great metropolitan centre, but not less to its own advantages and its superiority as a place of domicile. If the denizens of New York choose to reside in Brooklyn, depend upon it they intend by moving thereto to better their position. They escape from the foul streets of the great city to a comparatively pure and wholesome atmosphere, and find in their new abode no diminution of the advantages they have left behind: schools, churches, and all the means of enlightenment incident to a great city; abundant means of transit about, through, and around; and also plenty of places of recreation, instruction and amusement.

The growth of the city in taxable wealth has kept pace with its increase in population, and this during a period of drain caused by the existing rebellion. Indeed the last three or four years have been more magnificent in results than any former period, and though so many of its inhabitants have been drawn away and so much of its wealth devoted to the cause of the Union, both numbers and wealth have increased with unwonted rapidity. These results may thus be expressed in figures:—

	Real Estate.	Personal.	Total.
1861	$93,519,724	$11,495,375	$105,015,099
1862	94,192,702	10,981,805	105,174,507
1863	99,671,883	12,568,920	112,240,803

which figures give to Brooklyn one-fifteenth of the whole assessed valuation of the Empire State. To those familiar with our system of State and city valuation and taxation, however, we need not explain that these large aggregates do not represent the reality. If valued at what it would bring at auction any day the property here represented would bear a duplication of the official valuation.

Personal property is almost a neglected object of taxation.

The valuation of taxable property in the several wards of the city for the year 1863 is shown in the following table:

Wards.	Real Estate.	Personal.	Total.
First	$5,721,125	8978,724	$6,699,854
Second	3,073,750	1,885,497	4,959.247
Third	8,389,350	4,205,705	12,595,055
Fourth	4,988,125	851,040	5,839,165
Fifth	2,866,925	27,529	2,893,954
Sixth	10,123,593	932,497	11,056.089
Seventh	4,788,270	160,330	4,948,600
Eighth	4,935,296	284,421	5,219,717
Ninth	7,834,802	253,280	8,088,082
Tenth	9,446,533	355,495	9,802,028
Eleventh	11,157,240	468,058	11,625,298
Twelfth	4,438.710	25,311	4,464,021
Thirteenth	6,344,050	1,564,422	7,908,472
Fourteenth	3,411,843	213,806	3,625,649
Fifteenth	1,792,469	13,004	1,805,473
Sixteenth	2,332,540	27,600	2,360,140
Seventeenth	2,439,384	53,940	2,493,324
Eighteenth	1,728,221	70,626	1,798,867
Nineteenth	3,860,158	197,630	4,057,788
Aggregate	$99,671,883	$12,568,920	$112,240,803

The following is a statement of the receipts of the several municipal funds in 1863, and their total resources including balances from 1862:

	Bal. Jan. 1, '63.	Rec'pts '63.	Total '63.
General fund	$978,683	$1,833,353	$2,812,036
Special fund	238,187	557,694	795,881
Sinking fund	257,158	30,517	287,675
Revenue fund	149,681	290,495	440,176

The expenditures of these several accounts in 1863, and the balances remaining in hand for the service of 1864, were as follows:

	Payments 1863.	Bal. Jan. 1, '64.
General fund	$1,308,323	$1,503,712
Special fund	411,005	384,876
Sinking fund	160,000	127,675
Revenue fund	189,243	250,932
Total	$2,368,571	$2,267,195

A large portion of the expenditures of the city are of a permanent nature. The following are the appropriations made annually by vote of the Common Councils, showing the amounts appropriated for 1863, and the expenditures under each head for the same year:

	Appropriated.	Expended.
Principal of debt	$133,530 95	$131,530 95
Interest of debt	99,301 56	61,693 90
Principal and interest of certificates	9,353 34	10,278 57
Salaries	95,500 00	63,639 44
Police	220,200 00	221,876 03
Lighting streets	136,000 00	109,623 78
Contingencies—Mayor's office	200 00	130 28
City hospital	4,000 00	4,000 00
Board of health	500 00	596 26
Fourth of July	1,000 00	1,000 00
Dispensaries	3,000 00	3,000 00
Removing office	12,000 00	12,000 00
Printing and stationary	7,000 00	10,603 51
Printing city manual	2,000 00	901 00
City directories	500 00	
Advertising	7,500 00	7,500 00
Public buildings, gas, fuel, repairs, etc	12,000 00	8,758 61
Truant school	7,000 00	8,809 06
Election expenses	8,000 00	11,550 50
Contingencies	5,000 00	5,000 00
Fire Department	48,300 00	72,335 54
Water revenue	130,000 00	256,351 41
Total	$941,855 85	$1,050,678 87

The funded debt of the city contracted principally for its water works and other improvements amounted on the 1st January, 1864, to $6,159,055 36, besides which there was outstanding in certificates the sum of $236,660 46, making a total debt of $6,395,715 82. The details are as follows:

Description.	When Payable.	Amount.
City Hall Loan of 1846	Jan. 1, 1865–'70.	$60,000
Wash'gton P'rk loan, '48	Jan. 1, 1869	121,540
City Hall loan of 1849	Jan. 1, 1872–'76.	50,000
" " of 1850	Jan. 1, 1874	15,000
Cur. exp. loan of 1851	Jan. 1, 1871	150,000
Water loan of 1851	July 1, 1873	55,000
School loan of 1855	Jan. 1, 1866	44,200
Cur. exp. loan of 1855	Jan. 1, 1865	300,000
Debts of W'mburg of '55	Jan. 1, 1875	150,000
Mt. Prospect Sq. loan, '56	Jan. 1, 1887	90,000
W'mburg St. loan of '57	Jan. 1, 1872	92,000
Local Imp. loan of 1859	July 1, 1879	100,000
" " of 1861	Jan. 1, 1891	213,100
Deficiency loan of 1861	Nov. 1, 1866–'68.	25,000
Water bonds of 1856	July 1, 1881	1,700,000
" of 1857	July 1, 1886	749,000
" of 1857	July 1, 1891	819,000
" of 1857	July 1, 1896	1,432,000
" of 1859	July 1, 1899	850,000
4th Av. Imp. loan of '61	July 1, 1866'–'95.	300,000
Wbg. local imp. loan, '61	July 1, 1881	35,000
Third street loan of '61	July 1, 1881	76,000
War loan of 1862	Jan. 1, 1865	115,000
Atl. Av. imp. loan, of '61	Dec. 31, 1864–'66.	45,000
Wmbg. city bonds	Jan. & July '64'–70	33,026
Wmbg. village bonds	Various 1864–'69	5,029
Total funded		$6,159,055
Certificates		236,660

The total cash and property belonging to the city Jan. 1, 1864, amounted to $7,881,608. This includes the amount left in the hands of the Treasurer, the sinking fund ($790,356), the amount due from Williamsburg, the cost of the city water works, the value of real estate and property owned by the corporation, etc., etc.

The amount of taxes collected for city purposes in 1863 was $787,832 33. In 1862 the amount collected was $851,185 17, showing a reduction in 1863 of $62,352 84. This is something to boast of in such times as these we live in, and is highly creditable to the municipal authorities.

Central Pacific Railroad.

At the annual meeting of the stockholders of the Central Pacific Railroad Company, held at the office of the company in Sacramento, October 8th, the following persons were unanimously re-elected Directors of said Company, to-wit: Leland Stanford, A. P. Stanford, C. P. Huntington, Mark Hopkins, E. B. Crocker, E. H. Miller, Jr., and Charles Marsh. The following report was submitted by the President:

OFFICE CENTRAL PACIFIC RAILROAD OF CALIFORNIA, SACRAMENTO, October 8, 1864.

To the Stockholders of the Central Pacific Railroad Company: At this our annual meeting I avail myself with pleasure of the opportunity to present briefly the progress of our enterprise since the last annual meeting, its condition and future prospects—all of which, on the whole, are satisfactory, notwithstanding the distured financial condition of the country and the consequent depreciation of Government and other securities. During the year past we have constructed and have in operation thirty-one miles of telegraph line; also have constructed the same number of miles of railroad, which has been in running order since the sixth day of last June.

The average monthly receipts since that time are $16,156 64, and average current monthly expenses for operating are about $3,000 per month. The portion of road constructed has been examined by the United States Commissioners, who have approved the work and found it to be in all respects in compliance with the Act of Congress and have sent forward to the proper Department at Washington their report. The company consequently, is now entitled to, and will receive as soon as the bonds can be prepared $1,264,000 in Government thirty-year bonds.

The Legislature of the State at its last session changed the law giving to the company State aid, and which, in the whole, amounted to $500,000 on the first fifty miles in sections as completed, and granted instead to the company the privilege of issuing twenty-year bonds to the amount of $1,500,000, on which the State pays the interest of seven per cent. semi-annually in gold. These bonds have not yet been issued, owing to the necessity for waiting the action of Congress at its last session. There is nothing now to delay their issuance, and of course they are so much of immediately available assets to the company.

Congress at its last session altered materially the Pacific Railroad Act, and very beneficially in several respects. The more prominent benefits are chiefly in shortening the sections upon which we may be entitled to draw Government bonds from forty to twenty miles; in doubling the amount of lands, making the amount to which the company is now entitled per mile twelve thousand eight hundred acres; also, by providing that the Government subsidy shall operate as a second lien to an equal amount of first mortgage bonds of the company.

You will readily perceive the immense advantage of this last change, as it makes the Government virtually an indorser of the company's bonds for the full amount of its own subsidy, viz: $48,000 per mile easterly from Arcade creek, the established base of the mountains, and $16,000 per mile this side. The base of the Sierras has been ascertained and established since our last meeting, and is entirely satisfactory to the company, though strictly the geological, as distinguished from the apparent base, approaches several miles nearer the American river.

By virtue of an Act of the Legislature authorizing it, the company entered into a compromise with the city and county of San Francisco, by which the company accepts of $400,000 in the bonds of said city and county, in lieu of the subscription of $600,000, and for which stock was to be issued. Now the company receive the $400,000 and issue no stock.

The immediate available assets of the company for the further prosecution of the work are, therefore, from these sources: Government bonds, $1,264,000; bonds upon which the State pays the interest $1,500,000; first mortgage bonds of the company, 1,264,000; San Francisco bonds, $400,000.

There are prospectively, as the work progresses: First mortgage bonds, $48,000 per mile, and Government bonds of an equal amount, making in the aggregate $96,000 per mile, or about for the whole distance, $15,000,000, and 2,000,000 acres of land.

During the year past there has been completed over the mountains, and forming from Newcastle a direct route to Nevada Territorry, a wagon road offering unequalled facilities for transportation of passengers and freight. The advantage to the company from such a connection will be readily appreciated. It will give to our road from the time it reaches Illinoistown, which will be early in the coming Spring, the greater portion of the travel and freight to Nevada Territory.

The prediction that we shall reach Illinoistown as early as indicated is fully warranted by the extent of our resources and the progress in the past, it being but one year the 8th of last January since the first shovelful of earth was cast and the work commenced. Thus, we may confidently look forward to be in receipt at an early day of large revenues from the daily earnings of the road.

During the year past the company has met with considerable opposition from antagonistic interests, chiefly led on and controlled by those whose loyalty is of a more than questionable character, and who, naturally from their sympathies, though unnaturally as American citizens, oppose a great National work that, while providing for the utmost prosperity, State and national, serves to bind together and strengthen our nationality. This opposition, however, we have been able to meet and

overcome with signal success, and we may safely announce that the great work is now beyond the reach of enemies to seriously obstruct, and that it will progress with the rapidity that its friends desire.

LELAND STANFORD, President.

Interest and Dividends.

The Pennsylvania Railroad Company have declared a semi-annual dividend of five per cent., clear of National and State taxes, payable 15th of November.

The Cleveland and Mahoning Railroad Company have declared a dividend of four per cent. free of tax, on the full shares of the capital stock of the company, (except that issued since May 1, in conversion of bonds, and upon that a pro rata dividend), payable November 10.

The Pennsylvania Coal Company will pay, 17th November, a dividend of 7½ per cent.

The Pacific Mail Steamship Company will pay, 12th instant, a dividend of 5 per cent. out of the net earnings of the last three months.

☞ The annual election for directors of the New York Central Railroad Company, will be held at the office of the company in the city of Albany on the 14th of December next.

Indianapolis and Madison Railroad.

The earnings of this road for the year ending March 31, 1864, were:

From passengers	$105,185 96
" freight	112,550 93
Military passengers and freight	13,668 75
Express, mail, etc.	12,444 04
Jeffersonville Railroad	71,322 64
	$315,172 32

And the expenses were:

Running road	$39,802 31	
Repairs of road	63,506 29	
Repairs of cars & mach'ry.	44,522 37	
Wood	25,327 98	
Oil and waste	3,919 53	
Salaries	8,329 93	
Depots	14,760 00	
All other expenses	4,409 49	
		204,577 98
Net earnings		$110,594 34

The receipts of the company from all sources during the year were:

From transportation, as above	$315,172 32
Rents, sales of iron, interest, etc	9,338 96
Jeffersonville Railroad Company	1,866 27
J. & S. Ferguson, special deposit	19,303 75
Balance March 31, 1863	3,293 50
Columbus and Shelby Transp., etc	9,027 26
	$358,002 06

And the disbursements were:

Current expenditures, as above	$204,577 90
Taxes	3,474 00
Interest on bonds, including taxes, commissioners, etc.	46,643 32
Dividend on preference shares	31,464 00
" common "	22,530 00
Taxes, and commisions paying div	2,054 97
Commissions	1,524 57
Trustees of sinking fund	10,250 61
Scrip purchased and cancelled	6 25
Uncollected accounts	14,390 45
Deposited with J. & S. Ferguson.	4,357 37
T. P. Matthews	16,728 62
	$358,002 06

The receipts for transportation proper show an increase over those of the previous year of $38,295 72. In consequence of a large increase in the expenditures, resulting from an advance in the price of labor and of every material necessary to be used in the working of the road, as also from the large amount of extra work done and material purchased, there is, after paying that, the current expenses, interest upon the bonded debt, and a dividend, free from government tax, upon both classes of the capital stock, a decrease in the net profits, as compared with the previous year, of $177 28, as shown by the amount appropriated to the sinking fund.

But for the fact that the Company has claims against the United States for transportation, for about $5,500, which we have been unable to get allowed, and consequently could not include in the receipts of the year, we should have shown an increase in the net profits of the year, as compared with those of the previous one, of over $5,000. When the amount due by the United States is collected, it is to be paid to the Trustees of the Sinking Fund, as earnings of the last year.

In addition to the ordinary repairs upon the cars, machinery, and the road, the expense of which has been largely increased from the causes before mentioned, one baggage and express, three passenger, twenty-five box freight, and twenty-seven flat and coal cars, have been rebuilt, some nearly new, at a cost of over $17,500. One of the plane engines has had eight new tyre, new frame, pedestals, and fire box, and been otherwise generally repaired. Two freight engines have had new water and fire boxes, one of them four tyre, a new cylinder, and link motion, and both otherwise generally overhauled, at a cost of about $13,000, all of which has been charged to "Repairs of cars and machinery."

There have been five miles of the road track relaid, using entirely new ties, and seven miles graveled, at a cost over $5,000. The stone masonry for the culvert across Crooked Creek has been completed, and a large proportion of the necessary embankment has been filled in, at a cost of over $16,000, all of which has been charged to "Repairs of road."

The road, from its location, as stated in former reports, is unable to compete very successfully for a general, being confined very much to a local business. This, of course, will not justify the hope of large receipts upon its line proper under any condition of the country, but at the same time a hope may be reasonably indulged of larger receipts than the average of the last few years.

The receipts from the Jeffersonville Company, for the use of this Company's road between Edinburgh and Indianapolis, for the last year, were $71,322 64, being an increase of $5,008 37 over those of the previous year. Any increase or diminution of the through business of that Company, will, of course, under the contract, affect the receipts of this. Sufficient time has not elapsed, perhaps, to determine whether this Company is remunerated, under the present contract, for the said use of road, but the manner of compensation has proved quite satisfactory.

The use of the road between Edinburgh and Indianapolis by that Company, as tenants, they forming a through line between points east, north, and west of Indianapolis, and south of Louisville, makes it incumbent upon this Company to keep the same in a higher condition of repair than would be necessary if it was merely used for its own local business, the extent of their business requiring a good if not a first class road.

It is not proposed, however, to attain this at once, but to accomplish the result by a systematic and gradual expenditure. There are certain points on the road south of Columbus that very much need new iron, or that the old should be rerolled. Extensive repairs are needed upon some of the locomotives, and others of them as well as one or more of the passenger cars, should be rebuilt; and there also need to be built several box, lumber, coal and platform cars, during the current year.

The amount of expenditure necessary for the above purposes, in addition to that for the ordinary expenses of working and repairing the road, cars and machinery, will be very large; and whilst we think it will be a judicious and hope ultimately profitable one, it may have the effect to curtail the revenue of the stockholders from the road.

LEDGER BALANCES, March 31, 1864.

Cost of road	$1,464,347 98

President.—F. H. SMITH.

Directors.—James Guthrie, Dillard Ricketts, Michael G. Bright, Nathan Powell, Hiram Francisco, William McEwen, William H. Jennings, James Johnson, Frederick H. Smith.

Secretary.—THOMAS POLLOCK.

Treasurer.—T. P. MATTHEWS.

Superintendent.—A. B. CULVER.

Railroad Earnings—Weekly.

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the week ending October 31:

	1863.	1864.
Passengers	$48,053 38	$77,611 31
Freight	125,048 57	160,241 09
Express	1,109 32	1,673 67
Mail	1,286 15	1,405 64
Total	$175,497 42	240,931 71
Increase 37-28 per cent.		$65,434 29

The traffic of the Great Western Railroad for the week ending Oct. 28, 1864, was as follows:

Passengers	$28,589 30
Freight and live stock	30,964 53
Mails and sundries	2,130 55
Total	$61,684 38
Corresponding week of 1863	64,258 91
Decrease	$2,574 53

The earnings of the Marietta and Cincinnati Railroad for the 4th week in October:

	1864.	1863.
Passengers	$13,526 99	$9,758 92
Freight	13,854 02	19,576 62
Mail, express & telegraph	1,219 37	1,133 14
Total	$28,600 38	$30,468 68
Total this month to date	$90,576 04	$83,058 71
Total since Jan. 1	$827,950 10	$564,098 46

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 22, 1864, were:

	1864.	1863.
Passengers	$3,535 23	$2,103 75
Freight	8,867 43	9,998 72
Express	104 16	75 00
Mails	296 58	296 58
Total	$12,803 40	$12,474 05

Receipts from January 1st to Oct. 22:

1864	$465,382 79
1863	321,296 78
Increase	$144,086 01

Petroleum Companies.

We present our readers with a list of 247 petroleum companies established in the several regions of production. It is the most complete enumeration yet published, and may be considered as full to the 1st inst. It gives with the title of each company, the location of its principal office, the number of shares issued or to be issued, the par value of shares and the amount paid up per share. It is only by such a statistical exhibit that the real magnitude of this branch of industry can be measured; and when we state that the nominal capital involved in the oil business already approximates $166,000,000, the vast interest being developed in the country is at once apparent. We question whether the oil business does not even now exceed in value that of coal; but it will most undoubtedly at no distant day.

American Railroad Journal.

Saturday, November 12, 1864.

Stock Exchange and Money Market.

The recent elections have had a decided influence for a week or two past upon the movements in the Money Market. The two great parties at issue acted as if everything else in the world was secondary to their success, and the excitement which usually rages on Change in New York was over ridden by political fears and hopes.

Thus stocks were heavy, buyers were not anxious and sellers indifferent. Gold went up and down in gentle leaps, so that margins were not much disturbed. Rumors from the army did not discount readily, and the recent victories of Gillem and Sherman went for nothing. With this state of feeling, the election came off, and the results are known to our readers. It is evident that a vast majority of the people of the loyal states have determined that the policy of putting down the rebellion shall not be reversed, and the arts of "Statesmanship" are not to supersede at present the more forcible and simple one of arms. In a contest with a set of desperate men who began their assaults on the Union without reason, and refuse to listen to it now, it is sheer waste of breath to use arguments. That portion of our fellow citizens who believed the South would come back, on a proposition to do so from General McClellan have been grossly deceived. The South are so cowed down by the despotism of their authorities that their voice has been hushed in the agony of apprehension, not of the North but of Jefferson Davis. The determined front shown by the loyal States will give the unhappy Union men under his sway new confidence that the time of their redemption draweth nigh. The insurrectionary spirit in North Carolina, the change of political feeling in Alabama, and the doubt and despondency prevailing in Georgia, are signs of the times of great importance, and will culminate in more decided action ere long, and end in the entire breaking up of the Confederacy.

All this has a direct bearing on the financial credit and stability of the Country, and as such we notice it. We consider the war to be at a close. The re-election of Mr. Lincoln is a remarkable event all things considered. Great dissatisfaction prevailed even in his own party. In the month of September his previously most faithful friends had declared his success impossible, the radical press which had helped bring him into power had grown cool or refractory, it was even seriously proposed by leading republicans, that he should be withdrawn from the canvass, and yet in spite of all this and against a popular candidate, whose name was a watchword of more than ordinary power, he has again been placed in the Presidential chair by an overwhelming majority. Now then for the Country's sake we hope Mr. Lincoln will let politics alone, and think only of the great duties he has to perform. We have yet many things to do, and of these the reformation of our finances is the most obvious and pressing. Our debt is large and is increasing, taxation is heavy, and the willingness of the people to submit to it should not be abused. More activity in the Navy, and more carefulness in the expenditure of its funds are imperiously required. We have an enormous fleet of steamers, more than five hundred. What will we do with so many a few months hence. It is time to stop the construction of any more. We do not want them. Take Wilmington, and there will hardly be any use for those we already have. Stop the leaks in the Navy, and our expenditures will at once be reduced hundreds of millions.

The people also expect of the President that he will call to his personal aid the first talent of the Country. We want the restoration of a sound financial policy, and then everything will go well. So far we have done better than we could have hoped. The splendid confidence of the people in their own strength, and the readiness they have shown in lending the Government all the money it has wanted, and at low rates of interest are worthy not only of all praise, but the careful consideration of the Treasury department.

By withholding the further issues of paper money beyond the present amount afloat, or

rather we should say by not increasing the amount afloat, great steadiness may be given to present values, and the upward tendency of gold completely checked. This last is of the utmost importance, as the great evil of the hour is the exorbitant price at which articles of necessity are held, distressing persons of moderate means to such an extent as to make them willing to yield even their principles under the sufferings they endure. An abridgement of the currency, and retrenchment in the Navy expenditures will give immediate and universal relief.

The result of the present political contest will have an immense effect on securities abroad, and of course a favorable one. The friends of liberty and representative Government have everywhere abroad taken a deep interest in this election. They have shut their eyes to all Mr. Lincoln's mistakes and weaknesses, they have seen no spots in his broad disk, and have considered the cause of humanity staked on his success. They will now take care to proclaim the force and resolution of the American character, and pronounce the country "inflexible in faith and invincible in arms." American credit will rise higher than ever, and we must expect to see large and constant demands for its securities. Such at least is our opinion. It is the strength and determination of a people which makes them masters of public opinion and secures them the respect of the world. This late political crisis has not only been passed without danger, but has invigorated the constitution of the patient. The people have made a solemn and final record of their purpose, that this Government must and shall be preserved. We may be pardoned for saying this much in a general way, but it is not too much when we reflect that these popular demonstrations have an immediate bearing on the financial power of the nation.

The market has not been active the past week. It will be seen by our quotations that the speculative spirit was not very lively. Railway shares were drooping under an impression that the receipts had diminished, and the rumor prevailed, that the leading companies proposed to diminish their expenses by reducing their facilities. So State stocks and railway bonds were dull, and Governments were some fractions below the rates of the previous week.

It must be borne in mind, however, that we have had several days of stormy weather in succession, and the effect of this on the market, is always distinctly visible in New York. After years of attentive observation, we venture the statement, that rainy weather in this city always produces a temporary decline in stocks. Those who wish to save a little in their purchases should always choose a stormy day in which to make their investments. The reason is obvious enough. Capitalists are particularly careful of their health and comfort, and much exposure may take them out of the street forever.

Gold is fluctuating considerably, but seems to find no point at which its market value may be kept long enough to be read. One great object in pushing it up, that of influencing the election is no longer to be attained.

Whatever efforts have been made by the enemies of the Union at home or abroad, whatever ungrateful attempts have hitherto been persisted in by the agents of foreign houses to alarm the American people into an opposition to their own Government, by raising the price of gold, there is now nothing to be gained by a continuance of those efforts and that policy. One element of disorder disappears. We shall now see how far, pure commercial speculation can maintain the rise.

If it be true that the Money Market is likely to become stringent, we may expect a fall for this reason, if no other. That it is at least 50 per cent. higher than its proportions to paper money will justify, no one who understands the subject can doubt.

We notice from the Circular just issued by the Commissioner of Agriculture, that there has been a considerable falling off in the agricultural products of this country the present year. The wheat crop is 18 millions s hort of that of the previous year; the rye 2 millions, the barley 1 million, the hay crop 2 millions of tons, the tobacco crop several millions of lbs., bu ckwheat 2 millions of bushels, potatoes 5 millions, while on the other hand the oat crop is increased 4 millions of bushels, and the corn crop of 531,000,000, is increased 79,000,000 bushels from that of last year.

A rumov that a new issue of bonds bearing interest in gold, to the extent of a hundred millions is declared semi-officially to be without truth, yet with the denial, comes a statement, that a loan receivable partly in certificates of 7-3-10ths currency is under consideration.

A plan has been suggested to the Treasury department of making a large loan payable in legal tenders in instalments, of which a certain percentage is to be destroyed as they are received. In this way the Government will be rid of the legal tenders gradually, and get all the money it wants at the same time.

But we repeat for the hundredth time the fact that the greatest inflation of the currency is owing to the local banks, and we regret to see the National banks doing their full share of the mischief. If all the bank paper was withdrawn, the Government currency would be none too much.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending November 7, was $361,686, against $1,518,635 in 1863, and $426,017 in 1862.

The exports from New York for the same week were $1,874,605 against $3,339,088 in 1863, and $3,215,610 in 1862. The shipments of specie since January 1, have been $39,729,672. The exports since January 1, have been $185,021,661 against $149,012,435, in 1863, an increase of $36,009,226. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to November 5, was $60,813,272.

The value of foreign goods imported into the port of Boston for the week ending November 4, was $426,487, against $622,060 for the corresponding week in 1863. The exports were $365,915 against $301,193 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $394,861.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ We invite attention to the Advertisement of Mess. Stone, Quigley & Burton, Bridge Builders, in another column.

☞ Proposals will be received until the 25th inst., for the grading and masonry of the Dighton and Somerset Railroad, between South Braintree and Miller's Station on the Old Colony and Newport Railroad. The line will be ready for examination on the 14th inst., and profiles and specifications will be at their office in Taunton, Mass.

New Car Manufactory at Salem Massachusetts.

Among the many new enterprises called forth by the present demand for rolling stock for our railways is that of the "Salem Car Company." These works were commenced last winter and completed so as to commence operations in June last. They cover about two acres of ground on Bridge street in Salem, and consist of a series of buildings, for setting up and painting and trimming the cars, enclosing the entire ground leaving a quadrangle in the interior. In the centre of this are the machine shops both for wood and iron work, and the blacksmith shop with boiler house and engines. Between the centre buildings and those surrounding the ground, are roads passing entirely around the centre buildings, thus giving convenient access to every department and furnishing light upon all sides. These works are provided with machinery of the best description made by the New York Steam Engine Works on 23d street, and they have capacity for turning out a very large amount of work.

They not only construct cars of every description for steam roads, but are manufacturing a very superior style of horse cars, a number of which have been put on the Yonkers and New York Horse Railroad. One speciality of their works is the construction of cars with a frame made of wrought iron gas pipe. These when completed present the same appearance as those entirely of wood, and prove to be extremely light and of extraordinary strength. Those furnished to the Yonkers and New York road are of this description and are well worthy the examination of parties wanting cars. The company have unusual facilities for quick dispatch in the fulfillment of orders, and having cars on hand in various stages of progress can supply a demand at very short notice.

The following are the officers of the Company:

President.—John H. Nichols.

Directors.—W. P. Phillips, Frothingham, Chamberlain, A. P. Robinson, David Moore, W. R. L. Ward.

Treasurer.—James A. Gillis.

John Kinsman, Esq., former Superintendent of the Eastern Railroad is the General Manager. With his long experience in such matters there can be no doubt that the work turned out under his direction will give satisfaction.

Railroad Earnings—Monthly.

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Oct., 1864, were.....$404,568 00
Corresponding month of previous year 371,361 00

Increase.....$33,207 00

The earnings of the Chicago and Rock Island Railroad Company for the month of Oct., 1864, were.....$312,049 00
Corresponding month of previous year 208,549 00

Increase.....$103,500 00

The earnings of the Cleveland and Toledo Road for the month of Oct., 1864, were....$183,649 00
Corresponding month of previous year 140,013 00

Increase.....$43,636 00

The earnings of the Michigan Central Railroad for the month of Oct., 1864, were....$408,066 41
Corresponding month of previous year 375,487 91

Increase.....$32,578 50

The earnings of the Chicago and Northwestern Railway for the month of Oct., 1863 and 1864 were:

	1863.	1864.
Passenger	$133,769 02	$235,186 34
Freight	404,176 44	462,083 30
Express	4,437 28	5,922 00
Mail	5,144 51	5,622 51
Miscellaneous	3,594 87	.....
Total	$551,122 12	$708,714 15
Increase 28.59 per cent		$157,592 03

From June 1 to October 31, 1864, (5 months,) the earnings were $2,943,418 15, against $1,967,911 58 in 1863—an increase of $975,568 57, or 49.57 per cent.

The earnings of the Chicago and Alton Railroad for the month of Oct. 1864.....$281,418 60
Corresponding month of previous year 187,833 50

Increase.....$93,585 10

From January 1 to October 31, 1864, the earnings were $2,163,180 69, against $1,514,633 68 in 1863—an increase of $648,547 01.

The Pacific Railroad—Progress of the Work.

But few, if any, of our citizens, have a correct idea of the progress which has been made in the construction of the Union Pacific Railroad from this city westward. We recently made an examination of the work, in company with Peter A. Dey, Esq., Chief Engineer of the road, and we frankly confess that we were agreeably disappointed as to the *quantity* and *quality* of the work which has been done during the present Summer and Fall.

The masonry is first class at all points, and the graduation is in keeping with the magnitude and importance of the road, which is destined to become the great highway of nations. Arched culverts, stone abutments and piers for the bridges, wide embankments and cuts—everything is in harmony with the general character of the work—the greatest of modern times.

From Omaha west to the Elkhorn River—a distance of eighteen miles—the earthwork is heavy, and on this portion of the line the maximum grade is 60 feet to the mile. At the Elkhorn River the Platte Valley commences—and thence, for a distance of 500 miles, the graduation of the road will be accomplished with less expense than upon any equal distance of railway line, ever constructed in the world. At no point, for the distance we have named, will there be a cut or a fill of five feet—and what is equally important, in the management and working of the road, there will not be a dozen curves, and the average grade will be less than five feet to the mile—the maximum not exceeding six feet.

From Omaha to the Elkhorn River, the graduation will be performed chiefly with picks, shovels and self-loading carts—and on this portion of the line the work will be continued during the coming Winter at all the heaviest cuts. West of the Elkhorn the company are using Patent Excavators, drawn by eight yoke of oxen each. Three of these excavators average half a mile of grade per day. Already some twelve or fifteen miles of track have been made ready for the ties and iron by these machines, which we are informed, work admirably. The heavy work on the first eighteen miles, will be nearly or quite finished by the first of May next; and there is every prospect that the iron horse will reach the Loup Fork of the Platte,

at Columbus—eighty-five miles west of this city—by the 1st of November next.—*Omaha (Neb.) Republican, Oct.* 21.

Railroad Bonds and Interest Coupons.—Guaranty Consideration.—Third Parties. Dealing with Corporations. Jurisdiction.

The late case of The Connecticut Mutual Life Insurance Company against The Cleveland, Columbus and Cincinnati Railroad Company, was an action brought against the defendants to recover the amount due upon one hundred and forty coupons, attached to twenty bonds issued by the Columbus, Piqua and Indiana Railroad Company, the payment of which was guarantied by the defendants.

The bonds were for $1000 each, dated April 1, 1854, and were made payable to Elias Fassett, or to the holder thereof at the office of the Ohio Life Insurance and Trust Company, Wall street, in the City of New York, on the first day of April, 1869, with interest at the rate of seven per cent. per annum, semi-annually on the first day of October and April, on the presentation of the annexed interest warrants at said office. The bonds were signed by the President of the Railroad Company. The coupons, or interest warrants annexed to the bonds, were in the following form varied in each case as to the time of payment.

"The Columbus, Piqua and Indiana Railroad Company will pay to the holder thereof, on the first day of April, 1869, at the office of the Ohio Life Insurance and Trust Company, in the City of New York, thirty-five dollars interest, due on that day on their bond, No. 385.

$35. M. G. Mitchell, President."

The guaranty upon each coupon was as follows:

The Cleveland, Columbus and Cincinnati Railroad Company, for value received, hereby warrant and guaranty the punctual payment of the interest and principal of this obligation.

In testimony whereof, the said company, in pursuance of a resolution of the board, passed 6th day of March, 1854, have caused these presents to be signed by its President, the 7th day of April, 1854. The Cleveland, Columbus and Cincinnati Railroad Company.

By H. B. Payne, President."

The defendants, in their answer, set up as a defence, that the guaranty was unauthorized and without consideration, and that the plaintiffs had notice of it; also that the bonds were purchased from the Columbus, Piqua and Indiana Railroad Company, by one William Dennison, jr., for less than their par value, and that Dennison was, at the time of such purchase a director of that company; and that by the laws of Ohio, the bonds thereby became null and void; and that the defendants were induced to make the guaranties by false representations, made by the said Dennison and one William Neil, of all of which the plaintiffs had notice. Also that the defendants were accommodation guarantors, and that the plaintiffs took the bonds with knowledge of the matters alleged by the defendants, and paid nothing except a small per centage for the bonds. Also that the original issuing of the bonds was contrary to the laws of Ohio. Also that an injunction was pending, which forbade the payment.

Both parties were foreign corporations; the plaintiff being incorporated under the laws of the State of Connecticut and the defendant under the laws of the State of Ohio. The only demand ever made for the payment of the coupons, before this suit was brought, was one made on the assignees of the Ohio Life Insurance and Trust Company, at the office of which company, in New York, they were made payable. The company itself had previously failed, and had no office in New York. No demand was ever made of the makers, or of the guarantors, before suit brought. The action was brought in the Supreme Court of this State, and was tried at the New York Circuit, in January, 1862, before Justice Peckham and a jury, and, under the instructions of the judge, the jury found a verdict for the plaintiffs for the aggregate amount of the coupons and the interest thereon. From the judgment entered on the verdict the defendant appealed to the General Term.

By the Court, Sutherland, P. J. The bonds are payable in the City of New York, to Elias Fassett or holder. They are negotiable, passing by delivery, and would have been had they been under seal. Their negotiability was resumed, if not decided, in Zabriskie *vs.* The Cleveland, Columbus and Cincinnati Railroad Company, (23 How, U. S. Rep. 400). Similar bonds have repeatedly been held by the courts to be negotiable. It was so held or assumed recently by the court of Appeals of this State, in actions on one or more Harlem Railroad bonds under seal, I believe. (See also Redfield on Rail, § 239, and cases cited in note.) It has been repeatedly held in Ohio that affixing a seal to such an instrument does not affect its negotiability. (See Bain *vs.* Wilson, 10 Ohio Rep. 19; Bank of St. Clairsville *vs.* Smith, 5 Id. 222.) The English decisions are, too, I think to the same effect. This point was raised by the defendants' first exception, on the introduction of the bonds in evidence, and subsequently by another exception when the case was submitted to the jury. Neither exception was well taken.

In my opinion the judge was right in permitting the plaintiffs to recover interest on the coupons. This point is presented by the defendant's second exception. The coupons are negotiable promises to pay a certain sum of money, on a certain day to the holder, so made as to be cut off, and circulated independently of the bonds. If not paid when due, I think interest should be allowed by way of damages for the delay of payment. They do not contain any express promise to pay interest on the interest, and if they did, I think interest would or should be allowed, not by force of the promise, but as a compensation for the delay of payment by way of damages.

The general rule is, that where there is a written contract to pay money on a day and at a place fixed, and the contract is broken, interest is allowed. (Williams *vs.* Sherman, 7 Wend. 109. Still *vs.* Hall, 20 id. 51, 52. Reid *vs.* Rens. Glass Factory, 3 Cowen, 436; S. C. 5 id. 587.) The reason or ground of the general rule, that interest upon interest cannot be recovered, certainly does not apply to the principal case, and should not have prevented a recovery of the interest on the coupons. There is no danger of railroad creditors being negligent in presenting their coupons for payment, though they may run other risks. Railroad corporations certainly do not need protection from want of diligence on the part of their creditors.

In Van Benschoten *vs.* Lawson, (6 John Ch. 313,) Chancellor Kent said that agreements to pay interest on interest to accrue would not be enforced, because they were oppresive. I repeat, certainly there is no danger of railroad corporations being oppressed from want of diligence on the part of their coupon creditors.

In Van Rensselaer *vs.* Jones, Judge Willard appeared to think it by no means clear, that the cases in this state would prevent a recovery of interest on interest in a case like the principal case.

There is no doubt that in several of the States the plaintiffs would have been permitted by the courts to recover interest. (See Catlin *vs.* Lyman, 16 Verm. 45; Greenleaf *vs.* Kellogg, 2 Mass. 548; Hastings *vs.* Wisewall, 8 id. 455; Watkinson *vs.* Roob, 4 Ham, Ohio Rep. 373, Pierce *vs.* Rowe, Adams N. H. Rep. 179, Hollingsworth *vs.* Detroit 3 McLean, 472.)

Upon the whole I can see no good reason nor controlling authority for saying that the plaintiff should not have recovered interest on its coupons. From the transactions I infer, that the Piqua Company expected to pay interest on its coupons if they were not paid when due, I think the case shows a sufficient consideration for the guaranties outside of them. A railroad corporation must be presumed to be created not only for public convenience, but also for private profit. The arrangement which was entered into between the defendant and the other companies, of which the guaranties were a part, was entered into for the purpose of securing a uniform gauge of the connecting roads, and thus to increase its business and profits. The presumption is that the defendant has received the anticipated advantages from the arrangement. I think therefore, that the defendants' third exception was not well taken.

In my opinion the judge was also right in declining to instruct the jury, as requested, that the guaranties were unauthorized and unlawful. No doubt the plea of *ultra vires* raised the question of the corporate power of the defendant, to make the guaranties, as between the corporation and the state of Onio, and not merely the question as between the corporation and its shareholders, whether the making of the guaranties was a breach of trust. A corporation is the mere creature of law, and cannot act at all without law. A contract made by it, without authority is void, even in the hands of a *bona fide* holder, for value. Its legal capacity to contract cannot be enlarged by estoppel.

But, I think the defendant was authorized by the sections of the general railroad laws of Ohio, inserted in the case, to enter into the arrangement with the other companies, and to make the guaranties as a part thereof. There is another clause of these sections which authorize any two or more railroads, whose lines are connected, to enter into any arrangement for their common benefit. The counsel for the defendant insists, that this last provision evidently refers to arrangements as to the management of the road, price of fare, time of running, number of trains, &c. But I do not see why this limited construction should be given to the provision, particularly as against the plaintiff, who is a *bona fide* holder, for value, there being nothing in the case showing that it had notice of any of the defences set up in the answer. The language is broad enough to cover the arrangement which the defendant entered into with the

other companies, and the guaranties as a part of it. Perhaps this question of power may be said to have been decided in Yabriskie *vs.* Cleveland, Columbus and Cincinnati Railroad Company, (23 How. U. S. Rep. supra,) although that action was brought by Yabriskie as a shareholder.

It is not necessary to inquire or decide whether the acts of the defendant were authorized or ratified by a vote of the stockholders, in accordance with the provisos of the said sections of the Ohio general statutes if the defendant had the general power to make the guaranties; for these provisos were intended for the protection of the shareholders, and relate rather to the mode or manner of the execution of the power; and the plaintiff had a right to presume that the defendant had done its duty, and had proceeded regularly in the execution of the power. (See Commissioners of Knox Co., Indiana, *vs.* Aspinwall, 21 How. U. S. Rep. opinion 545; The Royal British Bank *vs.* Tarynand 6 Ellis and Blackb. 327; and Zabriskie against this same defendant, 23 U. S. Rep. supra.)

This doctrine does not at all interfere with the principle of the limitation of the powers of corporations and its consequences, before stated. Third parties dealing with a corporation are bound to know the law; that is, they are bound to take notice of the extent of its powers, but they have a right to assume, in the absence of anything suggesting inquiry, that it has proceeded regularly in the execution of its powers. I think, therefore the defendant's fourth exception was not well taken.

I think the judge was also right, in declining to instruct the jury, as requested by the defendant, that the plaintiff could not recover because the bonds were void, under the Ohio act of December 15, 1852, declaring that no director of a railroad company shall purchase any of the bonds, &c., of any railroad of which he may be a director, for less than the par value thereof, and that all such bonds, &c., so purchased, shall be void. The Supreme Court of Ohio has decided that these bonds were valid securities, and upon which the holders are entitled to recover the full amount of principal and interest, without reference to the amount paid for them. (Coe. *vs.* Columbus and Piqua Railroad Company, 10 Ohio Rep. 395, 399, and 410.) In Zabriskie against these same defendants, (23 How. U. S. Rep. supra.) the United States Supreme Court says: "In deciding upon this contract, we deem it unimportant to settle whether Dennison was a director of the Piqua Company on the 25th February, 1854, when he signed the contract with the committee of the Piqua board of directors." I doubt, too, whether Dennison was a director the 25th of February, 1854, within the meaning and interest of the act of December 15, 1852, although he may have been within the meaning of the Ohio act of February 11th, 1848, declaring that directors shall continue such, until their successors are elected and qualified. I think, therefore, the defendant's fifth exception was not well taken.

Neither do I think that the defendant's sixth exception was well taken. The judge declined to instruct the jury, that, if the bonds were void, the guaranties were void. In the case of Zabriskie, the United States Supreme Court held that it was not necessary to settle whether the bonds of the Piqua Company were void. The court said, "The contract of the guarantors, inclosing the bonds, is a distinct contract, and may impose an obligation upon them independently of the Piqua Company." An indorser may be liable though the makers name is a forgery. (Herrick, *vs.* Whitney, 15 John 240. Shaver *vs.* Ehle, 16 id. 201. See also, I Parsons on Con. 494, and cases cited in notes.)

It was decided by the general term, in this action, the bonds and coupons being payable here, that the cause of action arose here, and that this court had jurisdiction, though both parties were foreign corporations. (The Connecticut M. Ins. Co., *vs.* The C., C. and C. R. R. Co., 23 How. Pt. Rep. 180.)

My conclusion is that the judgment should be affirmed with costs.

Judgment affirmed.

Allegheny County Railroad Indebtedness.

The subjoined exhibit of the railroad indebtedness of Allegheny County, is copied from the statement of the fiscal affairs of said county to January 2, 1864, sworn and subscribed to by Henry Lambert, Controller, before the President Judge, published in the *Pittsburg Gazette* (supplement) of May 21:

Railroad Bond Account.—In the month of February, 1863, the following terms of compromise were agreed upon in Philadelphia, between the county authorities and a committee of railroad bondholders representing a large number of that class of creditors:

"The county to raise by taxation, annually, $130,000 for payment of interest on railroad debt, besides $25,000 for sinking fund. The whole class of indebtedness, both bonds and coupons, to be consolidated to January 1st, 1863, on which an abatement of 13⅓ per cent. to be allowed by the creditors. Fund the abated amount at 5 per cent. The new bonds to be clear of taxation under the laws of Pennsylvania. For judgments, the bonds to run twenty years; for balance of debt, fifty years. The old bonds to be deposited with Trustees, and not to be cancelled until after punctual payment of interest on new bonds for five years. Attorneys' commissions on judgments, and costs of court and expenses, to be paid by the county."

The necessary legislation was procured at Harrisburg to authorize the county officers to exchange the bonds and conclude a settlement. By close and accurate calculation, it was found that a levy of ten millions the county valuation would be sufficient to meet our engagements with the bondholders, and at the same time provide for the ordinary annual expenditures. The latter had been reduced under $90,000, and it was confidently believed there was no necessity why such amount should for the future be exceeded.

By a comparison of the Countersigned Warrant tables for 1862 and 1863, it will be perceived that some departments of the county have, during the past year, increased their expenditure fully fifty per cent.; and in these particular branches of the public service, neither the commissioners or controller have any direct check on the management. Whilst the enhanced value of commodities in general may partially account for the increase in some instances, in others it cannot be pleaded in justification. I consider it my duty to notify the tax payers, that if the amount of the public expenses is to be enlarged, or the system of economy which now prevails be departed from, it will require a levy for county purposes of at least eleven mills on the valuation for 1865.

The following statement presents the railroad bond indebtedness subject to the action of compromise, showing the actual amount of new bonds issued, and being the nearest approximation to accuracy which can be attained at the present stage of settlement:

Allegheny Valley Railroad Company, subscription to stock		$750,000 00
Pittsburg and Connellsville Railroad Company, subscription to stock		750,000 00
Pittsburg and Steubenville Railroad Company, subscription to stock		500,000 00
Chartiers Valley Railroad Company, subscription to stock		150,000 00
Cleveland and Pittsburg Railroad Co., subscription to stock		150,000 00
		$2,300,000 00
Net accrued interest to Jan. 1, 1863, per controller's report		715,290 00
Interest on coupons and judgments in U. S. C. Court, estimated		39,000 00
		$3,054,290 00
Abatement per terms of compromise, 13⅓ per cent		407,238 67
		$2,647,051 33

Deduct amount cancelled in sinking fund		39,111 48
Amount outstanding		$1,583,816 67

Philadelphia and Erie Railroad.

Now that this road is fairly open to the public its importance will be estimated more and more daily. Its chief, immediate and practical value is the direct access it gives to the oil regions. Formerly the traveler desiring to go there either had to go to Pittsburg, and thence by way of the Cleveland road into Ohio, and so round to Meadville, or by Kittanning, with the most unheard of staging through Clarion County to Oil City. Or else he might take the better route by Elmira, Salamanca and Corry. But now we have direct access, without going out of our own State, to that oil region which is and is to be the most productive region on the face of the world. This we have now by two routes through Pittsburg, or by Williamsport and Corry. Six months ago this could not have been accomplished by either route.

The Sunbury and Erie is of course the speediest, and, if well managed, will soon become the favorite route even from New York with many. At present the traveler can leave Philadelphia at 8 P. M., and, without leaving his seat in the car, arrive at Corry the following 4 P. M., and then be at Titusville, on Oil Creek, within about twenty-four hours of the time of leaving this city. He can even, if he pleases, get into a sleeping car and not be disturbed until the next morning, when he reaches Lock Haven, on this route. When the railroad is completed along the Oil Creek to Oil City he will be able to reach any part of the oil region along the creek to the city within a day from leaving Philadelphia.

At present, however, the traveler to Oil City will generally prefer going from Corry to Meadville by the Atlantic and Great Western road, taking a night's rest at the McHenry House, so celebrated as a truly first class hotel, and thence pursuing his way by railroad to Franklin the following morning. This will give him but six miles of staging in a convenient hack. After Christmas the railroad will be complete from Meadville to Oil City, where a first class hotel is about to be erected, and which must ever remain the great centre of the Pennsylvania oil trade.

But at Erie this new road taps all the business of the lakes, and, with proper facilities for commerce, will draw an increasing share of it from New York. This was the main object with which it was commenced. At Erie, moreover, oil has been struck, and at several points along the railroad between Erie and Ridgway, oil in considerable quantities has been obtained, and without doubt, more will be now since the road is opened. There are, too, vast fields of bituminous coal extending through this region, which are many of them unworked so far, though within a mile or two of the railroad, and can be shipped down the road more cheaply than any other coal of that kind. The freight along this line must, therefore, be immense, and business will soon spring up in regions where now the deer is constantly seen crossing the railroad track.

To the summer traveler the whole region will possess unusual interest. He winds along the beautiful Susquehanna and its branches from Columbia or Middletown, below Harrisburg, through that city, Sunbury and Northumberland, where Priestly, the great philosopher lies buried, past Lewisburg, with its flourishing University, Milton, Watsontown, Williamsport, Lock Haven, until, near Emporium, he reaches the place where the streams instead of flowing eastward towards the Atlantic, commence to flow westward into the Clarion and Allegheny Rivers, finally emptying into the Gulf of Mexico. Everything that can attract the lover of nature, of commerce, and of scientific inquiry seems concentrated on this road. The most beautiful scenery, hardly exceeded in Europe or Asia, is here to be met with. Great geological problems can here be solved, and probably the mysterious origin of petroleum may here be discovered, while the commerce of a vast chain of inland seas will draw travelers to this new line of railroad, from all parts of the world.

Let care only be taken to furnish every convenience and security for the traveler, let baggage checks be always on hand for every station through the route, and careful agents to prevent all possible mistakes, let good hotels be cherished, such as are to be found at Meadville, and as the Boston House at Corry, and travel will soon spring up, and the desert blossom as the rose.—*Phila. Ledger.*

U. S. MILITARY RAILROADS.

WAR DEPARTMENT,

Office of Director and Gen. Manager Military R. R's U. S. }

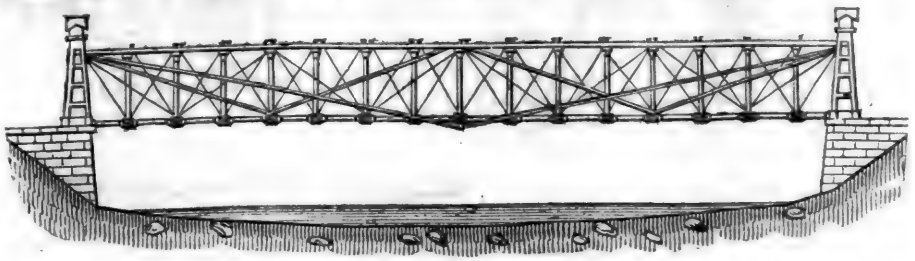
Petroleum Exchange Office

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:



Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, **FINK'S PATENT IRON BRIDGE** in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

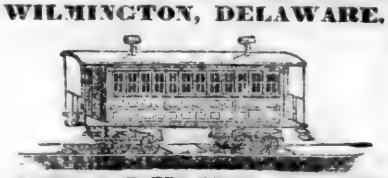
OFFICE OF THE PITTSBURGH BRIDGE COMPANY,
No. 83 Water street, Pittsburgh, Pa.,
October 12th, 1864.

PLANS AND PROPOSALS are invited for both Wooden and Iron Bridge Superstructure, and proposals for the masonry of the piers and abutments of the Roadway Bridge to be erected over the Monongahela river, from Pittsburgh Point to West Pittsburgh. The bridge will consist of eight spans 210 feet each from centre to centre of piers, or 201 feet clear of masonry, and one span 317 feet from centre to centre of piers. The clear width of carriage way must be 19 feet, with foot-ways at each side 8 feet in clear. The structure must be proportioned to sustain, in addition to its weight, a uniformly distributed load of 2,000 pounds per lineal foot. The effect on any portion of the structure under this maximum load must not exceed one-sixth of its breaking weight.



Plans and specifications of the masonry and superstructure may be seen at the office of the Company. Bids will be opened December 1st, 1864. The right to adopt either wood or iron superstructure, or to reject any or all of the bids or plans is reserved.

Endorse envelope "Proposals for Pittsburgh Bridge, ('wood') or ('iron')" and "Pittsburgh Bridge Masonry."

6t-43 JOHN F. SINGER, President.

HARLAN & HOLLINGSWORTH & CO.,

WILMINGTON, DELAWARE.

MANUFACTURERS OF ALL KINDS OF

RAILROAD MACHINERY.

PASSENGER CARS of the **finest finish,** also all kinds of FREIGHT CARS, DUMPING CARS, HAND CARS, WHEELS and AXLES, STEEL SPRINGS, and in fact EVERYTHING for the **full equipment** of a road.

From our long **experience** in Car building, and our **facilities** for doing work, we are enabled to give ENTIRE SATISFACTION in every particular.

From our LOCATION, and CONVENIENCES FOR SHIPMENT, we can supply southern roads with dispatch, and ship at reasonable freights.

We are also extensively engaged in building IRON VESSELS and IRON STEAM BOATS, STEAM ENGINES and BOILERS and **Machine Work in general.** All orders executed with dispatch and on reasonable terms.

Also 10-40 Bonds which are payable, principal and interest in Gold. Also converts the old 7-30s into 6s of 1881. Collects Certificates of Indebtedness. Buys and sells Quarter-Master's checks and gives every possible facility to parties wishing to transact financial business with Government. 3m-32

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "flammate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less coal, nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

10 PINE STREET, NEW YORK,
SEPT. 20, 1864.

TO THE PUBLIC.—We invite your attention to a projected enterprise in the production of Petroleum now in process of organization. Several of our leading capitalists and business men have already interested themselves in it, and in the fullest manner endorse the value of the property, and vouch for its present enormous production. We are satisfied no project has been offered to the public which offers so large immediate returns on the investment with a prospective increase almost incalculable. To all who, in these troublous times, are in doubt what species of investment are safe in any contingency and reliable as dividend paying, this enterprise is in the strongest manner commended. Full information in regard to the matter will be cheerfully furnished, and of the parties already interested on application to us.

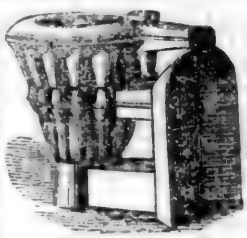
SANFORD'S
MAMMOTH
OR
GLOBE
HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y



This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

New York, Saturday, November 19, 1864.

Wealth and Resources of California.

This State is one of the wonders of our age. When in possession of the Mexicans it was chiefly noted for a few religious missions, where some benevolent priests, settled on splendid estates, devoted themselves to the duties of civilizing and christianizing the savages who surrounded them. The gold and silver lay in countless nuggets and Pactolean sands, undisturbed by explorers and prospectors, a prolific soil returned no products of value, no ships unloaded their valuable cargoes on its shores. It seemed to slumber under the unexciting banner of St. Francis, with no prospect of being ever roused from its repose. But when the flag of the United States was planted there, it shook off its somnolence and became one of the most busy and enterprising of modern States, and has not only afforded new fields for the exercise of American industry and commerce but has filled the world with gold. The area of this splendid State is 188,982 square miles. Its population by the census of 1860 was 379,994. Of this number 30,000 were Chinese.

It contains 12 principal cities and towns, of which the chief is San Francisco with a population of 56,802 in 1860, and rapidly on the increase.

Sacramento the next in size contained about 14,000, and Marysville about 10,000.

The cultivated lands amounted to 2,430,882 acres, and the uncultivated 6,583,858. The value of the farms was returned at $46,571,004, and the implements of husbandry used upon them to $2,443,297. The live stock was as follows:

Horses	160,395
Asses and mules	13,744
Milch cows	198,859
Working oxen	81,627
Other cattle	952,048
Sheep	1,075,718
Swine	453,523

The products of animals were of butter 3,338,590 lbs., when in 1850 they were but 705 lbs.; of cheese 1,564,859 lbs., and in 1850 but 150 lbs.; of wool 2,681,922 lbs., and in 1850 but 5,520; of animals slaughtered the value was $3,562,887, and in 1850 but $197,173. The yield of wax and honey was 2,940 lbs., and in 1850 none at all.

The cereal crops were as follows:

	1860.	1850.
Wheat bushels	5,946,619	17,228
Rye "	51,244	000
Indian corn bushels	524,857	12,236
Oats "	957,684	000
Barley "	4,307,776	9,712
Buckwheat "	31,486	000

The miscellaneous crops at those periods respectively were as follows:

	1860.	1850.
Peas and beans, bushels	184,962	2,292
Irish potatoes "	1,647,293	9,292
Sweet " "	158,001	1,000
Wine, gallons	494,516	58,055
Hay, tons	306,741	2,088
Clover seed, bshels	4	....
Grass seed "	162	....
Flax seed "	....	....
Maple sugar, lbs	....	....
Maple molasses, gallons	....	....
Sorghum do. "	100	....
Orchard products	$607,459	$17,700
Market garden	1,074,143	75,275
Home made manufactures	265,674	7,000

The number of manufacturing establishments in 1850 was 1,003, and in 1860 3,505. The capital invested in them in 1850 was $1,006,197, and in 1860 $23,683,593. The value of raw material used in 1850 was $1,201,154, and in 1860 $16,558,636. The number of operatives employed in 1850 was 3,094, and in 1860 23,803 while the value of the products which in 1850 was $12,862,523, even then surprisingly large for a new Country, was in 1860 $59,500,000.

The principal products of the industry of the Country are given as follows:

	1860.	1850.
Flour and meal	$4,335,809	754,192
Lumber	2,214,596	959,485
Steam engines	1,600,510	.....
Malt liquors (87,806 bbls.)	1,211,641	.....
Spirits (763,265 gallons)	349,410	.....
Leather	226,214	.....
Soap and candles	204,900	.....
Woollen goods	150,000	.....
Gas	146,200	.....
Fish (whale, white fish & sal.)	113,950	.....
Agricultural implements	7,375	.....
Salt (44,000 bushels)	7,000	.....

Being the great port on the Eastern shore of the Northern Pacific, its commerce is rapidly increasing. The total value of its foreign imports and exports in 1850 has not been officially returned. In 1860 the amount was returned at $19,876,870.

The tonnage cleared and entered was in 1850, American 152,216, Foreign 158,776 total 310,992.

In 1860 it was American 490,165 tons, foreign 98,702 tons, total 588,867.

This shows a heavy falling off in the foreign tonnage and an enormous increase in the American.

The shipping owned in the State in 1850 was of 17,592 tonnage, and in 1860 85,111. Thirty vessels steam and sails were built in 1860 and of 2,023 tons but in 1850 none had been. There are four ports of entry and delivery. San Francisco, Sonoma, Sacramento, Monterey and San Pedro, but the foreign commerce of the three last is of little account at present.

There are no incorporated Banks in California, but innumerable private ones. The constitution of the State prohibits the issue or circulation of paper money. Even under the National Bank bill passed by Congress, no one has ventured to establish any paper issuing institution, and though the United States Government issues are a legal tender currency, it is not received or used as such in California by general consent, public opinion being against the practice. It is nevertheless true,

that though California has no other than a metallic currency, its peculiar circulation has never kept down interest, or prevented commercial failures, or panics, or insolvency on the largest scale. Beyond all question the day is not far off, when the system will be changed, for the vast commerce which must then centre in San Francisco will require some other medium than gold and silver. A well devised system of banking would be the greatest blessing which could be conferred on California. Bills of Exchange and Banker's checks as now used, are not adequate to even the present demands of the business of the State. The railways of California are in fact but in their infancy, and need no further notice than we have from time to time given them. The Eastern terminus of the Pacific Union is constructed for some distance and is being steadily prosecuted. When that great work is accomplished a total revolution in the commerce of the world will be effected, and San Francisco may expect to be one of its greatest cities. That this road will be built at an early period no one doubts, as it is now in the hands of capitalists and men of the highest character and influence.

The real and personal estate of California was in 1860 $22,161,872, and in $207,874,613.

The real estate was rated at $66,906,691, but this does not approach the truth. The yearly products of the mines in gold and silver are now fully 70 millions a year, and as these products are saved, become coin and enter into our commerce as the profits of industry and capital, we may consider the mines themselves as so much real estate, and the valuation then instead of sixty or seventy millions would be placed at one thousand millions of dollars, and an income tax on the yield of the mining companies would now produce the Government $2,100,000.

The State debt in 1861 was $1,292,719, but it is understood that the direct obligations incurred for the prosecution of railway improvements has increased this amount considerably, and ample security has been provided for their final payment.

It is well enough to remark in conclusion that California is one of the most loyal States in the Union, and none of her Statesmen have claimed the right of secession, or its inherent and absolute sovereignty in any one particular.

The New Iron Mountain.

It is said that a mountain of iron has just been discovered at the east end of Lake Superior, on the Canadian side, about 45 miles from the Sault Ste. Marie; its altitude is 600 feet above the level of the lake, being about twice as high as the iron mountains of Marquette. The first examination was made in July last by Prof. S. P. Duffield, of Detroit, who, from the general features, came to the conclusion that the range was indentical with that of Marquette. The ore is of the finest quality, corresponding to the ores of the Marquette mines, and extending through a range of several miles in deposits many feet in thickness. It is so plentiful that by no human agency can the supply be exhausted for hundreds of years! Of the unequalled richness of the ore, says the Detroit *Tribune*, we are enabled to speak definitely. A quantity which was taken from the depth of only fifteen feet from the surface, and smelted in a common blast furnace, realized 60 per cent. of pure iron. When we remember that 30 per cent. is a good working average, the richness of the newly-discovered ore will be fully apparent.

Nova Scotia Coal Trade.

The whole amount of coal raised and sold from Nova Scotia, from 1827 to 1857, when the monopoly of the General Mining Association ceased, was 1,841,538 tons. The amount raised and sold in 1857 was 101,082 chaldrons. Since that time the amount has steadily increased, being in—

1858	239,618 tons.	1861	334,545 tons.
1859	267,496 "	1862	398,631 "
1860	304,129 "	1863	424,425 "

	Tons.
In 1863 there was sold in Nova Scotia	76,061
" " other Provinces	65,773
" " the United States	286,790

Two-thirds of the yield of the mines of Nova Scotia are taken to the United States.

☞ The Webster *Times* states that the rails on the Boston, Hartford and Erie Railroad are being laid with great rapidity. The intention is to have the road completed to Webster in a short time, and the entire line to Southbridge by the 1st of January.

☞ At the annual meeting of the Hartford Providence and Fishkill Railroad Company held at Hartford on the 26th ult., the old board of directors was re-elected, excepting Elisha Dyer, Simon H. Greene and William Sheldon, who were chosen in place of Byron Sprague, Geo. B. Holmes and Henry Lippett. The gross earnings of the road for the year ending Sept. 30, 1864, were $523,446 58, expenses $337,153 28, and the net earnings $186,293 30. The sinking fund for redemption of the company's bonds held by the city of Hartford is $77,395 47, and for redemption of the bonds held by the city of Providence is $61,500.

Funded Debt of the City of New York.

The funded debt of the city at the end of the last fiscal year, amounted in the aggregate to $24,000,372 being an increase of $1,461,000 over the amount outstanding at its commencement. Of this amount there was held by the Commissioners of the Sinking Fund, on account of the Fund for the redemption of the City Debt $5,794,701 reducing the actual funded debt by that amount and leaving $18,205,671 to be provided for in the future.

In addition to the foregoing there are temporary and other loans amounting to $3,885,570 of which $1,486,800 are held by the Commissioners of the Sinking Fund; and assessment bonds amounting to $2,013,000.

The total indebtedness of the city, funded, floating and contingent is therefore $29,898,942, and less the sinking fund $19,900,790.

The indebtedness above represented has been contracted for the following purposes:

Introduction of the Croton Water	$10,364,033
Central Park—Lands & Improvements	8,789,571
Erection of Public buildings	442,000
Building Docks and Slips	500,000
Payment of Fire (1835) damages	402,768
Indebtedness of old Public School Society	154,000
Purchase of market property	600,000
Liquidation of Floating Debt	2,748,000
War expenses	3,885,570
	$27,885,942
Assessment bonds	2,013,000
Total outstanding Jan. 1, 1864	$29,898,942

The above debt (exclusive of assessment bonds which are payable by the owners of property improved) is payable as follows:

From the Sinking Fund	$20,346,372
From future taxation	7,539,570
	$27,885,942
The amount of investments by the commissioners of the Sinking Fund, applicable to the redemption of the said debt is	$7,731,501
Amount of cash in said fund	253,651—7,985,152
Actual Debt Jan. 1, 1864	$19,900,790

The outstanding funded debt is constituted as shown in the annexed table:

Titles of Stocks.	Outstanding.	When pay'ble.
5s Water Stock	$4,871	Jan. 1, 1858
5s " "	20,862	" 1, 1860
5s " "	3,000,200	Nov. 1, 1870
5s " "	2,147,000	" 1, 1880
5s Croton Water Stock.	900,000	Feb. 1, 1890

Whole Amount			$1,913,000

—making a total of floating debt $5,898,942.

The indebtedness of the city in January 1863 and 1864 compares thus:

Funded Debt	$24,000,372	$22,539,372
Floating Debt	5,898,570	4,952,270
Total	$29,898,942	$27,491,642

The debt on the 1st January for the six last years has stood as follows:

1859	$22,690,669	1862	$25,599,241
1860	23,876,610	1863	27,491,642
1861	23,433,644	1864	29,898,942

Sinking Funds.

The capital of sinking fund for the redemption of the principal of the city debt January 1st, 1863, was $7,227,885 12

The Revenues in 1863, were as follows viz:

From bonds and mort..	$148,886 24	
Commutat'n of quit rents	4,445 01	
License Fees.....	31,792 00	
Market cellar rents.....	19,984 52	
Market fees and rents..	155,346 97	
Street vaults.....	18,145 64	
Water Lot quit rents...	334 64	
Interest on investments.	396,620 85	
		770,505 87
Annual payment by corporation on account of the Public Education Stock.....		4,657 86
		$8,002,998 85
Disbursements in 1863—		
Advertising, salaries, discount, etc.....	$1,319 99	
Real estate bonds.....	300,000 00	—301,319 99
Amount of capital Jan. 1, 1864.....		$7,701,678 86

The operation of the sinking fund for the payment of the interest on the city debt in 1863, was as follows:

	Balance January 1, 1864	Receipts.	Total.
1859	----	$1,253,317 50	
1860	----	1,222,507 38	
1861	----	1,718,068 04	
1862	----	1,279,122 49	
1863	1,298,318 02	892,589 11	
Total...	$1,298,318 02	$6,365,604 52	$7,663,922 54

	Interest.	Expenses.	Transfers.	Total.
1859	$541,831 75	$5,157 30	$442,801 02	$1,089,400 07
1860	477,539 79	4,310 98	776,671 15	1,258,424 92
1861	528,780 61	826 08	686,468 75	1,215,093 44
1862	892,589 11	1,115 43	660,000 00	1,553,704 54
1863	606,907 40	930 77	660,000 00	1,267,838 17
Total...	$3,047,648 66	$12,340 56	$3,225,940 92	$6,285,930 14

The following statement exhibits the yearly Receipts and Disbursements on account of this fund for the past five years:

	Cash on hand June 1, 1863	Receipts in 1863	Total.
	$135,489 55	1,388,313 02	1,523,752 57
Disbursements in 1863:			
Interest			$605,967 40
Expenses			320 77
Transferred to general fund			650,000 00—1,259,288 17
Balance in hands of Chamberlain			$264,464 40

☞ The following gentlemen have been elected directors of the West Philadelphia Railroad: John S. Morton, John F. Gross, Herman J. Lombaert, John C. Davis, Samuel Baugh, J. Warner Johnson, Benjamin Griffith, William M. Wright, and James G. Hardie.

☞ The receipts of treasure in San Francisco, from all sources, through regular public channels during the last nine months, have been as follows:

From California and Nevada Territory.	$34,846,299
From coastwise ports.....	4,840,141
From foreign countries.....	1,579,543
Total receipts.....	$41,265,983

A comparison of the past three years show a steady increase.

In 1862 the receipts were.....	$34,445,443
" 1863 " "	38,559,372
" 1864 " "	41,265,983

The following shows the exports of treasure during the first nine months of the year, giving the destination of same to the different countries:

To	1864.	1863.	1862.
England...	$28,364,870	$21,295,751	$7,586,073
New York..	8,745,277	7,982,827	19,469,192
China.....	5,813,208	2,645,874	1,952,150
Panama...	277,382	1,411,396	342,506
Miscellan..	571,822	253,204	289,896
Total....	$43,772,559	$33,589,052	$29,639,817

Crop Statistics.

The Department of Agriculture has issued a crop circular from the returns of correspondents of the Department, showing the following facts:

	1862.	1863.	1864.
Weat, bush..	181,188,089	179,404,036	160,695,823
Rye, bush...	21,239,451	20,782,782	19,872,975
Barley, bush.	12,488,022	11,467,155	10,716,328
Oats, bush...	171,463,405	173,800,575	176,690,064
Hay, tons....	20,257,968	19,736,847	18,116,751
Corn, bush...	556,226,305	451,967,959	530,581,403
Tobacco, lbs.	136,751,746	267,267,920	197,468,229
Buckw't, bu.	18,708,145	15,806,455	18,700,540
Potatoes, bu.	113,234,644	100,158,670	96,256,888

The following crops are reported in *tenths*, increase or decrease. Thus, 1 means one-tenth, 2⅜ means two-tenths and three-eighths of a tenth; ⅓ means one-third of a tenth; 0 mean an average. When there is a very large increase, as Cotton in Maryland, it shows that but little was cultivated previously.

Sorghum.—Increase over crop of 1862—New Hampshire 1, Massachusetts 1½, Connecticut 7, New York 0, New Jersey 10, Pennsylvania 2⅜, Maryland 6⅔, Delaware 3, Kentucky 4 5-6, Ohio 1, Illinois 2¼, Missouri 0, Wisconsin 3, Minnesota 3-5, West Virginia 2 1-6. Decrease of the same, Michigan 4-5, Indiana ⅓, Iowa 4-5, Kansas ½, Nebraska Territory 3⅓.

Flaxseed.—Increase over 1863—Maine 1 1-15, New Hampshire 1⅓, Vermont 1½, Rhode Island 1, Connecticut 3½, New Jersey 14⅔, Pennsylvania 4, Maryland 1¼, Delaware 1½, Kentucky 2½, Ohio 2 5-12, Michigan 1 1-7, Indiana 1 7-19, Illinois 1 1-5, Missouri 3 4-7, Wisconsin 3 3-5, Iowa 3-5, Kansas 1⅔, West Virginia 4. Decrease of the same—New York ⅓, Minnesota 1⅓.

Lint.—Increase over 1863—Maine 1 1-5, New Hampshire 2, Vermont ½, Connecticut 3, New Jersey 2, Pennsylvania 3 8-9, Maryland 1, Delaware 2, Kentucky, 1⅔, Ohio 2-12, Michigan 1½, Indiana 5-6, Illinois 1, Missouri 2 3-7, West Virginia 4 2-5. Decrease of the same—New York ½, Wisconsin ¾, Iowa ¾, Minnesota 2½, Kansas 3.

Cotton.—Increase over crop of 1862—Maryland 20, Kentucky 5¼, Ohio 1, Illinois 4, Missouri 2¼, Iowa 6, Kansas 1 1-6, West Virginia 5. Decrease of the same—Delawar e 2, Indiana 2.

Root Crop.—Increase over crops of 1862—Vermont ½, Connecticut 2⅔, Delaware ½, Illinois 0, West Virginia 1½. Decrease of the same—Maine 2, New Hampshire 2¾, Massachusetts 8-9, Rhode Island 2, New York 1 5-6, New Jersey 4-5, Pennsylvania 2 6-17, Maryland 5 6 Kentucky 2, Ohio ⅔, Missouri 2½, Indiana ½, Missouri 4⅛, Wisconsin 2¾, Iowa 1 2-5, Minnesota 2½, Kansas 3 5-7, Nebraska Territory 4⅓.

Fattening Hogs.—Increase of number over 1863—none. Decrease of the same—Maine 2 3-5, New Hampshire 1 4-5, Vermont 1 5-6, Massachusetts 2 2-7, Rhode Island 3, Connecticut 2, New York 1½, New Jersey 1⅝, Pennsylvania 2⅓, Maryland 2, Delaware 2, Kentucky 3 8-11, Ohio 2¾, Michigan 2⅔ Indiana 3, Illinois 3, Missouri 3, Wisconsin 3⅝, Iowa 1¾, Minnesota 2¼, Kansas 2½, Nebraska Territory 2, West Virginia 2½.

Fattening Cattle.—Increase of number over 1863—Minnesota ¾, Kansas 2⅞. Decrease of same—Maine 3⅛, New Hampshire 2, Vermont 1⅔, Massachusett 2 2-7, Rhode Island 3½, Connecticut 1 3-5, New York 2 1-5, New Jersey 1½, Pennsylvania 1¼, Maryland 3¼, Delaware 3⅓, Kentucky 1, Ohio 2⅔, Michigan 2⅛, Indiana 2⅓, Illinois 2, Missouri 2⅝, Wisconsin 1 5-7, Iowa 1½, Nebraska Territory 2¾, West Virginia 2 2-5.

Old Wheat.—Decrease on hand compared with Sept. 1863—Maine 3½, New Hampshire 2 5-6, Vermont 2½, Massachusetts 2, Connecticut 6, New York 3½, New Jersey 1 2-5, Pennsylvania 3, Maryland 3 4-7, Delaware 2, Kentucky 2 7-9, Ohio 2¾, Michigan 2½, Indiana 2¼, Illinois 4, Missouri 2 2-5, Wisconsin 2 5-7, Iowa 4, Minnesota 3¼, Kansas 3-5, Nebraska Territory 5, West Virginia 2 4-5.

Increase in quality over crop of 1863—Maine 2-5, Vermont 4, Massachusetts 1 2-3, Connecticut 2, New Jersey 1-9, Maryland 1 5-8, Delaware 5, Kentucky 1-7 Michigan 1¼, Indiana 2¼, Illinois 1 1-4, Missouri 2 4-7, Iowa ⅛, Minnesota 5-6, Kansas ¾, Nebraska Territory 3½.

Decrease in same—New Hampshire ⅗, New York ¼, Pennsylvania ⅛, Ohio 4-5, Wisconsin 1, West Virginia ¾.

Drafts drawn by Officers of Railroad Corporations in such capacity.—Powers of Corporations to give Notes or Drafts in Payment of Debts, and to make Indorsements. Usage.

The two cases of Olcott against the Tioga Railroad Company were appeals from judgments entered upon the reports of a referee in said actions.

Action No. 1, was brought to recover against the defendant, as drawer of a draft upon, and accepted by Hiram W. Bostwick, Treasurer of the Tioga Coal, Iron, Mining and Manufacturing Company. Action No. 2, was brought to recover against the defendant as indorser of eight promissory notes made by the Arbon Coal Company in 1841, in the aggregate amounting to $21,000. The draft and notes had been assigned to the plaintiff.

The referee reported in favor of the plaintiff, for the full amount claimed in each action, less an amount realized upon a sale of certain chattles embraced in a mortgage from the Arbon Coal Company to Morris Ketchum, in trust for creditors. The drafts and notes in suit were among the debts thus secured.

The actions were tried together, and the evidence in action No. 1 was by stipulation regarded as taken in case No. 2. In action No. 1, at the close of the evidence on the part of the plaintiff, a motion was made to dismiss the complaint; and the grounds of that motion present the defendant's objection to a recovery upon the draft. They were as follows: 1. The draft is not the obligation of the Tioga Navigation Company, but of Wilson. 2. Wilson had no power to bind the company by this draft. 3. The plaintiff has failed to show that payment of the draft was legally demanded, or that protest for non-payment was legally made, for the reasons stated in the objections to the certificate of protest before made. Also for the additional reason that said James R. Wilson at the time of the giving of the draft mentioned in the complaint, was not president of the company, because the term for which he was elected had previously on the first day of January, 1840, expired, and no meeting of stockholders, nor any meeting of managers of said company were held between 1839 and 1844, at which he was, or could have been elected president in accordance with the charter, or by laws of the company, or otherwise lawfully. And also, because he was at the time of giving the said draft, disqualified under acts of the legislature of Pennsylvania, particularly § 3 of the act of 7th of February, 1838, § 5 of the act of 20th February, 1826, given in evidence by the plaintiff, from being president of said company, by reason of his having ceased to be a resident of Pennsylvania and become a resident of Albany, in the State of New York; and because that notice of non-payment of said draft, alleged to have been received by said Wilson, at Albany, was nugatory so far as the defendant was concerned, he having ceased to be president of the company, or a resident of the State of Pennsylvania, and having no capacity to receive notice to affect or charge said company. 4. That the act of Wilson in drawing the draft, was not authorized by the company, in the first

instance, or subsequently ratified by it in any manner; and, moreover, was in contravention of the act of incorporation and supplementary act, and the by laws of the company, with notice of which, the payers of said draft, being stockholders of said company, were chargeable. 5. That the alleged contract with Rogers, Ketchum and Grosvenor, was the contract of Wilson and Bostwick, individually, and that the undertaking to give or draw the draft therein mentioned, was the individual engagement of Wilson, not binding on the company. 6. So far as Wilson undertook to bind the company for the purpose of a locomotive for the joint account of the Tioga Navigation Company, and the Tioga Coal, Iron, Mining and Manufacturing Company, and to pay therefor by drawing a draft for the price, he acted without authority, and did not bind the Tioga Navigation Company. 7. It did not appear that when the draft was drawn the Tioga Navigation Company existed as a corporation. 8. That the demand in suit was barred by the statute of limitations. 9. The legal presumption was that the draft had been paid. The referee denied the motion, and the defendants' counsel excepted.

Similar objections were raised in action No. 2, and also overruled.

Johnson, J.—The referee has found, as matter of fact from the evidence before him, that the draft in question, in action designated No. 1, was drawn for the defendant by James R. Wilson, who was then its president in his official capacity, and was used in the purchase of a locomotive engine for the defendant, who took and owned the same and used it upon its road with full knowledge on the part of its officers and managers of the manner of its purchase; and that the defendant had ratified and continued the act of the purchase, and that of making the draft on its account and behalf.

In regard to the notes, in the action designated No. 2, the referee finds that they were all made and taken on account of a then existing indebtedness from the maker, the Arbon Coal Company to the defendant; and that they were used, after being indorsed by the defendant, to borrow and raise money for the purpose of paying its own debts; and that the defendant was in no respect an accommodation indorser.

It is claimed on the part of the defendant, that the referee should have found the other way, and that the evidence before him does not warrant this finding of facts. But it seems to me that it would have been far more difficult to vindicate the finding had it been the other way. The facts as found, are in accordance with the testimony of two witnesses, each of whom was in a situation to know how the fact was, and each of whom testifies, unreservedly and unqualifiedly, and there is no witness and no evidence as far as I can see to show a contrary state of facts. The statement made by the witness Wilson, as treasurer of the Arbon Coal Company, nearly two years afterwards, relied upon apparently with so much confidence by the defendant's counsel, is at best but impeaching evidence, and proves nothing of itself one way or the other. Upon its face it appears somewhat inconsistent with the witness' testimony, but he undertook to explain the inconsistency and did so, it would seem, to the satisfaction of the referee. But whether he did so or not, his evidence upon the main facts is corroborated fully by the testimony of the witness Bostwick, and I do not see how the referee could well have rejected the testimony of both, as of no weight, without anything in the shape of affirmative testimony in the counter balance. In short, there is no ground upon which this Court can, according to well established rules, interfere with the finding of the referee as to the facts from the evidence before him. The referee also finds that Wilson, as president, had authority to make drafts and indorse notes for such purposes.

As matter of law it is claimed, on the part of the defendant, that the draft in action No 1, is not the draft of the defendant, but that of Wilson individually. The referee held that it was the draft of the defendant, and in this I think he was clearly correct. It is dated at the defendant's principal office, in Philadelphia, signed by "James R. Wilson, President T. N. Co.," directed to and accepted by "Hiram H. Bostwick, Treasurer Tioga Coal, Iron, Mining and Manufacturing Co.," and upon its face contains the direction to "charge to motive power and account." It thus appears plainly, as I think, upon the face of the instrument, that it is and was intended to be the draft of the defendant, and not of the individual who drew and signed it. (Bank of Genesee *vs.* Patchin Bank, 19 N. Y. Rep., 312. Babcock *vs.* Beman, 1 Kern., 200. Choteau *vs.* Suydam, 21 N. Y. Rep., 179. Dewitt *vs.* Walton, 5 Seld., 571. Many *vs.* Beekman Iron Company, 9 Paige, 188.)

In addition to this, the evidence in the case shows affirmatively and conclusively, that the draft was in fact the authorized obligation of the company.

That the defendant has power to give a valid note or draft in payment of a debt, or in the purchase of property for legitimate use, has been settled not only in this Court, but in the Court of Appeals, in the case of *Mallory* against this defendant, our decision having, as it is understood, been affirmed in that Court.

The indorsements upon the several notes, in action No. 2, purport upon their face to have been made by the defendant, and are proved to have been made by its authorized agent or officer. Having been used to borrow money to pay debts, of course the defendant is bound if it has been properly charged by demand and notice.

Certainly if the defendant can make a valid note or draft, to turn out in payment of a debt, it can make a valid indorsement upon the notes of others which it has received in the course of its business for the same purpose.

As to the authority of Wilson, as president of the defendant, to bind it by such instruments for such purposes, the question upon the evidence is too plain for argument. Even if he had not the necessary authority, originally, his long and uniform exercise of it, without objection or dissent from any one interested, would be sufficient when his acts are within the scope of the powers of the body represented. (Conover *vs.* Mu. Ins. Co., of Albany, 1 Comst., 290.)

Judgment affirmed.

☞ Sixty-three thousand three hundred and twenty-three hogsheads of leaf tobacco were sold in Louisville in the twelve months ending Nov. 1, 1864.

Wealth of Massachusetts.

The following important statistics of the valuation of Massachusetts, for the year 1864, are from the office of the Secretary of State, as made up from the returns of assessors:

Total number of polls in 1864	281,220
" " " 1863	275,758
Total value of personal estate in 1864	$324,584,847
" " " 1863	348,500,267

This shows an apparent decline in personal estate in 1864, which is explained by the fact that property in corporation heretofore taxed to individuals is now taxed to the corporation. This would add thirty millions to the amount in 1864.

Total value of real estate in 1864	$577,298,256
" " " 1863	553,650,716
Total valuation in 1864	901,883,103
" " 1863	897,150,983
Total tax for State county, city and town purposes, including the highway tax in 1864	12,876,850
Do. in 1863	10,599,097
Total number of dwelling-houses in 1864	185,232
Do. in 1863	183,528
Total number of horses in 1864	91,862
Do. in 1863	89,228
Total number of cows in 1864	155,043
Do. in 1863	158,906
Total number of sheep in 1864	169,513
Do. in 1863	150,922
Total number of acres of land taxed in 1864	4,410,805
Do. in 1863	4,383,108

This is a pretty good exhibit for a time of war. It shows an increase of polls; of the value of personal and real property; of dwellings; of horses; of sheep, and the number of acres of land taxed. There is a decrease of the number of cows of over three thousand.

The amount of State, county and town taxation has increased this year $2,297,753 37.

The total tax on polls in 1864	$574,274 11
" " " 1863	567,360 86

Connellsville and Southern Pennsylvania Railroad.

The books for subscription to the capital stock of this company were recently opened at Bedford, Pa., and the sum of $5,120,000 taken, thus insuring its prompt commencement. At a meeting of the stockholders held at the office of the Pennsylvania Railroad Company, on the 10th inst., the company was organized by the election of a board of directors, with John A. Wright as president. A corps of engineers will be put upon the route immediately, and the line surveyed and located at the earliest practicable period. The eastern and western ends of this road through the southern counties already exist, in the Cumberland Valley line to Chambersburg and the Pittsburg and Connellsville road to Connellsville. The intervening division will be built by the new company.

MINING STOCKS—GOLD, SILVER, COPPER, IRON, LEAD, ETC.

American Railroad Journal.

Saturday, November 19, 1864.

Stock Exchange and Money Market.

In a recent speech of the late Secretary of the Treasury delivered in the city of St. Louis, that gentleman gave his auditory a brief exposition of greenbacks, and his own policy with regard to their issue and their relations of value to the other currency of the country. Our readers will have noticed that from time to time we have given the late Secretary our cordial support to that part of his system which gave us for the first time a National currency, and which was a necessity of the occasion for which no other plan could have been substituted with the least hope of success. It was indispensable for the safety of the country and the preservation of the National life that money in very large amounts should be had on the asking, to prevent the success of the insurgents who had the immense advantage as it appeared at the time, of having on hand cotton enough to secure the payment of any debts they chose to contract, being an article with a universal market, and without which the world could scarcely get on. It was necessary for the loyal States to equip fleets and raise armies on a vast scale without delay, to cope with an enemy long in preparation for its revolt, and the money had to be forthcoming at once, for delay might be ruin. It was at this moment there was but this alternative, to borrow money wherever it could be had at any price, or to assume the sovereign power of the Nation to create its own money and make use of that. On the first of January, 1860, as appears by official returns, the circulation of all the banks in the country was $207,000,000, all they could find room for with safety or profit, and to redeem this they had but $83,000,000 of specie in their vaults. None but an insane man, none but the stupidest of Secretaries would have looked to any such limited and uncertain source as this to carry on a great war. It was madness to think of it. Mr. Chase with a grasp of mind equal to the greatness of the crisis took the only true course, to borrow of the people on their own obligations based on their indisputable ability and resources to meet these National engagements. This was the origin of what is called a greenback, the most popular form of currency we have ever had. But let him speak for himself. In a late address to the people of St. Louis he said:

I have been called the father of greenbacks. *You* are the fathers of greenbacks. What is a greenback? Why, it is simply the credit of this great American people put in the form of money, to circulate among the very people whose credit makes it worth anything. When I was Secretary of the Treasury, the question arose, how should these vast armies and navies be supplied? How should the boys be fed in the field, the sailors in ships, and provision made for their support, their clothing, their food and transportation? I found the banks of the country had suspended specie payment. What was I to do? The banks wanted me to borrow their credit or pay them interest in gold upon their credit. They did not pay any gold, or propose to pay any themselves, but they wanted me *to borrow their notes.* I said, 'No gentlemen, this great American people is worth all of you put together, and I will take the credit of these people and cut it up in the form of little bits of paper, and we will circulate that paper, and we will receive that paper for bonds, upon which we will punctually pay the interest in gold, and then, in order that the national currency might be permanent and that nobody could have just cause to complain, I called the national banking system into existence, and pledged every bank to redeem its currency in greenbacks, and the Government pledged that every dollar should be redeemed in the end—the securities to be pledged and provided—that in the end everything should be made equivalent to gold.'

"This is the true idea of a greenback. It is the credit and property of the American people; made to serve the purpose of money in the midst of a great strife, when we must have everything we can get. And fellow citizens, in my humble judgment, if out of this war this national currency comes as is provided for in our platform, so that no Western farmer or merchant will be obliged to pay any tribute to the East in his exchange, [applause] so that we shall not lose upon exchange so large a profit upon our industry; so that the laborer receiving his dollar or two dollars, or a dozen dollars, at the night or week's end, shall be perfectly sure that it will not turn to dust and ashes before the morning sun rises. I say if we can get such a sound currency as this,

then this country will not, at least, have been without one of the collateral benefits of this war; if you can take your money on the Atlantic, and go to the Pacific, and pay your bills all the way, without having to change the currency at every tavern you stop at. * * I say if the Government is administered as it should be, with proper vigor and economy every dollar in greenbacks will be as good as a dollar in gold. Why, eight months ago, if I could have met with the assurance that I would not have been troubled with any other issues—if I could have been assured that there should be no trouble from any unauthorized currency, unauthorized by any but the nation itself I would have undertaken to resume specie payments in a week, if anybody wanted it, and I say, now, if the war is prosecuted as it ought to be, and the Government is administered with the economy and prudence that I trust it will be, then there is no more danger of that currency than there is that the American people will fail."

Now it has been too much the practice of a large class of writers, even those friendly to the Government, to keep up a constant fire on the Treasury department for the issue and use of this currency, and to attribute the price of gold to this as the chief cause of the high rates it brings in paper.

We have taken we think a juster view of the subject. We have all along contended, and still contend that the inflation is much more fairly chargeable to the local banks themselves. We have in many previous articles shown how vastly disproportionate the issues of the New England, Pennsylvania and the Western State banks have been to their specie not only, but their capital. Yet these commercial writers never think of censuring these banks, nor do they perceive that their inflation is not only one of their own currency, but of everything else they can pass as money. We may safely say that most of them have loaned their capital stock, their bills, and their deposits, and have nothing to fall back on but very limited sums of specie, and assets which if this day were to be suddenly converted into gold, would leave them bankrupts by hundreds of millions. These very banks would in fact be bankrupt to-day, if it were not for the legal tenders, the very currency they are continually assailing, and of which they could not now obtain enough to redeem their own circulation if they tried the experiment.

It is well known in this very city where the local banks have made the greatest outcries against the Government issues, they have had frequently to ask delay from their customers, being unable to redeem their bills and deposits even in legal tenders.

So that if the policy of these banks had been adopted by Mr. Chase, all these miserable results would have surely followed. 1st. If the Government had sold its stocks in the market for what they would bring, they would have been sold far below par, and would not after all been paid in gold, for there was not a hundred millions in the power of all the banks together.

Next, the Government would have been paid in notes, which could not have been redeemed in specie, would not have been current beyond the localities where they were issued, would not have been acceptable to our army or navy, or to contractors, would have been transferable only at a heavy discount for other paper current at the place where it was disbursed, which was no better in fact, and would have cost the Government a large sum in interest, for their use, though absolutely of no real tangible value.

Beyond all question, therefore, the policy of the Treasury was the very best the time or the circumstances permitted, and if it had taken the other course the people would have had to pay 6, and even a higher interest to these suspended banks for the use of their paper which they could not redeem!

We go further, we say, that but for the existence of these so much abused greenbacks, abused only by the ignorant and unreflecting class of people we have alluded to, the banks in the loyal States would at this day have ceased to exist. They could not, and now cannot redeem their bills in coin as they have promised to do. Their only escape would have been the passage of relief and stay laws, entirely unconstitutional, and these have in the end proved but a temporary support. Now there being a legal tender currency, they can turn to that and so escape the stringency of those State laws, which if put into effect would break the whole of them. They could well afford to go on their knees and ask pardon for their abuse of the system, which has not only saved the country but *saved them.*

If by an act of Congress the legal tenders should be declared legal tenders no longer after the 1st of January, as many writers would recommend, but that after that period they would only be received as payment of a new public security, the banks would go down with a general crash; for it would be impossible to redeem their circulation in specie, and the legal tenders would no longer be within their reach. On the contrary, whenever the Government is able to redeem its legal tenders in gold, or receive them as gold at the Custom House, the banks will owe their salvation to the amounts they may happen to have accumulated.

Again it would be far better for the Country to have the Bank circulation now nearly as large as that of the Government currency, entirely withdrawn and cancelled, and retain the legal tenders. This would give us a truly uniform currency of positive value, such as the Banks can never give.

We therefore conclude that this clamor against the Treasury would be better turned against the Banks, who in 1862, by our latest official report on this subject, had loaned and discounted to make money for themselves and not to help the war, the enormous sum of $606,688,715, a larger sum by a hundred and fifty millions or thereabouts than the Government has inflated the country with in the shape of legal tenders. Not one word of censure for these institutions! No fears for them on the part of the sympathizers and patriots who can see and favor only one side of the question, and that is secession, when in truth the war, and the cause, and the local Banks themselves owe their present hopeful appearance to those very despised greenbacks. We speak strongly on this subject. We admit inflation and its injurious effects, but we lay it mainly to the charge of our old banking system, and to the immense spread of their business, without a single other motive than to make money. They are to blame and not the Government who did right to use its own credit, rather than pay for the use of that of suspended and doubtful banks, and by doing so have passed the crisis safely, and will come out stronger and more splendidly than they could have, by any other course.

The Stock Market has continued to wear a quiet aspect with but little tendency to change. The Railways are not making as large gains as usual, some of them even among the most prosperous, not earning enough to make much more than the interest on their bonded indebtedness, at least such are the statements in quarters likely to be well informed. The enormous prices they are compelled to pay for wages, materials, labor, &c., making a sensible difference in their footings.

Governments on the contrary have been firm, and with a tendency to rise as will be seen by our report in another place. There has been considerable speculation in the 7-30s under the impression that they would in some way or other be yet receivable for dues at the Custom House, but we believe there is neither authority for such expectation, nor a disposition in the Treasury department to change their present well understood character.

Gold opened on Thursday at 229, fell to 218¼, and closed at 221⅝.

It is understood that some of the heaviest operators have been caught within the last week, and have been unable to respond to their contracts. It is very expensive business to carry gold just now, and those parties who undertake to do it for their customers, show them little mercy when these get into a corner. The disputes which are continually going on between outside operators and their brokers about margins, sharp practice, and fictitious accounts of sales are of constant occurrence, and now and then become public through the courts of law. It is supposed that the Government will no longer offer any gold bearing securities, as there is no further occasion for them, and it is the part of prudence not to rely on the customs receipts for gold beyond a certain limit. And though there is a large surplus on hand, it is thought best not to calculate on a prospective increase beyond the average of the receipts of the two last years. The recent Presidental election has had a prodigious influence on the mind of the people of the Country, showing them they were more united and more decided than they themselves supposed. It is a positive and final decision that the Union is to be preserved at all hazards, and that all our means and power are to be used for the maintenance of our institution, and the performance of our obligations.

This will be equally apparent in Europe, and also have an immense effect on its future treatment of the American question, and give animation to the further inquiry after American securities. Our foreign relations must hereafter assume a much more friendly aspect.

We have not yet observed any attempt to disturb the market with the idea of difficulties with Brazil on account of the capture of the Florida. We do not think there will be any, for the Secretary of State has the credit of being very adroit in the arrangement of all such matters. If our Government chooses to defend the capture of the Pirate, it has only to plead the example of England in many memorable instances, and to repeated declarations that it would not respect neutrality if it became dangerous to herself. Money is reported to be easy, so easy that the Government is urged to come out with another loan.

The financial crisis in England is evidently not

yet over. The failures continue on a large scale and gold is higher in London than in the French Capital and commercial cities of Germany. Bank interest also keeps up to 9 per cent. It is also conceded that there will be a large surplus of cotton on hand the present year, so much so that the price must decline. This apprehension affects the credit of a large number of foreign houses which have thus far been able to maintain themselves.

The exports from New York for the week ending November 14, were $3,929,161 against $2,311,932 in 1863, and $3,780,451 in 1862. The shipments of specie since January 1, have been $40,953,852. The exports since January 1, have been $188,949,822 against $151,324,367, in 1863, an increase of $37,625,455. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to November 12, was $61,521,227.

The value of foreign goods imported into the port of Boston for the week ending November 11, was $257,435, against $641,976 for the corresponding week in 1863. The exports were $567,389 against $275,197 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $204,681.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York State 6s, 1877, 119; North Carolina 6s, 58; Illinois coupon bonds, 1877, 101½; Ohio 6s, 1881, 107; Milwaukee and St. Paul 1st mort., 93⅞; Mariposa 1st mort., 96; Second Avenue R. Interesting and Important Decision.

The case of Mr. Hamilton E. Towle *vs.* The Steamship Great Eastern, was decided a few days since in the United States District Court in this city by Justice Shipman, who awarded the plaintiff $15,000 for his services in saving that vessel while at sea in a storm with her rudder disabled, and in danger of a total loss. We shall take an early opportunity of publishing the opinion in the case as it has appeared in some of the daily newspapers, since it affords another striking instance of the skill of our American engineers, and the fertility of their genius in cases of difficulty and danger.

What gives particular interest to the transaction is the fact, that an unhandsome attempt was made to deprive Mr. Towle of the honor of his success, and although the grateful passengers on board at once presented him with a very valuable gold chronometer, neither the captain of the ship or his owners were willing to admit that it was saved by his exertions. The regular engineers on board were totally unable to do anything of an effective charater, but were actually proceeding to perform an operation which would have sent the rudder to the bottom of the ocean. Mr. Towle prevented this by a timely admonition of the danger, and when reluctantly permitted to try his own method fully attained his purpose, and the ship was saved. The lucid exposition of the case by Justice Shipman is another evidence of the great learning and ability for which our admiralty Courts are already distinguished.

☞ We publish elsewhere the business card of Messrs. Betts & Denslow, Bankers and Brokers, No. 24 William street. We have been referred to their friends, A. B. Baylis, Whitehouse, Morrison & Co., W. B. Clerke, and C. A. Meigs & Son, as to their standing and character, and we learn on inquiry that they have every claim to that full share of business which talent, experience and capital deserve.

☞ The Adirondac Company invite proposals for $1,000,000 seven per cent. mortgage bonds. Bids will be received until the 30th inst. The office of the company is at 18 William street.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of October, compared with the same period last year, were as follows, viz:

	1864.	1863.
Freight	$418,088 93	$324,334 67
Passengers	315,302 76	162,422 01
Express matter	5,200 20	2,700 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	5,360 00	1,449 41
Total	$758,860 02	$505,814 42
Increase		$253,045 60
From Jan. 1 to Oct. 31	$5,592,378 43	$4,178,992 45

The traffic receipts of the European and North American Railway for the month of Oct., 1864, compared with the corresponding month last year, is as follows:

	1864.	1863.
Passengers	$5,924 36	$6,135 34
Freight	6,104 69	6,827 95
Mails and Sundries	816 00	496 90
Total	$12,845 05	$13,460 19
Decrease		$615 14

The earnings of the Dubuque and Sioux City Railroad Company for the month of Oct., 1864, were $46,714 46
Corresponding month of previous year 39,493 62
Increase $7,220 84

The earnings from Jan. 1 to Oct. 31, 1864, inclusive, were $299,755 38; same period, 1863, $212,948 56; increase, $86,806 82.

The earnings of the New Brunswick and Canada Railway for the month of October were $3,850 97
Corresponding month of 1863 4,588 96
Decrease $737 99

The earnings of the Cleveland and Pittsburg Railroad for the month of October were $248,292
Corresponding month of 1863 180,246
Increase $68,046

The earnings of the Erie Railway for the month of Oct., 1864, were $1,202,568 84
Corresponding month last year 965,294 61
Increase $237,274 23

The business of the Illinois Central Railroad for the month of October, 1864:

LAND DEPARTMENT.

Acres construction lands sold	13,283.88 for	$154,263 85
Acres Interest Fund Land sold	764.06 "	11,025 26
Acres Free Lands sold	3,108.61 "	40,096 88
Total sales during month of Oct. 1864	17,156.55 for	$205,385 99
To which add town lot sales		2,359 45
Total of all		$207,745 44
Acres sold since Jan. 1, 1864	231,803.81 for	$2,507,830.68
Cash collected in October		$253,194 69

TRAFFIC DEPARTMENT.

Receipts from passengers	$239,158 18
" freight	408,782 62
" mails	6,358 33
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in month of Oct., 1864	$664,299 13
Total receipts in month of Oct., 1863	496,433 51
Increase	$167,865 62

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of October, 1864, were $178,526 07
Corresponding month of previous year 205,054 57
Decrease $26,528 50

Railroad Earnings--Weekly.

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the week ending November 7:

	1863.	1864.
Passengers	$30,771 69	$48,383 75
Freight	69,403 85	114,252 01
Express	998 38	1,433 66
Mail	1,286 12	1,405 62
Total	$102,460 04	165,475 04
Increase 61-50 per cent		$63,015 00

The earnings of the Chicago and Northwestern Railway from June 1st to Nov., 7th, (5 months and 1 week) in 1863 and 1864 were:

	1863.	1864.
Passenger	$561,633 77	$917,745 43
Freight	1,440,602 13	2,114,836 99
Express	26,249 11	82,163 93
Mail	20,966 22	29,550 40
Miscellaneous	20,920 89	14,658 44
Total	$2,070,871 62	$3,108,955 19
Increase 50.16 per cent		$1,038,583 57

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Oct. 31, 1864, were:

	1864.	1863.
Passengers	$4,095 03	$2,947 03
Freight	16,062 56	12,588 16
Express	104 16	75 00
Mails	296 58	296 58
Total	$20,558 60	$15,906 77

Receipts from January 1st to Oct. 31:

1864	$485,941 39
1863	337,203 55
Increase	$148,737 84

The earnings of the Chicago and Alton Railroad Company for the week ending Nov. 7, were:

	1864.	1863.
Passengers	$24,211 14	$13,970 65
Freight	43,066 86	19,718 26
Sundries	1,374 00	1,694 62
Total	$68,652 00	$35,383 53
Increase 1864		$32,268 47

The traffic of the Great Western Railroad for the week ending Nov. 4, 1864, was as follows:

Passengers	$27,696 14
Freight and live stock	30,128 12
Mails and sundries	1,343 18
Total	$59,167 39
Corresponding week of 1863	63,518 64
Decrease	$4,351 25

The earnings of the Grand Trunk Railway for the week ending Nov. 5, 1864, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$43,971 00
Express, freight, mails and sundries	3,124 00
Freight and live stock	69,755 00
Total	$116,850 00
Corresponding week, 1863	114,978 00
Increase	$1,872 00

The earnings of the Marietta and Cincinnati Railroad for the 1st week in November:

	1864.	1863.
Passengers	$8,135 80	$4,363 25
Freight	11,621 96	13,503 12
Mail, express & telegraph	1,084 48	872 00
Total	$20,842 24	$18,788 27
Total since Jan. 1	$848,792 34	$583,336 73

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week of November, 1864, were $94,935 00
Corresponding week of previous year 81,200 00
Increase $13,735 00

The earnings of the Michigan Central Railroad for the 1st week in Nov., 1864, were $87,479 00
Corresponding week of previous year 81,653 00
Increase $5,826 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in November, 1864, were $96,359 00
Corresponding week of previous year 45,753 00
Increase $50,606 00

The earnings of the Cleveland and Toledo Railroad for the 1st week in Nov. were $41,941 00
Corresponding week of previous year 32,829 00
Increase $9,112 00

Atlantic and Great Western Railway.

The following is the traffic of the Atlantic and Great Western Railway since Jan. 1, 322 miles being opened:

	Passengers, &c.	Freight.	Total.
January	$38,615	$168,683	$207,298
February	50,189	178,852	229,041
March	60,518	166,215	226,733
April	63,992	133,275	197,267
May	57,193	157,486	214,679
June	73,654	240,867	314,521
July	82,665	249,433	332,098
August	95,077	310,999	406,076
September	135,502	310,542	446,044
October	103,121	288,726	396,847
Total	$760,526	$2,205,078	$2,970,604

The Validity of Legal Tender Notes.—Ground Rents not a Debt.

We give below a decision recently rendered in the U. S. Circuit Court, Philadelphia, by Judge Grier, in the case of the Philadelphia and Reading Railroad Company *vs.* Charles Moulson *et al*, which was before the Court in the shape of a bill in equity, to compel the defendant to accept, in extinguishment of the principal of certain ground rents, to the amount of $300,000, the legal tender notes of the United States. The case was argued a few days since, and Judge Grier decided that the defendants cannot be compelled to accept the legal tender notes for the reason that a ground rent is not of the nature of a debt. Judge Grier's decision affects more a State law of Pennsylvania, regulating what are properly debts and what are not, than the validity of Treasury notes as a legal tender. It is in fact but a re-affirmation of a former decision, which declares that "a rent service is not a debt;" and if the offer to extinguish the defendant's claim to the premises had been made in gold instead of Treasury notes, Judge Grier would no doubt have decided in the same way. The decision was that no debt existed according to the laws of Pennsylvania, as the only debt contracted was the rent of premises. The validity of legal tender notes in payment of

debts between individuals is in no way affected by the decision. Judge Grier says:

Coined money in modern times forms but a very small portion of the current money used in commercial transactions. Paper money, representing credit, has long been used as current and lawful money. But no one could be compelled to accept the promise of a bank to pay money instead of the coin itself. The notes of the United States, issued under the authority of the Government, were current money, because issued by such authority, but were never made a legal tender for the payment of debt.

A contract made in the United States for the payment of a certain number of dollars would be construed as meaning, not Prussian dollars, or Spanish milled dollars, but lawful coin of the United States. The addition of the description "lawful money of the United States" is entirely superfluous, and does not change the nature of the obligation.

The statutes of Congress always make a legal distinction between lawful or current money and that which shall be a tender for payment of debts. Hence we find that when such is the intention, the language is, "And shall be a legal tender," &c.

Some coins of the Government are a legal tender below a certain amount, but not beyond. Thus, by the act of the 9th of February, 1793, after the expiration of three years, all foreign coins, except Spanish milled dollars, shall cease to be a legal tender.

By act of April, 1806, "Foreign gold and silver coins shall pass current as money within the United States, and be a legal tender for the payment of all debts, &c., at the several and respective rates following," &c.

Again, by act of the 28th of June, 1834, "The following gold coins shall pass as current money, and be receivable in all payments by weight at the following rates," &c.

Hence we find that in all cases where other money than the coinage of the United States ordered to be received as current or lawful money, the statute carefully provides the rate and conditions under which they are made a legal tender for payment of debts. It is clear, therefore, that Congress has always observed the distinction between current and lawful money, which may be received in payment of debts, if the creditor sees fit to accept it, and that which he may be compelled to accept as a legal tender.

It is clear, also, that if Congress make any other thing than their own coin a legal tender, it may be used as such. Thus, in the act authorizing the national banks, their notes are made a legal tender for certain debts due to the Government, for taxes, &c., but not for debts due from one citizen to another.

The Treasury notes are made lawful or current money, "and a legal tender for debts," &c., as between individuals. As this is the first act in which this high prerogative of sovereignty has been exercised, it should be construed strictly. It is doubtful in policy and dangerous as a precedent.

The only question, then is, whether this case comes within the letter of the statute.

Is the money which may be paid to extinguish a ground rent within the category of the act?

Is it a debt? The owner of the land is not bound to pay it. The owner of the rent cannot compel him to pay it. There is no obligation as between the parties. It cannot be converted into an obligation by the election of one of the parties without the consent of the other. A man may execute his bond to me voluntarily, but unless I accept it he does not become my debtor.

These ground rents, in the nature of a rent service, are somewhat peculiar to Pennsylvania, and little known in other States. But the Supreme Court of the State has clearly settled and determined their nature. The cases are too well known to the legal profession to need a quotation. "A rent service (says the Court in Bosler *vs.* Kilhn, 8 Watts & Sergeant, 186) is not a debt, and a covenant to pay it is not a covenant to pay a debt. The annual payments spring into existence, and for the first time become debts when they are demandable."

I am of the opinion, therefore, that the tender offered by the bill in this case is not authorized by the State, and that the respondents cannot be compelled to extinguish their estate in the land by such a tender as that now made. The bill must, therefore, be dismissed.

Nova Scotia Gold Mines.

The *Royal Gazette* contains a tabulated statement, showing the number of gold mines being worked, the number of men engaged in mining, the quantities of quartz raised and crushed, with the average yield of gold per ton, with the total production in the various districts for the quarter terminating Sept. 30 of the present year, complied from statistics received from the local commissioners.

STORMINT (ISAAC'S HARBOR).—In this district, in the month of September, there were 11 mines being worked; average number of men employed, 102; quartz crushed, 53 tons; total yield of gold, 99 ozs 17 dwts 6 grs.

WINE HARBOR.—Number of mines, 11; men employed, 75; quartz crushed, 199 tons; total yield, 220 ozs 10 dwts 15 grs.

SHERBROOKE.—Number of mines 15; men, 107; quartz crushed, 266 tons; yield 378 ozs 6 dwts 1 gr.

TANGIER.—Number of mines, 5; men, 59; quartz crushed 69 tons; yield 88 ozs 5 dwts 1 gr.

MONTAGUE.—Number of mines, 4; men, 45; quartz crushed 54 tons; yield 134 ozs 4 dwts 10 grs.

WAVERLEY.—Number of mines, 10; men, 278; quartz crushed, 937 tons; yield 855 ozs 3 dwts 3 grs.

OLDHAM.—Number of mines, 30; men, 80; quartz crushed 222 tons; yield 176 ozs 2 dwts 1 gr.

RENFREW.—Number of mines, 9; men, 40; quartz crushed, 91 tons; yield 111 ozs 19 dwts 0 grs.

The operations in the month of August, and July were much on the same scale, with similar general results.

RECAPITULATION.

Total yield of Gold for quarter ending Sept. 30, 1864.	5,395 oz	2 dwt	21 gr
Do corresp'd'g quarter 1863.	4,620 oz	2 dwt	2 gr
Do q'ter end'g June 30, 1864.	5,159 oz	8 dwt	8 gr
Do do Mar. 31, 1864.	4,010 oz	18 dwt	3 gr

The number of mines worked in the united districts in July was 97; in August 91, and in September 95.

The average number of men employed in the combined districts in July were 919; in August 786, and in September 836. The number of quartz mills in all the localities is 34; of which 22 are driven by steam, and the remainder by water power. The total yield of gold from the combinded districts in July was 1,445 ozs 18 dwts 7 grs; in August 1,874 ozs 12 dwts 22 grs; and in September 2,074 ozs 11 dwts 1 grain. The largest yield from a ton of quartz was obtained at Oldham in in the month of July, viz., 12 ozs 13 dwts 0 grains. The total quantity of quartz crushed in the combined districts was in July 1,501 tons; in August 2,013, and in September 1,894.—*Halifax Chronicle.*

☞ The authorized capital of all the railways in England, Scotland and Ireland, up to December 31st last, amounts to the sum of £474,999,545; and of this total as much as $404,215,802 has actually been paid up as capital, inclusive of debenture loans outstanding at that date. That is to say, in less than thirty years, a sum very nearly equal to one-half of the national debt of England, has been invested in that country in earthworks, rails, rolling-stock, and the other constituent elements of the vast aggregate known as railway property. The average net profit of the British railways is only four per cent.

New York Canals.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st of October, inclusive, during the years 1863 and 1864, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barl'y bu.
1863...	1,071,200	16,356,600	20,133,500	1,679,800
1864...	920,100	13,026,000	8,930,700	1,837,100
Dec ...	151,100	3,330,600	11,382,800	*157,300

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a deficiency equal to 817,120 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide water from the commencement of navigation, to and including the 31st of Oct., in the years indicated:

Canal opened—	1862. May 1.	1863. May 1.	1864. April 30.
Flour, bbls.....	1,201,200	1,071,200	920,100
Wheat, bu.....	26,282,600	16,356,600	13,026,000
Corn, bu.....	18,601,900	20,313,500	8,930,700
Barley, bu.....	1,101,900	1,679,800	1,837,100
Oats, bu.....	4,143,900	7,905,100	8,872,900
Rye, bu.....	729,800	353,700	503,200
Beef, bbls.....	12,400	10,000	6,900
Pork, bbls.....	167,200	228,300	56,500
Bacon, lbs.....	5,831,600	3,501,500	561,500
Butter, lbs.....	2,331,900	1,891,300	404,800
Lard, lbs.....	8,204,600	17,689,900	1,896,300
Cheese, lbs.....	3,190,500	5,250,800	1,393,600
Wool, lbs.....	1,697,100	253,200	1,101,700

Mt. Carmel and Lizzard Creek Railroad.

We learn from the Pottsville *Miners Journal*, that the subscription books are now open, and the Company has resolved to pay six per cent. interest to all stockholders from the time the money is paid in; that three persons have already subscribed $62,000 to the stock of the Company, and that there will be abundance of capital offered to make the road so soon as those interested in the coal regions it traverses, show by their subscriptions that they desire the road made.

Railway from Halifax to St. John.

It is understood that an English company have made an offer to the Government of Nova Scotia and New Brunswick to construct one hundred miles of railway, uniting the cities of St. John and Halifax, to form part of the Intercolonial Railway. The terms offered by Nova Scotia are 4 per cent. guaranteed on her portion of the road; by New Brunswick, $10,000 per mile. The offer of the company is understood to be most favorable.

Double Railway Track to Washington.

Of late considerable progress has been made in the construction of the double track of railway between Baltimore and Washington, and at the present time thirty-three miles have been completed. Within the past few weeks three additional miles have been laid between Baltimore and White Oak Bottom, and the entire work is expected to be completed about the 5th day of December.

Oil Creek Railroad.

The Oil Creek Railroad is now running regular trains to the Shaffer Farm, eight miles below Titusville. The road bed is graded over a mile beyond this point, and a large force of men is now employed in pushing it through to completion.—*Erie City Dispatch, November 5.*

☞ The following shows the movements of specie at New York during October:

Specie in banks and Sub-Treasury, October 1	$31,944,614
Received from California in October	855,378
Imported from foreign ports in October	129,775
Gathered in from hoards in October	3,522,321
Supply	$36,452,088
Exported	2,496,221
Leaves in banks and Sub-Treasury, November 1	$33,955,867

☞ The exports of treasure from San Francisco from January 1 to October 20, this year compare as follows with the shipments for same period in 1863:

Shipments since Jan. 1, 1864	$46,264,181
Corresponding period last year	36,831,533
Excess	$9,432,648

☞ The following table shows the coinage at the United States Mint in San Francisco during the third quarter (July, August and September) of 1864:

GOLD.

240,250 double eagles	$1,805,000
2,500 eagles	25,000
4,860 half eagles	24,300
247,016 pieces, valued at	$1,854,300

SILVER.

172,000 half dollars	$86,000
50,000 dimes	5,000
222,000 pieces valued at	$91,000
Total value gold bullion received and parted	$4,662,631
Total value silver bullion received and parted	108,948

☞ The Chicago and Northwestern Railway Company will pay 1st December a dividend of 3½ per cent. on their preferred stock.

Debt of Philadelphia.

The following statement shows the gradual increase of the debt of Philadelphia since 1860, the additions made to it since January, 1864, and the loans, &c., contemplated for the present year:

Amount of City debt, January 1, 1860	$20,913,505
Amount of City debt, January 1, 1861	20,982,409
Amount of City debt, January 1, 1862	21,576,851
Amount of City debt, January 1, 1863	24,029,755
Amount of City debt, January 1, 1864	$26,062,906
Deficiencies of 1863, as per report of City Controller	2,209,941
Bounty loan of February 18, 1864	1,250,000
Two millions appropriated for bounties, being excess over loan of	759,000
Appropriation for bounties for the 200,000 call	1,000,000
Appropriation for the purchase of League Island	340,000
Excess of the appropriations over revenue of March 31, 1864	2,480,780
Total authorized indebtedness	$34,093,627
Loan of Chestnut street bridge (reported)	80,000
Water loan (pending)	1,000,000
Gas loan (reported)	1,000,000
School loan (reported)	1,000,000
Required for families of volunteers	300,000
Purchase of ground at Fairmount	350,000
Estimated appropriations from March 31 to October 31	500,000
Total City debt at the close of 1864	$38,323,627

C. W. Betts. E. H. Denslow.

Betts & Denslow,

BANKERS and BROKERS,

No. 24 William Street,

NEW YORK.

Gold, Government Securities, State and Railroad Stocks and Bonds, bought and sold on Commission exclusively, at the NEW YORK STOCK EXCHANGE.

ADIRONDAC COMPANY,

Organized under special charter from State of N. Y.

Office No. 13 William St.,

NEW YORK.

$1,000,000

SEVEN PER CENT. MORTGAGE BONDS.

Proposals are invited for $1,000,000 of construction bonds of the Adirondac Company, bearing interest at seven per cent., payable semi-annually in the city of New York.

Twenty-five per cent. of the amount tendered for, to be payable on the acceptance of the bids, the remainder in three monthly installments of twenty-five per cent. each, or the whole may be paid for in one sum. Accrued interest on coupons will be charged, and interest allowed on payments.

Sealed proposals, marked "Bids for Construction Bonds," will be received until 30th day of November, A.D. 1864, at the office of the company, address to

G. T. M. DAVIS, President.

THE NEW YORK CENTRAL RAILROAD COMPANY, TREASURER'S OFFICE, ALBANY, Nov. 9, 1864.

THE ANNUAL ELECTION for DIRECTORS of this Company, and for three Inspectors of the next Election, will be held at the Office of the Company, in the Exchange, in the city of Albany, on the second Wednesday (the fourteenth,) of December next. The poll will be opened at eleven o'clock in the forenoon, and will continue open for two hours thereafter.

By order of the Board of Directors,

5t-46 ROBERT L. BANKS, Secretary.

WANTED

A gentleman with a capital of $25,000 to take an interest in a Car Manufacturing Establishment at New Haven, Ct. The business is already established, with a large capital invested, and in successful operation. Address this office, or box 2287 P. O., New Haven, Ct.

Fire Insurance on Favorable Terms.

Office, No. 74 Wall street, New York.

Ely Copper Mining Comp'y

CANADA EAST.

Office, 82 Broadway, N. Y.

Capital Stock, - - - - - - $500,000.

100,000 Shares—Par Value $5 each.

TRUSTEES.

JOHN E. BODY, President.
Stephen Hills, Jr., Wm. Barclay Parsons,
Geo. V. N. Baldwin, Edgar de Peyster,
ERNEST SACCHI, Secretary.

The Trustees offer for sale 15,000 shares of the capital stock of this Company.

The property consists of 325 acres valuable mineral land, twelve miles from Richmond Station, on the Grand Trunk Railroad, Canada East. The mine has been worked down to the rich copper bearing veins, and is a property of great value.

It is entirely free from debt

For full particulars apply as above, or at the office of

HENRY G. STEBBINS & SONS,
46 Exchange Place.

Where subscription books will be opened.

RICHARD DUDGEON,

MACHINIST,

24 COLUMBIA ST., NEW YORK,

WOULD respectfully inform his friends and the public that he has removed to his new Building **No. 24 Columbia Street**, where he is prepared to furnish

Hydraulic Jacks, of from 4 to 150 tons lifting power. PULLING JACKS of different sizes.

Hydraulic Presses WITH PLATENS.

Hydraulic Punches for punching iron from three-eighths to 1 inch thick. **Force Pumps** for Hydraulic Presses. Force Pumps for testing tubes, cylinders etc

STEAM CARRIAGES for good hard roads.—Squirting Oil Cans, also Danver's Patent Steam Hammer

A. WHITNEY & SONS

CAR WHEEL WORKS,

Callowhill & Sixteenth Sts.,

PHILADELPHIA, PENN.,

FURNISH CHILLED WHEELS for Cars, Trucks, and Tenders. CHILLED DRIVING WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES WHEELS and AXLES FITTED COMPLETE.

CENTRAL

Petroleum Exchange Office

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

New School of Mines.

A school of mines has been organized in this city by a portion of the faculty of Columbia College. This school is to be in connection with the college, but is to have distinct branches of studies for its students, apart from the regular college course. It will give scientific instruction in regard to minerals and the art of working mines, and will have various learned professors to preside over its several classes. Three years will constitute the period of study. The course of instruction adopted for the government of the school, is as follows:

First year—Descriptive Geometry and Graphics, General Chemistry, Rational Mechanics and Mining, Surveying, Mathematics, Analytical Geometry, Differential and Integral Calculus.

Second year—Mineralogy and Metallurgy, Mining Engineering, Analytical Chemistry, Botany and Geology.

The third year will be devoted to the completion of these studies, and during the recesses the students will visit, with one of the professors, the different machine shops and metallurgical establishments of the city and its environs, and will be required to write a report, which will be counted as equal to two weekly examinations in the account of their standing.

The degree of Mining Engineer and Bachelor of Philosophy will be conferred on those students who pass satisfactory examinations on either of the complete courses. Certificates of proficiency will be given to those who pass satisfactory examinations in any one branch. A special examination will be held for candidates for the degree of Doctor of Philosophy.

Wealth and Resources of Michigan.

The recent developments of the resources of Michigan has turned public attention to its probable future, and capitalists are already operating in various sections of the State with large confidence in enormous profits. Its people by authority of Congress while in a territorial condition, formed for themselves a State constitution in 1835, and were formally admitted into the Union in 1838. It is geographically speaking, peninsular in form, and contains an area of 56,243 square miles, or 35,995,520 acres, capable of sustaining a very large population. This in 1810 was 4,702, and in 1860 749,118. It contains 11 cities and as many villages. Detroit the chief of the former contained according to the last census 45,619 inhabitants. Grand rapids had 8,058, the remaining nine varied from 3,000 as the Sault St. Marie, to 6,213 as Adrian, so that 116,000 people are residents of its cities and towns, or more than one-seventh of its whole population.

The quantity of improved land was 3,419,861 acres, and of unimproved 3,511,581 acres. The value of the farms was returned by the assessors at $163,279,087, and of the implements used upon them $5,855,642.

The live stock consisted of 158,168 horses, 359 mules and asses, 200,635 milch cows, 65,949 working oxen, 267,683 other cattle, 1,465,477 sheep, in all of the value of $23,220,025.

The animal products were as follows: Butter 14,650,348 lbs., cheese 2,009,064 lbs., wool 4,062,858 lbs.; the value of animals slaughtered was $4,080,720, of wax and honey the product was 770,782 lbs.

The cereal crops were: 8,313,185 bushels of wheat, 494,127 of rye, 12,151,110 of Indian corn, 4,073,098 of oats, 305,914 of barley, 600,485 of buckwheat.

The tobacco crop amounted to 120,621 lbs., of hops there were raised 61,704 lbs., and of flax 3,359 lbs.

The miscellaneous crops were:

Peas and beans, bushels	182,195
Irish potatoes "	5,264,733
Sweet " "	36,285
Wine, gallons	13,733
Hay, tons	756,908
Clover seed, bushels	49,480
Grass seed "	6,555
Flax seed "	223
Maple sugar, lbs.	2,988,018
Maple molasses, gallons	384,521
Sorghum, gallons	266,500
Silk cocoons, lbs.	1,043

The orchard products were of the value of $1,187,678; those of market gardens $145,048, and of home made manufactures $143,184.

There were 2580 manufacturing establishments with a capital of $24,000,000, using $19,000,000 annually of raw material, employing upwards of 24,000 operators, and turning out fabrics of the value of $35,200,000.

The value of the principal articles of production was as follows:

Flour and meal	$8,663,288
Lumber	7,088,427
Copper ore (6,283 tons)	2,292,186
Boots and shoes	863,315
Leather	574,172
Furniture	450,028
Agricultural implements	412,192
Iron castings	383,002
Steam engines	309,082
Malt liquors (57,671 bbls.)	354,758
Spirits (251,320 gallons)	73,704
Pig iron (10,400 tons)	291,400
White fish	250,467
Printing	209,729
Woollen goods	174,398
Soap and candles	108,478

The total value of the domestic exports was 8,826,982, and of $976,179.

The American tonnage cleared was 187,142 tons, and foreign 249,709, and entered, American 172,114, and foreign 32,505.

The products of the copper mines in 1845 were

of the value of $390, and in 1860 $2,520,000. The shipping owned in the State was of the burthen, of sailing vessels, 40,241 tons, and steamers 31,-558. The vessels built in Michigan in 1860 consisted of 1 *ship*, 6 brigs, 6 schooners, 8 sloops, 8 steamers, in all about 3,000 tons.

There are very few banks in the State, in 1860 only two.

The railways are 8 in number, of 800 miles in total length, and constructed at a cost of $31,012,-399. The longest line is the Detroit and Milwaukee 180 miles long. There is but one canal in Michigan, that around the falls of Sault St. Mary, only one mile in length, yet one of the wonders of the United States. There are but two locks; these are of solid masonry, walls 25 feet high and 10 feet thick at the base. The canal is excavated in rock, is 100 feet wide and 12 feet deep. This connects Lake Superior with the lower lakes, and gives transportation to the great mineral products of that region.

The debt of the State in 1861 was $1,202,686, and until the war broke out the taxes were in process of being diminished.

Recently the manufacture of salt has been carried on at an enormous rate in the Saginaw Valley, and the product is rapidly increasing. It is also asserted that good coal has been discovered in large quantities, and is already profitably worked.

There is no doubt that Michigan is one of the most fertile and promising of the Northwestern States, and must soon take a high industrial and commercial position.

The Adirondac Company.

The Adirondac Company, 13 William street, New York, will receive proposals until the 30th inst., for $1,000,000 7 per cent. mortgage construction bonds. This is a manufacturing, land and railroad company combined. It owns 650,000 acres forest lands in the State of New York, with pine and spruce and hemlock upon it to any amount. The mineral products of the company's lands are of indisputable value. They embrace the entire Adirondac iron ore beds, extending over 100,000 acres, together with the furnaces, mills, and other works erected by former proprietors.

The iron ores of the Adirondac all belong to the magnetic oxide, and the three principal veins yield ores which, subjected to analysis, gives from 75 to 80 per cent. of pure metal. In toughness and strength this iron equals the best products of the Swedish ores. It has always commanded prices higher than those paid for imported iron.

To complete the construction of the railroad upon which has been already expended $1,500,000 it is proposed to issue three millions of construction bonds, bearing interest at 7 per cent. secured by a mortgage on the lands, railroad, and equipments of the company. The capital stock of the company is five millions, of which $3,000,000 have been issued.

The road starts from Saratoga, and is now under good way for some thirty miles. It is to extend to Ogdensburg, or a seaport on Lake Ontario.—*N. Y. Express.*

☞ Regular trains have commenced running on the Ottawa and Prescott Railway; two trains daily each way.

Interest on the Public Debt.

The Assistant Treasurers of the United States in New York, Philadelphia, Boston, etc., are now paying the coupons of the public debt falling due January 1, 1865. The interest on the registered bonds cannot be paid until the books of the Treasury are settled and schedules prepared, which probably will not be before the day named for their payment, January 1, 1865. The interest falling due at that date is as follows:

	Principal.	Interest.
Loan of 1867, 6s	$9,415,250	$282,457
Loan of 1868, 6s	8,908,342	267,250
Loan of 1874, 5s	20,000,000	500,000
Loan of 1871, 5s	7,022,000	175,550
Loan of 1881, 6s	268,392,800	8,051,784
Loan Oregon 6s	1,016,000	30,480
Loan Texas 5s	2,052,000	51,300
Total	$316,806,392	$9,358,821

The principal of the last named 5 per cent. loan will also be paid off in January, so far as the bonds presented for redemption are found to have been regularly and rightfully assigned by the State of Texas. The principal of the following loans of the United States will fall due in the course of the present and second term of the present Administration, and the Government is pledged to their payment, in gold, at maturity:

Loan of Jan. 28, 1847, due Dec. 31, 1867	$9,415,250
Loan of March 31, '49, due July 1, 1868.	8,908,342
Total	$18,323,592

People's Gold and Silver Mining Company.

The People's Gold and Silver Mining Company is situated in Amador Co., California.

The President writes that the company have met with the most extraordinary luck, having struck the great or mother vein in their gold ledge nine feet thick, for which hundreds of miners, have been searching without success. The ore is very rich; on the 30th Sept. last, 200 tons had been taken out. The company have built a fine road to the mine two miles long, have a mill and other necessary machinery, with an abundance of wood and a plentiful supply of water at the mine. The oldest miners in California say, that the company's mine bids fair to surpass the richest mines on the Pacific. The President says that the Secretary, Samuel Newell, Esq., who resides at the mine and superintends the works, is indefatigable in his exertions, working with the strictest economy and accomplishing wonders in comparison to the amount expended.

The office of the company in this city is at No. 8 Pine street.

The Reading Railroad Dividend.

The Pottsville *Miner's Journal* of 19th inst., says: "Reading Railroad stock is pushed up on the supposition that a large dividend in stock will be declared next month. Stock dividends only add to the increased liabilities of corporations, and is a very questionable policy when future permanency is taken into consideration. We know that Mr. McCalmont was decidedly opposed to this company declaring a large dividend (beyond 7 or 8 per cent.) a year ago, and unless he has changed his views since then, those who are operating on a heavy stock dividend may be disappointed. His policy was to declare moderate dividends, and use the surplus for building up the road and placing it in the most permanent condition—and besides, high dividends always invite more competition. This would seem to be the most prudent policy."

Railroad Earnings—Weekly.

The earnings of the Cleveland and Toledo Railroad for the 2d week in Nov. were ... $37,944 00
Corresponding week of previous year.. 31,714 00

Increase ... $6,230 00

The earnings of the Toledo and Wabash Railroad Company for the second week of November 1864, were ... $43,255 00
Corresponding week of previous year. 34,292 00

Increase ... $8,963 00

The following is a comparative statement of the earnings of the Chicago and Northwestern Railway for the second week of November:

	1863.	1864.
Passengers	$25,227 88	$43,774 76
Freight	74,676 52	98,905 69
Express	998 39	1,433 66
Mail	1,286 12	1,405 62
Total	$102,188 91	145,519 73

Increase 42-40 per cent. ... $43,330 82

From June 1 to November 14, 1864, (5 months and 2 weeks) the earnings were $3,254,473, against $2,172,558 in 1865—an increase of $1,081,918—or 50 per cent.

The earnings of the Michigan Central Railroad for the 2d week in Nov., 1864, were ... $88,659 88
Corresponding week of previous year.. 82,855 94

Increase ... $5,803 94

The earnings of the Chicago and Alton Railroad Company for the week ending Nov. 15, were:

	1864.	1863.
Passengers	$24,076 33	$12,174 79
Freight	46,452 69	28,371 30
Sundries	1,415 70	1,897 24
Total	$71,944 72	$42,443 33

Increase 1864 ... $29,501 39

The traffic of the Great Western Railroad for the week ending Nov. 11, 1864, was as follows:

Passengers	$24,788 46
Freight and live stock	25,520 59
Mails and sundries	1,704 01
Total	$52,013 06
Corresponding week of 1863	61,276 97
Decrease	$9,263 91

The earnings of the Marietta and Cincinnati Railroad for the 2d week in November:

	1864.	1863.
Passengers	$9,407 24	$4,244 05
Freight	10,650 80	13,063 70
Mail, express & telegraph	1,084 48	872 00
Total	$21,142 02	$18,179 75
Total this month to date	$41,984 26	$36,918 02
Total since Jan. 1	$869,954 86	$601,516 48

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Nov. 14, 1864, were:

	1864.	1863.
Passengers	$2,743 73	$1,879 31
Freight	9,480 39	7,755 71
Express	104 16	75 00
Mails	296 58	296 58
Total	$12,624 86	$10,006 60

Receipts from January 1st to Nov. 14:

1864	$512,234 47
1863	356,908 52
Increase	$155,325 95

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of November, 1864, were..... $93,211 00
Corresponding week of previous year.. 74,538 00

Increase..... $18,678 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in November, 1864, were..... $66,385 00
Corresponding week of previous year.. 48,174 00

Increase..... $18,211 00

Iron Mines of Northern New York.

Among the notable mining enterprises of the day but little mention has been made, as yet, of the extensive iron deposites which pervade the Southern borders of St. Lawrence County, N. Y. The whole area of what is called the wilderness of Northern New York, of which the South Corner of this county forms a part, is known to be intersected by two or three vast ranges of magnetic iron. So far the development of these veins has been confined to the region bordering about Lake Champlain, where, from Port Hudson to Plattsburgh, an immense business has grown up, both in the raising of ore for distribution all over the country, and the manufacture of malleable and pig-iron.

The great dependence in manufacturing the ore hitherto has been upon the forests which formerly skirted the whole Western border of the lake. But such has been the demand for charcoal to feed the numerous and increasing fires which have been started there in the gradual development of this important business, that the forests have retreated so far back as to increase the cost of the fuel upon which the iron works depend, and it is a well settled principle that the highest grades of iron, namely, those requiring the greatest tenacity, can only be made in charcoal fires. There is undoubtedly wood enough left for present uses of the works near the lake, but the added cost, both in transportation and waste, of charcoal, makes even a small difference a very important item on the cost of a ton of iron.

The most westerly of the iron ranges before alluded to in St. Lawrence County, may be termed the Clifton or Parish range. Southerly on the same vein the Clifton Iron Company have lately commenced operations. This range is about forty miles from the St. Lawrence river, and in its course appears to follow very nearly the stratification of that river. The next range easterly about 8 miles may be called the Harewood or Chaumont range, a portion of which intersecting the town of Chaumont, was examined by Prof. Emmons several years since, and favorably noticed by him in his work upon the Geology of Northern New York. There is still another great range easterly called the Oakham range, from the mountainous character of the deposit in the town of that name. These ranges have a curve nearly northeast and southwest, and lie in approximately equal distances apart.

Over the whole of this extensive region the woods are in almost their primeval state, and the country in addition to these elements of wealth, possesses unlimited water power. The attention of capitalists has been directed to this new field of mining enterprise for some time, and the Harewood Iron and Mining Company having acquired extensive grants on one of these large veins, is preparing for active operations at once.

☞ The valuation of Fall River is $11,057,645; appropriations, $135,971 23; rate of taxation $18 per thousand. The Fall River Iron Works pays a tax of $15,390.

Working Railways by Stationary Engines.

The plan of working railways by fixed engines and pipes has long been employed, the ropes being attached to the car. An improvement upon this plan, which has been proposed, is, with the ordinary construction and gauge of railway, to place in the intermediate space between a double line of rails, a series of double-grooved sheaves, fixed in spindles or axles, which pass across under the rails, extending a little over the centre of each line. A plain wheel or roller is fixed upon each end of these axles, by which the motion is communicated to the train from a stationary engine or engines, placed at a convenient point of the line, by means of an endless rope or wire, passing alternately over and under the grooved sheaves to the extremity of a section of the line, where it is taken round a large loop sheave and returned to the engine—now passing over each sheave which it before passed under, and vice versa, the double groove providing for the rope crossing itself without contact. Having traversed twice along the line of sheaves, the rope goes again on to the large winding sheave of the engine, on which a sufficient number of turns are taken to insure the requisite friction.

Columbus and Indianapolis Central R. W.

The reorganized Piqua and Columbus road—after foreclosure of old mortgages—has been consolidated with the Indiana Central road, and a direct line of 186 miles made between Columbus and Indianapolis; the new corporation retaining the branch of 20½ miles to Union on the State line, the original western terminus of the Piqua road. The original mortgages $1,300,000 of the Indiana Central road, are assured, and will be paid off at or before maturity, and after all improvements to the consolidated line, the

Funded debt will be..... $4,000,000
Capital stock..... 1,500,000

Together..... $5,500,000
Present traffic per year..... 1,078,000

—which business looks to a prospective improvement, now that the line is straightened and property equipped. Mr. B. E. Smith, of the banking house of Bartlett & Smith, of Columbus, is the President of the new corporation, known as the Columbus and Indianapolis Central Railway Company.

Valuation of Philadelphia.

The following statement of the value of Real and Personal property for 1865, has just been made out from the returns made by the Assessors to the City Commissioners:

Real estate	$155,980,917
Furniture	2,418,735
Horses and cows	533,015
Carriages	187,261
Personal	110,560
Total	$159,230,488

The assessed value of real estate in 1864, was $153,668,368, being $3,312,549, less than the assessed value for the next year. The rate of taxes for 1865 will be based upon the above statement.

☞ The State banks of Vermont present the following aggregate:—Capital, $3,834,900; decrease from last year, $81,010; circulation, $6,046,184—increase, $630,505; loans, $22,055,593—increase, $2,883,046; dividends, $403,824—increase, $125,219—mostly made out of rise in Government securities and the interest thereon; taxes to United States Government, $98,761; surplus on hand, half a million.

The Iron Interests of the United States.

It will be remembered that on the 19th of October an important meeting of the railroad iron manufacturers of the United States was held in this city, at which valuable statistics were presented, showing among other things, that the estimated capacity of railroad iron mills of this country for 1864 equals the estimated annual consumption of such iron. The meeting also considered the plan of uniting the iron interests of the country, and adjourned to meet on the 16th of this month, in the meantime inviting all iron producers to co-operate in an effort to enlighten the Government upon the legislation needed to protect at all times the great iron interests of the United States.

The meeting convened at the appointed time at the Board of Trade Rooms. There was a large attendance of the iron men of the country, particularly those of Western Pennsylvania.

After the reading of several reports from committees, one of which embodied a memorial to Congress, the meeting proceeded to revive the old American Iron Association, which, though not entirely dead in organization, has yet been wholly inactive for six or eight years. It was resolved to reorganize under the name of "The American Iron and Steel Association." This association, now brought into a live condition, and composed of the most active and influential concerns in the iron interest, bids fair to bring about a more satisfactory conclusion in reference to the settlement of our home policy than ever, and we shall look with interest for the result of their efforts.—*Philadelphia News.*

Milwaukee Grain Elevator.

The work on the great elevator of the Milwaukee and St. Paul Railway is going forward with rapid strides. The tall chimney for the engine house is already completed. It is octagonal in shape, and 135 feet high, being the highest chimney in the city. The foundation of this immense structure is laid upon one hundred piles driven well into the substratum of the Menomonee. About 100,000 bricks were used in its construction.

The work on the elevator has reached the bottom of the bins, and is going up to what might be termed the third story. The foundation for the immense engine and boiler that is to drive the machinery, is already laid. The river dock is built, and the work on the grounds well advanced. It is certain that the work will be completed in time to make shipments on the opening of navigation in the Spring. When completed this will be the largest shipping grain warehouse in the world.

The Western Extension Survey.

Mr. George Burpee has completed his survey of the route for the extension of the Railway Westward to the American frontier. The country through which the last fifteen miles is located is not so good as along other portions of the route. The surveyed line strikes to the St. Croix River at a place between what is styled Tobiguzzle and McAdam Brook. The line runs almost directly west after leaving the Oromocto River. Mr. Burpee seems to be quite sanguine that a first-class road can be constructed and equipped for even less than $28,000 a mile. Mr. B. will immediately proceed with the survey of a route for the branch line from the main trunk to Fredericton.—*St. John News.*

☞ Mr. S. C. Baldwin, having resigned his position as Superintendent of the Chicago and Milwaukee Railroad, has accepted the position of Superintendent and General Manager of the Peninsula Railroad from Bay de Noquette, to Marquette, on Lake Superior. This road is now in operation a distance of 60 miles, and will be running soon the whole distance of 93 miles.

Bridges Destroyed on Pacific (Mo.) R. R.

The following list of Bridges destroyed on the Pacific Railroad during the recent raid of the rebels is from the St. Louis *Republican*:

The four structures between Washington and Herman, namely, at Bœuf Creek, Big Berger, Little Berger, and Herman Creek are burned.

Between Herman and Jefferson City the Cole Creek, Gasconade, Bailey Creek, Osage and Moreau bridges are destroyed. These were all burned by the rebels except the Moreau bridge, which was fired through necessity by Col. Phillips, of the Seventh Missouri Cavalry. These works being heavy and expensive, many weeks must elapse before the road can again be open to Jefferson City.

West of Jefferson City, the small bridge over Grey's Creek, at Scott Station, and the one over the Lamine, at Otterville, are likewise burned.

Information has also reached the Pacific Railroad office of the burning of the large bridge over Big Blue and Rock Creek, both of which are between Kansas City and Independence.

The last-named bridge was but recently constructed, and a locomotive and railroad iron had been shipped to Kansas City by river with a view of pushing the work from the west end as well as from Warrensburg to Westward.

On the Southwest Branch the bridge over Buck Creek and the bridges over the first and second crossings of the Meramec are destroyed.

The whole amount of bridging burned on the main line is 3,402 lineal feet, and on the Southwest branch 1,020 feet, making nearly one mile in all. Depots and station houses were burned at Franklin, Grey's Summit, South Point, Washington, Miller's Landing, Herman, Osage, Lookout, California and Smithland, on the main line; and on the Southwest Branch at Moselle, St. Clair, Stanton, Sullivan, Bourbon and Cuba.

A water station and engine house and machine shop were burned at Franklin, and water stations with pumping engines at Washington, Miller's Landing, Herman, Osage, Scott, California and Lamine, on the main line; and at Moselle and Sullivan on the Southwest Branch. About forty-three freight cars were burned, and very considerable damage done to two locomotives.

Liability of Carriers.--Merchandize and Personal Luggage.--Notice.

The late case of Cahill against The London and North Western Railway Company, was an action brought against the defendant for the loss of baggage in the way of a box containing merchandize, which the plaintiff had carried with him as a passenger by the defendant's railway.

The following were the facts of the case: By their act of parliament, 9 and 10 Vict. C. CCIV. § 66, and their published notice, the London and North Western Railway Company were bound and professed to allow each passenger to take with him his ordinary luggage, not exceeding certain weights according to class, without any charge for the carriage.

The plaintiff, a passenger by the defendant's railway, who was stated in a special case to have had no knowledge of the act of parliament or the notice, brought with him as luggage a box containing only merchandize, but not exceeding in weight the limit prescribed for personal luggage.

On the box was painted in large letters the word "Glass."

No information was given by the plaintiff to the company's servants nor was any inquiry made by them, as to the contents of the box.

In an action against the company for the loss of the box, and its contents, the Court of Common Pleas held, that, inasmuch as the box contained merchandize only, and not personal luggage, there was no contract on the part of the company to carry it, and that consequently they were not liable for the loss. (vide 10 Common Bench Rep. N. S. p. 154.)

The plaintiff thereupon brought a writ of error, which was argued in the Exchequer Chamber before Cockburn, C. J., Pollock, C. B., Wightman, J., Crompton, J., Channell, B., and Wilde, B.

It was urged for the plaintiff in error, as was urged in the court below, that, as the company chose to receive the package as ordinary luggage, and there was no misrepresentation on the part of the plaintiff, they were responsible for the loss.

Cockburn, C. J. I am of opinion that the judgment of the Court of Common Pleas ought to be affirmed.

If a railway company, who by their act of parliament are bound or by their regulations profess to carry personal luggage, choose to take as ordinary luggage that which they know to be merchandize, I quite agree that it is not competent to them, in the event of a loss, to claim exemption from liability on the ground that the article consists of merchandize, and not of ordinary luggage. But, on the other hand if a passenger who knows or ought to know that he is only entitled to have his ordinary personal luggage carried free of charge chooses to carry with him merchandize, for which the company are entitled to make a charge, he cannot claim to be compensated in respect of any loss or injury by the company, to whom he has abstained from giving notice of the contents. In such a case he carries it at his own risk.

The question, therefore, comes to this, was there knowledge on the part of the company that the box which the plaintiff was carrying with him as luggage in fact contained merchandize? That which was said by Parke, B. in The Great Northern Railway Company, app., Sheppard, resp. 8 Ecch. 30. "If the plaintiff had carried these articles exposed, or had packed them in the shape of merchandize, so that the company might have known what they were, and they had chosen to treat them as personal luggage, and carry them without demanding any extra remuneration, they would have been responsible for the loss," is in perfect conformity with the view which we now take of the question.

Can we, from the facts stated in the special case, come to the conclusion that there was knowledge on the part of the company, by their servants, that this box contained merchandize? I must confess I do not see my way to that conclusion.

It is true that the package bore the semblance of a package of merchandize, and it was marked "Glass."

But many packages which do not contain merchandize are so marked in order to secure their being handled with more than ordinary caution.

It is not found in the case that the company or their servants had any knowledge on the subject, nor do I think we can assume it as a legitimate conclusion from the facts as stated.

The rest of the court concurring.

Judgment affirmed.

☞ A new track is to be built on Winnisimmet Square, Chelsea, to facilitate the travel of a dummy engine to be used on the Lynn and Boston Railroad.

Railroad Earnings--Monthly.

The earnings of the North Pennsylvania Railroad Company for the month of October, 1864 were $62,888 00
Corresponding month last year 54,569 00

Increase $8,319 00
In first 11 months $685,951 00
Same time last year 469,105 00

Increase $216,845 00

The earnings of the Rome, Watertown and Ogdensburgh Railroad for the month of October, were as follows :

	1863.	1864.
Passengers	$33,725 00	$42,485 00
Freight	40,744 00	39,195 00
Miscellaneous	1,667 00	2,266 00
Total	$76,136 00	$83,946 00
Increase 1864		$7,810 00

The earnings of the Long Island Railroad for the month of October were :

	1862.	1863.	1864.
Passengers	$16,284 68	$23,341 17	$32,964 96
Freight	8,935 13	9,276 32	17,563 29
	$25,219 81	$32,617 49	$50,528 25

The road came under control of New York management in April 1863, and was without cars or engines to do work with. The freight is largely increased and is now restricted for want of cars.

Philadelphia and Reading Railroad.

There was a moderate business in Reading Railroad shares yesterday, and now that the excitement attendant on the recent active movement in the stock is over, it may not be improper to state some facts in reference to the business of the road, and its next probable dividend. We are assured from parties in another city, who have been here in consultation with the officers of the Company, that the net profits the current year exceed 25 per cent., which, with the surplus of 15 per cent. carried from last year, give an aggregate of over 40 per cent. This the large holders at New York and Boston have urged, shall be divided in some shape, but as some of the officers of the Company thought it inequitable to divide profits nominally representing twice their value by reason of the depreciated currency, the parties at issue compromised on a basis of two for one, and with an understanding that the coming dividend will be 15 per cent. in stock and 5 per cent., or so much as there may remain of profits on the basis there named, in cash ; all profits of the Company thereafter to be divided at the designated periods, in cash. With the stock of the Company selling 88 per cent. above par, a stock dividend of 15 per cent. is equal to 20 per cent. in money, to say nothing of the 5 per cent. dividend expected in cash. These facts attest not only the productive value of the stock, as an investment, but the great importance of the Reading Railroad as a medium connecting our port with the wonderful wealth of the Anthracite coal regions.—*Phila. Ledger, Nov.* 17.

American Railroad Journal.

Saturday, November 26, 1864.

Stock Exchange and Money Market.

The rapid and evident fluctuations in the gold market have been the subject of much comment. The fall continued the whole week preceding our last issue, and the quotations were as low as 117. On Tuesday there was a slight reaction which was attributed to a demand for exportation on Wednesday. Upwards of a million was said to be engaged for the steamer of that day, the result of the engagements of the house of Rothchilds with the Bank of France, which has lately been supplied according to our advices with the sum of ten millions from that source.

No matter how much gold is shipped to London and Liverpool from the United States, it cannot be retained there, but is almost immediately re-shipped to the Continent or to Asia. If England coulp keep all the gold we have remitted her the last few years, it would gild the roofs of all the houses in England, but it cannot be retained, and its departure to distant Countries keeps her in a continual turmoil. Our advices also announce that the Bank of England has relaxed its high rate of interest, having made an abatement of one per cent. Out of Threadneedle street, the rate keeps up pretty steadily.

The rumors which have prevailed with regard to a heavy movement on Richmond, foreshadowed by the clustering of our iron fleet at the mouth of the Dutch Gap Canal, the visit of Gen. Grant to his family as if in anticipation of a contest where his own life must again be exposed, and the advance of Gen. Sherman into the heart of the enemy's country are likely to produce their effect on the market in a few days.

Besides as each transaction in gold costs the parties ⅛th per cent. for brokerage, and the interest from day to day, a heavy bonus being generally exacted by the lender, it becomes constantly a more difficult affair to contend for a rise against a falling market. We have the opinion of some of the most intelligent Brokers in the street, who are not at all speculators for their own account that the present rates cannot be sustained, and that it is the short contracts which cause these temporary reactions from a fall. Besides the Bull party is reported to be in a state of disorganization.

Railway shares are not much sought for. There has been a slight advance and a small decline in several. One cause of this inactivity on the part of capitalists is the expectation, that from the numbers of accidents happening all over the Country on the railways, they will require large outlays on the superstructure.

Railway bonds and state securities remain very quiet. On these all, the interest is regularly paid, and as investments they have unquestionably proved to be stable, and out of the reach of speculation. The statement of the associated Banks for the previous week show an

Increase in deposits	$4,771,001
" loans	1,547,833
Decrease in specie	1,052,163
" circulation	85,000

Money is called easy, but from 8 to 12 per cent. is readily paid for the discount of first class paper. The Bank of Commerce one of our most intelligently managed institutions has finally determined by a vote of its Board of Directors to accept a National organization. Its capital is ten millions of dollars, and its influence in favor of the system it has adopted will be very large.

Government stocks continue to be firm. The impression is that no more gold paying securities are to be offered to the public. This strengthens the present securities of that character. The 5-20 bonds are in demand, and the 6s of 1881 have been sold at 110¼. Exchange is not very active and brings about par in gold. Our imports are much smaller than they have been under the impression, that the fall of gold would prevent the realization of much profit, if any, on goods bought at the present premium. At the same time our exports are much larger than they have been at the same period the last year. This state of things is decidedly advantageous to the country.

A speculation with regard to the movements of Gen Sherman is just now indulged in by some

shrewd operators. It is to the following effect.

The presence of a large Union force under this accomplished officer in the heart of Georgia will give the opportunity to Gov. Brown of that State, and to Mr. Stephens the reluctant Vice President of the Confederacy, now while the Georgia legislature is in session, to bring about a repeal of the ordinance of secession, and to procure the reentry of the State into the Union. They will be safe in doing this under the protection of the Union forces. Savannah will then be opened to trade, and cotton will come into market in large quantities. The effect of this will be to break down the gold market with a terrible crash, and to take from the rebels their last hope of success.

At no period of the war has there been more unanimity of purpose in the 25 loyal States than at this moment. Party asperity if still maintained in any quarter lurks in the bosom of a very few men, whose influence is much shorn of its power by the course of events. All are agreed that the Union must and shall be restored, and those Southern States which come back earliest will be the most welcome.

Our trade and commerce will then revive and maintain a stable footing, and our relations with foreign countries, will probably have a more peaceful character than ever. This will ensure long years of financial prosperity. The public debt large as it is, may be safely set down as not likely to press upon the people with any great weight in the course of another decade, while the Government securities will be as capital of the country on which very large transactions may be safely based.

In connection with this future, we are happy to state that Mr. Dennison, the new Postmaster General, is turning his attention to the subject of using our surplus wooden steamers of war for the purpose of carrying mails and some kinds of freight, in order to revive our foreign commerce. There are no less than twenty-seven of these vessels of various burthens, as reported by the Secretary of the Navy, well adapted to this service. He furnished the last Congress with their names, and tonnage, and stated the amount of coal necessary to propel them, and the number of seamen sufficient to work them.

It has been shown in this JOURNAL where they could be best employed, what mail lines would be of the most immediate consequences, and what the result would be both to the navy, the post-office, and the merchants engaged in foreign trade. It is to be hoped that Mr. Dennison will take hold of this matter, and propose a system which will receive the sanction of Congress at its next session. What is to be done with our immense fleet when the war is over, or even before, if Wilmington and Savannah fall, would be a puzzle but for the suggestion of employing them in this business. Their employment in the manner suggested would change the whole face of our present commercial relations with foreign countries.

The aggregate value of the imports of general merchandise, other than dry goods and specie, at this port for the week ending November 19, was $1,461,315, against $2,609,950 in 1863, and $1,503,846 in 1862.

The exports from New York for the week ending November 21, were $4,845,104 against $2,309,288 n 1863, and $3,051,191 in 1862. The shipments of specie since January 1, have been $42,499,017. The exports since January 1, have been $193,394,726 against $153,633,555, in 1863, an increase of $40,161,371. The customs gold revenue at New York, specially pledged to the payment of the interest on the funded and fundable debt of the United States from January 1 to November 19, was $62,505,272.

The value of foreign goods imported into the port of Boston for the week ending November 18, was $533,091, against $632,445 for the corresponding week in 1863. The exports were $325,771 against $247,216 for the corresponding week in 1863.

The foreign exports from the port of Baltimore during the past week were valued at $143,625.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Long Island R. R., 97; Hartford and New Haven, 220; Central New Jersey R. R., 170; Michigan War Loan, 100; Georgia 6s, 65; Kentucky 6s, 100; North Carolina 6s, 60; New York State 5s, 1874, 106; Sixth Avenue R. R., 115; Brooklyn 6s, Water Loan, 114; Mariposa 1st mort., 95; Nicaragua Transit, 4; Wyoming Valley Coal, 53; Central Coal, 56; Smith Paramalee Gold, 10; Union Bank, 110; Bank of Commerce, 107; Am. Ex. Bank, 117½; Continental Bank, 98; Central National Bank, 110; 4th National Bank, 95; Bank of America, 137; Merchants Ex. Bank, 98½; Shoe and Leather Bank, 100; Phœnix Bank, 103; National Bank, 106½.

Philadelphia.—Allegheny Co. coupon 5s, 79; Reading mort. bonds, 105; Union Canal Int. bonds, 15; New Creek bonds, 85; Cleveland and Mahoning mort. 7s, 107; Huntingdon and Broad Top 7s, 100½; North Penna. scrip, 86; Chester Valley 7s, 49; West Chester 7s, 105; Phila. and Trenton R. R., 145; Ridge Avenue R. R., 15; 5th and 6th streets, 56; Union Canal, 1⅛; Densmore Oil, 7⅛; Ætna, 2¼; Hughes, 2; Blue Creek, 4; Dunkard, 2⅛; Howe's Eddy, 1¼; Olmsted, 3; Schuylkill and Oil Creek, 3; Pope Farm, 1; Hibbard, 3⅛; Cherry Run, 22; Walnut Island, 3¼; Oil Creek, 8⅝; Excelsior, 1⅞; Curtin, 15¾; St. Nicholas, 4⅞; Continental, 3¼; Bruner, 2¼; Mineral, 3; Dalzell, 9¼; Phila. and Oil Creek, 1¾; McClintock, 5⅞; McElheny, 6; Hyde Farm, 6; Hoge Island, ⅞; Upper Economy, ⅞; Noble and Delamater, 8⅜; Globe, 1½; Union Petroleum, 2¼; Story Farm, 2⅞; Perry, 4; Corn Pl., 7⅜; Big Tank, 2⅝; Seneca, 4½; Petroleum Central, 3⅞; Eldorado, 2¼; Caldwell, 5⅛; Irwin, 8½; Organic, 1¼; Egbert, 4⅝; Beacon, 1⅛; Tarr Homestead, 6½; Bull Creek, 4¼; Germania, 1⅜; Honey Brook, 6¼; Rock, 4¾; Fulton Coal, 7⅝; Green Mt., 4; Clinton Coal, 1⅞; Big Mt. The Adirondac Railroad.

A reference to our advertising columns will show the nature of the securities which the Adirondac Company is offering for sale.

We have before given to the great enterprise undertaken by this company, such notice as its magnitude deserved. Penetrating, as the railroad does, that region of vast mineral wealth embracing the northeastern portion of the State of New York, it creates for itself as it progresses, a business in travel and freights, which alone would make a respectable basis for profits; but with its completion to the St. Lawrence River, it becomes a much needed avenue to Middle Canada, and will of necessity divert over itself the business now seeking New York and Boston by circuitous and more expensive routes. With the opening of the Hoosac Tunnel, it will in fact become the great thoroughfare between the latter city and the whole Northwest.

But the security of the bonds now offered in the market, does not depend alone upon the public business of the road, ample as that will be. The Adirondac Company owns immense tracts of the rich mineral and timbered lands through which the road passes; including the great McIntyre Estate and the excellent mining works constructed by the previous owners in anticipation of this road, (which was to make their operation the source of princely revenues,) and the failure to build which, at that time, compelled the abandonment of their use, and ultimately forced their sacrifice. These works, the company will operate as soon as the road is sufficiently advanced; and owning as they do, the mines, unequalled in quality, the forests for fuel, and the road for transportation, it is not difficult to predict the nature of the profits they will produce.

It is very seldom that the public is offered a seven per cent. bond thus secured; and we have no hesitation in recommending it as an investment of the very first class.

☞ The California Circuit Court has confirmed the claim of San Francisco to four square leagues of land, embracing the site of the city and immediate adjacent territory. As every land owner derives title from the city, this decision renders them so far secure in their ownership. The case is appealed to the United States Supreme Court

☞ The total amount of National Bank currency issued to date is $62,350,390. The whole number of banks is now 568.

☞ We learn from the *U. S. R. R. and Mining Register* that the Philadelphia and Reading Railroad Company's Coal Pier at New Castle will be in readiness for use during the first week in December. This pier is for the accommodation of the winter coal trade, when the suspension of navigation on the Delaware and Raritan Canal closes the up river route to New York, leaving the down river or sea route the only open way to the Eastern markets. Hence, hereafter, in winter, if ice in the Delaware renders approach to the Richmond piers difficult to sea colliers, the Philadelphia and Reading Railroad Company's trains will continue down along the Delaware *via* Chester and Wilmington to New Castle, there to unload into sea colliers 36 miles below Richmond. This arrangement will give the Philadelphia and Reading Railroad a navigation programme available in all months of the year, and will add to its unequalled and unexampled efficiency to handle anthracite coal.

Central Pacific Railroad.

A California paper states that large contracts have been entered into to furnish provisions to the laborers on the Central Pacific Railroad, and that preparations are being made to put a very large additional force of men on the work.

St. Stephen Branch Railway.

The St. Croix *Herald* says: "A call has been made for the first instalment of ten per cent. upon the subscriptions to the stock of the St. Stephen Branch Railway. It is proposed to put the portion between Moore's Mills and the St. Andrews road, under contract immediately. Proposals are invited for the grading of the road between these points. Specifications, and all needed information can be obtained at the office of the company in St. Stephen."

Connellsville and Southern Penn. R. R.

This road will connect with the Huntingdon and Broad Top Railroad, at its terminus at Mount Dallas, 6⅛ miles east of Bedford; and a part of its plan is, we believe, to form a connection with the Western Maryland Railroad, whereby, at the same time a connection will be made with the Cumberland Valley Railroad.

☞ The following gentlemen have been unanimously elected directors of the Pacific Mail Steamship Company for the ensuing year: Messrs. Allan McLane, Howard Potter, Francis Skiddy, Charles A. Davis, William Dennistoun, Leonard W. Jerome, Elisha Riggs, Charles H. Russell, and Moses H. Grinnell.

☞ At a meeting of the directors of the Chicago and Milwaukee Railway Company held on the 2d inst., Mr. George L. Dunlap of Chicago Ill., was elected General Superintendent, and Mr. Charles C. Wheeler, of Milwaukee, Wis., was appointed Superintendent, Mr. S. C. Baldwin having resigned as Superintendent, to take a position upon the Peninsular Railroad of Michigan.

☞ During the month of October 321 boats cleared at Cumberland for Georgetown, carrying 34,749 tons of coal to market, and making a revenue for the canal of $32,839 19. The total tonnage for the year 1864 to the 1st of November, is 1,841 boats, carrying 201,490 tons of coal.

☞ The Suffolk Bank, Boston, has vo to become a National Bank.

Rutland and Burlington Railroad.

We understand that the gross earnings of this road for the year exceed six hundred thousand dollars, and that there will be enough left after meeting all expenses for the payment of two coupons.

Mt. Carmel and Lizard Creek Railroad.

We learn from the Pottsville *Miner's Journal*, that this road is received with great favor by the coal and landed interest, and about $100,000 worth of the stock is already promised by six land-holders and coal-operators. The object is to get the road under contract this winter, if possible, so as to complete it from Schuylkill Haven to Lizard Creek in the course of the ensuing year.

☞ A new census of Chicago, taken by the comptroller of that city, shows a population of 169,353—an increase of 31,167 since 1862.

☞ We understand that the New London Northern Railroad Company are to build a new bridge two hundred and thirty feet long at Three Rivers.

The Great Eastern.—Libel of a Passenger for Salvage.

UNITED STATES DISTRICT COURT—NOV. 12.

Hamilton E. Towle *vs.* The Steamship Great Eastern.—SHIPMAN, J.—On the 10th of September, 1861, the steamship Great Eastern left Liverpool for New York, with about four hundred passengers and a considerable cargo, together with about four hundred persons as officers and crew, including engineers, firemen, servants, &c. She was, as is well known, the largest ship that ever floated the sea, and was of great value. Her original cost was very large, but owing to her great draft of water and unwieldy proportions, which limited in many directions her general usefulness as an instrument of commercial enterprise, it is difficult to state her exact value at the time the events occurred upon which this suit is founded. But from the evidence before this Court, it is safe to conclude that she was at that time worth more than half a million of dollars. Beyond this, her value is not important for the purposes of this case.

Among her passengers on this voyage was the libelant in this suit.

On Thursday, the 12th of September, two days after the ship left Liverpool, and about two hundred and eighty miles west of Cape Clear, she encountered a heavy storm, which did great damage to, and finally swept away her paddle wheels and several of her boats. Her screw, or propeller, however, remained substantially uninjured, and by this she could make very good headway, when under steam.

During the evening or night of the 12th, she fell off into the trough of the sea, and rolled with such violence as to carry from side to side of the ship all the movable objects on her deck and in her cabins. Much of her furniture was broken up and destroyed, several of her crew and passengers injured, and a great part of the luggage of the latter was drenched and crushed into a mass of worthless rubbish. The immense size of the ship rendered her motions, when rolling in the trough of a heavy sea, much more dangerous and destructive than those of a ship of ordinary dimensions.

During the night it was discovered that her rudder-shaft, which was large, and of wrought iron, had been twisted off below all the points of connection with the steering gear. The ship, therefore, lay helpless in the trough of the sea, rolling heavily with every swell. Her sails were blown away in a subsequent attempt to control her movements by them, and no means were left by which her head could be brought up, and her position on the sea changed. She was as unmanageable as if her rudder had been entirely gone. The only way, therefore, to get any control of the

motions of the ship, was to secure some kind of efficient steering gear by attaching it to the rudder shaft below the point of fracture, and connecting it with the wheel. This was a work of considerable danger, and of great difficulty. It was, however, finally done, and the ship was again got under control, taken out of the trough of the sea, and steered safely back to port. The libelant claims that he devised and executed the plan of this new steering gear, and the means by which it was made available, and that the ship was thus saved from great peril chiefly through his instrumentality. To recover compensation, in the nature of salvage, for this service, he has brought this suit.

Before passing upon the questions of law which have been raised and discussed on this trial, I will state the facts which I hold to be proved by the evidence. In doing this I shall not detail the evidence further than may be necessary to enable me to state my own conclusions:

1. The ship was brought into a condition of great peril by the breaking of her rudder shaft in the afternoon, or during the night, of the 12th. In consequence of this accident she fell off into the trough of the sea and there lay in a helpless condition. The storm was very violent during Thursday night, but began to abate on Friday morning, and had, in the main, ceased on Saturday evening. But the ground swell continued and kept the ship rolling more or less until about 5 o'clock on Sunday evening, when her head was brought up, and she was started on her course. During all this time she lay drifting upon the waves; every attempt to get control of her rudder, or rig other steering apparatus, having failed. It requires no argument and little evidence beyond what the common history of the sea furnishes, to prove, that this immense and unwieldy ship, on the ocean, nearly three hundred miles from land, with eight hundred souls on board, in this disabled and helpless condition, was in great danger and exposed to numerous perils.

2. Between Friday morning and Saturday afternoon the officers of the ship had made repeated attempts to get control of her motions. It is not necessary to detail these experiments. It is sufficient to say that they all proved fruitless. Finally the chief engineer commenced unscrewing a large nut on the rudder shaft. This nut was on that part of the shaft which was below the upper deck, and in an apartment on the deck below at the stern of the ship. This apartment has been termed, in this case, the steerage deck. The rudder shaft passed up through it. On the shaft within this steerage deck was the frustrum of a ribbed iron cone, through the centre of which the shaft passed. The base of this cone rested on iron balls, the balls running in a circular groove sunk in an iron plate fastened to the deck, which constituted the floor of the apartment. The cone was fastened to the shaft firmly by appropriate means, so that they revolved together, as if one piece of iron. On the rudder shaft, at the top of the cone was a large nut, the one already referred to, which was screwed down firmly on the head of the cone. This nut it will thus be seen, kept the cone down to its proper position so that the base was made to traverse on the balls, and the cone and nut formed, together, a head or collar which contributed to support the weight of the rudder and shaft. The rudder shaft had broken off at or near the top of this nut. The last attempted experiment of the chief engineer was to unscrew this nut, with the design to secure, if possible, a tiller upon the end of the broken shaft, and thus, with the aid of the wheel in the steerage deck, to steer the ship. He had partly unscrewed the nut, though it was a work of considerable difficulty, as the nut and shaft turned by every blow of the sea on the rudder blade, when the libelant learned the fact. The latter regarded the nut as a very important means of supporting the rudder and the shaft, and looked upon its removal with alarm, on the ground that if this support were removed, it might lead to a total loss of the rudder. He communicated his fears to the Captain of the ship, and the engineer was ordered to desist. It is impossible to tell what would have been the result of this experiment had it been carried out, although by unscrewing the nut an inch the rudder fell half that distance; but it appears from the testimony of one of the witnesses that the engineer did not expect to be able to fit the tiller to the end of the broken shaft under three or four days. The Captain seemed now to have lost confidence in the chief engineer's ability to restore the control of the rudder. His own efforts had failed. Attempts had been made to secure control by winding chains round the cone on the shaft and connecting them with tackles fixed to the ship's sides, to be worked by men at each end. This failed. A spar was rigged over the stern of the ship as a temporary means of steering, and that also failed. Sails had been hoisted to change her position, but had been blown to pieces. It is evident, from the testimony, that after the captain had arrested the unscrewing of the nut, both he and his officers had exhausted their expedients for getting control of the rudder so as to steer the ship, and bring her up out of the trough of the swell. The situation of the ship and the persons on board of her, was now such as might well alarm the most accomplished and intrepid navigator, and lead him to welcome any aid which gave any hope of relief, especially when it proposed no experiments which could involve the ship in new dangers.

3. The libelant is a civil and mechanical engineer, regularly educated for his profession, and, prior to taking passage in this ship, had had considerable experience in responsible stations, both at home and abroad, where high professional skill was required. He had not been an indifferent spectator of such of the various attempts as he had seen made to get the ship under control prior to the commencement of the unscrewing of the nut. He had revolved a plan in his own mind, drawn a sketch of it, had shown it to the chief engineer, who had treated it with rudeness, which is not surprising, when we remember that in every profession men are apt to be impatient of outside interference in times of perplexity and danger. The Captain, however, having exhausted his own expedients and those of his officers, and evidently alarmed for the safety of the ship, decided that the libelant should try his. He put a sufficient number of men at his disposal, and the libelant entered upon his work. He had already matured his plan, and after ascertaining by calculations the necessary strength of the materials which he knew he could use, he felt confident that his plan was secure from danger or failure. He proceeded to the steerage deck with the men detailed to work under his directions. This was about 5 o'clock on Saturday afternoon. There is some conflict in the evidence as to who superintended the operation of screwing the nut back again; but on the whole evidence, I think the weight of it sustains the statement of Mr. Towle himself that he did.

I will not here detail the progress of the libelant's labors. It is sufficient to state that after three hours' labor, he succeeded in screwing the nut back to its place, and having obtained from the forward part of the ship an immense chain, weighing about sixty pounds to the link, which was let down into the steerage deck through a hole cut in the upper deck by his directions, he succeeded in winding round the cone on the rudder shaft a sufficient portion of this chain to constitute a cylinder or drum, and thus secured a leverage obtainable in no other way. The ends of the chain were then extended from the cylinder to two strong posts or bitts which came up through this deck. A turn was taken round each of these bitts, and the ends of the large chain were then connected with tackles fastened to the respective sides of the ship for taking up the slack and easing the strain on her wheel used immediately for steering. Smaller chains connected the wheel with the large chain before described, and the size of the shackles making the connections were arranged so that in the event of a break, it would not occur in the great chain or its lashings, but in the smaller or connecting chains or shackles. The links of the large chain composing the cylinder were lashed to each other, and to the base of the cone, by smaller chains which were passed through the holes in its base. The alternate links of the large chain, on the inner coil, sank in between the ribs of the cone, and thus tended to prevent slipping and to diminish the strain on the lashings.

The smaller chains connecting with the wheel were fastened to the large chain composing the cylinder and extending to and around the deck bitts, at a point between the bitts and the cylinder, so that, in the event of the breaking of the smaller chains, the rudder would still be held in position by the large chain, as the latter was wound round the bitts by one turn, and the ends secured to tackles fastened to the sides of the ship and manned for the purpose of taking up the slack and easing away, as the rudder shaft was turned one way or the other by the movement of the wheel.

This is a brief and general outline of the plan devised and executed by this libelant for rescuing this ship from her perilous situation. It is difficult to make the description of the arrangement clear without drawings and illustrations addressed to the eye. This arrangement was completed during Saturday night and Sunday, and at 5 o'clock P. M. on Sunday the ship was brought up to the sea and put on her course.

4. The labor of the libelant, both manual and mental, during the execution of his plan was very considerable—so much so as to reduce him at one time to a state of great exhaustion. It was attended with some danger, owing to the size of the chain, and the spanner with which the nut was screwed back. The large chain weighed sixty pounds to the link, and the spanner or wrench weighed one hundred and thirty pounds. The latter was suspended from the upper deck by ropes or chains, and used by holding it to the nut, securing it to the latter by a pin, to prevent it from slipping, and then a blow of the sea on the rudder blade drove round the shaft, and brought the nut down on the thread. As the cone turned with the shaft, the constant swell of the sea kept both in motion, which increased the difficulty of lashing the links of the large chain, and it a more or less dangerous work.

5. While the libelant was engaged in perfecting his plan for steering the ship, Captain Walker, who was in command of the Great Eastern, and his officers were also at work in connecting a large chain to the rudder, by passing it round the latter and securing it at the outer edge of the rudder blade by a shackle, and then bringing one end over the larboard and the other over the starboard quarter of the ship, and securing them on deck. The object of this arrangement was also to aid in steering the ship, by manning the ends of the chain on deck, so that the rudder could be moved either way, as either end of the chain might be hauled on. How much this contrivance was used it is difficult to determine exactly, from the evidence. I am satisfied, however, that it was greatly inferior, and subordinate, both in its use and capacities, to that arranged by the libelant in the steerage deck. That the latter was the efficient and principal means by which this great ship, with her valuable cargo and priceless freight of human lives, was saved from a condition of peril, I cannot doubt in view of the evidence. Well might Captain Walker exhibit a lively sense of gratitude toward the libelant, as the evidence discloses that he did, when the success of the latter's plan was demonstrated by trial.

In view of these facts, and the well-settled rules of law applicable to salvage claims, had the libelant fallen in with this ship thus at sea, disabled, and at the mercy of the winds and waves, and had gone from his own vessel on board of her, and rendered these services, I should feel no hesitation in pronouncing him a salvor, and entitled to a liberal reward. It is well said by Dr. Lushington, in the case of the Charlotte, (3, Wm. Rob., p. 71,) that "According to the principles which are recognized in this Court, in questions of this description, all services rendered at sea, to a vessel in danger or

distress, are salvage services. It is not necessary, I conceive, that the distress should be actual or immediate, or that the danger should be imminent and absolute; it will be sufficient if, at the time the assistance is rendered, the ship has encountered any damage or misfortune, which might possibly expose her to destruction if the service were not rendered." This doctrine has been repeatedly sanctioned by the Courts of the United States, and very recently by this tribunal. (Hennessey *vs.* The Ship Versailles, 1 Curtis, R., 355; Williamson *vs.* The Brig Alphonso, *id.*, 378; Winser *vs.* The Cornelius Grinnell, MSS.) In the case last cited Mr. Justice Curtis remarks: "It has been strongly urged that both the peril and the service were too slight to bring the case within the technical definition of salvage; but I am not of this opinion. The relief of property from an impending peril of the sea, by the voluntary exertions of those who are under no legal obligation to render assistance, and the consequent ultimate safety of the property, constitute a state of salvage. It may be a case of more or less merit, according to the degree of peril in which the property was, and the danger and difficulty of relieving it. But these circumstances affect the degree of the service, not its nature." The authorities are abundant and decisive on this point. (The Independence—2 Curtis', R., 352–353. The Reward—1 Wm. Rob., 174.)

I come now to the consideration of much the most important question in this case, and one upon which the authorities are not very numerous, and, as I view them, not decisive. The claimants insist that, even if the elements of a salvage service were otherwise found in the case, yet the libelant is precluded from salvage compensation on the ground that, during the whole period of peril and of the performance of the service rendered, he was a passenger. The very able argument of the advocate for the claimants proceeds upon the ground that the connection of the libelant with the ship as passenger was not dissolved prior to the perfosmance of the service, and that, as the relation of passenger imposed upon him the duty of aiding in the relif of the ship from the common peril in which he was involved with the rest on board, the law does not recognize him as a salvor. If this point is well taken, it is a complete answer to the libelant's claim for salvage compensation.

The principal cases relied on to support this position are the *Branston*, 2 Haggard, 8 and the *Vrede*, 1 Lushington 322. The report of the case in 2d Hagg is in these words: "This brig, homeward bound, got into distress, and a Lieutenant of the Royal Navy, a passenger on board, contributed his assistance and claimed to be remunerated. Per curiam. Where there is a common danger it is the duty of every one on board the vessel to give all the service he can, and more particularly this is the duty of one whose ordinary pursuits enable him to render most effectual service. No case has been cited where such a claim by a passenger has been established, though a passenger is not bound like a marine to remain on board, but may take the first opportunity of escaping from the ship and saving his own life. I reject the claim."

The facts in the cass of the *Vrede*, decided by Dr. Lushington, are reported as follows: "The plaintiffs were twenty emigrant passengers on board the Dutch bark *Vrede*, suing for alleged salvage services to that vessel and her cargo, after she had received damage from a collision.

The collision took place about 5 o'clock A. M., of the 27th of November, 1859, off the South Foreland, and the *Vrede* sustained great damage, and began to make water rapidly. The plaintiffs manned the pumps, and kept working them. At 7 o'clock a steamtug took the vessel in tow. The passengers continued to work the pumps, and about noon the vessel was safely brought into Ramsgate harbor. The petition alleged that the plaintiffs might have left the *Vrede* in the boats, or in the steamtug, but remained on board to work the pumps at the request of the master, and that but for their services the *Vrede* must have foundered, and been lost, with her cargo. The answer admitted the facts generally, except as to the extent of *Verde's* danger."

Dr. Lushington, after remarking that although passengers must have often rendered services at sea, yet, except the cases of the *Branston* and the *Salacia*, no claim had ever before been prosecuted in the Admiralty Court for salvage, and that this fact was sufficient to put the Court on its guard against readily allowing the claim, says: "It is true, as the counsel for the plaintiffs have urged to-day, that a pilot or master or ship's crew may sue as salvors in certain circumstances, and so I say that in certain circumstances passengers may also sue as salvors. But it is equally clear that it is only extraordinary circumstances, in the strict sense, which can justify a claim for salvage from persons so related to the ship as the first class of persons I have named. A master cannot be a salvor so long as he is performing his duties as master under his contract; nor can a marine until his contract is at an end; nor can a steamtug under a contract to tow make a title, unless, unforeseen dangers arising, she performs different services from those stipulated for in the original contract. With respect to a passenger, there is no engagement on his part to perform any service, but there is a contract between him and the shipowner, that for a certain money payment the ship shall carry him and his property to the place of destination. To a certain extent, therefore, he is bound up with the ship."

Dr. Lushington then proceeds to comment upon the case of Newman *vs.* Walters, 3. Bosanquet and Pullers R, and to distinguish the one before him from it. He says: "the circumstances are not the same or nearly the same." After considering the case of the *Florence*, 16 Jurist 572, and 20 English L. and Eq. 607, where salvage had been awarded to a mate and seaman for services rendered their own ship, by them, after they had been separated from it, he adds: "That case again is no authority to-day. I say, that in circumstances such as these, passengers could not claim as salvors. Here the passengers were never separated from the ship, and their only service consisted in pumping. They pumped first, as they themselves admit, to save their own lives and property. For such efforts in a time of common danger they were not entitled to salvage, by the authority of the *Branston*. Then the steamer comes up and takes the vessel in tow. I am of opinion that all danger then ceased, whatever danger might have been. The tug and the pilot-cutter were present; the water was smooth and the weather fine, and a harbor at no great distance. The passengers might, if they choose, have left the ship, but they remained on board and continued working at the pumps. I cannot consider the ship to have been in any danger of sinking, and I think I should be furnishing an evil example, if I encouraged suits of this description. I pronounce against the claim of the plaintiffs, but without costs."

It is obvious that the language of Dr. Lushington in this case of the *Vrede* is very guarded. There must have been a reason for this, and it is important to understand the extent to which this decision has carried the law, for I should hesitate long before I should pronounce judgment in conflict with the opinion of this eminent jurist. In order to arrive at a correct conclusion on this point, we must notice the scope of the *Branston* as an authority. The latter case is a very simple one. The report is brief, and all that appears from it is that the libelant, a Lieutenant of the Royal Navy, "contributed his assistance while the vessel in which he was a passenger was in distress." What the nature of that assistance was, or under what particular circumstances it was rendered, does not appear. I conclude that the service rendered was of the ordinary character, and consisted in assisting in working the brig in those ordinary ways well known to seamen. I can draw no other inference from the case, and upon such a state of facts, I think it very clear that any court would have rejected the claim.

In the case of the *Vrede*, the services rendered were also of the ordinary kind, and consisted solely in pumping. I understand it to be a well-known rule that passengers are bound to render all such ordinary aid to the ship when she is in distress. They are bound to man the pumps, the windlas and the ropes, and to assist in working the ship in all ways known to seamen, as far as they may be able. The line of their duty extends, at least, thus far. But the question now before this court is whether there are not extraordinary services which a passenger may render, that extend beyond the line of his duty, and which may entitle him to salvage compensation. That this question is not decided in the negative by the *Branston* or the *Vrede* I, I think, clear. It has been strenously urged on the argument, that no services that a passenger can render to avert a common danger while his relation as passenger continues, can exceed the limit of his duty. This doctrine certainly is not laid down in the *Branston* nor in the *Vrede;* for in the latter case the learned Judge, in the vital part of his opinion, is careful to say, "Here the passengers were never separated from the ship, and their only service consisted in pumping." Surely, if he intended to lay down the rule that the passengers must in all cases be first separated from the ship before they can become salvors, he would have so declared in terms. The point is so sharp and decisive as to admit of no ambiguity in the language of a judicial opinion. I include in the terms separation from the ship, both actual personal disconnection therefrom and a severance of their ordinary relation as passengers, though they may still remain on the vessel.

That there has been, for a long time a general impression, that a passenger may become a salvor by rendering extraordinary services on board of his own ship, the language of decided cases and text writers abundantly shows. I am aware that this impression can, in many instances be traced to the influence of Newman *vs.* Walters, but I think it equally true that it has derived strength from sound principles. In the case of Newman *vs.* Walters, the ship had struck on a shoal, and the captain and part of the crew had deserted her. The plaintiff took command of her and brought her safe into port. The jury gave him a verdict, and on a motion for a new trial Lord Alvanly, Ch. J., remarks: "Without entering into the distinctions respecting the duties incumbent on a passenger in particular cases, I think that if he goes beyond those duties he is entitled to a reward in the same manner as any other person. In this case the plaintiff did not act as a passenger when he took upon himself the direction of the ship; he did more than was required of him in that situation; and having saved the ship by his exertions, is entitled to retain his verdict in this action." Language substantially like this is used in various decided cases and by text writers. In several instances the doctrine is discussed and applied to cases where the capacity of a pilot to become a salvor was in question, but this stregthens the principle when applied to passengers. (Hope and others *vs.* The brig *Dido*, 2 Paine C. C. Rep. 243. Leu *vs.* The ship *Alexander*, id. 470, 471. Hoburt *vs.* Drogan, 10 Pet. Rep. 108. Abbott on shipping, p. 560; note 1 of Story and Perkins. Marvin on Wrecks and Salvage, sections 140 and 149; Le Tigre, 3 Wash. C. C. R., 567.) The learned author of Marvin on Wreck and Salvage, p. 160, remarks: "It is agreed, too, that seamen may, while their legal connection with the ship still subsists, earn salvage for services rendered to ship or cargo, exceeding the line of their duty. But there is a great difficulty in defining that line, and determining what services are within and what beyond it. No such determination can be made beforehand, and each case must be determined by its circumstances." In the Neptune Lord Stowell says: 'I will not say that in the infinite range of possible events that may happen in the intercourse of men, circumstances might not present themselves that might induce the court to open itself to their claim of a *persona standi in judicio*.'"

The authorities cited show that officers and crew, pilots and passengers may all become sal-

vors when they perform services to the ship in distress, beyond the line of their duty. The duties of passengers are much more circumscribed than those of sailors or pilots; and it would seem that all the law imposes upon them is to assist in the ordinary manual labor of working and pumping the ship, under the direction of those in command of her. If they assume extraordinary responsibilities, and devise original and independent means by which the ship is saved, after her officers have proved themselves powerless, I see no reason, and know of no authority that can prohibit them from being considered as salvors. I think it follows, from the principles laid down by the authorities.

1. That a passenger on board a ship can render salvage service to that ship when in distress at sea.

2. That in order to do this he need not be first personally disconnected from the ship; but,

3. That these services, in order to constitute him a salvor, must be of an extraordinary character and beyond the line of his duty, and not mere ordinary services, such as pumping and aiding in the working ship by usual and well-known means.

That the services of the libelant in the present case were of an unusual character cannot be denied. After the officers of the ship had exhausted their means of getting control of the rudder, he devised, and with the aid of a large number of men put under his directions by the Captain, executed a plan which, in the judgment of this court, was the efficient means of rescuing this great vessel from peril. The whole work of accomplishing this result was intrusted to him and to his directions. If it is said that he got his main idea of the plan he carried out, from witnessing an experiment of the engineer, which I doubt, still the effort of that officer had entirely failed, and was an abandoned experiment. The merit of the libelant in overcoming the obstacles which had proved insurmountable to the engineer, is, in my judgment, enhanced rather than diminished by the unsuccessful effort of the latter. That the service rendered by the libelant was a very difficult one, is proved by the fact that the able and experienced officers of this ship had failed to accomplish the result which he finally secured. They had spent two days of fruitless effort, though stimulated by motives as powerful as can be addressed to the minds of men. It required no little moral courage for this libelant to interpose to arrest the unscrewing of the nut on the rudder shaft, and then assume the responsibility of a new and different experiment, which would consume precious time, and might thus produce appalling consequences. Had he failed, the consequences to him would have been injurious and humiliating. The whole circumstances of the case are so extraordinary as to leave no doubt in my mind that the services which he performed were wholly beyond his duty as a passenger, and therefore entitle him to salvage compensation.

In fixing the amount of compensation, it must be considered that, though the service was one of conspicuous merit, and the amount of property saved large, yet the personal danger encountered by the libelant was not very great; and the only things contributed by him were personal skill and labor. He supplied no materials and risked no property, though his labors were protracted and exhausting. On the other hand, he rescued the ship from great peril by his own ingenuity, courage and skill. That the peril of the ship was great, and her position critical in the judgment of her Commander, is evident from the fact that he intrusted to this stranger a work, upon the success of which her salvation depended, and which for nearly two days had utterly baffled him and his engineers. This case is so novel a one, in all its leading features, that little light can be derived from precedents, to guide me in fixing the amount to be awarded; but I have concluded, on the whole, to allow fifteen thousand dollars. Let a decree be entered for the libelant for that amount with costs.

For libelant, Mr. G. T. Curtis and Mr. Hall; for claimants, Messrs. Evarts, Southmayd and Choate.

CENTRAL

Petroleum Exchange Office

No. 10 Pine St., NEW YORK.

WED. W. CLARKE & CO.

OUR OFFICE IS OPEN TO THE COMMERCIAL public for the purchase and sale of Petroleum lands of the oil districts of Pennsylvania, Virginia, Ohio and Michigan, and for the sale of oil stocks, many of which are paying large dividends monthly.

We now have in hand for sale stocks of the following companies:

Blood Farm Petroleum Co., N. Y., Chas. Butler, Prest.
Home Petroleum Co., N. Y., Josiah Oakes, Prest.
Tarr Farm Petroleum Co., N. Y., Jas. Wadsworth, Prest.
Central Petroleum Co., N. Y., Jas. Bishop, Prest.
American Petroleum Co., N. Y., F. C. Clark, Prest.
Oil City Petroleum Co., N. Y., D. S. Duncomb, Prest.
Michigan Central Petroleum Co, N. Y., F. Prentiss, Prest.
Penna. Petroleum Co., Phila., John S. Young, Prest.

We have centered with us $31,000,000 of capital invested in petroleum, and can supply applicants with names and general "status," of most companies now organized, and general information of the oil market, both at home and abroad.

Special attention is called to a prospectus now offered to capitalists and others of the "United Petroleum Farms Association," which combines some of the most wonderful productions of the day, paying at this moment attractive dividends, and combining a capital of $15,000,000 in this single enterprise. Subscription list opened for a few days at this office.

This enterprise with the present development, is now paying over two and a half per cent. per month, with a positive prospective increase almost fabulous.

Foreign and Domestic Commerce of the United States.

On the 12th March, 1863, the U. S. Senate by resolution ordered that the Secretary of the Treasury should cause to be prepared a "statement and general report upon the value and condition of our foreign and domestic commerce." In compliance with this resolution, Mr. Chase, the late Secretary, entrusted the task of arrangement and compilation to those eminent statists Dr. Wm. Elder of Philadelphia, James W. Taylor, Esq., of Minnesota, and Lorin Blodget, Esq., of Philadelphia, aided by a suitable number of accomplished assistants, attaches of the department. After a year's undivided labor the work was completed, and the results returned to the legislature and ordered to be printed.

Through the politeness of Mr. Blodget we have been favored with an advance copy of this important document—important whether within its own positive domain or as being the first official statement of the kind ever given to the public. We have always known that our commerce was large and ever increasing, but hitherto we have had no means to measure its width and breadth, and certainly its scope and dimensions, as exhibited by this report, more than realize our most sanguine anticipations.

It would be impossible to disclose to our readers within a reasonable space the rich statistical treasures collected and so well arranged in this volume. We have therefore concluded to present in a series of articles a complete recapitulation of its contents. In the present article we shall confine ourselves to a few general remarks on the character of the work, and in doing so give our readers a foretaste of the rich developments which are to be set before them.

The topics treated of in the report may be generally described and classified as follows:

A general exhibit of our foreign commerce, giving the tonnage employed and the values exchanged; the varying proportions of foreign and American tonnage engaged in American commerce since the year 1820, and distinguishing the transoceanic from that employed in trade with the British North American possessions, and the course of the carrying trade in five grand geographical divisions of our foreign trade, viz: Europe generally and the principal European nations specially; Asia and Africa; the West Indies, and British North America; the movements (increase and decrease) of tonnage and exchanges with the leading foreign nations; the value of the exchanges; the international movement of the precious metals; the periodic changes in the relative value of the imports from and the exports to the principal customer countries; the number, class and tonnage of vessels built in each year, with the tonnage employed in the foreign and coasting trades, and the whale, cod and mackerel fisheries respectively.

The trade and navigation of the United States with Great Britain on account of their importance are separately and very fully exhibited, using the official reports of both countries in the statements. The extent and fluctuation of this branch of our foreign commerce in the last forty years, the leading articles exchanged, the settlement of balances of trade with our customer nations, direct and indirect, and the direct exchange of commodities other than the precious metals between Great Britain and California form the subjects of sections.

The trade of the United States with Canada is also specially given, on the authority of both our own and Canadian official documents, showing the extent and character of the exchanges, the kind and value of the transit trade of the Eastern and Western States through Canada, and of the St. Lawrence to the ocean.

And lastly, a general exhibit of the steam tonnage engaged in our foreign commerce, a comparative view of the steam shipping of Great Britain, and a statement of the steam vessels engaged in American trade, entered and cleared in British ports; and to these is added an account of the steam vessels and cargoes of the Isthmus trade.

Our foreign commerce is thus given historically and analytically in sufficient detail, and in such array as to make it clear to the least intelligent.

The second division of the report is devoted to a consideration of our domestic commerce, or that between the Atlantic and Mississippi States. It embraces the quantities and values transported east and west by the great railroads of the Northern States and Canada, and the Welland, Erie and Champlain Canals, and the kind and extent of the shipping of the lakes. The compilation of this division of the work has been the most arduous portion of the work. It is well-known that no Government statistics exist regarding either the internal or coasting trade; and hence the compilers have had recourse to such other material as offered, such as the reports of States, Chambers of Commerce, carrying companies, etc., and from these have succeeded in producing one of the most interesting chapters in the volume, estimating the values of freight and cargo by well-ascertained commercial rules.

The reports of the trade between the loyal and rebel States previous to the beginning of the rebellion, are neither complete nor sufficiently reliable to serve any purpose, and the interruption of intercourse between the two sections renders the required information unattainable now; but the complete severance of business relations since 1861, has given us the east and west commerce of

the loyal States better defined and distinguished than it could have been obtained if the Mississippi River had been open to the trade of the bordering States, and has fully tested the capacity of our existing means of intercommunication and transport. The calendar year 1862 is the period selected as being the best, in all respects for the purpose of the inquiry, and this hitherto unattempted branch of our national statistics, though necessarily incomplete, and relating to a time of disturbance in our commercial affairs, nevertheless affords a most interesting view of our internal trade, and an excellent basis for the future completion of the work.

Another grand division of the report exhibits the trade of the Pacific coast of the United States, its commercial relations with Asia, the movement of gold and silver to China and India, the inland trade and communications of the Pacific States, the statistics of the population, mining and agricultural productions, and of transportation in Nevada, Utah, Colorado and Kansas, in reference to the construction and support of the Union Pacific Railroad; the late statistics of Arizona, New Mexico, Western Texas and Neosho, bearing prospectively upon a railroad from the States of the Lower Mississippi to the Gulf of California; similar statistics of Idaho, Montana and Dacotah with reference to overland communication between the great lakes and the Columbia River; the situation and prosperity of an international route passing through the Northwestern States to the Pacific coast in British Columbia; the progress of population, mineral development and mineral interests anticipated within the present century, in the several belts of the country traversed by these overland routes, and the condition and prospects of the mining interests of the basin of Lake Superior.

In addition and as a necessary illustration of the scope of the work, a new map has been prepared in which the territories are shown as they at present exist, in accordance with the latest legislation on their boundaries, and indicating the railroad routes as well as the sites of the precious metals most recently discovered, and of the points of mining enterprise occupied and about to be occupied in all the mineral regions of the territories of the United States and British America.

Taken as a whole the volume is one of the most creditable as to performance, and important as to its subjects that has ever issued from the Government press. It furnishes a proper basis for future comparisons, and as such will be valued and largely quoted by all future students of our commercial history. It equals the famous MacGregor statistics published many years ago by the British Government, both in its scope and extent of statistical illustration, and we may here express our hope that the subject may hereafter be followed up by an annual exposition, founded if possible on still more accurate data than it has been possible to obtain for the present work. The internal revenue returns will furnish much valuable information on the topics referred to, which may hereafter be employed to illustrate more definitely the subjects of the volume.

From these remarks on the contents and character of the work, it is apparent that it must furnish the texts of many economic discourses. It is the photograph representation of our interior trade; and from the rich treasures of its commercial statistics we shall hereafter draw for illustration and proof in the examination of its multiform topics.

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 21st ult. Hon. John P. Kennedy was called to the chair, and J. I. Atkinson, Esq., was appointed Secretary. The President of the company John W. Garrett Esq., presented the Thirty-sixth Annual Report, (being for the year 1862,) of which the following is a copy:

OFFICE OF THE BALTIMORE AND OHIO R. R. Co.,
BALTIMORE, Oct. 1, 1864.

At the annual meeting of the stockholders of the Baltimore and Ohio Railroad Company, held in Baltimore on the 17th of November, 1862, the President submitted the following statement, which was unanimously accepted, viz:

OFFICE OF THE BALTIMORE AND OHIO R. R. Co.,
BALTIMORE, Nov. 17th, 1862.

The stockholders of the Baltimore and Ohio Railroad Company will remember that the President and Directors of the company were unable to make the usual statement of its affairs and condition at the annual meeting, held on the 18th day of November, 1861.

Again, unhappily, the continuance of the war, involving great and repeated destruction of the works and property of the company, and frequent and present hostile occupation of important sections of the line, has precluded the President and Directors from obtaining the information which, if in their power, it would be their duty to furnish to all interested in the road.

Much effort has been made to close the business of 1861. A large aggregate of the services of the Government for that period still remains unsettled. Arrangements have recently been made under which, it is hoped, these settlements will not be much further delayed.

As soon as the revenue accounts can be adjusted, it is designed to submit a full report for that year.

The attention of all the departments of the service of the company will continue to be directed to the procurement of requisite data as to the extent of the damages, condition of the works, machinery, etc., so that as early as practicable, the report for the fiscal year, terminating 30th September, 1862, shall be presented.

During its protracted embarrassments and losses, the company has energetically maintained a most careful and economical system of management, which, in combination with its strong financial position at the commencement of its difficulties, has enabled it to meet promptly all its engagements, and to maintain its credit and the character of its securities at the highest standard.

Whenever protection has been afforded, the company has, with marked rapidity, reopened its route. The entire road was restored and worked from March 29th to May 25th, and from June 15th to 5th September last.

As indicating the vast uses and necessity to the country of this leading avenue of commerce from the Valley of the Ohio to the seaboard, it is interesting to state that, upon the reopening of the road, the company announced a large reduction of the rates of transportation from Western to Eastern cities, and notwithstanding these lessened rates as compared with those charged by the other Atlantic lines during the blockade of the Baltimore and Ohio road, the revenue of the company for the months of July and August is estimated to have exceeded $1,200,000; being the largest sum earned by the company for the same length of time since the construction of the road to the Ohio River.

In consequence of its ability to thus work for a portion of the year, over its entire line, the company was enabled to pay its usual semi-annual dividends. And it is further satisfactory to state, on behalf of the board, that it has also fully maintained the sinking fund established for the extinguishment of its funded debt. The success of that system continues to be demonstrated—the sinking funds having been increased from $1,356,371 35 on the 30th September, 1860, to $1,847,554 71 on the 30th September, 1862, exhibiting the gain for two years of $491,183 36.

These results have been realized without any payment by the Government for the losses and immense and repeated destruction of the property of the company.

The board having determined to replace the numerous wood and iron and wooden bridges which have been destroyed in the progress of the war, with iron structures of the most substantial and improved description, the material was promptly secured, and a considerable portion of the work has been successfully accomplished in the shops of the company.

For the purpose of furnishing employment to the large number of faithful workmen of the company during a period of depression, as well as to maintain its capacity for extensive and effective action when the road should be restored to its normal condition, the full forces have been retained, and have been engaged in repairing and constructing locomotives, cars and requisite machinery.

Arrangements have been made, and no efforts will be spared, again to reopen the line, whenever the opportunity is afforded, and with the repaired and newly constructed machinery, it is believed a very large business can as heretofore, be successfully transacted.

JOHN W. GARRETT, President.

Unexpected and protracted delays continued to occur in the adjustments of the accounts with the Government, and until recently, it has been out of the power of the company to close the settlements for services to a sufficient extent to enable its officers to prepare the statements requisite for the present report.

At the close of the fiscal year of 1862 the confederate forces continued in possession of a portion of the road, upon which the tracks, bridges and property of the company were generally destroyed. Much of the region between Hancock and Harper's Ferry was thus held until the 29th of December following. At the earliest practicable moment large forces commenced the work of reconstruction, which was pressed with great vigor from the east and west. On the 6th of January, 1863, the restoration of the bridges and tracks was completed, and the entire route again reopened.

Although surrounded by grave and varied difficulties, the management of the affairs of the company has been maintained upon the principles heretofore adopted, and the financial results, exhibited in the accompanying statements, in view of continued embarrassments, have again proven satisfactory.

I.—OF THE MAIN STEM.

The liabilities and assets of the company are shown in the Treasurer's statement A.

The earnings and working expenses are shown in statement B.

The gross earnings of the main stem have been $4,481,858 98, exceeding those of the preceding year $1,270,433 28, and those of the fiscal year of 1860 $559,656 04.

The expenses of working and keeping the road and machinery in repair, have amounted to $1,427,205 83, being 31.84 per cent. upon the earnings, showing a decrease of 11.47 per cent. compared with the previous year, and of 9.87 per cent. compared with the fiscal year of 1860.

For more than seven months the company was deprived of possession of important portions of its road. Such sections could not be reached by the employees of the company. A large amount of repairs, that should have been made, and the expenses of which would have legitimately attached to this fiscal year, could not be accomplished. The financial results should therefore be regarded as subject to the modifications of

necessary expenditures to restore and maintain the damaged equipment and property of the company.

Main Stem.—Comparative statement of the earnings and working expenses for the fiscal years 1860, 1861 and 1862:

	1860.	1861.	1862.
Earnings	$3,922,202 94	3,211,425 70	4,481,858 98
Working Expenses.			
General expenses	32,730 08	20,743 40	21,001 09
Losses by accid'ts, &c.	4,766 81	6,7 0 99	4,059 64
Expenses of transp'n.	480,467 26	416,537 97	436,650 22
Repairs of railway	418,529 19	485,074 19	3 1,184 10
Repairs of water sta'n	6,087 64	8,915 16	14,728 89
Repairs of depots	26,431 69	26,964 86	30,0 3 88
Repairs of bridges	305 2 69	42,612 53	140,041 53
Repairs of telegraph	2,798 75	2,5.5 73	4, 59 24
Repairs of stationary machinery	25,800 37	17,456 01	11,901 92
Watching cuts	29,421 50	22,519 90	19,018 05
Watching tunnels	1,632 60	1,2.5 50	500 70
Watching bridges	6,393 65	7,448 85	5,159 20
Pumping water	6,7 2 70	7,0 1 92	6,483 84
Repairs of locomotives	220, 94 72	13.,005 79	157,017 03
Repairs of dump cars	1,314 68	1,407 90	2,715 14
Repairs of pass'g'r cars	38,088 71	25,601 14	28,22: 25
Repairs of burden cars	151,843 31	77,.98 38	124,5:0 42
Clean'g engines & cars	32,805 25	23,23: 00	18,752 19
Contingent expenses of machinery departm't	3,437 83	1,306 96	1 825 02
Fuel	73,878 17	71,619 26	79,818 90
Preparing fuel and filling tenders	18,087 76	0,923 17	8,392 08
Total	$1,616,915 61	1,391,094 91	1,427,205 83

It is shown that the earnings, in comparison with the preceding fiscal year, have increased $1,270,433 28, and the working expenses $36,110 92, making a comparative increase of net profits of the Main Stem of $1,234,322 36. As compared with the fiscal year 1860, the increase of earnings being $559,656 04, and the decrease of working expenses $189,409 78; the increase of net profits amounts to $749,065 82.

By comparing the financial condition of the company, presented at the close of the preceding fiscal year, it will be seen that the following payments were made:

For increase of the sinking funds, exclusively by investments from the current net earnings, viz: the sinking fund:	
For the redemption of the city loans to $812,664 72, being an increase of	$49,580 27
For the redemption of the mortgage debts to $938,698 38, being an increase of	247,643 27
For the redemption of the ground rents on Camden Station $101,191 66, being an increase of	19,721 73
Showing the aggregate increase of sinking funds of	$316,945 27
For increase of real estate (purchase of square of ground bounded by Howard street and Ohio avenue, and Montgomery and York streets)	6,000 00
For additional advances to the Northwestern Virginia Railroad Company, after crediting all earnings received viz: For payment of interest and for expenditures in improving the condition of the road, &c.	148,784 84
For semi-annual cash dividend of 3 per cent. upon the capital stock on 28th May, 1862	303,399 00
For semi-annual cash dividend of 3 per cent. upon the capital stock on 30th September, 1862	391,131 00
Total	$1,165,260 11

The land occupied by the Camden Station was subject, when purchased, to ground rents which the owners declined to sell, amounting in the aggregate to $6,060 34 annually. This sum represented a capital at six per cent. of $101,003 66. The ground rent sinking fund was instituted for the purpose of purchasing these original rents when in market, or for the accumulation of an equivalent sum of principal, the interest upon which should be appropriated to the payment of the rents stated. As this sinking fund amounts to $101,191 66, its maximum has been reached, and the design of the company in establishing it has been fully accomplished.

The balance of cash in the Treasury on the 30th September, 1862, was $21,181 86, after deducting $165,000 for payment of interest on the city loan, and the bonds of the company which matured on the 1st of October, 1862.

II.—Of the Washington Branch.

The financial condition of the Washington Branch is shown by the statements of the Treasurer, D, E and F.

It will be seen by statement E, that the earnings for the year amounted to $778,416 67, showing an increase of $340,276 98 compared with the previous year.

The expenditures charged amount to $153,827 75, being for improvements, repairs of depots, bridges, water stations and railway, and for pumping water.

As stated in the last annual report, a system was adopted by the Board by which the "earnings are equitably divided, upon a basis requiring all the expenses connected with transportation, the use and repair of machinery, and of the shops and stations of the company in Baltimore, to be paid by the Main Stem—the expenses of the road department alone being charged to this road."

During this year large expenditures were made which are embraced in this statement, for the construction of additional tracks and slidings, the locations of which are furnished in the report of the master of the road.

A valuable improvement was also constructed near the Relay House, by which a convenient connection has been formed, so that engines with full trains pass through without delay between the Washington Branch and the Main Stem, thus facilitating transportation between Washington and the West.

The partial expenditures charged, deducted from the revenue stated, produced the net sum of $624,588 92, showing an increased comparative gain, over the preceding year, of $302,864 57. The increased business upon this line required further extensive permanent improvements, which it was determined to prosecute as rapidly as the labor and materials could be obtained.

A dividend of 4½ per cent. was paid on the 31st October, 1861, for the half year terminating September 30th, 1861, and similar semi-annual dividends on the 21st May and on the 30th September, for the respective periods in 1862.

III.—Of the Northwestern Virginia Railroad.

Statement G of the Treasurer shows that the earnings of this road for the fiscal year amounted to $464,022 19, and the working expenses to $266,670 77.

The exhibit is accompanied by the remark that "in consequence of the incomplete condition of this road, considerable sums, which from the difficulty of accurate adjustment, appear in the statement charged as repairs, properly belong to construction," thus explaining the large ratio of working expenses.

The earnings were $13,490 46 greater than for the preceding year, whilst the expenses were diminished $43,251 37, making an increased comparative gain of $56,741 83.

The ratio of working expenses to the earnings was for 1858, 102.12; for 1859, 82.55; for 1860, 72.28; for 1861, 88.41, and for 1862, 73.25 per cent.

General Remarks.

The aggregate earnings, working expenses and net results of the Main Stem, Washington Branch, and Northwestern Virginia road for the fiscal year have been, viz:

	Gross Earnings.	Expenses.	Net Earn'gs.
Main Stem	$4,481,858 98	$1,427,205 83	$3,054,6 3 15
Washington Br.	778,416 67	153 827 75	624,588 92
N. W. Va. R. R.	364,022 19	266,6:0 77	97,361 42
Total	$5,624,297 84	$1,847,704 35	$3,776,563 49

The reports appended from the Treasury, transportation, road and machinery departments, embrace much interesting information. To these the Board desire to call special attention, as exhibiting the particulars of the destruction of the tracks, bridges, machinery and other property of the company, the restoration thereof as far as effected, and the statistics and details of the working operations of the road.

During the year 129,889 cross ties were placed in the track, and 4,691 tons of rails were used relaying 49.9 miles of the Main Stem with new iron. All parts of the line not in possession of the enemy were maintained in safe working order. Very gratifying evidence has been furnished of the reliable condition of the machinery, and of all portions of the track within the control of the company, by continued remarkable exemption from accidents, and the general safety and success with which the large transportation of passengers and freight has been conducted.

The Board again perform an agreeable duty in tendering their acknowledgments to the officers and men of each department of the service for the skill, fidelity, persistent energy and unflinching courage with which, whilst continuing to encounter extraordinary difficulties, embarrassments and dangers, the business of the company has been performed and its interests protected. By order of the Board.

John W. Garrett, President.

After the reading of the report, no other business being presented, the meeting of the stockholders adjourned for the election of directors, to serve for the ensuing twelve months.

Messrs. Johns P. Kennedy, Wm. J. Albert and Miles White acted as judges, and the following ticket was unanimously re-elected by a vote of 28,924 shares:

John Hopkins, Samuel W. Smith, Francis Burns, Wm. A. Hack, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, James Harvey, Wm. Heald, Galloway Cheston, Wm. W. Taylor and Samuel Kirby.

At a subsequent meeting of the Board of Directors, John W. Garrett, Esq., was unanimously re-elected President of the company for the ensuing year.

Atlantic and Great Western Railway.—Buffalo Extension.

The contract for the construction of the "Buffalo Extension" of the Atlantic and Great Western Railway has been let to Messrs. Beachell & Ellis. The following is a description of the route:

Beginning at Randolph, a point on the Atlantic and Great Western Railway, 18 miles west of Salamanca, and passing through Napoli, Pigeon Valley, New Albion, Kelley's Summit, crossing the Erie Railway three miles North of Little Valley; through the village of Waverly; crossing the Cattaraugus Creek at the Lower Crossing, on a bridge 1,000 feet long and 300 feet high; through Collins Centre, a little west of Shirley; through Eden Centre, Water Valley, White's Corners, Big Tree Corners; cross Plank Road north of White's Corners; leaving it on the North; cross Buffalo Creek, near the Red Jacket Hotel; making a circuit of Buffalo, crossing Main Street at W. R. Coppock's, and terminating at Black Rock.

The road will be sixty-five miles long, and is all under contract to be completed in one year. A cut of 65 feet in length will be necessary near Cattaraugus Creek, requiring the removal of 250,000 yards of earth.

☞ Notices are published of applications to the New Jersey Legislature for authority to construct a steam railroad from Newark to the Hudson River; to build a horse railroad between the same points, with authority to use a dummy engine; and to authorize a horse railroad from Newark to South Orange.

Northern Central Railway.

The opening of the Philadelphia and Erie Railroad, extending from Sunbury to Erie, has given the city of Baltimore an unbroken line to Erie, and also to the lakes, passing through the great oil region of Pennsylvania. The Northern Central Company has also complete lines to Elmira, thence to Buffalo, and to all parts of Western and Central New York, and is now pouring a large trade into the lap of Baltimore. The company are now running through trains between Baltimore and Erie, Elmira and Pittsburg, whilst local trains on the line have increased to a great extent to meet the demands of the rapidly growing local trade. The business of the road has rendered it necessary to enlarge the accommodations at the Calvert Station, Baltimore, and a building is now in course of construction which when completed, will be one of the largest and most magnificent of the kind in the city. The company has built during the present year, and are now erecting many other large buildings, among which may be enumerated new engine houses and machine shops at Bolton and Marysville, and new car and repair shops at York.

The Northern Central Railway Company has, during the past two years, entirely rebuilt their road from Baltimore to Sunbury, renewing the rails and cross-ties, ballasting with broken stone ballast, and the entire road is represented as being in a much better condition than at any other former period of its existence. A double track has been laid between Baltimore and Cockeysville, which is now in daily use, and which is being rapidly extended to the borough of York, fifty-seven miles from Baltimore, the grading and ballasting being nearly completed, and the laying of the rails already commenced. The double track from Duphin to Sunbury, forty-five miles, rendered necessary by the recent opening of the Philadelphia and Erie Railroad, is also under contract, and is being pushed towards completion as rapidly as a work of such magnitude can be.

The rebel raids upon this railway in 1863 and 1864 destroyed thirty-four bridges, all of which have been rebuilt in the most substantial manner. The bridge over the Susquehanna, at Dauphin, three-fourths of a mile in length, is at present being entirely renewed with a superstructure of the most approved kind, and nearly all the timber bridges on the road have been replaced by permanent structures of iron and stone. The improvements made by the company during the past year have been indeed very extensive, and yet all has been done so quietly as to attract but little attention.

Philadelphia and Erie Railroad.

Wm. G. Moorehead, Esq., has resigned the position of President of the Philadelphia and Erie Railroad, and Edward F. Gay, Esq., who has long occupied the place of Vice President has been elected to fill the balance of the term. It may be mentioned in this connection that the traffic already thrown upon this new road is exceeding vastly the expectations of its most sanguine friends. More business is offered by far that the present facilities of the road can accommodate. Extensive preparations are being made at Erie for a line of steam propellers from that point to Chicago, thus bringing to this road its share of the immense lake trade. Energetic movements are on foot for the completion of the Warren and Franklin Railroad, which will bring to this road the oil trade of the Alleghany River and of Oil City. With a most commendable foresight, the control of the Oil Creek Railroad has been secured, and the present wide gauge will soon be changed to correspond with the track of the Philadelphia and Erie road, so as to give an unbroken uniform track from this city to the very centre of the oil producing region below Titusville. Oil will then be loaded upon the cars of this road at the wells, and brought to the wharves of Philadelphia without change or handling. Then this immense oil trade, which has heretofore been carried by the Erie Railroad to New York, will be largely thrown upon this new and highly favorable channel, giving to the road probably not less than 2000 barrels of oil per day for transportation. Some idea may be formed of the value and magnitude of this trade from the fact that the net earnings of the Oil Creek Railroad, a little road, only twenty-one miles long, for the past three months, amount to over two hundred thousand dollars. What may we not expect from the Philadelphia and Erie, when in addition to the heavy Lake trade and its already large local traffic, the vast business of the oil carrying is thrown upon it. The coal trade, it may be added, will form no inconsiderable feature in the operations of this road. Already two roads are in progress connecting the coal fields with the Philadelphia and Erie, and others are projected. There is unquestionable an encouraging future before this road. A consolidation of its stock with that of the Pennsylvania Railroad is spoken of, and the terms of such an arrangement are discussed. A double track first-class railroad from Philadelphia to Erie may be considered among the probabilities at no distant day.—*Phila. Ledger.*

☞ The extensive Coal Piers at New Castle, Del., for the use of the Philadelphia and Reading Railroad, are, we understand, nearly completed. These piers will be of great service in the shipment of coal. As there is a double track on the Baltimore road, large quantities of coal may be shipped by this route without interfering with the regular trade of the road.

Mt. Carmel and Lizard Creek Railroad.

REPORT OF THE COMMITTEE.

To all concerned in the prosperity of the First and Second Coal Fields of Pennsylvania, and in the lines of Canals and Railroads which transport the Coal therefrom.

The undersigned were appointed a committee at a public meeting held in Pottsville, Saturday, October 29th, 1864, to address you upon the advantages and necessity for a direct outlet for the Coal of these Coal Fields to some harbor at or near New York. The meeting by which we were appointed was one called of citizens of Schuylkill, Northumberland, Dauphin, and Columbia counties, and having especial reference to the construction of the proposed Railroad of the New York and Middle Coal Field Railroad and Coal Company. This Company has adopted as the line for their road from Mt. Carmel in Northumberland County, *via* Schuylkill Haven, to the mouth of Lizard Creek in the Lehigh Valley, about twenty miles above Allentown. A road over this line we believe will furnish the shortest, best, and most direct communication with New York of any route that has been suggested.

The respective distances by the line proposed by this Company, are, viz:

	Miles.
Mt. Carmel to Schuylkill Haven	22
Schuylkill Haven to Lizard Creek	30½
Total length of Road	52½
From Lizard Creek to Easton, the distance is.	87
Thence to Elizabethport *via* the New Jersey Central	64
From Easton to Hoboken *via* the Morris and Essex	78
Making the total distance from Mt. Carmel to Elizabethport	153
And to Jersey City	165
And from Mount Carmel to Hoboken	168

The route of the Road proposed to be constructed from Mt. Carmel to within five miles of Schuylkill Haven is through Coal Lands, and is so located as to be entitled by present lateral roads, or such as this Company may construct, to reach nearly all the Coal Mines of the First and Second Coal Fields. From Schuylkill Haven to Lizard Creek this Company has adopted the line of road partially built by the Schuylkill Haven and Lehigh River Railroad Company, and which has a grade of twenty feet per mile to overcome the summit between the valleys of the Schuylkill and Lehigh, and that for only a very short distance. On this partially built road over $100,000 were expended by the Schuylkill Haven and Lehigh River Railroad Company, but the Philadelphia and Reading Railroad Company in the manner and for the reasons we will hereafter state, caused this road to be abandoned, and since then the time limited by law for its construction has expired.

The New York and Middle Coal Field Railroad and Coal Company we believe is the only company that possesses the necessary authority from the Legislature to construct a Railroad to connect these Coal Fields with the waters at or near New York.

The question we propose for your consideration is, will you unite your capital and build this road?

We urge you to do so chiefly for these reasons:

1st. Because such road will be a good investment for your capital.

2d. Because it will make the last link that will complete the chain of roads for the shortest and best through route from the waters of Lake Erie to those of Philadelphia and New York, and will afford the opportunity to these lines to secure abundant back freight of Coal to the West upon trucks bringing produce from the West to the East.

3d. The construction of this road is a vital necessity to save the investments in the Coal business of so much of these Coal Fields as is now monopolized by the Philadelphia and Reading Railroad Company.

Upon the first point it is only necessary to refer you to the fact that Coal railroads have nearly always proved good investments. The local roads in Schuylkill County have earned large dividends, and the stock in the principal part of them has generally ruled considerably above par. The Lehigh Valley Railroad—a Coal road—while doing only a fair competing business with the Lehigh Navigation Company, and other rival transportation lines, has been one of the most profitable roads to its owners in the country. It cannot be doubted but that the road proposed will not only almost immediately—from the time of its completion—carry more Coal in a given time than has heretofore been carried on the Lehigh Valley Road, but that for travel, back freight, and general traffic, it will far exceed any business which the Lehigh Valley Road has done, or which—except from its prospect of a connection with this road—it could be reasonably expected it would hereafter do.

Upon the second point it is only necessary to refer you to the fact that the distance from Mt. Carmel to Schuylkill Haven by the proposed route of this road is but 22 miles, and from there to Lizard Creek it is but 30½ miles further to enable you to see that it must make a through link with the Philadelphia and Erie Railroad *via* the Shamokin Valley Road Mt. Carmel, either by way of the Philadelphia and Reading Road, or with the North Pennsylvania Road to Philadelphia, as well as by way of the roads now and hereafter to be constructed in the Lehigh Valley, and either the Morris and Essex, or the Jersey Central Railroads to New York. Besides the disadvantages of a connexion between Mt. Carmel and Schuylkill Haven, over the numerous inclined planes of the Mine Hill Railroad, this road is the shorter one even to Schuylkill Haven.

As early as 1852 a committee of the City Councils of Philadelphia, appointed to enquire into the subject, reported the Anthracite Coal consumption reaching the Western lakes, to exceed 200,000 tons per annum. Since then it has largely increased, and is to-day not less than at the rate of 1,000,000 tons per annum. The Philadelphia and Erie Railroad may, through the construction of the proposed road we advocate, carry almost the entire

of this tonnage. The trucks from the West to the East, bearing Lumber, Coal Oil, Bituminous Coal, and other products, must for the most part go back empty unless they take as they readily can, Anthracite Coal as return freight. As back freight the cost of transportation above the cost of transporting the empty cars will be so light that the Philadelphia and Erie can afford to carry this Coal at a good profit, but at considerable less rate than any other great through lines from the West to the East. In reference to this through connexion and back freight, we assume therefore that the Pennsylvania Central, the Philadelphia and Erie, and Shamokin Valley Roads, will be greatly benefitted by the construction of this proposed link. To the Lehigh Valley Railroad, or any other that may hereafter be constructed in that valley, and to roads crossing the State of New Jersey, not only do these advantages of the through-route apply but we are incapable of estimating the vast Coal tonnage that a connexion with the two principal Anthracite Coal Basins of this State will bring to them.

We desire especially to call the attention of the land-owning and mining interests of nearly all of the First Coal Field, and much of the Second, to the vital necessity there is for extricating themselves from the thraldom the Philadelphia and Reading Railroad Company is preparing for them. These preparations are nearly complete, and when so and without another outlet, that Company will substantially own, all your investments, and without paying for them. The value of these investments will be destroyed, and you will be in the state of vassalage and dependence that the like interest in the Lackawanna and upper portion of the Wyoming Coal Fields are now.

The Philadelphia and Reading Railroad Company inaugurated its policy of controlling the Coal Trade from these Coal Regions when it commenced leasing and buying up our local roads.—Gradually it has thus secured by lease or purchase the following which traverse these regions, viz.: The Lorberry Creek Railroad, the Swatara Railroad, the Mine Hill and Schuylkill Haven Railroad, the Mount Carbon Railroad, the Mount Carbon and Port Carbon Railroad, the Mill Creek Railroad, the Schuylkill Valley Railroad, the Little Schuylkill Railroad, the East Mahanoy Railroad, and the Mahanoy and Broad Mountain Railroad. Through the control of these roads, and by a contract entered into with the Schuylkill Navigation Co., it has effectually bound up the latter Company, if not in its interest, at least beyond its control, so as effectually to take away the rivalry of that Company as a competing line of transportation. Thus the Philadelphia and Reading Railroad monopolizes the Coal Trade of the region traversed by the local roads before mentioned. This Company claims that it is unrestrained in its power to charge for transportation, and the present season has raised the price of transportation to $3 50 per ton, as against less than $1 00 in 1861. Suppose this Company should next year choose to add $2 00 more, making $5 50 per ton for transporting Coal from Mount Carmel to Philadelphia, what power have the land owning and coal mining interests in this region now to prevent it? Without a rival and without legal restraint, what is there to induce this Company to allow the land owning and mining interests here a portion of those profits which it has the power to take for itself?

We make no especial reflections upon any who manage this corporation, when we say that as certain as capital will always seek the greatest profit, so certain will this corporation do so! We perceive the intention of this corporation to do so in the advance already of $2 50 per ton above the charge in 1861. We perceive it in the high prices it has paid to control the local roads before mentioned. We perceive it in the fact that this corporation brought up the control of the Auburn and Allentown Railroad and the Schuylkill Haven and Lehigh River Railroad at a cost of over $400,000, and then abandoned all further work on these roads—a course of policy that utterly ignored and contemned the interests of the public, for whose benefit the Legislature had authorized these roads to be constructed. It was, besides, a positive, especial wrong inflicted upon the land owners, whose land had been taken and spoiled by the partial construction of the road, and yet who settled or released their damages, upon the consideration of the "advantages as well as disadvantages" of the finished road. The interests of the public and these special private rights were, however, made to yield to the interests which the Managers of the Philadelphia and Reading Railroad intended to build up by their contemplated monopoly.

If further evidence of the determination of the Philadelphia and Reading Railroad Company to appropriate through this monopoly the landowning and mining interests of this region to their own use is wanting, it is to be found in what has already been done by other companies in the Lackawanna and Wyoming Regions under analagous circumstances.

Take, for example, the interests on the Lackawanna. The Delaware, Lackawanna and Western Railroad Company monopolizes the road and transportation thereon from Scranton to the Delaware Water Gap. This Company so monopolizes the transportation, that producers of Coal to be sent by this route have no choice but to sell their Coal to this Company.

In the years 1858, '59, '60 and '61, the average price received for Coal prepared for market at Scranton was from 70 to 85 cents per ton. In 1862 the price was from 80 cents to $1 per ton.—In 1863 from 90 cents to $1 40 per ton, and for the present year, 1864, as high as $2 50 has been paid; but recently this Railroad Company has ordered the price to be reduced 50 cents per ton, and accordingly the average price is now $2 per ton.—Out of these prices the miner was obliged to pay the cost of mining and preparing the Coal for market and the rent to the land owners, which latter, however, was proportionately low, as the land owners, as well as laborers, were obliged to share with the producer in his very narrow margin for profit.

The public were in no way benefitted by these starving prices paid by this Company for Coal, as the prices it received, as per the report of its public sales, must have enabled this Company to receive as much as $7 per ton for transportation and profits on the Coal from Scranton to Elizabethport. The prices paid by this Company for Coal were, in most instances, less than it would have cost the Company had they owned the lands and improvements, and mind the Coal themselves.

Thus this Company as effectually owns the lands and improvements there, for all the purposes of profit, as if deeds conveying the title in fee simple were made and delivered to them. Thus the land-owner and producer are in effect but trustees and managers of their lands and mining operations for the use of this Company, and thus it will soon be with the land-owning and mining interests of the portions of the First and Second Coal Fields before mentioned, if we do not defeat the thraldom the Philadelphia and Reading Railroad Company is so adroitly seeking to impose upon us. Our people have already had some foretaste of this in the arbitary discrimination exercised by this Company in this distribution of cars, and in its order reducing the price of Coal to Government contractors, whereby the contractors, but not the Government, were benefitted—an order reducing prices that this Company has as much power to enforce, for all purposes, as for this one purpose.

We perceive but one sure way to avert this thraldom, and that is to take advantage of the authority already conferred on the New York and Middle Coal Field and Railroad Company to build their road. We are assured that if the people of these Regions will show an earnest effort to contribute, the necessary means can be raised. The interests involved are great, the issue is vital to these interests, and we cannot doubt but you will protect them.

We are assured that this Company will faithfully and energetically go on to the full completion of this road. It may be under the control of the subscribers to the Railroad stock, so as to give full assurance of the completion and successful making of the road.

New Orleans—Statistics of 1864.

The following is a recapitulation of the assessments of the twelve districts of New Orleans, from the last lists of 1864, in possession of the Secretary of the Board of Supervisors of Assessments:

Value of real estate, $86,161,045; decrease since 1863, $253,815. Income, $711,470; increase since 1863, $359,470. Furniture, $1,032,325; decrease since 1863, $236,125. Horses, cows and carriages, $506,655; decrease since 1863, $78,225. Stocks in vessels and corporations, $95,800; increase, $15,000. Merchandise, capital and money at interest, $14,383,030; increase, $2,714,822. Grand total $103,395,325. Grand total of increase of all kinds of property since 1863, $2,526,227.

☞ The Philadelphia *Ledger* is informed, semi-officially, that "the Schuylkill Navigation Company contemplate six per cent. dividends at the next dividend period on all their shares—common as well as preferred; the exhibit of the company for the current year warranting such large dividends with a very handsome surplus. This, in the present condition of the coal trade, and an easy money market, will naturally tell on the prices of the shares, but especially on the preferred, which may now be rated among the regular dividend-paying stocks."

☞ The Massachusetts Legislature will be petitioned this winter for privilege to construct a railroad from Stafford or Rockville in that State to Springfield. The enterprise has been talked of for several years. The advantages of the connection which would be thus made, would be principally the establishment of a more direct line between New London and Montreal, and between Providence and Springfield. Stafford is on the New London Railroad and Rockville on a branch of the Providence Railroad, which two cross at Willimantic. Each is distant about seventeen miles from Springfield.

☞ A special meeting of the Stockholders of the New York and Boston Railroad Company, will be held in Woonsocket, Rhode Island, on the 15th of December, to act upon the question of uniting the Corporation with the Boston, Hartford and Erie Railroad Company, and of leasing the property of the Corporation to the latter Company.

☞ The earnings of the Cincinnati, Hamilton and Dayton Railroad Company for the six months ending September 30, 1864, were $589,168 10, being an increase over the corresponding period of the previous year of $90,681 06.

The earnings of the Dayton and Michigan Railroad during the same time were $586,821 05, an increase of $179,077 29.
